- Control the decay envelope of the reverb tail from non-linear gating to a more natural linear slopes.
- Early Reflections and reverb tail’s output level have a range of 0.0 to Off
- The Wet/Dry fader controls the balance, from 0 to 100%, between the dry and wet signals
- Low Frequency Shelving EQ has a frequency range of 16 to 1600 Hz with a variable gain of -24.0 dB (low cut filter) to +12 dB
- High Frequency Shelving EQ has a frequency range of 1k to 21 kHz with a variable gain of -24.0 dB (high cut filter) to +12 dB
- Control the “knee” of where the LF damping begins (16 to 1600 Hz) and where the HF damping begins (1000 to 2100 Hz)
- Control the progressive frequency response of the reverb’s low or high range with a multiplication factor of 0.10 to 2.00
The Ultimate Sound Design Tool Kit

Retaining the sonic excellence that Waves plug-ins are known for, Pro-FX are potent and innovative implementations of classic (and new) effects including emulation of vintage analog devices and effects possible only in the digital domain.

The Pro-FX Bundle includes the UltraPitch, a 6 voice formant-corrected pitch shifter; the SuperTap, a 6 voice multi-tap delay for effortless rhythmic repeats and doubling; the MetaFlanger for vintage tape-flanging and phase emulation; and MondoMod, a unique combination of AM, FM and Rotation (panning) modulations. Each plug-in uses Waves’ proprietary digital signal processing algorithms, with 56-bit audio math on TDM systems.

**UltraPitch**
Formant-corrected pitch shifter with 6 voices that creates huge and thick stereo chorusing, doubling, parallel harmonies and vocal slap/spread effects. It also creates excellent gender-bending effects. Independent stereo panning and delay for each voice. An animator delay-randomizer sets the pitchshift by musical intervals (with 5 cent resolution). Includes manual formant mapping as well as presets.

**MondoMod**
Combines AM (level), FM (frequency), and stereo rotation (panning) into a single modulator, with built-in LFO and the ability to modulate from a sidechain source. It is able to create bizarre and unexpected effects, both destructive and subtle.

**Enigma**
Combination of a new-technology “notchbox”, a feedback circuit with filtering, and a modulator, but as the name implies, has plenty of mysterious and creative corners for designers to explore.

**SuperTap**
Six taps of mono or true stereo delay (up to 6 seconds) with global LFO modulation, 2 feedback modes, Q10-style filtering for each tap as well as rotation (stereo panning). Delays are adjustable in milliseconds and note values and you can tap out delay times or patterns using the Tap Pad.

UltraPitch provides up to 6 voices of formant corrected pitch shifting each with independent level, pan and delay control for each voice. It allows you to raise or lower the pitch, of each voice, up or down one octave by semitone or with 5 cent resolution. Variable formant-corrected pitch shifting prevents chipmunk effects and is excellent for gender bending. With fast pitch detection and completely variable stereo panning and rotation for each output, UltraPitch can create huge and thick stereo chorusing, doubling, parallel harmonies, slapback effects and more. Includes three separate component plug-ins; single voice, 3-voice harmony maker and 6-voice harmony maker, that can be used in either mono or stereo.
MetaFlanger

MetaFlanger is a plug-in for creating unlimited flanging, phaser and chorusing effects including classic tape flanging effects and other mutations of vintage modulation effects. It can emulate traditional analog flangers, fill out a simple sound, create intricate harmonic textures and even generate small rough reverbs and effects. The Filter section allows you to affect only the upper or lower frequency ranges, while phase inversion allows even greater, more dynamic effects control. Has an extensive library of factory presets.

Mix, Feedback & Filter Controls

- Mix control sets the Wet/Dry balance with a range from 0% (Dry) to 100% (Wet)
- Invert the phase of the wet signal creating an increased boost or cancellation of frequencies depending on the flanger’s corresponding depth and delay settings
- The Feedback control, adjustable from 0 to 100% sets the amount of wet signal is feedback to the input. A higher feedback percentage increases the intensity of the effect
- Inv Feedback button adds even more tension and uniqueness to an effect
- Apply flanging effects to selected high or low frequencies
- Toggle between a low or high pass filter
- Sets the corner frequency for the selected filter within a range of 0.1 to 20.0 kHz.

Delay, Rate and Depth Controls

- Delay control is settable from 0 to 50.0ms in 0.1ms increments. The amount of delay dictates the type of modulation effect achieved:
  - 0.1 - 0.5ms is ideal for phaser type effects
  - 0.5 - 3ms for flanging
  - 3 - 50ms for chorusing effects.
- The Delay control combines with Rate and Depth to alter the sweep of the modulator.
- Adjust the LFO waveform frequency from 0 to 20Hz in 0.1Hz steps. The LFO rate controls the speed at which the delay time will vary.
- Vary the delay time of the wet signal, from 0 to 100%, creating a slight pitch shift
- Control Rate and Depth simultaneously, maintaining a constant ratio between them
- Tape button provides true tape-flanging emula- tion by causing the dry audio to be delayed equal to the wet delay.

Waveform, Modulation Display and Stereo Controls

- Waveform button selects either a Sine wave with a continuous variation from the highest to lowest pitch or Triangle LFO wave modulation which only has two pitches
- Modulation display shows you graphically how the LFO parameters dynamically change when you alter the Rate and Depth settings
- The Stop button “freezes” the modulator wherever it is when you click it
- Stereo control sets the phase between left and right LFO’s between 0 to 180º. When set to 180º, the Left side is flanging down while the Right side is flanging up
- Gain fader (+12.0dB) in 0.1 dB increments
- A Numerical Peak-level display shows the exact level to one decimal place
Doppler

Doppler is the effect heard when a sound source, such as a car or train, passes by, and the pitch changes. Pitch sounds higher as the sound approaches, and sounds lower as it goes away. Easy to operate, Waves' Doppler processor lets you create realistic and unusual Doppler effects with full control over pitch, path curve and high frequency damping, gain, reverb and start/stop points. Waves' Doppler is based “on reality”—some controls behave according to the laws of physics (air damping, gain hanging with distance). However you can set the values of Doppler to work well outside those laws; it is said there is reality, and there is “Hollywood”, when it comes to effects and the appropriate perception of them. Sometimes what an audience would expect is not based on the laws of physics at all!

SuperTap Multi-Tap Delay

SuperTap is a six-tap delay with up to six seconds of mono or true stereo delay. There's a dedicated Eq/Filter section for each tap derived from the acclaimed Q10 as well as Global LFO and a feedback section capable of overmodulation and positive gain feedback loops capable of some serious distortion. SuperTap can produce a wide range of creative rhythm effects and loops and includes 19 factory presets covering a broad range of multi-tap delay effects, including analog and tape delays, slapback echo, chorusing and more. To conserve processing power, SuperTap allows you to choose between 2 or 6 tap plug-ins, in mono or stereo, with or without modulation.

Each Tap Features

- Controls for each tap are arranged in a row from left to right — On/Off, Gain, Rotate, Tap Marker, and Eq/Filter section
- Gain is adjustable in 0.1 dB steps
- Rotate controls the tap's stereo position ±45°
- Each tap has its own slider located in the Tap Delay Grid that is adjusted by dragging the slider from left to right. Each slider shows a value either in BPM or milliseconds (ms)
- Each tap has its own EQ/filter section derived from the Q10 plug-in. Each filter has a selectable frequency range of 100 Hz to 20kHz and six filter curves — Bell (wide) Bell (narrow), Hi and Low Shelf, High and Low Pass. Gain control lets you boost or cut the filtered bands without affecting the pass bands
- Pan Graph shows the stereo location of each tap with a marker. Tap markers can be dragged from left to right to adjust Rotation (±45°) and up and down to adjust Gain (from 0.0 to -24dB).

Global Controls

- Grid Mode button changes between BPM (adjustable from 40 to 1200bpm) or ms
- Snap-to-grid feature lets you quantize each tap to a beat selected with the Grid button. Note divisions include quarter, quarter triplet, eighth, eighth triplet, and sixteenth. A Free mode can be used to accommodate complex rhythms and odd time signatures
- Tempo Controls allow you to raise or lower the BPM and corresponding quarter note value in milliseconds
- Tempo Mode button changes the function of the Tap Pad between Tempo and Pattern mode which allows you to tap a rhythmic sequence to use for the delay values
- Two Feedback Modes: Normal mode where the feedback sends each tap back into the input again and Tap Feedback mode, where the feedback has its own delay time that sets the repeat time for a rhythmic pattern
- Feedback Gain controls how much signal is fed back into the input. In Normal mode, this effect can range from gently decaying repeats to positive gain feedback that develops into distortion. In Tap Feedback mode, a gain setting of 100% will continuously cycle the delay loop while a lower percentage will cause the loop to gradually fade out.
- Feedback Rotation control allows you to shift the entire stereo signal ±45° without collapsing the stereo image
- Feedback EQ/Filter section offers 3 filter types — Low Pass, Low Shelf, and a unique Low Decay that gently attenuates treble frequencies not unlike the behavior of tape or analog delays, or vintage digital delays with low sampling rates
- Modulation section allows you to control the depth (from 0 to 500ms) and the LFO rate (from 0.0 to 20Hz) of the taps
MondoMod

MondoMod is software plug-in for pro-audio processing applications. It includes an AM (Amplitude Modulation) section for creating tremolo effects, an FM (Frequency Modulation) section for creating vibrato effects, and a Rotation Section for creating panning effects. The rate of change for all three effects are controlled by an LFO (Low Frequency Oscillator) with 5 different waveforms and a variable tempo adjustable by Hz (frequency) and BPM (Beats per Minute). Simple On/Off buttons allow you to use the three effects together or individually.

Tempo and Waveform Section
- Tempo adjusts the rate of an LFO (Low Frequency Oscillator) in cycles per second from 0.01 to 60.0Hz and beats per minute from 0.6 to 3600 BPM.
- The x-factor control multiplies the tempo by 0.5, 1, 2, 4, 10 or 100.
- Waveforms available for the LFO include — Square, Saw, Saw up, Triangle and Sine.

AM (Amplitude Modulation) Section
- Control the amount of AM from 0 to 100%. A setting of 50% means that the amplitude will drop by half and then return to 0 dB at a rate set by the LFO in the Tempo section.

FM (Frequency Modulation) Section
- Control the amount of FM from 0 to 100%.
- Adjust the phase relationship of the FM to Amplitude and Rotation Modulation (selectable from 0, 90, 180 or 270° out-of-phase).

Rotation Section
- Set the amount of rotation to the left and right channels. Negative settings place more audio to the right, positive settings place more to the left channel. Set the modulator’s left and right sweep range, or width, between 0 and 360º.

Output Section
- Adjustable output Gain (±12.0 dB in 0.1dB increments). Dry/Wet balance can be adjusted from 0% (Dry) to 100% (Wet).

MondoMod - the Enigma processor
- Choose from 2 to 12 (1 to 6 pairs) of notches/frequency sweeps
- Plus Half (“+1/2”) button adds “half a pair” of notches at the high end.
- Depth controls the depth of the notches in the Enigma processor. When set to zero, the Feedback section is the main area of control.
- Phase button reverses the polarity (up/down orientation) of the notches.
- Control both stereo and tonal aspects of the processor.

Modulation Section
- Modulation On/Off button can be used to “freeze” the notches at a certain color and to automate the start and stop of the modulator.
- Waveforms include sawtooth up down, triangle, sine, square (50% pulse).
- Adjust modulation in seconds or beats per minute.
- Set the boundaries of the frequency range to be swept.

Feedback Section
- The Decay Time slider responds like a feedback control with longer delay times and a reverb decay control with shorter decay times.
- The Feedback Phase button reverses the phase of the feedback.
- Control the density and stereo spread of the individual delays.

Global Section
- Gain controls the output level indicated by the peak reading meters.
- Control the Wet/Dry balance between the processed and input signals.
- Pre-delay delays the wet signal before mixing it with the dry.
- The Wet control offers 3 modes that control the output signal — mono, stereo, and M mono+Phase Reverse which takes reverses the phase of the left channel and then sums it with the right channel, producing a stronger notching effect while phase cancelling the original input signal.
Professional Tools for Production, Mastering, Tracking and Multimedia Audio

Whether you've exhausted your old plug-ins or have simply been waiting for the right all-in-one audio toolbox to come along, the Waves Gold Bundle is simply everything you need, with several daily tools, sweetening and mastering processors, and sound design mindbenders. A near-flawless, must-have plug-in suite, Waves Gold includes a total of 19 plug-ins — enough tools to round out any plug-ins menu — or replace it all together. From the original Q10 and L1 to the Renaissance series, over 300 setups and processors provide exacting control of the highest-resolution tools, for musicians, mastering, remix, restoration, multimedia, film, web, games, everything audio. In fact, the Gold Bundle can handle hundreds of jobs—yet the whole collection falls into tight formation, thanks to its consistent interface design and expansive compatibility.

C4 Multiband Processor

The C4 Multiband Parametric Processor harnesses the compression design from the award-winning Renaissance Compressor including the ARC Electro and Opto bands. Key features of the C4 include transparent cross-over design with global adjustable Q; true parametric control including independent threshold, range, gain, attack, release and bandwidth per band; flexible design allows compression; expansion or EQ independent of the functions of the other bands; adjustable global knee control; bit precision dithered to a 24 bit output.

- Pure innovation with 4-band up and down expansion, limiting, compression, plus dynamic and standard EQ.
- The C4 is simply the most flexible, musical device ever created. Compress the bass, expand the mid, De-ess the highs, EQ the air, all with complete understanding and control. No tiny LCD screens or confusing menus. Pure multiband power. Instant gratification. Each component is crafted to provide exquisite clarity and control.
- Each C4 band includes threshold, range, attack, release, and gain. The crossover has independent bandwidth control and global Q adjustment. This unmatched flexibility allows highly different functions in each band simultaneously. For example, you can compress the lows, expand the low-mids, add fixed gain to the upper mids (with no dynamic change), and limit the highs, all at once. The combinations are staggering and give you the ultimate in tonal control.
- The C4 brings a fusion between gain reduction metering and EQ. You can think of the C4 as a dynamic EQ, and therefore, Waves' displays the output as an EQ curve that moves, called the DynamicLine. Of course, as with all Waves processors, you can select-and drag any graphical representation, or type in numbers, tweak with the mouse, etc. And as always you can select multiple controls at the same time for great ease in adjustments.
MaxxBass

MaxxBass provides a virtual subwoofer by extending the perceived bass response on any speakers. Whether for mastering enhancements or site-specific mixing, your ears will perceive an amazing low end.

Patented technology, MaxxBass takes your bass to the maximum by adding a series of harmonics to the signal. These harmonics stimulate a psychoacoustic bass-enhancing effect – a phenomenon that small speakers rely on to play audible bass. MaxxBass simply maximizes this known acoustical phenomenon. Thus bass frequencies are greatly enhanced without traditional EQ or bass compression. Taken to the extreme, you can actually remove the original bass signal completely and the ear will still "capture" the fundamental from the added harmonics. Employing dynamic graphics and a simple user interface, MaxxBass allows you to creatively add specific harmonics to bass signals.

The MaxxBass Graph
- **Frequency slider** controls the crossover point between the original bass and the added harmonics with a range of 32 to 256 Hz. Frequencies below this point have harmonics created for them; above it, are passed to the output.

Output Section
- **Harmonics fader** controls the level of the generated harmonics in the output mix from +12dB to -infinity.
- **Original Bass fader** controls the level of the low-passed bass signal in the output mix from +12dB to -infinity.
- **Input level fader** can be used to attenuate hot signals indicated by the peak reading output meters.
- **Monitor buttons** toggle between Audio (mixed output), Harmonics (MaxxBass Signal), and Original Bass.

Harmonics Section
- **Highpass filter** toggles between a 24dB/oct filter at 16Hz for removing DC and very low frequency components, a 12dB/oct filter at the selected Frequency on the graph, and a 24dB/oct filter at the selected Frequency on the graph.
- **Decay control** adjusts the progressive rate of decay in level for each succeeding harmonic in the series.

Dynamics Section
- **Ratio control** applies upward compression to the generated harmonics between 1.00:1 to 4.00:1 in 0.01 increments. Higher ratios limit the dynamic range of the harmonics.
- **Response controls** adjust attack and release of the harmonic generation between 10 and 30 ms in 0.1ms increments.

AudioTrack Channel Insert

AudioTrack is a channel insert with 4-band, fully parametric EQ, compressor, and gate, all in one space-saving window, 88.2/96kHz ready for many native platforms. Unbelievably efficient on any system, with undeniable quality, it is ideal for multimedia producers, voiceover, project studios, and more.

The EQ is a true fully parametric 4-band EQ, with bell, shelf, and highpass/lowpass filters, all taken from Wave's Q10 design.

The compressor includes expander ratios, plus a “one-hand” Autogain feature. The noise-gate removes background noise from voiceovers and more.

- Single window interface
- Volume and Gain Reduction meters
- Setup library with: Effect, Multimedia, Musical Style, RealAudio, and ShockWave audio setups. (Mac version only)
- Sample-Accurate peak hold and clip meters
- Single pass: Equalization, Compression / Expansion and Gate
- Instantaneous A/B comparisons between on-line settings
- Full compatibility between native and DSP hardware processing
- ShockWave Audio Preprocessing presets (PC version)
WAVES

RENAISSANCE MAXX — NATIVE or TDM

Classic Sound — Complete Control

Available for Native and TDM platforms, Renaissance Maxx offers seven of Waves’ most acclaimed audio processors in one bundle to provide the MAXXimum in flexibility, efficiency and intuitive control.

Renaissance Maxx features vintage-modeled equalization, dynamics, and reverb plus a powerful vocal processor, a new de-esser, Renaissance Bass, and the new plug-in that tips the scale — Renaissance Channel — the ultimate channel insert processor.

Renaissance VOX combines compressor, limiter and gate functions to bring vocals and solo instruments to the front of the mix while pushing out unwanted noise. Renaissance Bass refines Waves’ popular MaxxBass technology to allow bass frequency extension through speakers with limited low frequency response. Renaissance DeEsser is the next generation DeEsser, and Renaissance Channel is a true channel insert with EQ, comp/limiter, gating, and more incorporated from other award-winning Renaissance plug-ins.

Renaissance Maxx (Native of TDM) includes

- Renaissance Bass, Renaissance VOX, Renaissance DeEsser, Renaissance Channel

**Renaissance EQ** —
Perhaps the most musical EQ plug-in ever developed, the award-winning Renaissance EQ offers two to six bands of audiophile EQ. Selectable filter types respond like classic analog/tube hardware adding air and smoothness while maintaining clarity and space.

**Renaissance Compressor** —
The Renaissance Compressor recreates the warm distinctive sound and simple operation of classic analog hardware. Features ARC and Opto/Electro modes with brickwall (L1 style) limiter on the output. Has an intuitive interface for comprehensive, detailed control.

**Renaissance Reverberator** —
Easy to use, with incredible detail and flexibility, the Renaissance Reverberator offers the classic sound of professional reverb with intuitive controls. It offers Hall, Plates, Chambers, Gates plus Reverse, Reverb and Echoverb.

**Renaissance VOX**

This may be one of the ultimate “one-knob” compressor limiters in pro audio history. Actually it has two controls because it also has a gate. Renaissance VOX is optimized for vocal tracks, featuring a simple interface with only two controls and two meters. The elegant display controls a compressor, gate, and precision limiter with automatic gain staging for clip-free maximization of vocals. The Energy control adjusts the threshold of the multi-stage downward expander, and the Compression control adjusts the amount of compression and limiting while automatically providing output gain boost. This greatly simplifies voiceover or vocal track production by giving the user a single-control adjustment for the most-needed compression and maximization of such tracks.
**Renaissance DeEsser**

Renaissance DeEsser relies on technologies used in Waves C4, DeEsser and Renaissance VOX plus it has several proprietary features that make it better than other DeEssers including Waves own DeEsser. Here are a few main advantages:

- **Threshold is not the normal “absolute value” threshold that you usually have. Dynamically adapting to the input signal in order to provide a more unified DeEssing effect yielding more natural sounding results.**
- **Specify the maximum desired gain reduction for better control of the DeEssing effect.**
- **Phase compensated crossover – this is very important in order to avoid undesirable coloration to the sound and to eliminate phase modulation that would other wise occur as an artifact of the amplitude modulation applied by the compressor. Same type of crossover used in the Waves C1, and C4.**
- **As the DeEsser works only on part of the spectral range of the input, the graphic user interface incorporates a graph that lets you see what you hear.**

**Renaissance Bass**

Waves developed the MaxxBass technology to allow audio engineers to selectively add harmonics which significantly enhance the bass perception by the listener, and most importantly, beyond the range of the speaker's conventional frequency response. Renaissance Bass takes the MaxxBass algorithm to greater effectiveness and simpler operation. The process has been refined and is even more effective than the original processor. In addition, a simplified user interface helps achieve top-quality sound with quick adjustment, whether in post, mixing, mastering, or multimedia.

**Renaissance Channel**

Renaissance Channel is a complete channel processor with true double precision operation for maximum fidelity and artifact-free audio. It includes vintage modeled EQ and compression inherited from the critically acclaimed Renaissance EQ and Compressor, selectable EQ/Dynamics ordering, and independent sidechain configuration of routing and filtering for compression and gating. In addition, it includes overload protection and stereo rotation, taking the concept of channel insert to the limit.

The EQ features consistent filter response over the entire audio range, with two user-selectable compression curves – one taken from the Renaissance Compressor, and the other from the Renaissance VOX processor. With true double precision processing, the internal processing bus always has the definition required to handle any input signal without artifacts or internal distortion, while overload protection ensures there is no output clipping. The entire stereo stage can be rotated, controlling the level balance without affecting center channel sound. In addition, sidechain routing and filtering can be configured independently for the gating and compression components of the processor.

- **Selectable EQ/Dynamics signal flow**
- **Overload protection - no output clipping**
- **EQ with consistent filter response over the whole frequency range**
- **Setting of sidechain routing and filtering for gating and compression**
Precision Mastering Tools
Setting the standard for mastering applications with higher sonic capability plus a greater
degree of functionality, the Masters bundle includes the award-winning L2
Ultramaximizer as well as innovative linear phase equalization and multiband processing
which result in absolutely no phase distortion created by previous software and hardware
tools. The sound is more transparent with better musical balance.
Audio mastering professionals are continually looking for methods to deliver more pristine
audio quality in their recordings. In direct response to their demands to
eliminate phase distortions from their work, Waves has developed the Linear
Phase Equalizer and Linear Phase Multiband.
The Linear Phase Equalizer utilizes an innovative FIR (Finite Impulse
Response) filter implementation that introduces no phase distortions. This
innovative design also overcomes the variable latency of traditional IIR
(Infinite Impulse Response) filter implementation that add phase distortions,
while offering a user-friendly tool with a user interface similar to Waves
popular Renaissance Equalizer.
The Linear Phase Multiband supports independent gain and dynamics
(compression, EQ, and limiting) on five user defined frequency ranges, while
adding linear phase crossovers. The Linear Phase Multiband extends Waves
award-winning C4 Multiband Parametric Processor to an even higher quality
standard for purist mastering on full range mixes.
In addition, Waves award winning limiter, the L2 Ultramaximizer is included in the Masters bundle. The L2 adds ARC
(Automatic Release Control) to provide extra gain during mixing.

Linear Phase Equalizer
Innovative phase linear filters eliminate your phase distortions to pro-
vide you more transparent sound that better preserves the musical
balance. Linear Phase EQ includes a broadband component with 5
general bands and one LF band and a more surgical LF component.
Uses the familiar Q10 and Renaissance EQ type interface. Hear what
you have been missing.

L2 Ultramaximizer
The L2 is the next step in peak limiting with ARC (Automatic Gain
Control) to add the extra gain you need to master your projects. IDR
and ninth order filters maintain the highest quality. Designed exclu-
sively for mastering.
Linear Phase Multiband

Linear Phase Multiband supports independent gain and dynamics (compression, EQ and limiting) on five bands with linear phase crossovers. It includes Adaptive Thresholds, Automatic Makeup and Gain Trimm. It uses the familiar C4 type interface and is ideal for purist mastering on full range mixes.

PLATINUM BUNDLE —

NATIVE or TDM

The most complete set of audio processors ever offered

The Platinum bundle offers the highest-quality, most comprehensive set of audio processors to provide professionals with everything they need in a single cost-effective bundle. For those searching for a larger palette of creative options, the Platinum bundle is the perfect choice.

Containing 26 premium audio processing tools, the Platinum bundle includes all 19 processors in the award-winning Gold bundle, plus the three processors from the Masters bundle, and four additional processors from the Renaissance Maxx bundle.

The Native version supports RTAS, AudioSuite, VST, M.A.S and DirectX formats (Macintosh and Windows). The TDM version adds support for Digidesign’s Pro Tools TDM format on the Macintosh.

Platinum Bundle (Native or TDM) includes:

Native Power Pack or TDM Bundle—
L1 Ultramaximizer, Q10 Paragraphic EQ, SuperTap 2-tap, DeEsser, TrueVerb, S1 Imager, C1 Compander

Pro-FX Plus—
Enigma, Doppler, Ultrapitch, MetaFlanger, SuperTap, MondoMod

From the Gold Collection —
C4 Multiband Processor, AudioTrack, MaxxBass

Masters Bundle—
L2 Ultramaximizer, Linear Phase Equalizer, Linear Phase Multiband

Renaissance Maxx —
Renaissance EQ, Renaissance Compressor, Renaissance Reverberato, Renaissance VOX, Renaissance Bass, Renaissance DeEsser, Renaissance Channel
Audio Restoration and Noise Reduction

Removal of unwanted background noise and disturbing signal transients without affecting the original sound has always been a major challenge in audio postproduction, remastering, broadcasting, video, film and forensics. Waves' Restoration bundle has addressed the increasing demand for real-time noise and transient elimination tools. It establishes a new standard for quality and simplicity in software based noise reduction and sound restoration tools for post-production, remastering, and forensics applications. Fast and incredibly simple to use, it provides feedback through audio output, audio difference and intuitive graphics. Quality is comparable to reference hardware costing up to 10 times more.

The Restoration bundle includes four plug-ins: X-Noise, X-Click, X-Crackle, and X-Hum. X-Noise intelligently learns from a section of noise, and then applies a broadband noise reduction to eliminate background noise from any source. Primary controls are similar to classic dynamic processors. Eliminates learning curve. Even stores noise profiles for future use.

X-Click offers high quality click removal. X-Click eliminates analog or digital clicks with the provided presets. Effectively removes clicks from 78's or vinyl records, as well as spikes arising from digital switching or crosstalk. X-Crackle is the second stage in the restoration of old records eliminating crackles and surface noise left after the X-Click process. X-Hum attenuates steady pitched low frequency disturbances, such as ground loop hum and its harmonics. It is also intended to reduce rumbles, microphone pops, and DC-offset.

X-Crackle is the second stage in record restoration eliminating crackles and surface noise from old vinyl or magnetic tapes. Simple and effective.

X-Hum is perfect for high quality hum removal. Eight harmonically linked notch filters attenuate ground loop hum by up to -60dB with very narrow Q. Removes 60 Hz power in a snap. High pass filter options remove rumble, mic pop and DC-offset.
The 360° Surround Toolkit offers a complete set of tools for surround audio production to industry standards. Available for Pro Tools® HD and M 1X systems on the Mac, the 360° Surround Toolkit consists of seven surround tools for the most impressive surround localization, spatialization, and envelopment, with enhanced panning, reverb, and dynamics:

The Surround Manager allows the calibration of a studio setup to all industry standard surround release formats, and includes flexible bass management, while the Surround Reverb includes six channels of completely de-correlated reverberation with special front and rear surround control.

The Surround Imager adds distance panning, generating early reflections and shuffling (frequency-dependent localization) for greater LF spatialization.

The Surround Limiter is a 6-channel implementation of the acclaimed L2, and the Surround Compressor provides dynamic compression with flexible channel coupling and grouping for surround applications.

Finally, Surround Mixdown allows the derivation of Quad, LCR, Stereo and Mono mixes directly from the surround mix, greatly adding to studio productivity and compatibility between different format mixes of the same material; and the Surround Panner provides rotation and width for any input.

**BROADCAST & PRODUCTION BUNDLE — NATIVE or TDM**

Complete production solution covering all your audio signal processing needs

Featuring Waves critically acclaimed Renaissance Maxx, Masters, and Restoration processors, this bundle includes limiters, compressors, EQ’s, filters, noise removal, reverb, bass enhancement, de-essing & voice processing. You will be able to clean up audio, get killer voice overs, easily create both common and signature audio effects, fatten the sound, have the best level control available, and create superior feeds & mixes. These are the world-class standard processors used in Hollywood and in audio and music production the world over.

**Broadcast & Production Bundle (Native or TDM) includes:**

- Renaissance Maxx—Renaissance EQ, Renaissance Compressor, Renaissance Reverberator, Renaissance Bass, Renaissance VOX, Renaissance De-Esser, and Renaissance Channel
- Restoration —X-Noise, X-Click, X-Hum, and X-Crackle,
- Masters Bundle—L2 Ultramaximizer, Linear Phase EQ, Linear Phase Multiband
Modular Virtual Percussion Instrument

Culture delivers an unprecedented level of quality and control to satisfy the demands of today's top professional musicians. With over 9GB (2 DVDs) of authentic and highly optimized sounds, Culture is the world's largest collection of world, ethno, orchestral and industrial percussion instruments. The essential sonic details of each instrument have been captured perfectly, making Culture sound incredibly real. Each instrument was sampled using every playing technique imaginable... 16 unique velocities per note for left AND right hand! The natural touch of each instrument makes Culture a percussion player's delight. For example, play crisp bass tones at the center of a djembe drum by playing the middle keys, then work your way out to the outer keys for some serious rimshots... brilliant!! Culture includes a full range of percussion instruments such as: djembes, tamdrums, udus, darabukas, shakers, barrels and cans, framedrums, orchestral timpani, orchestral snares, cymbals, tonal gongs, chimes, bongos, congas, claps, tambourines, dunun, sangban, kenkeni, balafon and many more standard and exotic percussion instruments.

Features

- Highly optimized engine for low CPU load
- Powerful MIDI processing including keyswitch option
- Flexible and intuitive handling of multis, layers and single keygroups
- Up to 16 audio outputs
- Simultaneous use of up to 8 different layers
- Hundreds of stunning single and multi patches using over 20,000 samples
- Intelligent polyphony management: protection of the natural release of the instruments and also the adjustment of voice usage per layers and notes to save CPU power
- The Pre Silence parameter applies a slight initial delay to each note that adds a humanizing element to your performance. For example, when a group of percussionists playing a note at the same time, they never hit the note right on the spot.
- Easy and fast switching between different instruments with previously assigned keys or the modwheel. So the hands can stay where the should be: on the keyboard...
- Basic and pro editor modes
- Cross platform plug-in compatibility: VST 2.0 (PC, Mac OS 9 and OS X); RTAS (Mac OS 9); MAS, RTAS OS X and AU for free download when available
- Compatible with Digital Performer, ProTools Logic, Cubase, Nuendo, SONAR, etc. up to 32bit/192kHz.
Modular Virtual Bass Instrument

Majestic covers with 9GB finest sound samples the whole range of electric basses, useful for all styles of music. You can play Majestic's e-basses with the different playing styles fingered, fingered muted, slapped, thumbed, picked and picked muted and in addition with the playing techniques long notes, vibrato notes, short notes, ghosts, tappings, hammer ons, 8th notes, slow slides, fast slides, back slides, fret noises, FX... everything with up to 8 velocity splits per note. To achieve even more authentic e-bass performances, the instruments were recorded in two different scales. Next to the international well-known and specifically for the MVI optimized instruments of the yellow tools pure e-basses libraries, Majestic was enhanced with a vast number of e-basses.

Majestic delivers the whole range of e-bass instruments:
- Music Man Sting Ray
- Höfner Beatles Bass
- Höfner shortscale
- Ibanez BTB 5-string
- Warwick Streamer Stage 1 fretless
- Danelectro
- Fender Jazz Bass
- Fender Jazz Bass fretless
- Fender Precision Bass
- Rickenbacker
- Epiphone Jack Cassidy Signature Model,
- Gibson EB-0
- Steinberger headless
- Warwick Thumb 5-string.

Features:
- Highly optimized engine for low CPU load
- Powerful MIDI processing including keyswitch option
- Flexible and intuitive handling of multis, layers and single keygroups
- Up to 16 audio outputs
- Simultaneous use of up to 8 different layers
- Hundreds of stunning single and multi patches using over 20,000 samples
- Intelligent polyphony management: protection of the natural release of the instruments and also the adjustment of voice usage per layers and notes to save CPU power!
- Basic and pro editor mode
- Cross platform plug-in compatibility
- Compatible with Digital Performer, ProTools and any VST 2.0 compatible Host like Logic, Cubase, Nuendo etc. up to 32bit/192kHz

CANDY

Modular Virtual Saxophone Instrument

- The same 2 DVDs, 1 CD, MVI package as Culture
- Includes 11,000 Samples of the highest quality saxophones:
  - soprano, alto, tenor, bariton, bass saxophones
  - Classic, Jazz and Metal-mouth pieces
  - playing styles: long notes, short notes, vibrato, staccato, long and short sforzando, long & short falls, overdrives, FX - playing techniques: piano, mezzo-forte, forte, fortissimo, with up to 4 velocity splits per note.

Special features:
- after touch volume: press the already played key even more to increase the volume after the sample is already play. You can adjust the time and the volume
- alternate: if a sample is played twice, another sample of the same note is played with the second hit, so you will not have the same sample two times after another.
- SP-switch: you can switch between two layers with the sustain pedal. Amazing for long notes on the one layer and vibrato notes on the second. It is like keyswitch but you don't have even to move your fingers from the keys.

Z4 • Z8

Z•Series Performance Samplers

The Z4 and Z8 are the industry’s first 24bit/96kHz hardware-based samplers. Z-Series samplers were designed for professional audio production with 64 voices of polyphony (32 voices at 24bit/96kHz), 272MB of RAM (expandable to 512MB) and a 60GB internal IDE hard drive for storing a serious sample library. Both units include Akai’s award-winning ak.Sys PC/Mac Control and Networking System Software allowing you to control the Z4 and Z8 using your computer while taking advantage of the powerful DSP processing capabilities provided by Akai’s custom Z-96 LSI sampling engine and a high-performance Intel CPU. Both units also feature balanced stereo analog I/O with 24-bit/96kHz converters. An option is available for adding eight additional analog outputs. What sets the Z4 and Z8 apart? Both units employ Akai’s realtime controllers called Q-Link knobs that can be assigned to a variety of parameters. The Z4 has four Q-Link knobs while the Z8 has eight. The Z8 also features a removable front panel for remote editing as well as a S/PDIF digital I/O with a Word Clock input and a powerful 56-bit, 4-channel effects processor, both of which are optional on the Z4.

FEATURES

- Supports 24- and 16-Bit linear samples at sample rates of 44.1, 48, and 96kHz
- 272MB of internal SDRAM memory expandable to 512MB using off-the-shelf 168-pin DIMMs (PC133/PC100, CL2, 256MB max.
- 64-voice polyphony, 128-part multitimbral (32-voice polyphonic with the system clock set to 96kHz)
- 60GB internal IDE HD
- 248x60 graphic LCD display
- Built-in sample rate conversion is available on the digital input for capturing audio from peripherals such as CD players.

File Compatibility

- Akai S1000, S3000, S5/6000 and MPC2000XL - Sample and Program files
- EIII, EIV, Roland samples and programs
- SMF (Standard MIDI File) playback
- FAT32/DOS disk format and .Wav implemented as native format
- .AIF also supported using ak.Sys Networking Software on the Mac.

Q-Link Knobs For Realtime Control

- The Z4’s four and the Z8’s eight realtime Q-Link knobs can be individually assigned to control a wide variety of parameters including level, pan, filter cut-off and resonance, start offset, effect send, tuning and more. Control of an entire program or a sound assigned to a single keygroup is possible.
- Each assignable Q-Link knob can generate MIDI controller data so that parameters movements can be recorded and played back from a sequencer.

Digital Dynamic Filters

- 36 types of 6-pole digital dynamic resonant filters plus a special ‘Triple’ mode that supports up to three independent 2-pole filter blocks per voice.
- Realtime control of the cut-off frequency and resonance from the Q-Link knobs or via MIDI control change messages.
- Dual independent LFOs with internal, external modulation control and MIDI clock sync.
- Three Digital Envelope generators including two multi-stage envelopes.

Inputs and Outputs

- Two 1/4˝ TRS balanced record inputs
- Two 1/4˝ TRS balanced outputs
- 24bit/96kHz A-to-D and D-to-A converters with Enhanced Dual Bit 64-times oversampling A-to-D and Advanced Multi-bit 128-times oversampling D-to-A conversion.
- Two MIDI In and Two MIDI Out/Thru connectors
- A USB master port allows you to interface USB compatible floppy disk drives, hard disks, removable media drives, or a USB keyboard for quick name entry.
- An additional USB slave port is provided for connecting a Mac/PC running the Akai Professional ak.Sys software.
- 50 pin high density SCSI port

Z8 Adds

- 2-channel S/PDIF digital I/O
- Word Clock input
- 8 x Q-Link assignable controllers for realtime modulation control
- 56-bit, 4-channel effects processor (EB4JS)
- Removable front control panel for remote operation.
IntelliSample

- IntelliSample provides an automated sampling function that allows you to easily create custom sounds while eliminating complete steps in the sound creation process. For example, using IntelliSample is a convenient way to continually record from an audio CD, normalize, name, and assign the samples to a program automatically.
- IntelliSample uses an audio triggering to begin and end the sample recording process. Recording is triggered when the input level exceeds an adjustable threshold level, and stops when the level drops below the threshold level. The recorded samples are automatically named and assigned to a new program, or any specified program.

Quick FX

Quick FX allows sounds to be easily resampled and simultaneously processed with the internal 24bit/96kHz effects processor. A variety of presets are available that describe the final result and further simplify the effects assign and programming process. Presets such as Dirty, Swell, Squash, Stretch, Distant, and Fat will provide immediate results for most effects applications while retaining the original sample.

Waveform Editing

Resample, Insert Sample, Delete Section, Silence Zone, Reverse Zone, Pitch Shift, Fade Up/Down, Normalize, Rescale (user defined normalized), TimeStretch, BPM Matching, Cross-Fade, Sound Slicing, and many more.

ak.Sys Control and Networking System software

- The included ak.Sys software provides brings intuitive, computer-based program editing, multi editing and file management functionality to your Mac or PC.
- The on-board USB Host/Slave port connects to your computer allowing you to take advantage of computer software control while relying on the processing DSP power of a dedicated hardware sampler.

Options

EB4JS: 56Bit, 4-channel effects processor (Standard in the Z8)
1B-4D: S/PDIF 2-channel digital I/O with BNC Word Clock input (Standard in the Z8)
1B-4ADT: 2 in/8 out ADAT optical I/O
1B-48P: 8-channel analog output board
Z48-256MB: 256MB DIMMs

VZ8 - Software Sampler

The VZ8 is a 24-bit/96kHz compatible software sampler that offers the same specifications and performance capabilities as its hardware counterpart, the Z8 Performance Sampler. The VZ8 is available as a VSTi under Windows and as an Audio Unit plug-in under Mac OS X.

- 24-bit/96kHz performance
- Up to 64 voices and 16 audio outputs per instance
- Over 30 filter types including 2, 4, and 6-pole lowpass plus various highpass, bandpass, notch reject, peak, phase shifting filters, a vowelizer and an assortment of combination filters.
- ‘Triple’ filter mode lets you to create outrageous and unique filter combinations.
- Three envelope generators (two multi-stage, one ADSR) per voice.
- Two multi-wave, MIDI synchable LFOs with variable waveform phase and shift.
- The comprehensive modulation matrix allows up to 35 control sources to be routed in completely variable amounts to over 50 targets.
- Eight virtual Q-LINK controls allow real-time performance.
- Easy to use - just insert the VZ8 into a track and start dragging and dropping sounds onto it. Layer up to 128 sounds across 16 MIDI channels.
- True compatibility with S1/1100, S2/S3000, S3000XL, S5/6000, Z4/8 sound libraries. Sounds can be loaded from your Mac/PC hard drive, CD-ROM drive, or, using the ak.Sys Disk Browser.
- The Q-EDIT function provides quick and easy access to filter cutoff, resonance and envelope times.
- Seamless integration with with Akai’s ak.Sys software, which provides access to all of the sampler’s parameters as well as the ability to transfer data between your VZ8 and Akai’s hardware samplers using simple drag-and-drop procedures.
AKAI

MPC2000XL

MIDI Production Center

The MPC2000XL is a complete MIDI production center that combines a digital sampler, 64-track sequencer and a tactile work surface based around 16 velocity sensitive drum pads. The sampling section features 16-bit stereo sampling, 32-voice polyphony and is expandable to 32MB with widely available standard SIMMs (2MB of RAM is included standard). Each voice has access to a dynamic resonant filter and envelope and samples can be precisely edited using the MPC2000XL's intelligent time stretch function, graphic cut-and-paste sample editing and resampling capabilities. The sequencing section has a 300,000 note capacity and allows you to record on up to 32 MIDI channels simultaneously. Two MIDI Out ports allow you to integrate external synths and synchronize with other workstations. The MPC2000XL can be pre-configured with a host of options including 8 individual outputs with S/PDIF I/O, SMPTE I/O and a 4-bus effects processor. These options, including memory upgrades are user-installable and can be added at a later date.

Sampler/Sound Generator

- Sampler, drum machine and MIDI sequencer in one instrument
- 44.1 kHz, 16-bit stereo sampling with 32-voice polyphony
- 2MB of memory is included as standard providing 21.9 sec. mono or 10.9 sec. of stereo sampling.
- Two memory expansion slots allow you to expand the available memory to 32MB using 16MB 72-pin SIMMs (70ns).

Control Surface

- 16 large, velocity- and pressure-sensitive drum pads and 4 pad banks provide a total of 64 pad/bank combinations.
- Up to three samples can be assigned to one MIDI note. The samples can be played simultaneously or can be switched via velocity, or with the Note Variation slider.
- Up to 256 sounds and 24 programs can be loaded into memory at one time.
- Note Variation slider for programming a wide variety of dynamics
- Large 248 x 64 dot flip-up LCD display for graphic waveform editing. Six soft keys under the LCD display provide direct access to functions on each page.
- Dedicated buttons for most-used functions

64 Track Sequencer

- The powerful and easy-to-use 64 track MIDI sequencer offers a great alternative to complex computer-based sequencers.
- A maximum of 50,000 notes (events) is available per sequence. The sequencer's total memory supports a maximum of 300,000 notes (events) and 99 sequences.
- Support is provided for both linear and pattern-style (loop-based) recording. The loop recording function allows you to quickly and easily loop short phrases.
- The Step Edit function allows you to view and edit the pitch, duration, position and velocity of individual events.
- A dedicated Undo Seq key allows you to undo sequence recordings or edits.

Storage

- MPC2000XL models are available with either a 3.5˝ 2HD/2DD compatible 1.44MB disk drive or a 100MB Iomega Zip drive for storing and loading samples.
- 50-pin high-density SCSI port allows you to back up large projects to a variety of removable media such as Zip or Jaz disks, fixed hard drive or you can connect a CD Rom drive allowing you to access a vast array of commercially available sample libraries.

File Compatibility

- You can load samples from the vast Akai S-Series Sound Library as well as the Akai MPC60, MPC60-II, MPC3000 libraries, E-Mu EIII and Roland S750/S760 CD-ROM libraries, as well as .WAV files from PC disks.
**Inputs and Outputs**
- Left and right balanced 1/4" TRS record inputs with a Max. input level of +10dBu.
- Left and right unbalanced 1/4" outputs.
- The optional IB-M208P I/O board provides an additional eight individual unbalanced 1/4" outputs plus a coaxial (RCA) S/PDIF digital input and master output.
- 1/4" stereo headphone output with dedicated volume control.
- Two independent MIDI outputs permit 32 simultaneous MIDI output channels.

**Synchronization**
- Synchronization and control capabilities include MIDI clock, MTC, MMC (MIDI machine control)
- The optional IC-M2TC board supports SMPTE time code synchronization. The supported SMpte frame rates are 24, 25, 30, 39, 48.

**Realtime Control**
- Track mute can be turned on or off and sequences can be selected using the drum pads.
- The Note Variation slider allows you to control the decay or filter value of the sound in real time.
- The Next Seq key allows you to select another sequence to play directly following the one already selected.
- The Erase key works in conjunction with the drum pads to allow you to delete sequence data on the fly, without stopping the sequencer.
- The note repeat function and the after touch function pads enable you to easily enter drum rolls and hi-hat beats.
- The Tap Tempo function allows you to set the playback tempo by tapping a key in the time of 1/4-notes.
- The ability to convert MIDI sustain pedal data to note duration data allows you to insert sustain effects independently from the note data within a track.

**Sample Editing**
- Extensive cut-and-paste sample editing with waveform display.
- Waveform display with zoom function allows precision editing.
- Tempo stretch allows you to intelligently lengthen or shorten a sample using 18 different preset algorithms tailored to suit a variety of source material.
- BPM Match enables you to change the tempo of the sample so that it will fit into the track that you are working with.
- The Re-sampling function allows you to change the sampling frequency of the sample which is useful for conserving memory as well as for creating LoFi samples.

**Utilities**
- The Utilities page provides lets you customize settings to suit your particular work style such as whether MIDI notes are shown as numbers or keys, loop lengths as a time value or samples and whether you want the Ent/Play button to play back a key as one note, a chord or an arpeggio.
- All customized settings can be saved to Flash ROM so that your sampler boots up exactly as you want it every time. Settings can also be saved to floppy disk or hard disk.
- Data can be exported to or imported from standard MIDI files.
- Tempo changes can be programmed mid-sequence or mid-song are supported.

**Also Available**
- MPC2000XL Studio Plus — All MPC2000XL Studio features PLUS EB16, 4 bus digital multi-effects processor, capable of 6 simultaneous effects
- MPC2000XL Studio-ZP — MPC2000XL with built-in 100MB ZIP drive, 100MB ZIP disk loaded with 50MB of free MPC programs and sounds
- MPC2000XL Studio-ZP — MPC2000XL Studio Plus with 100MB ZIP drive, 100MB ZIP disk loaded with 50MB of free MPC programs and sounds

**Optional Accessories**
- IB-M208P: 8 individual output and digital I/O board
- EB16: Multi-effects processor board
- FMX008M: 8MB Flash ROM board
- IC-M2TC: SMPTE + IC
- 16MB SimM memory board
AKAI

MPC4000

**Desktop 24-bit/96kHz Sampler/Sequencer**

The MPC4000 is Akai Professional’s most advanced music production center ever. Built around the same Z-96 LSI sampling engine found in Akai’s Z4 and Z8 Performance Samplers, combined with a high-performance Intel CPU, the MPC4000 provides ultra-fast processing with 24-bit audio resolution and support for sample rates up to 96kHz. This is the first MPC to integrate a full feature sampler that not only supports standard Drum programs, but also gives you the ability to use keygrouped programs such as piano, bass, strings, synth, etc. The MPC4000 uses .Wav as its native sample format and is compatible with Z-Series and S-Series multi, program, and sample files offering you instant access to a huge library of material. The MPC4000’s 128 track sequencer boasts a 300,000 note capacity and 960 PPQN resolution. The large 6-inch backlit, hinged graphic display offers high resolution graphical editing of waveforms as well as sequence event editing, including piano roll style editing. Other features include: 272MB of RAM, expandable to 512MB; a built-in four channel, 56-bit effects processor; a 60GB internal hard drive and CD burner for archiving and loading data as well as burning audio CDs; plus a whole lot more.

**Features**

- Includes all sampler functions of Z4/Z8 sampler – Z-96 sampling engine, combined with a high-performance Intel CPU provides ultra-fast processing and 24-bit audio resolution with sample rates up to 96kHz.
- 64-note polyphony (up to 48kHz), or 32-note polyphony at 96 kHz.
- Includes 272MB of internal memory. Expandable to 512MB maximum expandable using standard PC100 or PC133 SDRAM.
- Samples can be recorded to RAM or directly to the internal hard drive for streaming playback.

**Data Storage**

- A built-in 60 GB EIDE hard drive is included for sample storage.
- An internal CD Burner is also provided for master archiving, back-up, audio CD creation as well as loading commercially available samples CD-ROMs.
- FAT 32 disk format is fully compatible with S5/6000, Z4, Z8, DPS524; and as well as the .WAV sample format allows data sharing with anything supporting .WAV files.

**User Interface**

- Sixteen velocity and pressure sensitive drum pads plus six pad banks provide quick access to up to 96 different sounds.
- Large backlit 320 x 240 dot hinged graphic LCD display.
- Up to six real-time controllers can be assigned to control a wide variety of parameters.
- Virtually all parameters are assignable to two Note Variation sliders, or four Q-Link knobs for real-time modulation control.
- All Q-Link knobs generate MIDI controller data that allows performances to be captured with the built-in sequencer.
- Memory meters display remaining free sampler memory, sequence memory and CPU memory.
- IntelliSample automates sampling, naming, program creation and sample assignment.

**Inputs and Outputs**

- Balanced stereo XLR-1/4-inch TRS combo inputs with reference-grade preamps, as well as (RCA) phono inputs that allows you to sample from a turntable without the need for an external mixer or amp.
- Balanced stereo XLR and 1/4” outputs.
- All inputs and outputs utilize high quality 24bit/96kHz converters.
- Two MIDI In and four MIDI Out ports control up to 64 independent MIDI channels.
- SMPTE I/O is included standard.
- A 50-pin Ultra SCSI port is provided for accessing additional storage peripherals.

**Two USB Ports**

- A USB host port supports an ASCII keyboard for naming, or USB floppy, Zip, CD-R, HD or MO drives for storage.
- A USB slave port is included for computer interfacing ak.Sys utility software.
Sequencing
- You can record up to 128 tracks per sequence and up to 128 sequences can be stored in internal memory.
- The sequencer allows you to capture MIDI data at 960 ppq resolution and has a 300,000 note capacity per sequence.
- The length (1-999 measures), tempo, and time signature can be specified separately for each sequence.
- You can freely select the output destination for each track — the MIDI events recorded in the 128 tracks can be sent to the sampler section or you can access external synths by channelizing tracks to any of the four MIDI Outputs.
- Multiple sequences can be easily arranged in any order to create a "song." A song can be converted to a sequence.
- The large LCD also allows an unprecedented view of sequence data showing data as a piano roll or as a drum machine 'grid'. Continuous MIDI data can also be shown (and edited) graphically.

EB4JS 4-Channel 24-bit/96kHz Effects Processor
- Four-channels of 24-bit/96kHz compatible effects, processed at 56-bit. The four processors can be configured as mono in/mono out; mono in/stereo out or you can strap two processors together for true stereo I/O.
- Each of the four effect units has access to one of 52 effect types and each effect is fully editable allowing a wide range of effects to be obtained.
- The effects are accessed via four effects sends.
- Quick FX resampling using powerful presets from the four-channel 24-bit/96kHz effects processor. Samples can be edited by simple descriptive commands like Dirty, Swell, Squash, Distant, Fat, etc.

Sample Editing
- Besides standard cut copy and paste editing, the MPC4000 offers a wide range of tools for extracting the perfect groove for your productions.
- The Slice Sound Function (also available on the MPC2000XL) allows you to divide a sample into 32 samples and assign them to a new program automatically.
- The Beat Loop Function calculates the tempo from the phrase length for Pitch Shift and Time Stretch functions to change the tempo.

Realtime Synthesis Control
- There are 26 types of 6-pole digital dynamic filters available with up to three simultaneous filters per voice (192 total). Filters can be independently controlled from a variety of assignable modulation controls.
- Dual multi-wave LFOs with internal/external modulation control
- ADSR envelope generator, two multi-stage envelope generators,
- Virtually all parameters are assignable to two Note Variation sliders, or four Q-Link' knobs for real-time modulation control.
- All Q-Link knobs generate MIDI controller data that allows performances to be captured with the built-in sequencer.

Computer Interfacing
- The free (downloadable) ak.Sys Network and Control Software allows complete Program editing, Multi editing, and file management via Mac or PC computers.
- The MPC4000's intuitive interface combined with the generous ak.Sys software GUI makes the MPC4000 extremely easy to manage, and since all DSP processing takes place within the MPC4000 instead of the computer, it won't overtax your CPU.
AKAI

**MPD16**

**USB/MIDI Pad Control Surface**

The MPD16 is a self-contained control surface based on the drum pad design found on Akai’s legendary MPC series of music production systems. The MPD16 connects via USB and/or MIDI to your computer, synth, drum module or sampler — anywhere you want to take advantage of a velocity drum machine-style tactile interface.

- Designed with simplicity in mind - allows you to program your drum sequences using a drum machine style interface instead of your keyboard.
- 16 MPC-spec pressure-and-velocity sensitive drum pads
- 16-Level mode allows you to generate the note velocity in 16 steps with 16 pads. Full-Level mode produces data with velocity value of 127, regardless of the velocity of the pad tapped.
- Bank key allows you to switch between two banks of sounds.
- The Active key enables the fader which outputs MIDI control changes.

**MFC42 MIDI Filter Controller**

The MFC42 is a digitally controlled analog filter module optimized for use with Akai’s MPC-Series of Music Production Systems. It features four selectable filter types, real-time control of filter, LFO, distortion, phasing and envelope parameters. The MFC42 can be rackmounted or mounted directly on an MPC2000/MPC2000XL using the optional KIT-MFC Mounting bracket kit.

- Two independent channels: a stereo channel, for processing MPC drum sounds, with a choice of 2-pole and 4-pole filter curves; and a mono channel, for bass with a choice of a 2-pole, 4-pole and an awesome 8-pole filter.
- Four filter types are available including: low-pass, high-pass, band-pass and notch filters. Toggle switches allow you to immediately switch to any filter type, with having to scroll through unwanted choices.
- Dedicated controls are provided cutoff frequency and resonance allowing real-time sound sculpting – from sub-sonic to extreme weirdness.
- An assortment of standard inputs, plus direct turntable inputs, allows the MFC42 to be used in just about any application.
- In addition to the powerful filtering capabilities, the MFC42 provides one LFO, one Envelope Generator
- Almost all of the controls on generate MIDI controller data, allowing performances to be recorded in the MPC’s sequencer.
- You can assign the LFO and EG (envelope generator) to either channel to provide real-time changes. The on-board LFO can sync to external MIDI clock to easily match the tempo of any beat.
- The LFO rate can also be controlled using TAP TEMPO as well as BEAT SYNC which allows the duration of the LFO/Envelope when using the tap tempo feature.
- When using the stereo channel, you can shift the LFO phase between the left/right outs.

- While each of the channels is independent, LINK and INVERT functions allow interaction between the channels. By linking the channels together, any changes made on one channel will actually affect both channels. The INVERT function allows the control of one channel to have the opposite effect on the other channel.
- A Trigger button allows instant filter triggering - no keyboard required.
- Large, dedicated control knobs

**Built-in effects**

- Even greater sound shaping possibilities are provided via the distortion, a stereo analog phaser, and EQ.
Drum/Percussion Sound Module

The DM5 is an affordable, single rack space drum module that offers drummers and MIDI composers a professional, full-featured tool for high quality drum, percussion and special effect samples. The DM5 puts over 540 sounds, many recorded in true stereo and with ambient effects. You'll find a range of classic Alesis studio drum sounds as well as cutting-edge sounds representing many of the latest musical styles. The DM5 also features four assignable 1/4" outputs as well as a 12 ultra-fast trigger inputs. Whether you're needs quality drums and percussion on a budget or are looking to add new sounds to your arsenal, the DM 5 provides a low cost solution.

- 1,024 different kick, snare, tom, cymbal, hi-hat, percussion and special effect samples derived from 16MB of PCM ROM.
- Create and store up to 32 virtual drumkits, and each kit can contain up to 64 different drum sounds.
- Up to four samples can be layered on each drum sound. The DM Pro also provides complete envelope control.
- Customizable onboard multi-effects use the same processing engine as the Q20 multi-effects processor.
- Coarse (chromatic) and Fine (cents) tuning is provided for each sound.
- Data knob, front panel keypad sound auditioning via velocity sensitive Preview button on front panel.
- Expanded Dynamic Articulation uses velocity to modulate the tone and pitch of samples.
- Random Sample feature brings new life to static tracks by realistically varying the sound of the drum as you play.

DM PRO — 64 Voice 20-Bit Expandable Drum Module

The DM Pro is Alesis’ most advanced drum module. It boasts 64 voice polyphony, and a 16M B drum and percussion library with a diverse range of over 1,000 sounds designed to accommodate nearly any musical style. A PCM CIA card slot allows you to add an additional 8M B of customized samples for a total of 24M B. The DM Pro also provides 16 drum trigger inputs using Alesis’ most advanced triggering system. The DM Pro Expandable 20 Bit Drum Module is the most advanced device available today. For composers who need a dedicated MIDI module for drums, or drummers looking for the professional solution for triggered electronic drum performances, the DM Pro represents the most powerful tool for creative inspiration.

- 16-note Polyphony
- 127 velocity levels are available via MIDI or trigger inputs.
- 21 drum kit memory locations wdefaults permanently stored in ROM.
- MIDI In, Out/Thru connectors
- 1/4" TRS headphone output with variable gain control
- 1/4" switchable footswitch input can be assigned to control hi-hat or program advance mode.
- 1,024 different kick, snare, tom, cymbal, hi-hat, percussion and special effect samples derived from 16MB of PCM ROM.
- Create and store up to 32 virtual drumkits, and each kit can contain up to 64 different drum sounds.
- Up to four samples can be layered on each drum sound. The DM Pro also provides complete envelope control.
- Customizable onboard multi-effects use the same processing engine as the Q20 multi-effects processor.

Expansion
- An expansion slot allows access additional sounds via 8M B PCM CIA-format cards.
- Alesis’ Sound Bridge sample management software allows you to burn your own sounds and samples from your computer (PC or Mac) onto a PCM CIA-format card.

Inputs and Outputs
- Six 1/4" audio outputs provide optimum mixing and processing flexibility.
- Stereo RCA audio inputs accommodate external audio sources, like CD players or tape decks, to be routed through an audio system so you can practice with recorded music.
- 16 fast trigger inputs for drummers using electronic pads or triggered acoustic drums.
64 Voice Expandable Synthesizer

Alesis introduced the Q8 in 1996, and shattered the price barrier for professional 88-note keyboards. Normal working musicians, and those just aspiring to work more, could suddenly afford a no-compromise instrument for a very compromising price, and this tradition continues with the Q6.2 and Q8.2. Featuring serious sounds for serious players, the Q S synths are loaded with stunning pianos and keyboards, a soup-to-nuts collection of orchestral instruments, killer drum and percussion kits, and enough amazing synth textures, fat basses, and sizzling leads to keep dance musicians and remixers grooving into the next time zone. A deep programmable synth architecture and four-bus effects processor add the finishing touches. And a wide variety of fresh samples are available from our extensive QCard library. Whether you need an 88-note workhorse or a do-it-all synth, the Q8.2 and Q6.2 keep your fingers flying for a down-to-earth price.

features

- Mix Mode allows you to access up to 16 different Programs at once from the keyboard or an external sequencer. Each of the 16 parts can have its own level, panning, transpositions and effect send settings.
- You can use Mix Mode to create complex layers and/or splits. Example you can create a lush piano, string layer or create a split with an acoustic bass on the left side of the keyboard and an organ on the right side.
- You can also use Mix Mode to receive data on 16 MIDI channels simultaneously from an external sequencer, with each channel representing a different instrument.

Inputs and Outputs

- Stereo L/R 1/4" outputs using 24-bit 128x oversampling delta-sigma Digital to Analog converters.
- 1/4" Stereo headphone output
- Assignable aux pedal, sustain pedal inputs.
- MIDI in, out, and thru connectors

Sounds

- 16M B of internal wave memory, expandable to 24M B via PCM CIA Q cards.
- 16-bit linear 48kHz samples
- 640 Programs (512 preset, 128 user) including Alesis' acclaimed Stereo Grand Piano, and 500 multimbral mixes (400 preset, 100 user).
- To make it easier to find a desired program, they are organized into 11 categories based on instrument type: Pianos, Chromatic, Organ, Guitar, Bass, Strings, Brass, Winds, Synth, Rhythm/FX, Drums/Percussion

Mix Mode

- Mix Mode allows you to access up to 16 different Programs at once from the keyboard or an external sequencer. Each of the 16 parts can have its own level, panning, transpositions and effect send settings.
- You can use Mix Mode to create complex layers and/or splits. Example you can create a lush piano, string layer or create a split with an acoustic bass on the left side of the keyboard and an organ on the right side.
- You can also use Mix Mode to receive data on 16 MIDI channels simultaneously from an external sequencer, with each channel representing a different instrument.
Expansion
- A QCard expansion slot, compatible with Type I PCMCIA SRAM and flash cards, allows you to add 8MB of additional samples and programs from Alesis' comprehensive QCard library.
- The programs in each QCard employs 16-bit, 48kHz uncompressed digital samples for exceptional clarity, dynamics and detail. Each 8 megabyte QCard also offers 100% plug-and-play convenience and can be used with any expandable Alesis synthesizer.

Available QCards
- **Stereo Jazz Piano** – featuring multisamples taken from a renowned concert grand favored by top jazz players everywhere.
- **Stereo Classical Piano** – captures the rich, authentic tone of a world-class grand piano. It's ideal for any musical style that demands superb piano sound.
- **Latin** – vibrant sounds and rhythms, ranging from traditional to contemporary including Tex-Mex, Tejano, Salsa, Merengue, Samba, and much more.
- **Classical** – a collection of authentic classical instruments including solo and ensemble strings, brass, woodwinds, percussion and much more.
- **Sanctuary** – A wide variety of instrument, choral and special effect sounds for the creation and performance of spiritual music for churches, musicians and composers.
- **EuroDance** – Create powerful Techno, Trance, Ambient, Industrial or House music with this awesome collection of drums, bass, noise bursts, filter sweeps and synths.

Sound Bridge
- Sound Bridge is a free (downloadable) software application for the Mac and PC that allows you to download your own sequences, Program Banks, and samples (.AIF, .AIFF, .SD, and .WAV) from your computer into a Flash card plugged into the Q5. All you need is a Flash card and a computer with a MIDI interface.

SR-16 Drum Machine

The SR-16 is one of the most popular drum machines ever made. It features a great selection of 233 realistic, natural drum sounds, offered both in dry form and sampled with Alesis' renowned digital reverbs. 50 preset patterns, performed by top studio players, are provided with enough rhythmic variations to create a complete arrangement making the SR-16 an ideal companion for songwriters. Live musicians and studios will appreciate the SR-16's straightforward drum programming, 12 velocity sensitive drum pads and four outputs as well as its ability to sync to external sequencers via MIDI clock and Song Position Pointer.

Sounds
- 233 internal 16-bit sampled sounds many of which are stereo samples with reverb and ambience.
- 50 preset drum kits are provided plus you can create up to 50 of your own kits. Drum kits program changes can be made via MIDI.
- You can access up to 12 sounds at a time via the drum pads, and up to 120 sounds via MIDI.
- 16 voice polyphony
- Adjustable volume and pan per sound

Drum Pads
- 12 velocity sensitive drum pads with a Dynamic Articulation function that enables a drum sound to change its tonal content as it's played harder, adding a humanizing element to performances.
- There are 8 loudness (velocity) levels via pads, and 127 levels via MIDI.
- You can sync the SR-16 to external devices via MIDI clock and Song Position Pointer.
- A footswitch input allows you to access a number of functions including: start/stop, count/A/B/fill.

Pattern-Based Sequencing
- 96 PPQN timing resolution
- You can create patterns with any time signature (1-128 beats per pattern)
- The tempo can be set between 20-255 bpm
- 12,000 note capacity with 400 pattern memory locations (200 user, 200 preset) and 100 memory locations for songs.

Outputs
- Four 1/4” outputs (2 stereo pairs) with 18-bit D-A converters.
Analog Modeling Synthesizer

The ION is a 49-key analog modeling synthesizer with a super-charged sound engine that packs eight voices of smooth, high-bandwidth analog-style punch, with three oscillators and two multi-mode filters per voice. This four-part multitimbral sound engine serves up everything from warm, round bass tones to lush pads and gritty lead sounds, making ION perfect for music styles ranging from rock to funk and the latest house, techno and trance dance styles. The ION’s intuitive user interface begs to be tweaked with 30 knobs, over 70 direct-access buttons, a pitch bend wheel, and two assignable modulation wheels that provide realtime control over synth parameters. From radical filter sweeps to subtle tonal changes, everything is right at your finger tips, just like the classic analog synths of the past. The ION also has an array of onboard effects including chorus, flange, phaser, echo, distortion, fuzz, compressor and more — all developed using Alesis’ legendary effects algorithms. The ION even offers a full-featured Vocoder, which can perform up to 40 bands of vocoding. Connections include four balanced analog outputs and stereo balanced analog inputs, as well as MIDI In and Out/Thru ports. A built-in switching power supply is also included.

FEATURES

- 49 velocity sensitive synth action keyboard
- Eight note polyphony and four multitimbral parts with a proprietary 500 MIPS sound engine that is capable of delivering everything from warm, round bass tones to lush pads and gritty lead sounds, perfect for a wide range of musical styles from retro rock and funk to futuristic house, techno and trance dance styles.
- 512 Preset Programs, all of which are user re-writeable

Synthesis

- 3 oscillators per voice, with continuously variable wave shapes. Sync and FM.
- 16 types of filters are available – up to two multimode filters can be used simultaneously in series, parallel, or stereo configurations.
- 2 LFOs, Sample and Hold and Arpeggiator - all Sync to MIDI Clock
- External signals can be routed via the balanced, 24-bit analog inputs where they can access the onboard filters, effects as well as a 40-band Vocoder.

Performance Friendly Interface

- Cleanly laid-out and intuitive user interface begs to be grabbed and tweaked.
- 30 infinitely adjustable, realtime control knobs - on high-resolution pots, not encoders, over 70 direct-access, backlit buttons
- Pitch bend wheel, and two assignable mod wheels.

Alesis Effects

- 4 Individual Mono/Stereo Insert Effects and Stereo Master Multi-FX Processor.
- Includes many of Alesis’ renowned effects including: chorus, flange, phaser, echo, distortion, fuzz, compressor and more.
- A full-featured Vocoder provides up to 40 bands of vocoding without affecting polyphony.

Connections

- Four 1/4” balanced analog outputs and stereo 1/4” balanced analog inputs all with 24-bit converters.
- 1/4” stereo headphone output
- MIDI In and Out/Thru ports.
- Built-in switching power supply
**16-Voice Real Analog Synth**

The Alesis A6 Andromeda is a real polyphonic analog synthesizer designed to uphold the legacy of classic American synthesizers. Andromeda offers a 61-note synth-weighted keyboard features velocity and aftertouch sensitivity, 16 true analog voices and 16-channel multitimbral functionality with full MIDI implementation. The keyboard’s powerful voice engine includes two oscillators per voice with five waveforms each, and two sub-oscillators. To achieve the rich and resonant sound so characteristic of analog synths, Andromeda features 2-pole multimode and 4-pole lowpass classically derived resonance filters. To unleash the potential of Andromeda’s true analog sound, there are 72 knobs and 144 buttons that allow real-time control of virtually every parameter. Other powerful features include MIDI-synchable LFOs, an arpeggiator and an analog-style step-sequencer. To manipulate sounds even further, Andromeda offers a high quality digital effects processor along with a dedicated analog distortion circuit. In addition to the standard pitch and mod wheels, Andromeda also has a large, multi-function ribbon controller that offers an expressive alternative for controlling real-time parameters.

**FEATURES**

- 61-note synth-weighted velocity sensitive keyboard with aftertouch.
- 256 internal preset programs and 128 user programs.
- 16 true analog voices and 16-channel multitimbral functionality with full MIDI implementation.

**True Analog Subtractive Synthesis**

- Two oscillators per voice with five waveforms each (sine, triangle, square, up saw, down saw), and two sub-oscillators.
- A 2-pole multimode resonant filter and a 4-pole lowpass resonant filter per voice.
- Three MIDI-synchable LFOs each with six waveforms and three 7-stage envelopes.
- Portamento with nine slopes, and legato functions.
- Analog-Style Sequencer with 16 steps and four levels. Note, the note’s Velocity, the note’s Gate time (duration), and Type which selects whether a note will play or the step will be a rest.
- Up to 16 user-defined arpeggiators can be created and stored per program (one per voice).

**Hands-On Interface**

- 640 x 240 backlit graphic LCD display provides real world values (time, frequency, BPM, etc.) with high-resolution graphics.
- A total of 72 knobs and 144 buttons allows for real-time control during performances.
- Pitch and mod wheels are provided as well as a large ribbon controller, which offers multiple, assignable functions, and allows for greater tactile control.

**Fully Programmable Effects**

- Two complete effects systems are provided: the first produces a variety of analog-generated distortions (overdrive, classic fuzz box and more) and the other for producing an array of studio-quality digital effects (reverbs, delays, chorus, flanging, pitch-shifting and rotating speaker).
- The digital effects contain a number of single effects plus some very useful multi-effects where two or more single effect generators are linked.

**Inputs and Outputs**

- An extensive audio input/output array provides maximum routing flexibility.
- 16 mono outputs via eight 1/4˝ TRS jacks — one for each of the 16 voices.
- Stereo 1/4˝ main outputs.
- Two 1/4˝ mono aux outputs (jacks)
- 1/4˝ stereo headphone output.
- External audio sources can be routed to the 1/4˝ analog inputs and processed via the A6’s Filters and modulation sources.
- Dedicated 1/4˝ Pedal/CV, Switch and Sustain jacks.
- MIDI In, Out and Thru connectors.

**Conveniences**

- An Auto-Tune function automatically tunes the 16 oscillators that may become detuned due to temperature changes.
- A card slot allows you to save and recall custom programs and mixes to a standard PCMCIA-format memory card.
E-MU

PROTEUS 2000 SERIES

Expandable Sound Modules

There are a total of six single rack space sound modules available in the Proteus family covering a wide spectrum of musical styles from Pop to HipHop and Techno to Classic Synths and Keyboards to Orchestral instruments. Each module features a powerful synth engine with 32MB of sound ROM packed with over 1000 presets, dual stereo 24-bit effects processors, an ultra-fast 32-bit processor and real-time control over an extensive range of synth parameters. In addition, each module can be further expanded by adding any of the large number of Proteus 2000 expansion ROMS. Modules are available with either 64-note polyphony and 16 multitimbral parts or 128-note polyphony and 32 multitimbral parts allowing you to play back complex sequences with timing and expressivity that will meet the expectations of the most demanding composer and producer.

Powerful Synthesis
◆ Up to four synthesizer voices can be layered per preset making it possible to program just about any kind of sound. Layers can be switched or crossedad using key position, velocity, real-time controllers or any modulation source.
◆ 50 different types of 2nd to 6th order deep resonant and modeling filters allow you to shape and modify the raw waveforms.
◆ 64 modulation sources are also provided including three multistage envelopes and two LFOs per layer, as well as full MIDI control over virtually every parameter.
◆ The LFOs and Envelopes can be synced to MIDI clock or to an internal tempo.

Control
◆ The digital patch bay, with 24 cords per layer, (and 12 more cords per preset) allow you connect modulation sources to up to 64 destinations in any imaginable way.
◆ Four front panel real-time controllers can be switched in three layers giving you control over 12 user-selectable parameters. The real-time knobs can also control multiple parameters at once.
◆ Virtually every synth parameter is controllable using the real-time knobs or by any internal or external control source.

Dual 24-Bit Stereo Effects
◆ 24-bit stereo effects allow you to add richness, depth and color to your sound. You can choose from over 60 different algorithms and effects can be linked to each preset or used globally.
◆ The effects section is actually two separate effects processors with control over each wet/dry mix level on four effects sends.
◆ Effects Processor "A" contains primarily ambiance algorithms like reverb and delays, while effects processor "B" contains primarily spectral algorithms such as chorus, flange, phase, distortion, and delay.

Expandability
◆ Each module has between one and three user installable expandable sound ROM sockets for adding any of fourteen available 16MB or 32MB ROM sets.
◆ You can also author your own -ROMS using the E4 Ultra sampler.

Additional Features
◆ The powerful Sound Navigator function makes it easy to find the exact sound you want from the thousands available. It's powerful, yet simple to use.
◆ 12 user-definable alternate tunings, and, of course, an extensive MIDI implementation.

Selected Models Include-
◆ Each module features either 64-note or 128-note polyphony.
◆ Modules may be outfitted with dual 1/4˝ outputs or up to six outputs and a S/PDIF digital output.
◆ Modules may also be outfitted with either 16 or 32 MIDI channels.

SuperBEATS Mode (Available in Selected Models)-
◆ SuperBEATs Mode is a 16-track play-only sequencer that is optimized for live performance and groove creation. It allows you to trigger, latch and unlatch synced loops and grooves from your MIDI controller.
◆ SuperBEATS compatible sound modules include dozens of special 16-part BEATS Riffs created by some of the best producers in the business.
◆ Rhythmic Pattern Generator/ Arpeggiators can play up to 16 synchronized arpeggio patterns at once.
◆ Patterns can be edited using pattern flow commands such as: delay for 2 bars, play for 4 bars, hold for 2 beats and repeat. There are 200 factory patterns included in addition, you can program or download up to 100 user patterns.
E-MU

**PROTEUS 2000 SERIES**

**Proteus 2000**

This powerful 128-voice expandable sound module is E-MU’s first sound module to employ the ultra-fast 32-bit processor, extensive real-time controls and powerful synthesis that allows you to playback complex sequences with remarkable timing and expressivity. The versatile 32 MB Composer soundset offers you 1536 presets (1024 ROM, 512 user) with a wide and highly useful assortment of instruments covering many different styles of music. Three additional 32 MB ROM slots let you add up to 96 MB of additional sounds as well as the ability to author your own custom sound-ROMs using E-MU’s E4 Ultra samplers.

**Proteus 1000**

The Proteus 1000 is a 64 voice expandable sound module that offers the same 32 MB Composer soundset with 1536 presets (1024 ROM, 512 user) and lightning-fast processor as the Proteus 2000. Proteus 1000 also provides you with an additional 32 MB ROM slot, so you can expand your sounds using any of the available Proteus-ROMs including custom sound-ROMs using E-MU’s E4 Ultra samplers.

**Virtuoso 2000**

The Virtuoso 2000 is a 128-voice expandable orchestral sound module with a comprehensive 64 MB orchestral sound set powered by the Proteus 2000 synth engine. E-MU’s sound designers spent months sampling dozens of solo and section instruments, all from the same professional symphony orchestra, to develop an orchestral ROM sound set that is second to none in realism, versatility and consistency. Meticulously crafted into 512 presets that include: violins, violas, cellos, double basses, trumpets, French horns, trombones, bass trombones, tubas, Piccolos, flutes, oboes, English horn, clarinets, bass clarinets, bassoons, contra bassoons, harp, orchestral bells, tubular bells, celesta, metallic, marimba and percussion battery with over 20 instruments.

**Orbit 3**

The Orbit 3 is a 128-voice electronica/dance sound module with a electrifying 64 MB soundset created by famed sound designer Rob Papen - well known for his work on both Access and the Waldorf synths. From fat analog synth patches to “in your face” acoustic dance kits and percussion, Orbit 3 offers fresh, diverse and eclectic dance sounds. The Orbit 3 also employs SuperBEATS mode which consists of multi-layered sequences that you can interact with to create unique performances. Using the front panel, real-time controller knobs, you can manipulate different aspects of a groove or rhythm pattern.

**Mo’Phatt**

Mo’Phatt is a 64-voice Urban Dance Synth that is loaded with the hottest Hip-Hop and R&B sounds and beats. With its 32 MB expandable soundset, 12-pole digital filters, synchronizable/programmable arpeggiators, and interactive SuperBEATS mode, Mo’Phatt has become a production tool staple, found in the studios of many composers, producers and musicians. A Turbo upgrade option increases polyphony to 128 voices, and provides 4 additional outputs (6 total), a S/PDIF digital output, two additional internal ROM expansion slots and 16 additional MIDI channels. Also available with the Turbo upgrade pre-installed.

**Vintage Pro**

The Vintage Pro is a 128-voice retro-styled sound module with a 32 MB soundset that packs an extensive collection of sampled vintage keyboards from the 60’s, 70’s and 80’s, as well as an assortment of samples from E-MU’s B-3 module. Each of the keyboards that were sampled had its own identity, both sonically and from a design standpoint. Using samples derived from the finest vintage instruments available, the Vintage Pro is an indispensable tool for musicians from classic rock and blues purists to the latest in dance music productions.
The Vintage Keys keyboard delivers over 30 classic keyboards in a high quality, 61-note package. The 32 MB soundset includes the legendary synth and keyboard sounds that defined music in the 60's, 70's and 80's. All sounds are optimized for the Proteus synthesis and filter architecture, and many presets were voiced side-by-side with the original instruments, for unmatched realism. Expand your sound palette further using any Proteus expansion ROM to configure your soundset to match your individual sound requirements. Together with its 16 simultaneous, synchable arps, real-time controllers and other performance features, the Vintage Keys gives you an incredible selection of classic keyboard sounds.

PK-6 – Proteus Keys
The PK-6 offers cutting-edge Proteus sounds and features in a high quality keyboard package. The 32 MB composer soundset can be expanded to 128 MB using any of the Proteus expansion ROMs available. The 16 real-time controllers allow you to tweak the PK-6's synthesis architecture and filters, giving you total performance control over your sounds. And the PK-6's 16 synchable/programmable arpeggiators and interactive SuperBEATS Mode let you perform entire pieces in real-time, all in perfect unison. Together with pristine 24-bit DACs and a lightning-fast processor, the PK-6 offers professional results and playability at an incredible price.

XK-6 – Xtreme Keys
The XK-6 is a 61-key Electronica performance/production keyboard that delivers the advanced synthesis architecture and 12th order filters found in the Xtreme Lead-1 Sound Module. A host of interactive SuperBEATS, arpeggiators and effects, all synced to BPM, deliver unprecedented rhythmic control. 16 mute/enable buttons bring beats in and out of your mix on the fly, while the 12 controllers allow you to tweak filters and synth parameters in real-time. The diverse 32 MB Electronica/Techno soundset features everything from cutting lead sounds to drumkits to ethereal pads, and can be expanded using any of the many Proteus expansion ROMS available. You can even create your own custom ROMS using E4 Ultra samplers. Whether it's your main axe or an addition to your arsenal, the XK-6 delivers total sonic satisfaction in an amazing price.

MK-6 – Mo'Phatt Keys
The MK-6 puts Hip-Hop sounds and beats at your fingertips. Based on the sound set of Mo'Phatt, it features a fresh new collection of presets and SuperBeats, giving you hands-on control of your sounds with a host of real-time performance controllers and buttons. And keeping your grooves tight is no problem, as your synth parameters, arpeggiators and interactive SuperBEATS all lock to your master BPM. The 61-key MK-6 ships with a 32 MB soundset that has been carefully crafted by top sound designers to create the first “state-of-the-art” keyboard dedicated to Hip-Hop and R&B. Three additional internal slots accommodate all of the Proteus expansion ROMS available (up to 128 MB total).

They All Feature

- High-performance 61-note keyboards with velocity and aftertouch.
- 64-voice polyphony and 16-part multimbral with a super-fast sound engine for tight layered sounds, arpeggiators and grooves.
- 32 MB soundset, expandable to 128 MB using any Proteus expansion ROMS (three additional ROM slots available).
- 64 multi setups, 640 Factory and 512 User presets with up to 4 layers per preset.
- Over 100 synthesis parameters per preset.
- Dual 24-bit effects processor with over 70 effects parameter including a number of BPM-synced effects.
- Over 50 types of E-MU's legendary 6 and 12th order filters.
- >100 BPM / MIDI1 synchronized parameters per preset.
- Use up to 16 simultaneous arpeggiators that are perfectly synced to each other.
- 300 Factory and 100 User arp patterns.
- Control of the number of steps (up to 32 steps) with Key, Velocity, Duration and Repeat parameters for each arpeggio.
- 2 line by 24 character LCD display.
- 4 programmable real-time control knobs give you instant control over 16 synth parameters including filters.
- Interactive groove control with 16 dedicated trigger buttons.
- Other controllers include: Footswitch, Foot pedal, Modulation Wheel and Pitch Wheel.
- Four 1/4” analog outputs, with 24-bit D-to-A converters, configured as 2 stereo pairs.
- MIDI In, Out and Thru connectors.
- Universal power supply: 90VAC – 260VAC at 50Hz – 60Hz.
- 40.75 width, 13.30” depth, 4.32” height (21 lbs.)
128-Voice Expandable Command Module

The four rack space Proteus 2500 Command Module is E-MU’s 128-voice flagship sound module with three times the processing power of the Proteus 2000, a host of real-time editing controls, a full-featured MIDI sequencer, and USB connectivity to a host computer. This latest processor, combined with high quality 24-bit analog and digital audio outputs, delivers outstanding audio quality. The Proteus 2500 ships with a 32 MB soundset that can be expanded to 128 MB using any of the fourteen Proteus Expansion -ROMS currently available. The Proteus 2500 also ships with over 100 MIDI sequences, allowing you to play and modify existing sequences as well as your own.

FEATURES

- 128 voice polyphony and 32 simultaneous internal MIDI channels.
- 32 MB soundset, 512 presets and 512 user presets, with up to four layers per preset, provides you with a versatile sound palette that includes everything from lush strings and pristine pianos to synth stabs and hip-hop scratches.
- Three internal ROM slots allows expansion to up to 128 MB of sounds using any of the 14 available Proteus expansion -ROMS as well as Flash-ROMS authored using E4 Ultra samplers.
- Over 100 synchronizable synthesis parameters per preset, as well as 50 of E-MU’s legendary 6/12th order filters.
- The internal processor is three times more powerful than the Proteus 2000, delivering better audio performance and flawless MIDI timing of even your most massive sequences.
- Six 1/4” analog outputs with high quality 24-bit A-to-D converters and 24-bit coaxial S/PDIF digital output.
- One MIDI input and two MIDI outputs supports up to 32 external MIDI channels.

16 Track MIDI Sequencer

- Sixteen track sequencer with up to 16 MIDI channels per track can be used in either linear or pattern based modes.
- The sequencer’s intuitive and flexible operating system allows you to select sounds, toggle between real-time, grid, and step record modes, edit parameters, and mix without ever stopping the recording process.
- 300,000 note sequencer memory with room for 512 songs and 1024 patterns
- 384 PPQN resolution
- Standard MIDI File import/export

Multi-channel Pattern Arpeggiators

- 32 simultaneous rhythm patterns or arpeggiators.
- 300 ROM and 100 User Arp Patterns
- Each arpeggio can have up to 32 steps with variable Key, Velocity, Duration, Repeat
- Arpeggiators can be saved with your sequence and can be modified in real-time using the control knobs.

Control

- Over 40 knobs and buttons deliver total hands-on control of all synth parameters (cutoff, Q, attack, delay, etc.) as well as sequencer functions (track mute, pan, volume, BPM, etc.). Up to 24 modulation routing patch cords can be assigned per preset for customizing controller setups.
- Knobs and buttons can be programmed to control all of your external MIDI gear, allowing you to use the Proteus 2500 as the central control system for your studio setup and live performance rig.

24-bit Dual Effects Processor

- Two internal effects processors provide you with over 60 effects algorithms — from tempo-based delays to reverb, distortion, chorus, flanger, phasers and more.

USB Port

- The USB port offers easy connectivity to a host computer allowing you to import and export Standard MIDI Files to and from the computer and accommodate easy software updates from the internet using E-MUs E-Loader application.
Command Stations
The XL-7 and MP-7 Command Stations are tabletop groove-oriented instruments each containing powerful multi-track sequencers and 128-voice synthesizers. Each Command Station features 128-note polyphony, a 16 track pattern based sequencer with real time, grid and step recording capabilities, 13 velocity sensitive pads, 32MB of ROM with over 1000 waveforms, three additional ROM expansion slots, digital output, and over forty performance realtime knobs, buttons and switches. The XL-7 Combines the Proteus 2000 and Xtreme Lead — ideal for High Energy Dance and Electronic music production. MP-7 Combines the Proteus 2000 and MoPhatt soundsets — ideal for Hip-Hop, Rap and R&B music production. The Command Stations can also function as a dynamic MIDI controller that will work with your external MIDI devices via its Sequencer, Arpeggiators, Controller Knobs, Trigger button section and Key Pad.

Control Surface
- The control surface is designed to provide quick and intuitive access to sound and sequence editing.
- One octave keyboard — thirteen velocity sensitive key pads (one octave) with after-touch, transposable over a 7 oct range.
- 16 programmable controller knobs for accessing synth parameters (LFOs, envelopes and filters) in realtime.
- Center detented touch strip
- 2 footswitches
- 4 button switches
- Controllers can be assigned to access external MIDI gear.
- Controller setups can be stored into multi-session setups.

Sounds
- 32 MB sound ROM — 512 ROM and 512 User presets with up to 4 layers per preset
- 128-note polyphony, 16 part multimbral
- 50 types of 6 & 12th order filters
- Expandable to 128 MB using three additional ROM slots — choose from a large selection of Proteus 2000 Sound ROMs to enhance and increase the types of available sounds.

Interactive Sequencing
- 16 track per pattern sequencer with up to 16 MIDI channels per track.
- Realtime, Step and Grid recording modes that can be switched in realtime without interruption to your creative process.
- 384 PPQN timing resolution
- 300,000 note internal sequencer memory with up to 512 Songs and 1024 Patterns
- Tap Tempo control
- 16 internal MIDI channels, 32 external
- 128 factory sequences
- Sequence editing tools include cut, copy, paste, quantize, swing, and more.
- 16 dedicated Mute/Select buttons allow you to add, monitor and modify parts on the fly — perfect for remixing.
- Song mode allows you to chain patterns in a cue list.
- E-MU’s E-Loader program allows you to import and export MIDI files to and from your Mac and PC with ease.

Multi-channel Pattern Arpeggiators
- 32 simultaneous rhythm patterns or arpeggiators.
- 300 ROM and 100 User Arp Patterns
- Each arpeggio can have up to 32 steps with variable Key, Velocity, Duration, Repeat
- Arpeggiators can be saved with your sequence and can be modified in real-time using the control knobs.

Inputs and Outputs
- 6 1/4” analog outputs (configured as 3 stereo pairs) with 24-bit D-to-A converters. Outputs 3 - 6 can be configured as a stereo effects loop.
- Stereo S/PDIF digital output
- One MIDI Inputs and two MIDI Outputs

Other Features
- 2 line by 24 character backlit LCD display plus a 4 Digit 7 Segment LED.
- Optional rack ears for mounting in a standard 19-inch rack (6 rack spaces).
- 2 line by 24 character backlit LCD display plus a 4 Digit 7 Segment LED.
- 12 volt goose-neck lamp adapter
Definitive B-3
John Novello and E-MU present the Definitive
B-3, a diverse collection of tone wheel organ
drawbar settings sampled direct and with rotary
speakers (chorale and tremolo) to give you the
most versatile and playable B-3 available!

X-Lead
X-Lead consists primarily of analog, noise and
modern synthesizer waveforms, which are rich in
harmonic texture and are a perfect match with
the Z-plane filters in your Proteus family sound
module. With the included software upgrade,
you now have access to dynamic and rhythmic
features not found on any other instrument.

Orchestral Sessions Vol. 1
A 32MB collection of the most realistic and
comprehensive section strings — the same
sounds featured in E-MU’s Virtuoso2000 sound
module, complete with legato, spiccato, pizzicato
and tremolando samples, and includes special
presets for 4 speaker applications.

Orchestral Sessions Vol. 2
A realistic and comprehensive collection of
woodwinds, brass, percussion, and solo strings — the same sounds featured in E-MU’s Virtuoso
2000 sound module, complete with velocity
switching between p/mf/ff samples, special pre-
sets for 4 speaker applications and a percussion
battery with over 20 instruments.

World Expedition
An amazing collection of traditional instruments
from the four corners of the globe including
exotic stringed instruments, winds, percussion,
and chromatic percussion. World Expedition
delivers the most realistic ethnic soundset in the
world.

Siedlaczek Advanced Orchestra-
Special Edition
Some of the finest orchestral samples ever from
Peter Siedlaczek, one of Europe’s most respected
sound designers. It brings together the finest
string, brass, wind and percussion ensembles of
Siedlaczek’s legendary Advanced Orchestra
library.

Beat Garden
Dutch sound designer Rob Papen and E-MU
introduce the 32MB Beat Garden expansion
ROM, a diverse palette of all-new
Electronic/Dance beats, synths, bases, drumkits, acoustic and electronic percussion.

Sounds of the ZR
Sounds of the ZR faithfully reproduces the diverse
sounds of ENSONIQ’s popular ZR-76 keyboard,
including William Coakley’s Perfect Piano. You'll
find everything from synths and orchestral instru-
ments in this one soundset.

Pure Phatt
E-MU’s latest Hip-Hop soundset produces the
freshest and newest sounds and grooves from top
notch producers from the East, Southeast and West
coasts. Pumping leads and bases, silky pads and
those unique hits, scratches and drones that your
mix needs to bring it to the next level are ready to
provide the love.

Techno Synth
Rob Papen and E-MU deliver a compilation of
synth, techno, and ambient sounds from one of
Europe’s finest programmers. From atmospheric
pads to punchy sub-basses and crunch drum loops,
these sounds will help you tear up the dance floor!

Protozoa
E-MU presents the ultimate sound compilation
containing presets from the groundbreaking
Proteus sound modules, all optimized for your
Proteus 2000’s advanced synthesis and filter
architecture.

Proteus Pop Collection
The bread and butter sounds of E-MU’s Proteus
2500 module and PK-6 keyboard. Provides 640
diverse presets that cover the sonic spectrum with
everything from traditional keyboards and
orchestral instruments to electric guitars, world
percussion and drumkits.

Ensoniq Project
The sounds of Ensoniq’s acclaimed Urban Dance
Project and Real World collections from their
legendary MR and ASR sound libraries. It features
the Hip-Hop and World sounds heard on countless
hits, all optimized for E-MU’s powerful synthesis
and filter architecture.

Vintage Collection
The 32 MB Vintage Collection delivers the key-
board sounds that defined popular music in the
60’s, 70’s and 80’s. From tonewheel organs and
suitcase pianos to analog and digital synthesizers,
Vintage Collection gives you an all-in-one, no-
compromise source for all your classic keyboard
sounds. Meticulously sampled from the finest vin-
tage instruments available and optimized for the
powerful Proteus architecture.
E-MU

E4 Ultra Series Sampling Synthesizers

E5000 ULTRA • E5000 ULTRA Turbo

The E5000 Ultra is E-MU's most affordable E4 Ultra Series sampling synthesizer. It offers you all access to all of the state-of-the-art features available to the powerful EOS (Emulator Operating System), lightning-fast 32-bit RISC processor and proprietary tools like Beat Munging and Z-Plane filters. In fact, with the exception of its four standard outputs, 64 voice polyphony, 2 fewer ROM slots and new LED backlit display, the E5000 Ultra features the identical hardware and software of its more expensive models of the E4 Ultra line. And with the revolutionary RFX Card option, your E5000 Ultra will push the envelope even further. Never before has Emulator technology been so affordable. The E5000 Ultra Turbo adds a 3.2GB hard drive as well as the 16M B Orbit/Phatt Sessions ROM card with 500 presets derived from E-MU’s Orbit and Planet Phatt sound modules.

E6400 ULTRA

The E6400 Ultra is E-MU’s 64 voice expandable sampling synthesizer that delivers professional results at an affordable price. The E6400 is perfect for the budget-minded professional, providing superior sampling and synthesis flexibility with all of the latest advances in the powerful Emulator Operating System (EOS). The E6400 Ultra is fully upgradeable to E-MU’s top-of-the-line E4XT Ultra, as well as supporting the various available sound-ROMS and Flash-ROMS, allowing your E6400 Ultra to grow with your needs. The E6400 Ultra features Digital Modular Synthesis (DMS), 16MB of RAM (expandable to 128MB), a 48 track sequencer and more. The E6400 Ultra offers you all the features you need to deliver unique, complex and expressive sounds no matter what style of music you create, now and in the future.

E4XT ULTRA

The E4XT Ultra is E-MU’s workhorse digital sampling synthesizer, created for the world of composition, performance and sound design. Equipped with a new ultra-fast 32-bit RISC processor, 128 voice polyphony, a 4 GB hard drive and 64 MB of RAM (expandable to 128 MB), the E4XT Ultra is a professional design tool to realize any sound imaginable. The E4XT Ultra also comes with a comprehensive palette of digital audio sculpting tools like Beat-Munging and Bit Converter, EOS Link software to control the E4 Ultra from your computer desktop, 24-bit dual stereo-effects processor and the capability to author Flash-ROMS for E-MU’s Proteus 2000 sound module. A legend in its own time, the E4XT puts the professional tools you need at your fingertips.

E4 Ultra Series Sampling Synthesizers

Sound Storage
- Arrange up to 1000 samples per bank in up to 1000 presets.
- The SoundSprint function automatically loads presets from the hard disk as you browse through them. You can continue to play while the new preset is loading in the background.
- The Sound ROM option gives you 16 M B of great samples with hundreds of user programmable presets which are always on-line and ready to go.
- A 50-pin SCSI connector is compatible with a variety of storage devices, including external hard disks (up to 18 GB), CD-ROMS, DVD-RAM, Jaz, Zip and more.

Digital Modular Synthesis
- Access up to 128 analog-sounding filters from the 21 different 6th order Z-Plane Filters with variable, cutoff frequency and resonance controls. These Filters include:
  - 12, 24, or 36 dB/octave Low-pass filters with resonance
  - 2nd & 4th order High-pass filters with resonance
  - 2nd & 4th order Band-pass filters with resonance
  - Contrary Band-pass filter
  - Three types of swept EQ filters
  - Three Phasers and one Flanger with resonance
  - Six powerful Morphing filters
- Two LFO's with variable Rate, 17 waveforms, variable Delay, Variation and Sync (key and free run)
- Amplifier Envelope (6 rates, 6 levels)
- Envelope (6 rates, 6 levels)
- Auxiliary Envelope (6 rates, 6 levels)
- The virtual Patch Cord architecture allows you to easily target the Z-Plane filters, LFOs, tuning functions, and three fully independent six segment envelope generators per sample to create any sound imaginable.
- You can create up to 24 Patch Cords derived from 60 sources and 60 destinations.

Advanced DSP
- EOS's advanced digital signal processing (DSP) features make sampling a breeze.
- Undo and Digital Re-Sampling functions
- Samples can be truncated, normalized and placed keymapped automatically. Samples can be controlled dynamically from the keyboard using velocity and positional crossfading and switching functions.
- Auto Correlation, Loop Compression and Crossfade Looping allow even the most difficult sounds to be looped easily.
- Digitally splice and mix samples with other samples.
- Advanced digital processing features such as Compression, Parametric EQ and Digital Tuning let you shape raw samples quickly and with greater precision than computer based systems.

Built-in 24-bit Digital Effects
- The dual 24-bit stereo effects processor allows you to add reverb and chorus effects without having to leave the digital domain.
- There are 76 different effects available, each with a number of controllable parameters.
- Sounds with effects applied can easily be resampled and then saved as an entirely new sound.

File Compatibility
- Roland S-700 & AKAI 3000/1100/1000 sound library compatibility

48-track Linear Sequencer
- The 48-track sequencer contains a host of powerful features such as high resolution cut and paste editing, quantization, data filters, and external sync capability.
- Tweak sequences to perfection with intuitive Copy and Paste style editing and an array of tools which allow you to transpose, quantize, scale velocity or rechannelize tracks.
- Program changes, pan, initial volume, submix, tempo, controller changes and SysEx data can all be stored with the sequence.
- Record and save up to 50 sequences along with each EOS bank.
- Note capacity is dependent upon the amount of RAM installed and how much you have allocated to sequences. As an example, over 400,000 notes can be stored if you have 4 M B of preset RAM.
- The virtual “Jukebox” lets you link up to 7 sequences and play them back in any order.
- Standard MIDI files (format 0 & 1) can be read and played back direct from a DOS floppy disk and saved to a hard drive.

Arpeggiator
- The arpeggiator is a powerful and easy to use performance-oriented function that moves a pattern of notes sequentially over a range of the keyboard.
- Control is provided for tap tempo, octave extension, note value divisior as well as the note pattern (up, down, or up and down or random).
- Arpeggiated notes can be recorded into the sequencer and are transmitted on the MIDI Out port.
- Beat Munging: Analyzes drum loops and phrases and allows you to change tempo, time signature, swing and individual beats in real-time.
- Time Compression and Expansion: Shortens or lengthens the sample time without changing the pitch.
- Pitch Change: Changes the pitch of a sample without altering the time.
- Transform Multiplication: Creates weird and wonderful new timbres.
- Aphex Aural Exciter: Adds brilliance and sheen to your samples.
- Dopplerization: Moves samples forward and backwards in space as well as from side to side.
- FIR Filters: Non-realtime digital filters with “Ultra” high Q values and phase-linear filter response.
- Bit Converter: Removes unwanted bit resolution from your samples.
**RFX-32**

**Digital Effects and Mixer Card**

Take a giant step into the future of sampling and synthesis with the RFX-32 digital FX/mixer card for E-MU’s E4 Ultra Series Sampling Synthesizers, and blur the line between MIDI and Audio forever. Transform your sounds at the sample level with 32-bit effects, run external signals through E-MU’s patented morphing filters and synthesis architecture, and then blend and modulate them in real-time using your MIDI controller. Take total control of your sound with the RFX-32.

- 16 studio-quality 32-bit stereo effects-large effects polyphony means you can have all those specialty effects as well as plenty of fat reverbs spread across RFX’s many mixing busses
- Multiple FX setups and routing configurations-program each sample with its own exact blend of effects (up to 4 stereo sends with amount per voice)
- External signal processing through FX, filter and synthesis architecture-your E4 Ultra becomes a world-class digital effects/filter/mixing system with up to 16 inputs
- Multi-bus resampling-blend external and internal audio with powerful effects to create new samples
- Perfect Live System with instant recall of multiple RFX and MIDI setups-your E4 Ultra becomes the perfect centerpiece of your live and studio rig for mixing, effects and samples
- MIDI synchronization of FX parameters
- Support for new 24-bit analog and ADAT I/O cards

#### Voltage Input:
- 100-250 VAC, 50/60Hz auto select

#### Maximum Output Level:
- +10 dBv

#### Output Sample Rate:
- 44.1Khz, 48Khz

#### Analog Inputs/Outputs:
- Balanced Stereo 1/4”

#### Digital Inputs/Outputs:
- AES/EBU (optional for E6400, E5000), Optional 16 out/8 in ADAT card
Music Workstations

The TRITON Le inherits the main functionality of the "classic" TRITON music workstations within a streamlined and cost-effective package. There are three TRITON Le models available: the 61-key TRITON Le 61 and the 76-key TRITON Le 76 both featuring synth action keyboards; and the 88-key TRITON Le 88 which employs a piano weighted, graded hammer action. Featuring Korg's HI (Hyper Integrated) synthesis technology, TRITON Le provides 62-voice polyphony. The 61-key and 76-key TRITON Le models offer a robust 32MB of PCM ROM that provide numerous classic TRITON Programs and Combinations, along with a host of cutting-edge sounds geared toward electronic music. The TRITON Le 88 adds an additional 16MB piano-based ROM samples. The user-installable EXB-SMPL Sampling option adds two mic/line audio inputs, SCSI, and supports 16-bit 48kHz linear mono/stereo sampling along with the sophisticated sample waveform editing functions you'd expect to find in a dedicated sampler.

FEATURES

TRITON Sound Data
- 512 Programs (448 factory and 64 user) and 24 drum kits are available in internal memory. 128 programs and 9 drum kits are also included for GM compatibility.
- Programs and drum kits are derived from 32 Megabytes of internal PCM ROM using Korg's HI (Hyper Integrated) synthesis system and high-quality 48 kHz sampling. These samples are divided among 425 multisamples and 413 drum samples and cover a broad range of instruments from piano, guitar, brass, strings and tuned percussion to cutting modern synth sounds. The Triton Le 88 uses 48 Mbyte of PCM ROM and 492 multisounds.
- There are also 384 Combis available each comprised of up to eight Programs that can be layered, velocity layered and split. Combinations are a great way of creating rich textures and for configuring complex live performance setups.
- 62 note polyphony in single oscillator mode and 32 note polyphony in double oscillator mode.

Studio Quality Effects
- There are a total of four independent studio quality effects processors available, based on 89 effects types, including one stereo insert effect, two master effects and a master 3-band EQ.
- Effects types include: filter and dynamics effects, such as EQ and compressor; Pitch and phase modulation effects, such as chorus, phaser, rotary speaker and pitch shifter; early reflection, delay effects and reverbs; as well as a number of mono and mono-chain effects in which two mono effects are connected in series.
- Each effect is fully editable and many of the effect's parameters can be controlled in real time.
- The BPM/MIDI SYNC function allows you to synchronize the modulation/delay time of effects to the internal or external tempo. You can specify each delay time as a note value, easily setting up rhythms that will follow any changes that occur in the tempo of the arpeggiator, sequencer or external MIDI clock.

Full-featured 16-track Sequencer
- The 16 track / 16 part multimbral sequencer features a 200,000 note/event, 200 song capacity and offers the flexibility to record in real or step time.
- The Cue List allows you to assemble your song from separate elements (Intro, Verse, Chorus, Bridge, etc.), and even convert them back into a single song for further recording or editing.
- 150 preset drum patterns and 100 user patterns are provided.
- Track Looping lets you play back specified measures of a track as a loop.
- The Template Song function provides 16 presets and 16 user template memories containing program and effect setups appropriate for various styles of music.
- Sequence data can be saved as SMF format 0 or 1, making it simple for you to exchange data with other sequencers.

USER-INSTALLABLE EXB-SMPL SAMPLING UPGRADE

- The sampling upgrade supports 48-kHz 16-bit linear mono/stereo sampling and adds two mic/line switchable inputs with a variable gain knob as well as a SCSI interface.
- The EXB-SMPL Board comes standard with 16M B of SIM M memory, which allows about 2 min / 54 secs of monaural sampling, and can be expanded to a total of 64-M B using two 32M B Fast Page or EDO-compatible 72-pin SIM M modules with an access speed of 60 nsec or faster.
- Sophisticated waveform editing functions include Crossfade Loop, Truncate, Normalize, Time Slice, Time Stretch and Sample Rate Convert.
- The SCSI interface is compatible with a wide range of storage media and will allow you to access CD-ROM sound libraries including AIFF, WAVE, AKAI S1000/3000 (samples and multisamples) as well as Korg format data.

Dual Arpeggiator
- Two powerful polyphonic arpeggiators can be used to create intricate and expressive pitched patterns or drum grooves. One arpeggiator can be assigned within a Program, and two arpeggiators can be assigned in Combi and Sequencer modes. The arpeggiators can be synchronized to MIDI clock, internal clock and can be recorded into the internal sequencer.
- There are five Preset patterns (UP, DOWN, ALT1 ALT2, RANDOM ) available as well as 216 User patterns.

RPPR (Realtime Pattern Play/Recording) Function
- The RPPR function allows you to trigger up to 74 different sequences directly from individual keys on the keyboard.

Four Outputs
- The sound from each oscillator, drum, timbre/track, or insertion effect can be freely assigned to the 1/4” L/MONO and R main stereo audio outputs or two additional individual audio outputs.
- MIDI In, Out and Thru connectors are provided for interfacing with external synth, samplers, sequencers, etc..

Memory Back-Up
- Internal memory (Program, Combi, Sequence and sample data) can be backed up onto SmartM edia cards (3.3V, 4M B - 128MB) or external fixed and removable drives via the optional, user-installable EXB-SMPL Sampling/SCSI upgrade board.
- SmartM edia cards can also be used to exchange data with your computer via the readily available adapters commonly used with digital cameras.

User Interface
- The AUDITION key allows you to preview Programs using a selection of musically-appropriate riffs while the CATEGORY key allows you to find Programs and Combris quickly and easily as well as selecting oscillator waveforms and effect algorithms.
- Large, backlit 240 x 64 pixel LCD display

HI Synthesis
- HI (Hyper Integrated) synthesis is Korg’s system for manipulating PCM sound data. By filtering, shaping and modulating the Triton’s high-quality PCM data and then processing the result in the powered-up effect section, Triton can create richly expressive and nuanced sounds.
- Internal PCM samples or your own custom samples can be assigned to an oscillator, and processed via the filter, EG’s and LFO sections.

Dual Arpeggiator
- Two powerful polyphonic arpeggiators can be used to create intricate and expressive pitched patterns or drum grooves. One arpeggiator can be assigned within a Program, and two arpeggiators can be assigned in Combi and Sequencer modes. The arpeggiators can be synchronized to MIDI clock, internal clock and can be recorded into the internal sequencer.
- There are five Preset patterns (UP, DOWN, ALT1 ALT2, RANDOM ) available as well as 216 User patterns.

Memory Back-Up
- Internal memory (Program, Combi, Sequence and sample data) can be backed up onto SmartM edia cards (3.3V, 4M B - 128MB) or external fixed and removable drives via the optional, user-installable EXB-SMPL Sampling/SCSI upgrade board.
- SmartM edia cards can also be used to exchange data with your computer via the readily available adapters commonly used with digital cameras.

User Interface

HI Synthesis
- HI (Hyper Integrated) synthesis is Korg’s system for manipulating PCM sound data. By filtering, shaping and modulating the Triton’s high-quality PCM data and then processing the result in the powered-up effect section, Triton can create richly expressive and nuanced sounds.
- Internal PCM samples or your own custom samples can be assigned to an oscillator, and processed via the filter, EG’s and LFO sections.

Dual Arpeggiator
- Two powerful polyphonic arpeggiators can be used to create intricate and expressive pitched patterns or drum grooves. One arpeggiator can be assigned within a Program, and two arpeggiators can be assigned in Combi and Sequencer modes. The arpeggiators can be synchronized to MIDI clock, internal clock and can be recorded into the internal sequencer.
- There are five Preset patterns (UP, DOWN, ALT1 ALT2, RANDOM ) available as well as 216 User patterns.

Memory Back-Up
- Internal memory (Program, Combi, Sequence and sample data) can be backed up onto SmartM edia cards (3.3V, 4M B - 128MB) or external fixed and removable drives via the optional, user-installable EXB-SMPL Sampling/SCSI upgrade board.
- SmartM edia cards can also be used to exchange data with your computer via the readily available adapters commonly used with digital cameras.
TRITON • TRITON PRO

Music Workstation / Sampler

The classic 61-key TRITON and 76-key TRITON Pro represent where the legendary TRITON series began. Employing Korg’s HI (Hyper Integrated) synthesis system along with powerful sequencing, onboard sampling, built-in effects and a wide selection of user installable options, the classic TRITON series is still on the cutting edge of music workstation technology. Both TRITON models contain 32MB of internal PCM waveform ROM, 425 multisamples and 413 drum samples, that range from edgy dance/techno synths to real-world instruments. Both TRITONs come with the EXB-SMPL sampling board already installed and includes 16MB of RAM that can be easily upgraded to 64MB using standard 72-pin SIMMs modules. Both models also feature Korg’s intuitive TouchView Graphical User Interface that will have you zipping around the TRITON’s extensive programming, sequencing and performance capabilities with style and grace. The TRITONs also add an assignable ribbon controller allowing even greater expressiveness to these already inspiring synths.

◆ The internal memory is re-writable and contains 640 Programs, 512 Combinations and 64 drum kits.
◆ 256 programs and 9 drum kits are also provided for complete compatibility with the latest GM Level 2 specification.
◆ Floppy disks or an external fixed or removable SCSI drive (optional EXB-SCSI interface board required) can be used to back up this data, or to create your own data library.

Outputs
◆ Sounds can be freely assigned to the 1/4” stereo outputs or to any of the four 1/4” individual outputs.
◆ External audio sources can be routed through the sampling input and processed using insertion and master effects.

Effects Section
◆ The Effects section consists of five stereo insert effects, two master effects, a stereo three-band master EQ and a mixer that controls the routing of these effects.
◆ Insertion effects can use any of the 102 available types, and the master effects can select from 89 types.
◆ In addition to standard effects like reverbs, chorus and delays, Triton has unusual effects such as stereo random filter and ring modulator.
◆ A vocoder effect is also available that can control internal sounds via the sampling input.

All the features of the TRITON LE Plus—

TouchView GUI
◆ All functions and parameters are displayed in a large and highly-visible 320 x 240 pixel screen using Korg’s original TouchView Graphical User Interface that lets you perform operations smoothly just by touching the screen.
◆ A ribbon controller and an assignable slider and two assignable pedal inputs.
Expandable Sound Module / Sampler

The TRITON-Rack is a two rack space module that features the same high quality sound, effects and sampling functionality of the TRITON Workstation/Samplers with a few enhancements including an increased number of program and combination locations along with significantly more expansion and digital I/O possibilities. In Multi mode the TRITON-Rack functions as a 16-part multi-timbral tone generator with 60 voices of polyphony and offers room for up to 2,057 programs and 1,664 combinations of up to eight timbres each. To navigate this vast array of sounds, the TRITON-Rack features an Audition Riff function that can playback 382 different riffs tailored to various types of sounds. The TRITON-Rack provides room for up to eight PCM expansion boards, allowing you to expand the PCM wave memory from a very respectable 32MB to a whopping 160MB. In addition, up to 96MB of sample memory may be added via three SIMM slots. The TRITON-Rack also supports the SCSI and MOSS options that are currently available for the TRITON keyboards. The TRITON-Rack provides 60-voices of polyphony and functions as a 16-part multi-timbral tone generator that can play back tracks from an external sequencer or from the internal playback-only sequencer.

**FEATURES**

- The same powerful 48 kHz 16-bit linear mono/stereo sampler section as the TRITON keyboards, plus the ability to export samples as .WAV and AIFF files for editing samples on computer systems or use on other products, such as Korg's ELECTRIBE-S.
- Room for up to eight PCM expansion boards, each with their own dedicated bank for programs and combinations.

**Sampling**

- 48 kHz 16-bit linear mono/stereo sampling with visual waveform editing, Time Slice, Time Stretch, Crossfade Loop, and more.
- 16 M B of sample memory is included, expandable to up to 96M B using three 32 M B 72-pin SIMMs.
- Export samples as .WAV and AIFF files for editing samples on computer systems or for use in other products, such as Korg’s ELECTRIBE-S.
- The optional EXB-SCSI SCSI Interface Board will allow you to load and save data on an external SCSI device, and load AKAI sample data from CD-ROM.

**Multi Mode**

- You can edit and store a maximum of 200 Multis consisting of up to 16 programs with transposition settings along with five insert and two master effects.
- You can use Multis for playing back tracks from an external sequencer or the Internal playback-only sequencer which supports TRITON and Standard MIDI File (Format 0 and 1) sequence data.
- Time-sliced pattern data, from the sampler, can be saved as MIDI data (SMF file) and loaded into an external sequencer.

**Arpeggiator**

- The dual polyphonic arpeggiator provides access to 5 preset and 328 User patterns – 200 patterns are preloaded.

**User Interface**

- 240 x 64 dot backlit LCD display
- Four realtime controller knobs (with 3-step selector), Arpeggiator ON/OFF key.
- 3.5 inch, 2DD/2HD compatible Floppy Disk Drive

**Expanded TRITON Stereo Digital Multi-effects System**

- Access up to two master effects (mono in, stereo out), 5 insert effects (stereo in / out), 1 master EQ (3-band stereo) simultaneously per multi.
- Choose from 102 insert and master effects types

**Inputs and Outputs**

- Six 1/4” outputs (two main and four individual), plus SPDIF optical digital I/O included standard.
- 1/4” stereo headphones outputs with level control for the Main and Headphones.
- Two 1/4” mic / line switchable inputs with volume control for sampling.
- MIDI In, Out and Thru connectors

**I/O Options**

- EXB-DI Digital Interface Board – 6-channel ADAT optical output
- EXB-mLAN mLAN FireWire audio/MIDI interface
TRITON STUDIO is Korg’s most advanced and expandable music workstation ever. Available in 61 and 76-key synth action versions, as well as an 88-key weighted action model, each TRITON STUDIO combines Korg’s HI (Hyper Integrated) synthesis technology, effects, sampling and sequencing into what can only be described as a sonic powerhouse. The addition of an internal CD-R/W burner not only facilitates a convenient means of backing up and loading samples and sequence data, it also allows you to create an audio CD of your finished work. In addition to the original “classic” TRITON PCM ROM, TRITON STUDIO also offers 16Mb of ROM devoted to a stereo acoustic grand piano - resulting a total of 48Mb of internal PCM ROM. TRITON STUDIO is also the first TRITON to feature Korg’s Open Sampling System, which allows direct access to sampling and resampling functionality from within the Program, Combination or Sequencing modes, as well as from the Sampling Mode.

**All the features of the TRITON Plus—**

- Three models are available: 61/76 note synth action and 88 note weighted action keyboards using Korg’s RH2 graded hammer action.
- Ultra-powerful processor with 6 times the power of the Triton and 2 times the Karma.
- Expandable to a total 256 MB of waveform data:
  - 48 MB of PCM ROM onboard, with 429 multisamples and 417 drum samples
  - Includes a 16 MB stereo acoustic piano with two levels of velocity switching.
  - Room for up to seven PCM expansion boards
- There are 1,536 Programs (512 preloaded) and 1,536 Combinations (512 preloaded) available in user writable memory locations as well as 144 user drum Program locations (20 preloaded) — Open memory locations can be used for sounds that you edit/create, load from expansion board packages or get from other sources
- An additional 256 sounds and 9 drum kits are provided for GM 2 compatibility.
- 120 note polyphony
- Expandable to up to 96 MB of sample memory (16 MB included standard)

**Create Audio CDs**

- An optional internal CDW/R drive is available for burning audio or data CDs as well as ripping samples from audio CDs.
- A 5 GB internal hard drive is provided for backing up samples
- The internal hard drive is also available as a two track HD recorder that allows you to record live audio, or sequenced tracks onto two dedicated tracks. Audio can be recorded through onboard effects, and a number of editing functions are available.

**Re-Sampling**

- Resampling is possible in Program, Combination and Sequencer modes using the full functionality of each mode (filters, effects, arpeggiator, sequencer, etc.):
  - Sample keyboard phrases in realtime; or bounce an entire mix from the 16 track sequencer to a two track .Wav file.
  - The In-Track sampling function allows you sample external audio sources directly into the sequencer while your track is playing.
  - Samples recorded to hard disk can be loaded into sample memory for editing and use in Programs and drumkits.

**Enhanced TouchView Graphic Interface**

- The enhanced, easy-to-read 320 x 240 pixel TouchView graphical user interface is faster than ever and provides visual waveform editing for samples, a clean mixing layout for sequencing and a logical, category-based system for finding sounds, effects and even waveform data.
- 24-bit optical (S/PDIF) I/O is provided with support for both 48 kHz and 96 kHz audio sources.
Music Workstation with Variable Performance Modeling

The KARMA is a totally unique Music Workstation that combines the sounds, effects and sequencing capabilities of Korg's award-winning TRITON with a powerful realtime performance modeling technology called KARMA. The result is a workstation that provides an unprecedented amount of user-interaction that will allow you to reach, what was once considered, unobtainable expressive control of your musical ideas. KARMA stands for Kay Algorithmic Realtime Music Architecture and is the invention of musician/programmer Stephen Kay, who has worked closely with Korg for the past seven years to integrate and further enhance KARMA's functionality. Based on the notes and chords that are played, KARMA will automatically generate and manipulate phrases and patterns that are impossible to produce with conventional arpeggiators or static pattern playback functions. KARMA can produce anything from unhuman electronic rhythms and melodic textures to acoustic emulations of harp glissandos and finger-picking and provides control over almost 400 musical elements that allow you to interact with the phrases intuitively, and to change them in ways that can range from subtle to extreme.

FEATURES

KARMA Function (Variable Performance Modeler)
- Karma (Kay Algorithmic Realtime Music Architecture) is a patented algorithmic MIDI data generating technology that takes input notes, chords and controller movements to generate complex and sophisticated musical phrases and effects.
- Phrases and patterns are produced by a GE (Generated Effect). Each GE consists of nearly 400 parameters, such as note data, rhythm development, chord structure and velocity. Of these, 16 parameters are available for realtime control.
- There are over 1000 types of phrase or pattern available covering a wide range of instruments, playing styles and musical genres: Create swirling cascades of complex interweaving notes, tricked-out techno arpeggios, dense rhythmic and melodic textures, natural sounding glissandos for acoustic instrument programs, guitar strumming and finger-picking simulations, to name a few. And because phrases and patterns can evolve in response to realtime controller movements, your performance will never sound "canned" or static.

Realtime Control
- 61 note, synth action keyboard, Karma Realtime control knobs 1-8, plus Joystick & latching controller switches.
- Alternate Modulation and Effect Dynamic Modulation functions allow you to freely assign modulation to parameters that affect the pitch, filter, amp, EG, LFO, and effects etc.

HI Synthesis System
- Includes the same HI synthesis system and 32MB of PCM wave ROM with 425 multisamples and 413 drum samples as the classic TRITON.
- 640 user Programs and full General Midi level 2 with 256 Programs and 9 Drumkits. 768 user programmable Combi sounds and 64 User Drumkits.
- 5 Stereo Insert and 2 Stereo Master Effects, with 102 different effect types available and a Master EQ section.
- The 16 Track Sequencer has the same capabilities as the classic TRITON with the added ability to capture the performance of KARMA phrases and patterns.

KARMA MW Software
- KARMA MW software allows PC and Mac users to access all internal parameters of existing GE's as well as make new ones via their computer. KARMA MW also offers the ability to import SMF phrases and grooves (from any SMF source) as well as TRITON Arpeggiator data and convert them into GE's.

Connectors
- Left and right 1/4" main outputs plus two 1/4" individual outs.

Options
- Up to two TRITON series PCM expansion boards can be installed, for a total of 64 Mbytes of waveform data. The six-voice MOSS DSP Synthesizer Board can also be installed (EXB-MOSS), allowing you to use both DSP and PCM synthesis technologies without connecting external equipment.
Korg offers a variety of user-installable ROM and I/O options for enhancing your TRITON Music Workstation including a number of 16 MB PCM data boards, each consisting of high-quality PCM data and 128 programs and 128 combinations.

The MS2000 44-note velocity keyboard and the MS2000R 4U rack-mount are analog modeling synthesizers that use the latest DSP technology to recreate the coveted analog sounds and hands-on functionality of Korg’s classic M20 analog synth, VC-10 vocoder and SQ10 analog sequencer. All major sound creation parameters are available on the front panel, with 35 dedicated knobs providing the ability to create and manipulate sounds in real-time. MS voices are built around two multi-waveform oscillators and a noise generator and have access to four types of analog-style filters, dual ADSR envelopes and two MIDI-synchable LFOs along with dedicated volume, pan and distortion controls. The Korg M2000 is housed in a futuristic metallic blue-green body, with the keyboard version echoing traditional analog instruments with rosewood side panels. The rack-mount M2000R can also be used on a tabletop. Both have an angled front panel for excellent visibility and easy operation.

**Hierarchy**
- There are a total of 128 programs divided into 8 banks of 16 sounds.
- Each program can contain one or two timbres (4 voices total), effects and an arpeggiator— if two timbres are used, they can be split, layered or accessed independently from different MIDI channels.
- Each timbre consists of Osc1, Osc2, and Noise followed by a Mixer that allows you to adjust the levels of each.
- The tone generator uses a DSP-powered analog modeling system based on the KORG Prophecy, Z1, and Electribe series and has been further refined to produce a wide range of sounds. From sharp, cutting leads to powerful and thick pads.
- OSC1/OSC2/NOISE
  - OSC1 allows you to select from eight different oscillator algorithms, including basic analog synth waveforms such as SAW and PWM, Cross Modulation, and 64 DWGS (Digital Waveform Generator System) used on the Korg DW-8000 synthesizer.
  - OSC2 allows you to select from three types of oscillator algorithms: SAW, SQU, and TRI. It can also be used as a modulator oscillator for the Sync or Ring modulation characteristic of analog synthesizers.
  - You can also mix NOISE into the signal.
  - There are a total of 70 possible waveforms which can be “wave-sequenced” using the Mod Sequencer.
- All of the analog-modeled waveforms include modulation/shaping to help recreate the sound of pulse width modulation as well as generating frequency modulation from the Cross Wave.
- Oscillator 1 can be linked to Oscillator 2 for Ring Mod and Sync timbres
- External audio signals can even be used as a waveform, and processed and modified with filter, effects, and parameters.

**Mixer**
- The mixer section allows you adjust the levels of OSC1, OSC2 and NOISE, and send the combined signal to the Filter section.

**Filter Section**
- Four filter types are available: 12 and 24 dB low-pass as well as band pass and high pass, each with variable resonance that can be adjusted into self-oscillation.

**AMP Section**
- In addition to volume and pan controls for each timbre, the amp section provides a Distortion on/off setting so that even soft sounds can be transformed into aggressive solo parts.

**Envelope / LFO Section**
- Dual ADSR envelope generators and two four-waveform MIDI-synchable LFOs provide flexible sound shaping control.
Mod Sequence
- The Mod Sequence function allows you to apply time-variant changes to sound parameters in a way similar to varying the control voltage on an analog synthesizer.
- Each timbre can have up to three sequences with up to 16 steps each.
- Sixteen knobs on the front panel allow you to set the value for each of the 16 available steps. Knobs can be operated in realtime, and you can record the movements of the parameter values in each step using the Motion Rec function.
- In addition to the 28 parameters on the front panel, you can apply time-variant change to the pitch or step length.

16-band Vocoder
- A powerful 16-band, four voice vocoder modeled on the classic Korg VC-10 is also provided. You can use vocal, using a microphone connected to Audio In 2, or rhythm sounds as an input source.
- The vocoder uses two 16-bank filter sets to simulate the vocoder sounds. Original vocoder sounds can be created by shifting the filter frequency, or adjusting the level and pan of individual frequency bands.

Inputs and Outputs
- Left and Right 1/4˝ line level outputs and a 1/4˝ stereo headphone output.
- Two 1/4˝ inputs are provided allowing you to use an external source as an waveform for the oscillator 1. Input 2 can be switched to accommodate mic or line level signals.
- MIDI In, Out and Thru connectors and two footswitch inputs (one switch and one pedal) are also provided.

User-Programmable Effect Section
- The programmable effects section provides each program with access to a modulation effect (phasor, chorus/flange and ensemble), three types of delay, and 2-band EQ.

Virtual Patch
- The Virtual Patch system, based on the patching capabilities of the legendary Korg PS series and MS series synthesizers, delivers an array of rich creative possibilities. It allows you to use the EGs, LFO, velocity or keyboard tracking as modulation sources to affect parameters such as pitch, noise level, and pan.
- You can select up to eight sources and destinations directly from the front panel.

Classic Korg Instruments to Return in Virtual Form
Korg has a long history in the world of synthesizers and they will now be bringing many of the classic, discontinued instruments back to life for digital studios in the form of virtual instruments - the Korg Legacy Collection. Korg uses Component Modeling Technology (CMT), to model the components that make up the signal chains of the instruments and how they interact in the original hardware instruments.

Currently, Korg has only confirmed that they will be producing virtual instrument versions for three of their synths: the MS-20, Polysix, and Wavestation.

Others Korg models are expected to be recreated as well, however.

The plug-ins will be available for both Windows and Mac OS (VST and AudioUnit formats). Release is expected in the third quarter of this year (2003). More details will likely be released at the Summer NAMM show in July.

Korg has created a special preview section on their web site, currently offering a video summary with an audio track produced with preliminary versions of the Legacy Collection instruments.
Analog Modeled Synth/Vocoder

The microKORG delivers state-of-the-art analog modeling and multi-band vocoding in a compact, portable instrument. With 37 keys and 128 user-rewritable programs, the microKORG Synthesizer/Vocoder is perfect for any performer, producer, computer musician or beginner looking for an affordable synthesizer. The microKORG offers you the quality sounds and features you expect from Korg at a price that will astound you. The microKORG's compact size is perfect for the musician or DJ looking to add a portable synth to their setup. It's also a great choice for use in a computer-based music setup. And because the microKORG will run on battery power, it is the perfect choice for using with your laptop computer. The beige-gold body, wooden side panels and retro-influenced design, the microKORG has a look that's both vintage and funky.

FEATURES

Powerful Synthesis

- 128 great-sounding presets, including 16 vocoder programs are available covering a wide range of contemporary and vintage musical styles.
- The same dual-oscillator DSP synthesis engine, arpeggiator, and effects found in Korg's critically acclaimed M2000 and offers a wider selection of waveforms than any other modeled synth.
- Multi-Mode resonant filter, two ADSR envelope generators and two MIDI-synch-able LFOs.
- The Virtual Patch matrix allows you to create advanced modulation settings, providing an unprecedented level of control over synth parameters at this price range: route the Mod Wheel to control filter cutoff or pulse width; use an LFO to control panning or amp level, etc.

Classic Vocoding

- An 8-band vocoder including its own microphone.
- The voice formant capture function allows you to “freeze” the formants of your voice, and then play it across the keyboard, or shift the formant frequency to make your voice sound male, female, or childlike, etc.

An Ideal Compact MIDI Controller

- 37-note velocity-sensitive mini-keyboard with Pitch Bend and Modulation wheels.
- All editing parameters are located on the panel for easy access to any function.
- A large dial and LED illuminated buttons provide easy program selection even on a dark stage.
- Five realtime knobs on the front panel that not only provide flexible realtime control over filter cutoff, attack, release and other important parameters. The knobs can be used to transmit MIDI CC messages for controlling both hardware and software synthesizers.

Audio and MIDI I/O

- Two external audio input jacks permit you to run other instruments, CDs and more through the microKORG’s filter and effects. This allows you to process sounds in creative ways.
- 1/4” left and right outputs as well as a 1/4” stereo headphone output.
- MIDI In, Out and Thru connectors
Dynamic Effect/Controller

The KP-2 is Korg’s second generation KAOSs PAD, an innovative sound manipulation tool that has become a must-have item for the cutting-edge DJ and remix artist. Using the concept of “the effect processor as musical instrument”, the KP-2 allows real-time control over digital effects processing for any audio source (records, CDs, samplers, keyboards, voice). The KP-2 puts 100 killer effects, along with synthesizer and sampling functions, quite literally, at your finger tips - an unique X-Y Touch Pad allows you to control effects parameters with the touch (or sweep) of a finger. A wide variety of functions are provided to augment the X-Y pads realtime capabilities including: input mute (Transform), Pad Notion record/playback, effect Hold and more. Plus, MIDI I/O allows the KP-2 to control or be controlled from external sources. The KP-2’s compact size allows it to be easily integrated in to your studio or DJ rig.

FEATURES

Realtime Control

◆ The Touch Pad controller provides unique and intuitive ways of manipulating effects using your fingertip.
◆ The Pad Motion function lets you record and playback complex finger movements on the touch pad.
◆ The Hold switch lets you freeze the effect setting at the current location of the X-Y pad. The effects depth knob allows you to adjust the exact mix of effects desired.
◆ A Mute function, aka “Transform” in DJ speak, allows you to cut off the incoming signal leaving the effect’s “tail” or gate the input to create interesting rhythms.
◆ MIDI IN/OUT is provided, letting you control the KP2’s effects via MIDI IN from an external sequencer.
◆ The color of the pad changes dramatically according to your finger position and the type of effect (delay or reverb, etc.), adding an even greater impact and visual feedback during performances.
◆ 100 different effect programs can be easily selected by turning a knob, and can be assigned to any of eight programmable buttons for immediate recall.

Effects

◆ 13 effects types including: Filter, Isolator, Distortion, Wah, Talking Modulator, Flanger, Vibrato, Tremolo, Slicer, Auto Pan, Phaser, Pitch Shift, Delay, Ping-Pong Delay, Tape Echo, Multi Tap Delay, Reverb, Gate Reverb, Reverse Delay, Ring Modulator, Broken Modulator.

Sampling

◆ You can sample any incoming audio (up to 6 seconds each at 44.1 kHz) onto two sample playback keys.
◆ You can sample through the effects, play a sample through a new effect, or even resample a sound through effects.
◆ Samples can be modified using a variety of effects (such as time stretch, reverse playback, loop time modulation and pitch change). This is ideal for integrating sampled effects into a live performance situation or create sound material for further sampling.

Synthesis

◆ A wide variety of cool analog modeling synth and drum sounds, drum patterns, slicer, vocoder and other essential DJ effects are also provided.

BPM Control

◆ The BPM function allows effects to be synchronized to the tempo of the music.
◆ The Auto BPM function can detect the tempo from an incoming audio source or MIDI Clock.
◆ BPM can also be set using the Tap tempo button.

Inputs and Outputs

◆ Independent stereo RCA Line and Phono inputs and a 1/4” Mic input
◆ Stereo RCA line outputs
◆ 1/4” TRS stereo headphone output with volume control
◆ 20 bit linear A-to-D and D-to-A converters
◆ MIDI In and Out connectors allow you to use the KP-2 as both a MIDI controller for synths, samplers, effects or other external devices and as a unique, MIDI controlled effects processor/sampler for sequencing and remixing applications.
◆ Includes DC12V AC adapter and Touch panel protection sheet.
◆ The compact size (8.03” W x 8.15” D x 1.89” H)
Analog Modeling Synth

The ELECTRIBE·A (EA-1) is a compact tabletop analog modeling synth with an onboard sequencer and a host of realtime controllers designed to allow you to create and record phat analog synthesizer, bass, and sound effect sounds. Operation is easy and intuitive because the results of tweaking any of the realtime knobs is reflected immediately in the sound. The sounds you create on this compact synth can be input to the internal sequencer to create phrases. The ELECTRIBE-A’s high quality sound is descendant from the DSP synthesis technologies used on the Z1 and Trinity V3 MOSS synthesizer engines, as well as the legendary Prophecy synthesizer platforms. Having produced classic analog synthesizers such as the “Mini Korg 700,” the “PS series,” and the “MS series,” Korg has a long history of analog sound creation experience. And with that heritage, Korg’s ELECTRIBE·A provides the ultimate in analog modeling to give you the richest, most versatile analog-style sounds that are sure to inspire today’s electronic dance music artists—from DJs to remixers to producers.

Step Sequencing

- Two tone generators (or parts) based on the analog modeling technology made famous on Korg's “Prophecy” and “Z1” synthesizers generate the warm, fat tone and rich distortion that make analog sounds stand out.
- Each of the two parts has access to two VCOs (Voltage Controlled Oscillator) with a choice of Saw, Triangle and Square waveforms, and a VCF (Voltage Controlled Filter) with variable cutoff, resonance and envelope controls.
- Oscillators can be further modulated using Ring Modulation, oscillator Sync, or the Decimator effect.
- Realtime controllable distortion, delay, and chorus/flanger effects are provided for each part.

Motion Sequence Function

- You can control volume dynamics and filter cutoff of sounds or patterns in realtime using dedicated control knobs. These movements can be recorded into the sequencer allowing you to create continuously evolving variations to the sounds.

FEATURES

- The onboard sequencer uses a 16 step-grid interface, with 16 step keys, that allows you to create two-part sequenced patterns using the two onboard analog modeling tone generators.
- The pad keys can be played as a pitched keyboard in either step or real time. Pad keys light up so you can easily see what rhythm a part is programmed to play.
- Phrases can be stored as a pattern that can be from one to four measures long and include a chosen knob movement as well as an accent function.
- There’s room for creating 256 patterns, each with its own tones programmed as well as the sequences recorded.

Inputs and Outputs

- Left and right 1/4” outputs and a 1/4” stereo headphone output.
- A 1/4” audio input allows you to process an external audio source through the resonant filter or effects knobs, and then sync them to your sequence, using the step-grid interface.
- MIDI In Out and Thru connectors allow you to use the Electribe units as tone generators. They also output note and controller information as well as MIDI clock for synchronization with other MIDI gear including other Electribe units.

Analog Modeling Rhythm Synthesizer

Korg has harnessed its 35 plus years of rhythm programming expertise to create the ultimate analog beat machine. The ELECTRIBE·R (ER-1) combines a four-part DSP-based synthesizer with four additional PCM sound sources, providing classic hi-hat and cymbal tones. Its synth voices include dual oscillators, waveform modulation, amp and panning parameters. Effects include low boost for booming low-end, normal or tempo delay settings and the same Motion Sequence as its sibling, the ELECTRIBE·A. The onboard sequencer allows you to program your own custom analog-style beats using the 16 trigger pads. The combination of DSP and sampled sound sources is what gives the ER-1 its unique character—the voice is much warmer and more modulatable than other sampled-only drum boxes. And with unlimited real-time control of every sound parameter, you know your sound will be uniquely your own.

Features

- Input two external audio sources and use the ELECTRIBE·R's synth parameters to process the sound.
- Input sequences into the ELECTRIBE·R and hear your results in realtime as you play the steps.
- Record Oscillator, amp or effect parameter knob movements in realtime using the "Motion sequence" function.
- Sync the ELECTRIBE·R to other MIDI devices using tap tempo or MIDI clock, or tap in the beat and sync to a turntable or other non-MIDI sound sources.
- Built-in low boost and delay effects
- Simply by tweaking the knobs you have unlimited control over all the elements that make up the sounds - like pitch, modulation depth, waveform shape and much more.
- Drop these sounds into the built-in sequencer and you’ve got unique rhythms with your own creative signature. And with the ELECTRIBE·R, you can hear every change you make as it happens, allowing you to mold the groove on the fly.
- You can store a total of 256 (64 x 4 banks) phrases or other patterns plus 16 songs consisting of multiple patterns, so all your beats are with you.
- "Motion Sequence"
  - Record the realtime movement of any of oscillator, amp or effect parameters as a Motion Sequence. Change sounds as your groove progresses in unique and expressive ways.
  - Every sound or rhythm you create can be stored as a pattern that includes your knob movements. And you can save up to 256 1 to 4-bar patterns in internal memory.
- External Control
  - The ELECTRIBE·R can also be controlled from an external sequencer, keyboard, or sampler to function as an analog sound rhythm tone generator, or set up to control or be controlled by
  - You can also control the ELECTRIBE·R from an external sequencer or keyboard and it becomes a MIDI expansion tone generator.
- Four Modeling Synths In One
  - Four analog modeling tone generators, based on Korg’s renowned Prophecy and Z1 synths, allow the creation of four completely different kinds of rhythm sounds that can be used simultaneously.
  - Four PCM (samples are also provided that cover essential crash, open hi-hat, closed hi-hat and clap sounds).
- Step And Real-Time Input
  - The built-in step sequencer’s 16 pad keys make it easy for you to produce rhythms from the sounds you create.
  - Each pad keys lights up so you can easily see what rhythm a part is programmed to play. You can also play in beats in real-time using the 16 trigger pads.
  - Four of the pads are assignable to any analog modeling sound you come up with, two are reserved for controlling sounds accessed through the audio input, and the other four permanently control the indispensable PCM sounds. So you can tailor your own custom “kits” to fit each musical situation.
KORG

ELECTRIBE-S

Rhythm Production Sampler

Korg’s ELECTRIBE-S (ES-1) combines the ELECTRIBE Series easy and intuitive realtime tweaking and sequencing functions with extensive sampling, resampling, signal processing capabilities. The ELECTRIBE-S was designed to make sampling straightforward: play it, sample it and then combine samples to create rhythm patterns and grooves. The ELECTRIBE-S has 95 seconds of sampling time (mono), and can store up to 100 samples in memory at a time. In addition, the ELECTRIBE-S features a broad range of editing capabilities, allowing you to create many unusual sounds and grooves. Sounds may be sampled through any of 11 different effects. With the realtime resample function you can apply pitch, filter effects to previously recorded samples and then resample the result. Sampled sounds can be assigned to as many as ten parts, and then sequenced in real or step time. Samples can be stored and exported to your computer via readily available SmartMedia cards.

Features

- 95 seconds of mono sampling time with room to store up to 100 samples in memory at a time.
- Sounds can be sampled through any of the 11 different effects, including standard reverb, chorus/flange, and distortion as well as unique effects such as the Decimator, Isolator, and Resonant Filter.
- Effect parameters can be edited in realtime using dedicated controller knobs and can be switched on/off for each of the ten available parts.
- A Master tempo-synchable Delay offers a wide range of realtime rhythmic possibilities.
- Samples can be played in reverse with the touch of a button, or you can trigger rolls to create complex rhythmic variations.

Motion Sequence Function

- The Motion Sequence function allows you to capture realtime knob movements of pitch, filter, level and pan parameters as well as effect on/off assignments and record them as part of the rhythm pattern.
- An Effect Motion Sequence is also provided so you can record changes in effect parameters. A Delay Motion Sequence can be used on the overall pattern.

Sequencing

- Rhythms can be created by assigning sampled sounds to as many as ten parts, and then triggering them in real or step time.
- The step sequencer can be used to edit the pattern via 16 step-keys, which control when each sound is to play within the measure.
- Patterns can be from 1-4 measures long, and there are 128 pattern locations available, including 64 preloaded patterns and 54 preloaded samples.
- Up to 256 patterns/steps can be combined to create a song, and then stored in one of 16 internal song memories.

Real-time Resampling

- The real-time resample function allows you to apply effects to previously recorded samples and then resample the result without loss in audio quality.
- Pitch, filter and effects knobs can be manipulated in realtime while resampling.
- Incoming audio can be gated in time with a pattern for rhythmic effects and the gated audio can then be run through the Master Delay for further processing.

Smart Media Sample Storage

- Samples, songs and patterns can be stored on 3.3 V Smart Media ranging from 4 MB to 64 MB. You can also use Smart Media to load AIFF and WAV files of sampled data stored on computer.

The Ins and Outs

- Mic/Line switchable 1/4” stereo input with variable Gain adjustment knob.
- Left and right 1/4” outputs, and a 1/4” stereo headphone output.
- MIDI In, Out and Thru are provided for easy connection to other MIDI equipment, to create finished tracks. Power is supplied via 9V AC adapter.

Music Production Section

The ELECTRIBE•M, the next step in the evolution of Korg’s ELECTRIBE series. Now you can focus on creating scorching dance tracks with one easy-to-use production tool. With powerful sounds and the same motion sequence functionality featured on other ELECTRIBE models, the ELECTRIBE•M enables you to create an entire song with a single piece of gear. Plus, its easy operation and killer sounds help you to produce sophisticated music quickly and easily. With ELECTRIBE-M you have access to a huge array of sounds and phrases including 144 drum waves and 50 synth waveforms, covering the latest dance music styles such as Techno, Trance, House, 2step, Drum’n’Bass, R&B, and Big Beat, so that you can produce tracks quickly and easily. The Electribe•M features the classic 16-keypad, illuminated interface found on all Electribe dance tools. Also on-hand is Korg’s unique “Motion Sequence function” that can memorize the movements of knobs used to vary the volume, panning or filter cutoff of a phrase you create. You can sync the ELECTRIBE-M with other models of the ELECTRIBE series simply by connecting a MIDI cable. You can even use the Electribe-M as a step sequencer for external tone generator modules, or connect it to a computer for running alongside another sequencing program or as a tone generator.

FEATURES

Dance Oriented Sounds and Phrases
- 144 drum waves include vintage kicks, snares, classic electronic tones, cymbals, hi-hats percussion and more.
- 50 synth waveforms cover everything from deep bass tones and vintage analog synth waves, to moving modulation timbres like sync and PWM, plus chord tones, various hits and sound effects.
- A variety of cutting edge patterns covering the latest dance music styles such as Techno, Trance, House, 2step, Drum’n’Bass, R&B, and Big Beat are also included giving you the leg up when producing new tracks.

Realtime Pattern Performance
- Realtime controller knobs and functions such as Part solo/mute let you produce a range of variations from a single pattern.
- Using the Pattern Set function, you can arrange up to 64 Patterns across the step keys, and then switch patterns in realtime by simply touching the keys.

Effects
- A variety of effects are provided for applying subtle to dramatic changes to the sound. Effects can be edited via dedicated knobs, and can be controlled by separate Motion Sequences.
- You can access up to two different effects simultaneously per Pattern to create a highly polished mix. Eleven different Insert effect choices are available, and you can choose to send parts individually to your selected effect or not.
- The eleven types of Insert effect include standards such as Reverb and Flanger, Chorus, as well as radical effects such as Decimator, Resonator, and Ring Modulator.
- A Master tempo-syncachable Delay effect is also available.
- The Drive effect allows you to add a subtle presence to synth sounds to extreme and intense timbres when opened up and used in conjunction with filter resonance.

Step Sequencer
- The 16-keypad step sequencer, with its illuminated interface and intuitive visual feedback, allows you to create rhythm patterns and phrases with ease and efficiency.
- Each pattern can consist of up to eight drum parts and two synth parts allowing for extensive arrangement possibilities.
- Each pattern can be from 1-4 bars long, and each Song can hold a maximum of 256 patterns, and up to 35,700 events!

Motion Sequence Function
- The Motion Sequence function memorizes the movements of knobs used to manipulate the volume, panning or filter cutoff of a phrase you create. You can record up to two Motion Sequences per Drum Part, and up to three per Synth Part.

Inputs and Outputs
- Left and right 1/4” outputs, and a 1/4” stereo headphone output.
- MIDI In, Out and Thru connectors
The SP-200 and SP-300 are slab-style stage pianos that are an answer for any pianist — from student to professional — looking for rich piano sounds in a convenient and portable package. They come equipped with an authentic-feeling 88-note hammer-action keyboard that faithfully reproduce the touch of an acoustic piano. Complementing this piano action are four full stereo and mono grand piano sounds. Three carefully tuned velocity-response curves are available so players can tailor the action of the SP-200 and SP-300 to their own playing styles. The SP-200 and SP-300 feature 30 sounds in total, including a number of Vintage 60’s Electric Pianos, an Electric Grand, plus Harpsichord, Clavinet, Wah Clav, Vibraphone, Marimba, Acoustic Guitar, Jazz and Church Organs, Strings, and Choirs. All of the sounds can be played individually or in two-timbre layers. Reverb and chorus effects add spaciousness and depth to these sounds, recreating everything from a subtle chorus to a concert hall. Effects settings have been optimized for each individual sound, and the performer can choose from three levels of effect — Light, Normal, or Deep.

The headphone output and built-in metronome with adjustable tempo and time signature are ideal for student use. For pro players, they provide mono and stereo outputs, and for those interested in period tunings — the addition of Kirnberger and Werckmeister Temperaments. They also offer a Transposition Function and up to 60-note polyphony. The SP-200 and SP-300 include a music stand and a sustain pedal, while the optional DS-1H pedal provides a Half-Pedal Sustain function that will meet the needs of even the most demanding pianists.

Otherwise identical, the SP-300 features a built-in amplification system consisting of a main amp and two 15-watt speakers. The SP-300 also features mono/stereo audio inputs to play external MIDI modules and other instruments through its internal speaker system. The SP-300 is housed in a sleek silver cabinet with dark cherry end pieces that fits into any décor. The optional SP-300 stand — specifically designed for use with the SP-300, has a dark cherry finish that matches the end pieces of the SP-300.
KORG

SP-500

88-Key Portable Digital Piano with 396 Sounds

Housed in a stylish wood and brushed metal cabinet, the SP-500 Digital Piano uses Korg’s TouchView display to provide fingertip access to numerous piano and accompaniment features. The 88-key SP-500 is a “slab” style digital piano equipped with Korg’s Real Weighted Hammer-Action 2 keyboard, providing a heavier touch in the low register and a lighter touch in the high register, just as on a real piano. Key Touch Control function allows the performer to select from six different velocity curves for a personalized touch.

The SP-500’s compact size allows it to fit in places where a traditional piano or larger digital piano would be impractical, and its modern design blends well with any décor — from home, to church, to school.

 FEATURES

- Highlighted by a stereo grand piano, the SP-500 is loaded with 396 sounds derived from Korg’s professional synthesizers, and an ample 64 voices of polyphony. In addition to 19 different piano sounds, the SP-500 boasts an assortment of electric piano, organ, flute, sax, brass, strings, guitar, drum, and synthesizer sounds. Any two sounds can be layered together or split across the SP-500’s keyboard.
- Two independent stereo effect processors offer up 37 different effect types, including reverb, delay, chorus, flanger, exciter, distortion, overdrive, phaser, rotary speaker, auto-pan, tremolo, and more. The amount of the effect can be easily adjusted to suit the user’s taste.
- The SP-500 contains an advanced auto-accompaniment system with professionally produced styles that make it easy to create great-sounding ensemble performances. A wide range of Styles covering rock, pop, jazz, and other musical genres enable the SP-500 to deliver the full-sounding performance of a complete pro backup band with up to six musical parts.
- The Pianist Styles provide an accompaniment featuring piano-type left-hand passages that enable even novice players to sound like accomplished pianists.
- The sequencer features a full set of event editing and quantization tools. Realtime, step-entry and punch in/punch out record modes are also available.
- Comes loaded with 128 Rhythm Styles, 26 Pianist Styles, and room for 64 User Styles.
- GM compatible, the SP-500 can be connected to a computer or other MIDI-equipped devices for playing back song files, taking interactive music lessons, and much more.
- Advanced TouchView Graphical User Interface is a touch-panel LCD that lets you select or modify sounds and accompaniment styles with the touch of a finger.
- Eight-track internal sequencer can capture and record performances created using the accompaniment system. This unique arrangement saves all the accompaniment data down to three tracks, leaving five tracks available for overdubbing additional parts.
- Additional features include dual headphone outputs, audio and MIDI I/O, Key Transpose, a built-in metronome, and ten tuning temperaments.

PA60 Professional Arranger

Whether using the PA60 as a songwriting station or as a back-up band, you can always be sure that its performance will be truly musical. The PA60 combines enhanced sequencing functions, powerful performance features, comprehensive arranging tools and impeccable sound quality. Its huge, custom, backlit LCD screen displays the status of multiple features in an organized and easy-to-read manner.

- Relies on the same Hi synth engine found in Korg’s TRITON workstations. Included with its 660 sound programs is a set of very expressive solo instruments, sampled with a natural vibrato. All sounds are fully editable, and simple sound edits can be made inside the sequencer itself. Four studio-quality effect processors are available and feature 89 different effect types.
- Provides a huge collection of music Styles created by top musicians from around the world. Each Style provides up to eight accompaniment parts – drum, bass, percussion and more - that respond interactively with your playing. With 256 editable Styles onboard (plus 48 user styles) the PA60 can cover any situation.
KORG

CX-3/ BX-3

Single Manual and Dual-Manual Combo Organs

For years, if you wanted the sound of a real tone-wheel organ, there was only one instrument that could deliver - until now. Korg's Combo Organs accurately and faithfully re-create that classic sound in two portable models - the single manual CX-3 and dual-manual BX-3. The original Korg CX-3 first went on sale in 1979 followed by its dual-manual sibling, the BX-3. Both went on to become favorites in their own right, and are still widely used. Now, using advanced DSP technology and painstaking attention to sound, touch and style, they have been reborn and vastly improved upon.

FEATURES

- DSP technology makes it possible to precisely re-create the unique sound that, until now, could only be produced by the real thing. Two different tone-wheel sounds are provided: "VINTAGE" and "CLEAN". The CX/BX-3's amazing realism even extends to such details as allowing you to add the "leakage" noise generated by the tone-wheels, and the ability to adjust their overtone levels.

- The CX/BX-3 feature two sets of nine drawbars that duplicate the sonic characteristics of the originals - including the proper foldback settings and harmonic distortion. Select between the presets and these two sets of "live" drawbars while performing for real organ-playing experience. An EX mode in which all 18 drawbars can be utilized as one extended palette is provided. The resulting harmonics and percussion timbres can be used to create organ sounds never before heard.

- One of the unique characteristics of a genuine tone-wheel organ is the percussive effect that adds a readily identifiable sound to a note's attack. The CX/BX3 re-creates that beautifully. The volume, decay rate and harmonic pitch (2nd, 3rd) of the percussion can be adjusted – and the percussion has the proper "multi-triggered-yet-monophonic" characteristic for authentic organ performance. You can even control the amount of key-click heard when you press or release a key, simulating the dirty contacts often found on older instruments.

- With 128 programs, the CX/BX-3 are ready to cover a wide range of musical styles including pop, hard rock, jazz, gospel, and rhythm and blues. Detailed drawbar and parameter settings are displayed, and can be easily edited and stored.

- Proprietary "REMS" modeling technology is applied to create effects that add further authenticity to the organ sound. The rotary speaker effect, so important to the organ experience, is recreated with total realism. You can even adjust the time required for the rotor and horn to speed up or slow down when switching speeds, or stop the rotation altogether.

- Three types of amp simulation are provided: a traditional rotary speaker sound, a blend of rotary and tube amp sounds, or a pre-amp-only signal. The amp simulations are dynamic, so your sound naturally evolves from a warm and fat sound to a natural overdrive as your volume increases. In addition, the classic vibrato and chorus settings are provided along with three types of reverb, featuring adjustable time and depth.

- Attention has been paid to the long-neglected aspect of keyboard response speed. The key scanning method used on the CX/BX-3 starts the sound at the first key contact, ensuring a much faster response to your playing. Notes speak more crisply, allowing glissandi, trills and "smears" to be played with total authenticity.

- Not limited to a vintage recreation, the CX/BX-3 is equipped with many advanced MIDI features. Every drawbar, switch and control can be transmitted as MIDI data so your performance can be perfectly captured by a sequencer. The keyboard can be set to transmit key dynamics via MIDI to an external device that can even be layered with the onboard organ sound.

- The BX-3 provides all these features in a dual manual model. Pitch Bend and Modulation Wheels for improved MIDI control, additional voice parameters for even more authentic sound reproduction, and a newly-designed "waterfall" keybed for absolutely authentic look and feel have all been added.

- Different sets of drawbars, and Chorus/Vibrato On/Off can be assigned independently to the BX-3's UPPER and LOWER manuals, just like using a real tone-wheel organ. The single manual CX-3 gives you this functionality via a Split Mode, enabling you to play the single keyboard in two sections. Or you can plug in a second MIDI keyboard to recreate the dual manual playing experience.

- Drawbars, vibrato/chorus, and percussion switches are placed in the same location as on the classic tone-wheel organs, demonstrating a total commitment to tradition and playability. The sturdy wood cabinet gives them the proper vintage look, as does the BX-3’s wooden stand.
Concert Pianos

Korg’s Concert Series piano’s are housed in a stylish cabinet and come with all the essentials, including two types of piano sounds and a variety of valuable features only available from a digital piano. And with their stunningly beautiful sound, they are sure to bring years of musical enjoyment. The C-3200 and C-6500 feature a real weighted hammer action keyboard that responds to every movement of your fingers. Just like a grand piano, the keyboard has a heavier action in the lower register and lighter action as you play upward, giving you the truest piano feel possible. All three models offer a three-position key touch control that lets you select light, medium, or heavy response, so you can choose how the sound will respond to your playing dynamics. A two-track, 14,000 note sequencer lets you record two parts separately (like a backing track and a melody). This can be a convenient function to use when you are practicing or working on a new lesson.

FEATURES

- Three separate pedals are provided for damper, soft, and sostenuto, allowing professional-level piano performance.
- They also support half-pedaling, a technique where you only slightly depress the damper or soft pedals for a wide range of tonal possibilities.
- In addition to two grand piano sounds, they give you a total of nine sounds (six on the C-4500) including electric piano, harpsichord, organ, string, and bass, all with the same quality as on Korg’s professional synthesizers. You can choose to split these across the keyboard with different sounds in the high and low ranges, or layer them for rich new sounds.
- They come with chorus and reverb effects that enable you to further enhance its piano and other sounds. (On the C-3200 the effects can be adjusted in three stages.). Brilliance is also adjustable in three steps to control the brightness of the sound.
- MIDI I/O allows connection to a synthesizer or other MIDI-equipped device. (IN addition, the C-4500 has a PC interface).
- Key transpose feature lets you transpose the pitch of the instrument so you can play in any key with ease.
- A convenient metronome function is built-in for practicing.
- In addition to the standard temperament, they provide two historical temperaments, Kirnberger and Werckmeister.
- With a maximum 64-note polyphony, you'll have plenty of notes for full piano performance even while using the sustain pedal.
- Utilizing Korg’s world-acclaimed technology, the C-4500 and C-6500 boast beautiful, professional piano sound and feel. Their tone generator is equipped with the same H1 synthesis system as best-selling Korg synthesizers, like the award-winning TRITON and KARMA workstations. With a new memory-rich, dynamic stereo-sampled piano sound, the C-4500 and C-6500 sound like a true grand piano and respond faithfully to your keyboard playing dynamics.
- On the C-6500, “Dynamic Stereo Sampled” piano sound actually switches between two different piano samples, one played softly and the other hard so your expressive playing is perfectly represented.
- Audio output jacks allow their sounds to be heard through external speakers. Or, via the audio inputs (not on the C-3200) you can plug an outside audio source and listen through their internal speakers.
- Their sophisticated and classic design features a brown walnut finish that looks good in any room. On the C-6500, the key cover that protects the keyboard is designed to close slowly, like a fine acoustic piano, giving an extra measure of safety in homes with small children.

New! EC-120 Concert Piano

The EC-120 is the most affordable 88-key Concert Series Piano. Using the latest sounds from Korg’s professional voicing technology, the 32-voice EC-120 delivers a high-quality, spacious stereo piano sound, plus electric piano, harpsichord, vibraphone, organ and string sounds. The EC-120’s full-scale keyboard provides the same feel as a traditional hammer-action acoustic piano and includes three levels of touch sensitivity.

Two pedals provide true piano performance, with the ability to switch the Sustain pedal to Sostenuto function when needed. Reverb and Chorus effects add spaciousness and color to the sounds. A built-in, 4,000 note MIDI recorder can capture and playback the user's performance for tracking progress or playing along to. Also features MIDI I/O, two headphone jacks, line inputs, and key transposition. Housed in a rich black walnut finish cabinet.
Micro Ensemble Keyboard

The KME61 offers the power and versatility of the Micro Ensemble in a 61-note keyboard. This synth action keyboard features 256 sounds from the PC2 series, including Triple Strike Stereo Piano, electric pianos, award-winning Take 6 vocals and much more. The KME61 has thirty effect combinations, with a choice of reverbs, choruses, delays and flangers. Each effect has a wet/dry mix which can be controlled per channel. The synth action of the KME61 also includes aftertouch, for a realistic playing experience. Pitch and Mod wheels give expressive control for any musician. The KME61 allows for the creation and storage of 16 multi-timbral setups, as well as customization of effects for each of the 256 sounds.

- 256 Preset programs using samples from the Kurzweil PC2 including: Stereo Triple Strike Piano, Electric Pianos, Strings, Basses, Guitars (Acoustic and Electric), Take 6 Vocals, Brass, Drums, and Percussion.
- 30 effects combinations, with a choice of reverbs, choruses, delays, and flangers. Each effect has a wet/dry mix, which can be controlled per channel. Change and store effects for each of the 256 presets.
- 32 Multi-Timbral Setups with up to 3 Zones. You can create and store up to 16 of your own Setups.
- MIDI In, Thru, Out responds on all 16 Channels
- 32 Voice Multi-Timbral Polyphony
- 20 Character x 2 line backlit LCD display with contrast knob
- Two 1/4” Analog Outputs
- 1/4” TRS Stereo Headphone output
- External Power Supply
- Pitch and Modulation wheels
- Data slider
- 1/4” hold pedal input (Pedal is included)
- 1/4” continuous pedal input
- Dimensions: 3.25” x 37.25” x 12.0”
- Weighs 22 lbs.

Micro Ensemble ME-1

In the tradition of Kurzweil's highly popular and successful Micro Piano, comes our newest half rack module, the ME-1 Micro Ensemble. This low cost module features a wide variety of piano, keyboard and synth sounds, along with strings, guitars, basses, voices, and drums - a total of 256 programs in all. The samples and synth programming is taken directly from our PC2 series instruments, including our newest stereo triple strike acoustic piano sample, and our new multi-strike electric pianos (both Rhodes and Wurlitzer). It should be noted that the KB3 Organs from the PC2 are not found in the Micro Ensemble, but the regular organ programs ARE included. The Micro Ensemble has 32 voice polyphony and is multi-timbral on all 16 MIDI channels. A Global effects processor features the same effects found in our Stage Piano series. You can choose from one of 9 different effects, along with the wet dry settings for reverb and chorus, directly from the front panel, or via MIDI (the effects are applied the same for the programs on all MIDI channels). The Micro Ensemble can also be transposed up or down up to an octave.

- 1/2 Rack Module: will fit into a regular rack with a standard 1/2 rack adapter
- MIDI: Receives on all 16 channels, In and Thru jacks
- Polyphony: 32 voices
- Effects: 9 preset effects, featuring 8 different reverb, plus chorus, with separate controllable wet/dry levels for reverb and chorus components.
- Outputs: 2 Analog Outputs (1/4 in. jack Left/Mono and Right), Stereo headphone out.
- Power: external power supply.
Lightweight Stage Pianos for the Next Century

The SP Series Stage Pianos are the performance keyboards you've been waiting for. Well-constructed and affordable, these stage pianos have everything you need. The SP Series comes in lightweight 76 and 88 key semi-weighted action models, plus an 88 note fully weighted action model. The Stage Pianos have the award-winning Kurzweil sounds and transmit on two, user-selectable, independent MIDI channels. Put your music on stage with this new model of performance piano from Kurzweil, the leader in sound technology.

FEATURES

- Available with 88- / 76-note Semi-weighted action keyboard, or 88-note fully weighted action keyboard
- Lightweight design for easy transportation
- 32-note polyphony

MIDI Controllers

- Two Ribbons (used instead of traditional wheels) provide flexible control.
- The Pitch ribbon has a user programmable software "spring", allowing the pitch to jump back to center or remain at the value where the finger lifts off the surface.
- The Mod Ribbon also has the programmable "spring", and in addition, allows for different functions (software destinations) to be programmed for the ‘up’ position separately from the ‘down’ position.
- A front panel control slider
- Pedal inputs include a continuous control pedal input plus a 1 dual footswitch input for two pedals.

32 High Quality Programs

- The award-winning Grand Piano offers stretched and non-stretched tuned versions, and programs with different EQ.
- Dual-Hardness Tine Electric Piano offers soft and hard strike samples arranged in many program variations, FM Electric Piano is also provided in a variety of programs.
- Programs based on the Ensemble Strings include selections with different EQ’s and envelope response.
- Tone Wheel Organ programs include organ w/percussion, ballad organ, jazzy organ and more.

Setups

- 32 user programmable MIDI setups, each with 2 independent zones that can be used to configure a variety of splits and layered combinations with useful controller assignments.
- 2 independent external MIDI zones + 1 internal MIDI zone

Effects

- 9 preset effects, featuring 8 different reverb, plus chorus, with separate controllable wet/dry levels for reverb and chorus components.

Inputs and Outputs

- Two (left/right) 1/4” outputs
- 1/4” stereo headphone out
- MIDI In and Out connectors: Transmits on 2 channels, Receives on 1 channel.
- Accepts remote setup change on any MIDI channel
- 12V DC external power supply

Dimensions:

- **SP76**: 47.2 x 11.5 x 3.54” (27.5 lbs.)
- **SP88**: 53.3 x 11.5 x 3.54” (30 lbs.)
- **SP88X**: 54.8 x 14 x 4.8” (52 lbs.)
Performance Controller

Following on the design of their award winning PC88, the PC2 features outstanding sound and impressive master controller capabilities. The Easy Split and Layer feature makes it fast and easy to create quick layers and splits. The PC2 series comes in both the PC2 76 note and PC2X 88 note keyboards. The PC2 features many incredible sounds not found on any previous Kurzweil models, including a triple strike stereo grand piano, the new lush stereo strings, newly recorded multi-strike classic electric pianos (both Fender Rhodes and Wurlitzer), brass sections, drums, percussion, voices (featuring Kurzweil's outstanding Take 6 vocal samples), and more. It also features Kurzweil's KB-3 modeled tone wheel organ mode, giving you ultra-realistic tone wheel organ programs. Orchestral Sounds include String Sections, Solo Strings, Woodwinds, Orchestral Brass, Jazz Brass, Orchestral Ensembles, Choir, Organ, Harp, Nylon String Guitar, Orchestral Percussion, and Ethnic Percussion. Additional sound include mallet percussion, guitar, bass, Clavinet, harpsichord, synth sounds, and more.

Features

- 4 zone MIDI controller operations with easy Split/Layer functions
- 76 note lightly weighted keyboard with mono pressure (PC2) or 88-note, two-piece weighted keyboard with mono pressure (PC2X).
- Pitch wheel, modulation wheel, 4 front panel sliders, 5 front panel switches (momentary or toggle, software selectable), 2 continuous control pedal inputs, 3 footswitch inputs, mono pressure, breath controller input, Kurzweil Ribbon input.
- 64-note polyphony dynamically allocated, 128 with the Polyphony Expansion option
- 64 factory and 128 user programmable MIDI setups, each with 4 independent zones, effects and arpeggiator settings.

Effects (Dual Processors)

- Processor A presets provides a choice of: 58 Reverbs, 6 Delays, 10 Choruses, 6 Flangers, 3 Phaser, 4 Shapers, 2 Enhancers, 8 Filtered Effects, 4 Distortions, 1 Mono>Stereo, 3 Wide Stereo, 4 Compressors, 2 Panners, 7 Rotaries, Stereo Tremolo, and 44 combination effects chains utilizing Kurzweil's unique Laserverb.
- Processor B effects offers a choice of 30 Reverb including booths, rooms, chambers, halls, and plates.
- All 16 parts can send to A and to B in any amount. A global send allows serial effects changing from A to B.

Voice Control

- User Adjustable Voice Parameters (Timbre, Envelope, LFO)

Arpeggiator

- Full-featured MIDI note arpeggiator with multiple latch modes, selectable play order, velocity and duration as well as tempo and sync functions.

Inputs and Outputs

- Two (L/R) 1/4” analog outputs
- 24-bit stereo, AES/EBU and S/PDIF compatible coaxial digital output
- 1/4” stereo headphone out.
- MIDI In, Out, Thru (hardware switchable to copy of MIDI Out): Transmits on 4 channels, Receives on 16 channels.
- 9V AC external power supply.
- KFP-1 Single Piano-Style Footswitch

Dimensions and Weight

- PC2: 47% x 14 x 4 1/4” (39 lbs.)
- PC2X: 54% x 14 x 4 1/4” (55 lbs.)
PC2R 1U Performance Rack Module

The PC2R is a 1U rack module, which incorporates the feature set from Kurzweil’s new PC series. 256 programs featuring triple strike stereo grand piano, new stereo strings, great multi-strike classic keyboards and organs and more. Kurzweil’s award winning KB-3 tone organ models are also included. Dual stereo FX processors offer flexible routing and extensive effects algorithms. 4 real-time performance knobs are provided and allow users the same real-time control over functions as the sliders on their PC2 series. 64 voices expandable to 128 voices, easy split and layering capabilities, powerful setups (allowing for up to 4 split/overlapping zones with extensive MIDI control), expandable sound ROM, and 24 bit digital output with better than 117 dB S/N place the PC2R in a class of its own.

- Designed for anyone in search of great sound quality with great sounding effects in a compact 1U rack module.
- 4 multi-function controller knobs
- Four programmable zones
- Onboard arpeggiator with multiple note order modes, latch modes, selectable play order, velocity, duration, tempo, and beat values; synchable to MIDI clock
- 64 voice polyphony, user-expandable to 128
- Same dual sounds and effect processors as the keyboard models.
- 20-character x 2-line backlit LCD display with front panel contrast knob.

Inputs and Outputs
- Two 1/4” balanced TRS analog outputs
- Coaxial digital with selectable format (AES/EBU, S/PDIF), bit width (16, 18, 20, 24), and dithering
- Front panel 1/4” stereo headphone output
- MIDI jacks: In, Out, Thru

Options
- PCX-1 Polyphony Expansion
- PCR-1 16MB Orchestral ROM expansion (standard in current units, available as an option for older units)
- PCR-2 16MB ROM expansion (not yet released)
KURZWEIL
K2600 SERIES

Keyboard Workstations

Professionals around the world use Kurzweil instruments for all their production needs. From Film Studios and composers to the U.S. Government, Kurzweil delivers the quality and award-winning audio that is required by the best. Continuing this tradition, Kurzweil is proud to offer the K2600. Fully compatible with all models that Kurzweil offers, professionals can continue their work without interruption, always confident that archived work will be compatible. Building on Kurzweil’s world-renowned operating system, the K2600 can do more than ever before. The new operating system expands the algorithms from 32 to 127 with Kurzweil’s exclusive Triple Modular Processing. The K2600 is a complete workstation, allowing the user to work from concept to completion without changing from station to station. Full MIDI controller capabilities including eight sliders, two ribbon controllers, footswitches, pedals and breath controllers.

FEATURES

- 76 note semi-weighted and 88 note fully weighted action keyboard versions available.
- True 48 polyphony with 192 oscillators
- 16 MIDI channels, each can be a 32 layer program
- 64MB sample memory upgradable to 128MB
- Sampling option with analog and digital I/O and sample-while-play capability

Sound ROM

- 12MB of onboard ROM, including an acclaimed Stereo Grand Piano.
- Includes over 450 programs (with 100s more available) for a wide and useful selection. A search function allows you to locate programs, setups or objects quickly.
- KB-3 Organ Mode provides powerful tone wheel organ synth models
- Four expansion slots allow you to expand your K2600 to a total of 44MB of sample ROM.
- Optional ROM boards include the well known Orchestral and Contemporary - ROM S which already exist for the K2000 and K2500 series, as well as the newer Stereo Dynamic Piano, and Vintage Electric Pianos ROM options.

V.A.S.T.

- Extensive synth and sample editing is available via Kurzweil’s V.A.S.T. (Variable Architecture Synthesis Technology) which features different 60 DSP functions.
- New Triple Modular Processing offers 126 sound shaping algorithms for per-voice processing.
- Even without the sampling option installed, you can take advantage of the many sample processing DSP capabilities. Some of the Sample Processing DSP functions include: time compression/expansion, pitch shifting, re-sampling, pasting samples on beats-per-minute timeline (Mix Beat), volume ramps, mix sample, and many other functions.

Powerful KDFX 5 stereo bus, 24-bit digital Effects

- Kurzweil KDFX utilizes Kurzweil’s VLSI DSP chip that delivers a versatile 5-stereo-bus design, 24-bit signal processing, cutting edge DSP functionality, and unparalleled real-time control, all with an extremely flexible routing scheme.
- KDFX offers over 100 effects algorithms arranged into 260 effects presets.
- All I/O can be routed through KDFX including 8 outputs and 8 inputs from Kurzweil Digital Stream (KDS) digital I/O, or sampling I/O.

Sequencing

- Full-function 32-track sequencer with an internal resolution of 768 ppq.
- Sequencer functions include: Linear, Pattern and Step Record Modes
- Editing functions include: Event Edit List with view filters and audible scroll; Cut, Copy, Paste facilities; as well as Reference Quantize which allows you to quantize to a groove track, and to quantize tracks not previously recorded with a click.
- Advanced Auto Arranger functions (allows sequences to be triggered from keys with velocity sensitivity and transposition).

File Compatibility

- K2000 and K2500 compatible, enabling it to read Kurzweil or third-party libraries for each instrument from disk or CD-ROM.
- Reads/writes AIFF and WAVE files.
- Reads libraries in Roland 700 series, Akai S900, S950, S1000, S1100, and S3000, and Ensoniq EPS, and ASR file formats.
- Import and export either Type 1 or Type 0 Standard MIDI files.

www.bhphotovideo.com
Assignable Controllers

- The front panel has eight independently assignable sliders, useful as MIDI sliders, for sequencer mixdown, or as organ drawbars in the KB-3 Mode.
- A 600mm ribbon controller, running across the top of the keyboard, is programmable in three distinct zones or one long zone. It can be assigned to respond to finger positions as follows: relative to absolute center; relative to “virtual center” (initial finger-press defines the virtual starting point); return to center when finger is removed; or maintain current value when finger is removed.
- Outputs are 1/4˝ TRS balanced and include a pair of mixed audio outs, plus eight individual audio outs.
- A shorter, pressure and direction sensitive ribbon controller below the pitch and mod wheels allows natural vibrato and subtle nuances of expression.
- Two buttons above the pitch and mod wheels are completely programmable.
- Additional controllers include sequencer “transport control” buttons
- 4 footswitch inputs, and 2 continuous control pedal inputs (1 CC2 and 1 CC2/breath controller). The breath controller input accepts Yamaha BC-1, BC-2, and BC-3 breath controllers. The multitude of flexible control surfaces make the K2600 the ideal center piece for any MIDI production.

Connectivity

- MIDI In, Out and Thru (Thru switchable to a copy of Out).
- Controller inputs include 4 footswitches, one breath-controller and two continuous control pedal jacks 1 CC2 pedal and 1 CC2/breath input).
- Outputs are 1/4˝ TRS balanced and include a pair of mixed audio outs, plus eight individual audio outs.
- A 1/4˝ stereo headphone output is also provided.
- Two 25-pin SCSI connectors
- The front panel has eight independently assignable sliders, useful as MIDI sliders, for sequencer mixdown, or as organ drawbars in the KB-3 Mode.

Models

- K2600 - 76-note semi-weighted piano-style keyboard.
- K2600S - 76-note semi-weighted piano-style keyboard with the SMP2X Sampling Option.
- K2600X - 88-note fully-weighted piano-style keyboard.
- K2600XS - 88-note fully-weighted piano-style keyboard with the SMP2X Sampling Option.
- K2600R - All of the same features as the K2600, minus the keyboard and MIDI controllers, in a 3U rack space
- K2600RS - Same as above with the Sampling Option installed.

Live Mode

- Process any mono or stereo signal via the analog or digital sample inputs (requires the sampling option) with powerful VA.S.T. synthesis functions and built in KDFX capabilities.
- Plug your guitar, microphone, mixer or tape track directly into your K2600 and customize the sound using any of the VA.S.T. parameters, all in real-time. Then add effects using the K2600's on board effects or the state-of-the-art KDFX.
- With the digital I/O option you get 8 in and 8 out KDS I/O which can bi-directionally communicate with the DMTi and any other devices wired to the DMTi, such as MDM's (Adat, TDIF), Computer I/O (AES, PDIF) and more.

Options

- SM P-2X Advanced Sampling Option with Digital I/O, Optical I/O, and Sample-while-play. DSP functions include time compression/expansion, pitch shifting, re-sampling, pasting samples on a beats per minute time line (Mix Beat), volume ramps, mix sample and many other functions.
- DIO-26 Digital Input/Output Option adds the ability to input and output eight channels of digital audio to/from the K2600. All incoming audio can then be routed through VA.S.T. and KDFX processing.
- DMTi Digital MultiTrack interface performs real-time digital data format conversion between K2600, AES/EBU, S/PDIF, ADAT, and DA-88. It simultaneously performs real-time sample-rate conversion to 44.1 kHz, 48 kHz or a variety of external clock rates.
- Contemporary ROM, Orchestral ROM, Stereo Dynamic Piano ROM, and Vintage Electric Pianos ROM. Soundblocks add additional ROM samples, along with new preset programs and setups
- PRAM-26 Program RAM Memory Expansion increases the amount of battery backed RAM from 486k to 1503k.
KURZWEIL

KSP-8

Multi-Bus Signal Processor

The KSP-8 is an eight channel, 2-space rack mount signal processor designed for the pro and semi-pro musician/engineer/producer requiring high quality signal processing and demanding unparalleled real-time control. It is the world's only 8-channel multi-effects processor with twice the processing power of Kurzweil's KDFX system. The Kurzweil KSP8 includes all the high-quality effects algorithms from KDFX, and adds surround reverbs and other new effects. The KSP8 breaks through traditional barriers and delivers with a wide range of flexibility. The base unit comes with 4 analog inputs and outputs, and stereo AES/EBU in and out, for a total of 6 possible channels. An I/O option slot provides a choice of expanding with 4 additional channels of analog I/O or 8 channels of Alesis Lightpipe I/O, Tascam TDIF, or AES/EBU I/O. Inputs and outputs may be flexibly routed. 24 bit precision is maintained throughout. The unit offers a selectable master clock, dedicated EQ, and can process 8 mono channels of audio simultaneously, making the KSP 8 an ideal tool for today's MDM based studios.

FEATURES

Factory ROM
- 249 effect algorithms (expandable)
- 636 effect presets (up to 999 user presets)
- 138 effect chains (up to 999 user chains)
- 14 studios (up to 999 user studios)

Effect Routing
- Any 8 of up to 14 possible inputs can be processed and routed to any 8 of the 14 possible outputs. This allows the KSP8 to be setup with 8 mono in, 8 mono out; 4 stereo in, 4 stereo out; 5.1 plus stereo I/O configurations and anything in between.
- Each input signal has its own multi-band EQ and stereo or multi-channel panner.
- Input and output routings can be saved as part of the Studio.
- Effect buses can be routed directly to the KSP8's outputs, or to internal mixdown buses for submixing.
- The unique multi-stage metering section allows for metering at 4 points in the signal path, for all 8 channels.

Architecture
- At the lowest level is the effect algorithm which are designed for use in mono, stereo, and surround applications. These high quality, and highly tweakable algorithms have been crafted exquisite effect presets ranging from spacious and gorgeous, to shocking and in your face rude.
- Effect presets are easily linked together to form effect chains on up to 8 buses. You can fully customize effect presets and chains and have all the control they want.
- Parameters can be controlled in realtime and automated via MIDI. A host of local modulation sources including up to 36 LFOs and 36 envelope generators, with 72 functions is also available for combining control sources.

The Studio
- The highest level of the KSP8 architecture is called the studio — a kind of “snapshot” of the total state of the KSP8 at one time.
- Studios contain all the physical connection settings, signal routing (analog and digital I/O selections), analog and digital signal levels, as well as the assigned effect presets, effect chains, effect bus assignments (including all MIDI channel and controller settings) and all multi-band EQ settings.
- A studio allows you to save and recall your entire project, quickly and easily.
- The KSP8 offers up to 999 locations for user-created objects. SmartMedia cards are used to store your work.

Effects Algorithms
Reverbs (booths, rooms, chambers, halls, plates, stages and more), Delays, Choruses, Flangers, Phasers, Shapers, Enhancers, triggered Filters, Distortions, Tube Simulators, Compressors, Limiter, Expanders, Gates, Bit Resolution Degenerators, Aliasing, Ring Modulators, Cabinet Simulators, Spatializers, Rotary Speaker Emulations, Tremolo, Resonant Lowpass, Highpass Filters, Bandpass, Notch, Parametric, Graphic and Multi-band equalizers, Kurzweil's unique Laserverb, Pitcher' and Chaos, plus others.
◆ A SmartMedia slot can be used to store data on cards up to 64Mb.

◆ 240 x 64 CCFL backlit LCD display with front panel contrast

◆ MIDI In, Out and Thru connectors with 16 channel operation. Data can be stored and retrieved via MIDI Sys Ex.

◆ ROM Upgrades: OS and objects upgradeable via SmartMedia card, or via SysEx dump from a MIDI sequencer.

Intelligent Interface Design

◆ The easy-to-use interface includes a 240 x 64 CCFL backlit display, scroll knob, data entry keypad, and dedicated buttons for navigation and actions.

◆ The intelligent and intuitive design offers features like Quick Pages, allowing instant access to the most commonly needed effect parameters.

Analog Inputs and Outputs

◆ Four 1/4” TRS balanced inputs and outputs, expandable to eight with the optional KANA4 analog I/O board.

◆ 24-bit, 128x oversampling A-to-D and D-to-A conversion

Analog I/O Specs

◆ 20Hz - 20kHz frequency response ±0.15dB

◆ Dynamic Range: > 110dB unweighted @ 1kHz

◆ Crosstalk: < -100dB @ 1kHz

Digital Audio I/O

◆ 24 bits Digital I/O with XLR connector – 110 ohms (AES/EBU) or 75 ohms (S/PDIF)

◆ 16, 20, or 24 bits output with a choice of None, Flat, and 2 types of Shaped dither.

Optional I/O

◆ KANA4 - 4 channel of 1/4” analog I/O

◆ KAES8 - 8 channel AES/EBU or S/PDIF I/O (multi-pin connector, serial connectors, BNC word clock)

◆ KADT8 - 8 channel Alesis Lightpipe I/O plus 8 channel TDIF I/O with BNC word clock connector

◆ KMLN8 - mLAN option

RSP8 - Remote Control

The optional RSP8 offers totally remote operation over all KSP8 functions. The remote offers the same display, navigation and data entry controls as the KSP8. In addition, the RSP8 adds a joystick and 8 knobs to control the KSP8 more efficiently. The RSP8’s compact, attractive design will be at home in any studio environment. One RSP8 can control up to 7 KSP8s when used with the optional HUB7 multi-port hub.

RUMOUR / MANGLER

Effects Processors

Say hello to the Rumour and Mangler, Kurzweil’s two low cost effects processors. Based on the award winning KDFX technology found in the KSP8 and K2600, these single space rack units pack a powerful punch for a very low cost. The Rumour features a comprehensive set of Kurzweil’s finest reverb and reverb variations, including gated, reverse, and reverb/compression combinations, along with Kurzweil’s unique LaserVerb(tm), and chorus/flange+delay+reverb combinations. The Mangler focuses on effects other than, but not excluding, reverb, featuring chorus, flanger, phaser, tremolo, rotary speaker, panner, delay, filters, LaserVerb, Pitcher(tm), synth trigger, ring mod, distortion, and compression effects, and many combinations.

◆ Stereo Balanced Analog I/O

◆ Stereo Digital S/PDIF I/O

◆ Stereo and Mono Input Channels

◆ Stereo Effects Buses

◆ 44.1 kHz and 48 kHz Sampling Frequencies

◆ Selectable Bit Depths of 16, 20, and 24 bits

◆ 3 band parametric EQ

◆ 192 Effects Presets

◆ 64 User Locations

◆ Extensive MIDI Control

◆ Up to 16 Effects Parameters

◆ 3-LED Input Signal Level Metering

◆ Output Clip LED

◆ Tap Tempo and BPM Sync

◆ EQ and/or FX Bypass

◆ Tap/Bypass Pedal Input
ROLAND

XV-5050

128-Voice Synth/Sample Player

The Roland XV-5080 128-Voice Synthesizer Module is the ultimate sound module based on the best-sounding, most expressive and expandable synthesizer/sample player architecture in Roland history. This flagship module offers 128 voices, true stereo waveforms per tone, expressive Matrix Control, expandability via new 64MB SRX- and popular SR-JV80-Series wave expansion boards, Roland/Akai sample library compatibility and a host of new studio-quality effects. Put simply, cutting-edge synthesis doesn't get any better than this.

Sample Playback
- The XV-5080’s sample playback capabilities will allow you to load Roland S-700 and Akai S1000 sample libraries via its 25-pin SCSI port.
- You can add up to 128 MB of sample playback memory via two 72-pin FP/EDO SIMM slots.

Expansion
- Four expansion slots are available for adding Roland’s popular SR-JV80 Series expansion boards.
- Another set of four expansion slots is provided for Roland’s latest SRX Series of 64MB Wave Expansion boards.

Intuitive
- 320 x 80-dot graphic backlit LCD
- The PatchFinder button allows you to quickly locate sounds by category. The Favorite List function calls up your favorite Patches in succession for live performance.
- The Matrix Control offers an extensive array of modulation routing capabilities, providing a wide variety of expressive control and sound shaping possibilities.

Sample Playback
- 32-part multitimbral and 128-note polyphony allows you to create lush arrangements without note robbing.
- The massive 64MB internal wave memory (16-bit linear equivalent) offers four times the capacity of Roland’s JV Series synths.
- Patches are comprised of up to four tones, each capable of using stereo waveforms. Each of the four tones can be velocity-switched and assigned its own key range, providing a high degree of realism and expression at the basic Patch level.
- 1,152 Preset patches (128 x 9 bank with GM 2 banks) and 128 User patches
- Performance Mode allows you to create complex setups, such as layers and/or splits, by combining up to 32 different patches. You can also assign each of the 32 patches to a different MIDI channel for use with MIDI sequencers.
- 64 (32 x 2 bank) Preset performances and 64 User performances.
- 23 (14 + 9 GM 2) Preset rhythm sets and 4 User rhythm sets
- User memory can be greatly expanded using SmartMedia storage.
- Upward compatible with Patches from the JV-2080/1080/1010 and XP-80/60/50/30.

Studio Quality Effects
- Independent reverb, chorus and a multi-effects processors are provided.
- Many of the onboard reverbs are based on algorithms from Roland’s top-of-the-line SRV-3030 24-bit Digital Reverb Processor.
- The multi-effects algorithms include unique Roland effects like RSS, Isolator, Shuffle Delay and more.
- In Performance mode you can assign up to 3 sets of Roland’s acclaimed COSM algorithms guitar amp models and other unique and powerful effects.

Connectors
- 1/4” stereo headphone output
- 1/4” L/R main outputs plus three additional 1/4” stereo pairs with 24-bit D-to-A.
- Coaxial and Optical S/P DIF digital outputs (24bit, 44.1kHz)
- A proprietary 24-bit R-BUS digital output port is available for sending eight channels of audio to the latest VS recorders, or ADAT and Tascam T-DIF compatible gear using the optional DIF-AT Interface Box.
- Two MIDI Ins (for accessing all 32 parts, plus a, MIDI Out and Thru connector. 

For Any Inquiries Regarding Your Order, Call Our Customer Service:
(800) 221-5743 • (212) 239-7765 • FAX: (800) 947-2215 • (212) 239-7549
64-Voice Synthesizer Module

The XV-5050 is a single rack space, 64-Voice Synthesizer Module that gives musicians access to Roland’s flagship XV sound engine without breaking the bank. This space-saving 1U rack module offers four stereo Tones per patch, expressive Matrix Control and over a thousand inspiring Presets—expandable via high-quality SRX-Series Wave Expansion Boards. There are also three independent effects processors, digital outputs, plus a new USB port for easy connection to PCs. Don’t compromise your sounds. Get the best for less!

FEATURES

- Affordable, 64-voice 16 part multitimbral synth module based on acclaimed XV-5080 synth engine
- Stereo 4-Tone architecture and Matrix Control for ultra-expressive sounds
- 64M B of internal wave memory (16-bit linear equivalent) – 1,083 (XV-5080 equivalent) waveforms.
- Includes all presets from the XV-5080, select Fantom patches and all-new sounds
- 1,024 (128 x 8 Banks) Preset patches and 256 (GM Level 2) Preset patches
- 16 (2 x 8 Banks) Rhythm Sets plus 9 (GM Level 2) Rhythm Sets
- 64 (32 x 2 Banks) Performances
- 128 User patches, 4 User Rhythm Sets and 64 User Performances

Expansion

- Two SRX-Series Wave Expansion Board slots allow you to expand and customize your XV-5050 with up to 192M B of high-quality sounds designed to suit your needs.

Studio Quality Effects

- Three independent effects processors with everything from 24-bit reverb to chorus, plus 90 multi-effects including COSM Guitar Amp Modeling.

User Interface

- Display 20 letters 2 lines (backlit)
- Convenient 1U rackmount design

Inputs and Outputs

- 1/4” L/R main outputs plus two individual 1/4” outputs using superb sounding 24-bit D-to-A converters
- Coaxial and Optical S/P DIF digital outputs (24bit, 44.1kHz)
- 1/4” stereo headphones output on the front panel
- A USB port on the front panel can be used as a MIDI interface for your USB-equipped computer.
- MIDI In, Out and Thru connectors
- Included accessories: Owner’s Manual, CD-ROM (USB Driver), Power Cable

XV-2020

64-Voice Expandable Synthesizer Module

The XV-2020 64-Voice Expandable Synthesizer Module puts Roland’s flagship XV sounds in a convenient half-rack design complete with USB. Expandable via two SRX-Series Wave Expansion Boards, it’s like a powerful “plug-in” synth with up to 192M B of sounds, 3 independent effects processors and intuitive editing software.

- Half-rack synth module with 64M B of XV sounds and USB port
- 64-voice polyphony and 16-part multitimbral operation
- Presets include 768 Patches, 17 Rhythm Sets and 64 Performances
- Expandable via two SRX-Series Wave Expansion Boards
- USB port for easy MIDI connection and control via software
- 3 independent effects processors: reverb, chorus and 40 multi-effects
- Stereo 1/4” and RCA outputs
- Includes editing software for Mac or PC
Roland’s Fantom-S workstation keyboards are a complete solution for professional music production. The 61-note Fantom-S and 88-note Fantom-S88 both feature seamless integration of audio and MIDI—plus advanced sampling with realtime timestretch, sample chop and new “Skip Back Sampling.” A Dynamic Pad Bank makes it easy to arrange and trigger audio, while all-new factory sounds, an onboard mastering processor and USB file exchange give the Fantom-S the power to take your music from idea to completion.

**Features**

**Flexible User Sampling**
- Includes 32MB of sample RAM (expandable to 160MB) — enough to resample an entire song.
- Audio (samples, loops, etc.,) can be used as a waveform in the expressive stereo 4-tone synth engine, or sequenced seamlessly alongside MIDI data - complete with realtime timestretching.
- Your favorite samples can be saved to the internal 16M B flash memory or to an optional SmartMedia card.
- The unique “Skip Back Sampling” feature continuously records performances, enabling you to retrieve an idea that might otherwise be lost.
- Sampled waveforms are displayed graphically for quick and precise editing.
- Waveforms can be automatically divided into 16 “slices” using the Chop function.
- The onboard USB port allows you to grab .WAV and/or AIFF files from your Mac or Windows computer.

**Internal Sounds**
- 64 voice polyphony and 16 part multitimbral (shared with Sampling Section).
- All-new Patches and Rhythm Sets built from 64M B-equivalent wave ROM. These stereo-sampled waves were painstakingly sampled in world-class studios around the world, and are the finest building blocks ever offered in a Roland keyboard.
- 640 Preset Patches and 256 General MIDI 2 Patches; 32 Preset Rhythm Sets plus 9 General MIDI 2 Rhythm Sets; 64 (16 part multitimbral) Preset Performances
- 256 User patches, 32 User Rhythm Sets and 64 (16 part multitimbral) User Performances
- A range of tweakable modulation routings are available via the Matrix Control
- The user programmable LFO allows you to program cyclic modulation (such as filter cutoff, pitch, etc.) using 16 steps.
- Expandable to 192M B of internal sounds via four optional SRX-Series Wave Expansion Boards.

**16-Track High Resolution Sequencer**
- The internal pattern-based 16-track sequencer features a 480 PPQN (pulse per quarter note) resolution, and a 400,000 note capacity with support for both realtime and step recording.
- Because the sequencer is always active, you can start recording as soon as inspiration hits — whether it be while playing live, tweaking the realtime controls or playing Arpeggiator patterns.
- The oversized LCD display makes it easy to view and edit track data with unparalleled precision when using Microscope editing.
- Compatible with MRC Pro Songs and Standard MIDI Files (format 0, 1)

**Mixing**
- The Mixer View screen takes advantage of the large 320-240 LCD display to offer the look and feel of a digital mixer. This screen offers intuitive graphic editing of a multitimbral Performance allowing you to change track levels, panning and effects settings using the four front-panel knobs.
- A Layer View screen offers quick graphic editing for layering and key zones.
Arpeggiator and Rhythm Generator

- The onboard Arpeggiator provides 128 Preset and 128 User patterns that allow you to create anything from wild synth patterns to bass lines and chord comping.
- Graphically build your own arpeggiator patterns by inputting notes in the 32-step grid.
- Parameters such as pitch, velocity and note duration can be specified for each step.
- The Rhythm Generator is designed to allow you to quickly and easily add realistic sounding drums using a choice 256 Preset and 256 User rhythms.

Studio Quality Effects

- 3 MFX processors, plus dedicated reverb, chorus and new mastering processor.
- An onboard 24-bit reverb on par with rackmount processors and professional plug-ins
- A dedicated chorus processor that serves up warm, rich chorus and delay.
- Three multi-effects processors handle everything from tempo-synced delay and Lo-Fi processing to COSM Guitar Amp Modeling, Slicer, Isolator and more.
- A dedicated mastering processor with multi-band compression lets you add that finishing touch to your mixes.
- You can resample phrases or entire songs with effects to create entirely new sounds or bring a mix into your computer for CD burning.

Expressive Interface

- 16 (velocity-sensitive) Dynamic Pads make triggering internal sounds (such as drums), RPS Phrases, samples and audio loops easy.
- 320 x 240 dots LCD Display with helpful graphic icons including full waveform editing with zoom capabilities.
- Pitch Bend / Modulation joystick-style lever as well as 4 realtime assignable control knobs.
- The D Beam Controller uses an infrared beam of light that allows you to controller a variety of synth and effect parameters.

Sound collection optimized for XV-5080's sample-playback capabilities*; Includes samples taken from popular L-CDP-Series for S-Series samplers; Perfect for composer/performers requiring very high quality sounds.

*Samples are in S-700-Series format and must be convert loaded for use with XV-5080.
The SRX-Series is Roland’s next-generation sound library for “SRXpandable” instruments like the Fantom-S/-S88, XV-Series sound modules and RD-700 expandable synthesizer. With a strong focus on quality, each 64MB-equivalent expansion is loaded with sounds for all types of applications and genres.

- User-installable SRX wave expansion boards with all-new stereo sounds with astonishing quality
- Fully compatible with XV-Series synthesizers, Fantom Workstations, and RD-700 Expandable Keyboard
- Equivalent to 64MB of high-quality waveforms with zero loading time (when converted into 16-bit linear format)

SRX-01 Dynamic Drum Kits
- 64M B of world-class drum kits
- Drum sounds developed in conjunction with Spectrasonics
- Stereo samples with multiple velocity switches for unsurpassed authenticity

SRX-02 Concert Piano
- User-installable wave expansion board offering the best concert grand piano sound in Roland history
- Entire 64MB memory dedicated to stereo samples of a single, very rare European piano

SRX-03 “Studio SRX” Wave Expansion Board
- An extensive 64MB collection of all-new pop music sounds
- Focus is on superb sound quality rather than quantity

SRX-04 Symphonique Strings
- Includes violin, viola, cello, bass and full orchestra selections
- Multiple performance articulations of virtually every type

SRX-05 Supreme Dance
- 64MB of all-new waveforms and patches for dance music producers
- Focus is on individual sounds: 818 waveforms, 312 patches, 34 rhythm sets including 113 kicks and 133 snares alone!

SRX-06 Complete Orchestra
- Includes 64MB of waves from SR-JV80-02/07/13/16

SRX-07 Ultimate Keys
- Includes 64MB of waves from SR-JV80-03/04/08/09/10

SRX-08 Platinum Trax
- Includes 64MB of waves from SR-JV80-11/12/15/19

SRX-09 World Collection
- Includes 64MB of waves from SR-JV80-05/14/17/18

SRX-6/7/8/9 Wave Expansion Boards feature waves from 4-5 classic SR-JV80-Series boards with all-new patches programmed for XV-Series engine. They include stereo waveforms, Matrix Control and multi-effects, plus most original Patches and Rhythm Sets on CD-ROM.
Keyboard Amplifiers

The Roland KC-Series has earned a reputation for both powerful sound and flexible mixing features. Now with the introduction of the KC-550/350/150, that legacy is set to continue. All three models feature a flexible 4-channel design with a stereo Auxiliary input and XLR Microphone input—plus compatibility with the new KCW-1 Powered Subwoofer and more.

- 4-channel stereo mixing keyboard amplifiers with clean, powerful sound
- Stereo Auxiliary input (RCA type) for connecting CD/MD players
- XLR Microphone input for adding vocals or acoustic guitar
- New Subwoofer output creates powerful low end with optional powered subwoofer
- KC-550/350 include Output Select and Shape switch, plus XLR or 1/4˝ Line output

**KC-550 Stereo Mixing Keyboard Amplifier**

The KC-550 boasts 180 watts of powerful sound via a 15˝ speaker and horn tweeter. In addition to its four input channels, this flagship amp includes an Output Select switch for selecting the monitor sound destination, a Shape switch for quick sound adjustment and an XLR Line output for direct connection to a mixing console.

- Powerful 180-watt/15˝ speaker and horn tweeter
- Output Select feature and convenient Shape switch for tonal adjustment
- 3-band EQ and Subwoofer output compatible with new KCW-1
- XLR Line output for connection to mixing consoles
- Stereo Link In/Out for chaining to KC-550s for stereo applications

**KC-350 Stereo Mixing Keyboard Amplifier**

The perfect combination of power and value, the KC-350 is ideal for medium-sized gigs. It features a 120-watt amplifier with convenient 3-band EQ, Output Select and Shape switch features, plus a Subwoofer output for extra low end. The KC-350 can also be connected to mixing consoles via its XLR Line output.

- 120-watt/12˝ speaker and horn tweeter
- Output Select feature and convenient Shape switch for tonal adjustment
- 3-band EQ and Subwoofer output compatible with new KCW-1
- 1/4˝ phone output for connection to recording devices
- Stereo Link In/Out for chaining to KC-350s for stereo applications

**KCW-1 Powered Subwoofer**

A convenient way to add 200 watts of punchy low-end to sub-out equipped KC amps, or standard amps via the stereo Thru output.

- 200-watt powered subwoofer for use with KC-Series amps
- Stereo Thru Out jack (XLR and 1/4˝) for amps without a Subwoofer output

- Intuitive controls including Crossover knob, Phase switch and Shape switch
The XV-88 128-Voice Expandable Synthesizer is Roland’s finest performance synth to date, featuring powerful XV-3080 synthesis, an 88-note precision hammer-action keyboard, and other expressive features like the infrared light-sensing D-Beam controller. This synth offers 128 voices, true stereo waveforms per tone, expressive Matrix Control, expandability via new 64M B-equivalent SRX- and popular SR-JV80-Series wave expansion boards, and a host of new studio-quality effects marking the XV-88 as performance synth of the highest order.

- 88-note precision hammer-action synthesizer with D-Beam controller and aftertouch.
- 128-voice synth engine for extensive layering and multimbral applications
- Massive 64M B-equivalent internal wave memory includes incredible new sounds, plus all sounds from JV-2080 and a collection of waveforms from the JD-990 Super JD
- Stereo playback capability per tone for amazing velocity switches and keyboard splits
- Powerful Matrix Control gives sounds an unprecedented level of nuance
- Studio-quality reverb and effects derived from Roland SRV-3030, V-Studios, and RSS technology
- “SRXpandable” via SRX-Series 64M B-equivalent
- Compatible with SR-JV80-Series wave expansion boards and XP/JV-Series Patches (XP-80/60/30, JV-2080/1080/1010)
- Advanced arpeggiator functions
Stage Piano

The RD-170 is an entry-level stage piano, for students and live performers, with an 88-key weighted hammer action that feels and sounds like it should cost hundreds more. And with an upgraded sound engine that’s equally realistic, the RD-150 sets a new standard for affordable digital pianos.

- 88-note weighted hammer-action keyboard with improved touch response
- Full 64-voice polyphony with 64 sounds including Roland’s best stereo grand piano plus electric pianos, clavinets, vibraphone, strings, pad, voices, jazz and church organ, guitar, acoustic bass and more.
- Master Keyboard functions for controlling external MIDI modules
- 16 Programmable Setups allow instant recall of custom settings
- 8 levels of Sympathetic Resonance add realistic acoustic piano resonance when using the damper pedal
- Keyboard split and layer functions with separate volume controls for upper and lower parts.
- Stretch Tuning function provides instant alternate tunings
- Built-in 2-track Recorder for practice or accompaniment
- Onboard reverb and chorus effects with eight levels
- MIDI In and Out connectors
- Half-pedal recognition for sustained playing just like an acoustic piano (requires optional DP-8 Damper Pedal).

RD-700

Expandable Keyboard

The RD-700 Expandable Keyboard is loaded with 64MB of stereo-sampled piano and instrument sounds — expandable using quality-intensive SRX-Series Wave Expansion Boards—plus an 88-note Progressive Hammer-Action Keyboard for the ultimate musical expression. And with its new graphic LCD, intuitive knob- and slider-based editing and powerful arpeggiator, the RD-700 is everything an expandable keyboard should be.

- Flagship expandable keyboard with 128-voice/16-part multimbral sound engine and 88-note Progressive Hammer-Action Keyboard
- Massive 64M B-equivalent internal wave memory includes stereo-sampled piano sounds and a collection of Roland’s best instrument sounds
- Large graphic LCD for easy operation; dedicated knobs and sliders for quick sound shaping and direct volume control over parts
- Expandable via two SRX-Series 64M B-equivalent Wave Expansion Boards
- Onboard effects include Sympathetic Resonance and 63 algorithms identical to the XV-3080
- One-touch Piano button instantly switches RD-700 for piano performance
- Realistic tonewheel organ sounds with graphical drawbar editing
- Powerful arpeggiator with 45 styles including guitar strumming; 50 onboard rhythm patterns for practice and composing
- MIDI Tx button for easy control over external MIDI devices and sound modules
Roland’s SR-JV80 Sound Library

Genre-specific sound expansions compatible with a wide range of Roland synths and modules including the famed JV Series sound modules and XP Series synths and workstations as well as the current XV-5080 128 voice sound module.

- User-installable SR-JV wave expansion boards with all-new patches and waveforms
- Fully compatible with XP-80/60/30, JV-2080/1080/1010, XV-5080 and RD-700 Expandable Keyboard
- Equivalent to 16MB of high-quality waveforms with zero load time when converted into 16-bit linear format

SR-JV80-01 Pop
A collection of basic sounds ranging from rhythm sections, keyboards, bass and guitars to strings, brass and synth patches. 224 waveforms and 145 Patches.

SR-JV80-02 Orchestral
Realistic sound for classical orchestration, covering a variety of string, woodwind, brass and percussion sounds. 174 waveforms and 255 Patches.

SR-JV80-03 Piano
Features an unprecedented variety of piano sounds, including world-class grands and electric pianos. 73 waveforms and 111 Patches.

SR-JV80-04 Vintage Synth
The definitive collection of legendary “vintage” synth sounds, including most of the classic Roland synths. 255 waveforms and 255 Patches.

SR-JV80-05 World
Extensive collection of ethnic instruments from around the globe, including bagpipes, quena, kayakom and tablabaya. 255 waveforms, 255 Patches and 1 rhythm set.

SR-JV80-07 Super Sound Set
Contains sounds ranging from rock and pop to Baroque and traditional music, such as harpsichord, accordion, fiddle and banjo. 255 waveforms, 255 Patches and 8 rhythm sets.

SR-JV80-08
60s & 70s Keyboards
Offers various classic organ and electric piano sounds, including a vast number of Hammond B-3 settings. 255 waveforms and 255 Patches.

SR-JV80-09 Session
Includes lush stereo grand pianos, high-quality strings, choirs, nylon and electric guitars, brass and synth textures. 206 waveforms, 255 Patches and 8 rhythm sets.

SR-JV80-10 Bass & Drums
Contains cutting-edge bass and drum sounds meticulously sampled from renowned studio musicians including Marcus Miller, Abraham Laboriel, John Patitucci, Abraham Laboriel Jr. and Bob Wilson, adding a high-powered rhythm section to your music. 241 waveforms and 204 Patches.

- Includes various playing techniques such as slapping, fingering and picking, slides, harmonics and assorted playing noises
- Dynamic drum waveforms with expressive velocity control

SR-JV80-11 Techno Collection
High-quality Dance/Techno sound expansion board featuring 255 waveforms, over 200 Patches and 8 full rhythm sets.
- Provides a wealth of classic Roland drum and synth sounds (TB-303, TR-808, -909, etc.) as well as effected/distorted bass, synth and rhythm sounds
- Sound effects include noise, hits and industrial sounds

SR-JV80-12 Hip Hop Collection
Features 256 Patches and 8 full rhythm sets of the latest, fattest hip-hop sounds.
- Over 40 cutting-edge hip-hop phrase loops for quick song creation
- A wealth of hip-hop instrument sounds including drums, bass and keyboards
- Includes a variety of “Lo-fi” sounds, human beat box sounds, vocal sounds and sound effects
SR-JV80-13 Vocal Collection
High-quality vocal sounds ranging from choir groups and jazz scatting to Gregorian chants. Extremely expressive and strikingly realistic, they can add life to music ranging from soundtracks to classical compositions.
- Stereo sampled Jazz scatting includes five-stage velocity switching with very responsive vocal sounds (in Performance Mode only)
- Contains 94 different waveforms focusing on unrivaled sound quality

SR-JV80-14 “Asia” Collection
Authentic Asian instruments, including distinctive sounds from China, Indonesia, India, Japan, Korea and more.
- Features Asian string instruments with a variety of distinct “weeping” sounds, as well as rhythm instruments
- Phrase loops include both Standard (even-metered) and Asian-style timing that can be tempo sync'd to MIDI
- Chinese instruments include Er Hu, Yang Qin, Suona and many others
- Gamelan (Indonesian orchestral music) instruments include Jegogan, Jublag and Pemade — other Korean and Japanese sounds also included
- Indian instruments include Tabla, Dholak, Dhol, Sitar, Santoor and more
- Expressive possibilities are easily enhanced with bender lever and Arpeggiator functions

SR-JV80-15 FX Collection
A range of sounds including ambient sounds, noise, rhythmic hits, environmental sounds, nature sounds and more — many derived from the popular Distorted Reality CD-ROM.
- High-quality wave expansion board with 100 waveforms and 200 Patches
- Includes a variety of synth-type effects, Ambient sounds, Noise and Rhythmic Hits
- Environmental sounds include rivers, ocean, birds, insects, weather sounds, industrial sounds and machines, city and construction sounds, and much more

SR-JV80-16 Orchestral II
Includes stunning new string, brass, wind and other orchestral sounds, as well as Celtic instrument samples — great for film scores and television commercials. 100 waveforms and 200 Patches
- Contains a wide variety of useful sounds, including stereo string sounds, brass, wind instruments, percussion, ensemble, breath noise and more
- Celtic instrument sounds including Bosouki, Uillean Pipe, Bodhran, and Clarsah Harp

SR-JV80-17 Country Collection
Easy access to hundreds of authentic country music sounds.
- Includes acoustic guitars, pedal steel, resonator guitar (metal hollow-body), clean electric guitars, fiddle, banjo, wash-tub bass, and a variety of natural drum sounds
- Perfect for studio use and live performance

SR-JV80-18 “Latin” Collection
Designed to meet the unique needs of Latin music, this is an authentic collection of Latin drum and percussion sounds, pianos, horns, and other genre-specific instruments.
- Authentic Latin sounds including pop, mariachi, cumbia, and more
- Genre-specific instruments include percussion, pianos, horns, etc.
- Onboard rhythm/phrase loops for easy groove creation and song composition

SR-JV80-19 House Collection
Loaded with all the fresh loops, phrases and keyboard sounds needed to lay down your next house track. Developed in collaboration with Ueberschall, many of the sounds and loops were created by legendary house music producer Mousse T.
- Based on Ueberschall’s acclaimed “HOUSEWORK!” and “jam box” CD--ROMS (from producer Mousse T.)
- Includes 255 waveforms: drum and percussion loops; piano and guitar phrases; piano, bass, brass and string sounds; hits and vocal samples
- Contains 256 patches including key split settings of loops and keyboard sounds for instant house music creation
61-Note Synthesizer

The Roland V-Synth is a distinctive and inspiring new instrument that opens up a world of new sounds full of life and motion. The V-Synth’s sound engine is designed to be configured in several different ways by choosing from preset Structure types—just like a semi-modular synth. Imagine a synth that combines multiple oscillator technologies with realtime control of a waveform’s pitch, time, and formant. Now add user sampling to create entirely new waveforms, powerful COSM filtering, a killer arpeggiator, touchscreen and a host of realtime controllers including the revolutionary TimeTrip Pad.

Sound Generator

- Two variable oscillators, each with a choice of three sound generation techniques.
  - The PCM oscillator uses Roland’s VariPhrase technology for independently manipulating the pitch, time, and formant of the over 300 preset or user-sampled waveforms.
  - The second oscillator type is Analog Modeling which offers nine traditional waveforms, utilizing Roland’s latest modeling technology to deliver sounds that are fat and warm.
  - External Audio Processing is the third oscillator type, which allows any external sound to be used as a synth waveform.
- All oscillator types can be mixed and layered in several ways, or modulated using FM, ring mod, and hard sync to create sounds never heard before.
- Powerful COSM processing including filter modeling, guitar amp modeling, resonator and Side Band Filter.

Effects

Global reverb, chorus and multi-effects enhance the sonic palette even further.

TimeTrip Pad

- The TimeTrip Pad is an innovative controller that lets you adjust the time parameter of a waveform in real time—without affecting pitch or formant—simply by dragging your finger along the pad. You can speed up a waveform, slow it down, or freeze it at any point.

Realtime Control

- Over dedicated 20 knobs and sliders allow you to grab essential sound parameters quickly and easily.
- The large and intuitive touchscreen interface responds to dragging motions, allowing you to access more detailed parameters—Imagine setting an envelope curve just by sliding your finger on the screen.
- The Twin D Beam controllers provide an expressive interface for controlling parameters in realtime

Programmable Arpeggiator

- Programmable arpeggiator provides additional rhythmic and timbral controls. It allows you to create complex riffs from a single note or chord, or to create timbral changes that add rhythmic motion to a sound.

Inputs and Outputs

- 1/4” stereo Mic/Line analog as well as coaxial and optical digital sampling inputs
- Two 1/4” Main and two 1/4” Direct outputs each configured as stereo pairs
- Coaxial and optical digital I/O
- 1/4” stereo headphone output
- Hold pedal and two Control Pedal jacks
- MIDI In, Out and Thru connectors
- A USB port allows .WAV/AIFF file import, .WAV export and MIDI interfacing with your computer.
VariOS

Open System Module

VariOS (short for Variable Operating System), is an open-ended hardware/software system that can be customized for different needs. In its first configuration, the VariOS module comes standard with the software program V-Producer. This software lets musicians manipulate a sample's pitch, time and formant—giving musicians the power to build complete audio-based arrangements with seamless software/hardware control and without draining the host computer’s CPU. The VariOS module can also be updated via PC cards so the system can take on entirely new functions, making it the most open-ended and flexible hardware-based product ever.

FEATURES

◆ Open-ended realtime audio construction system consisting of VariOS module and new V-Producer for VariOS software.

◆ Play back up to 14 phrases simultaneously with 6-part multitimbral operation

◆ Award-winning VariPhrase technology for intuitive realtime manipulation of pitch, time and formant—control audio phrases like MIDI!

◆ Batch load/auto-encode .WAV/.AIFF audio files from computer via USB and browser

◆ Internal memory holds up to 300 seconds of mono samples (150 seconds in stereo)

◆ Easy drag-and-drop sample arrangement—build a complete song in minutes!

◆ PhraseScope window provides free-form editing of a phrase's melody content

◆ GrooveScope window allows non-destructive reconstruction of rhythm loops

◆ Graphic editing of VariOS module's 40 multi-effects, 8 chorus types and 9 reverbs

◆ V-Producer for VariOS supports MIDI clock/MTC sync and audio/SMF export

◆ Flash memory and PC Card sample storage for using VariOS module without computer

◆ Open-ended design allows for future software updates

Firmware Updates

Two firmware sets with control software allow you to turn the VariOS module into a polyphonic Analog Modeling Synth (which can re-create Roland's vintage Juno and Jupiter synths) and monophonic Analog Modeling Bass Synth (to re-create a Roland TB-303 Bassline synth) respectively, but with modern conveniences like onboard effects and more.

Connections

◆ Stereo 1/4˝ inputs (mic/line switchable) with variable gain

◆ Two pairs of stereo 1/4˝ line outputs

◆ Optical and coaxial S/PDIF digital outputs

◆ 1/4˝ stereo Headphones jack

◆ MIDI In and Out and a USB port.
ROLAND

SH-32

Desktop Synthesizer

The SH-32 Synthesizer is a nod to Roland’s past with a look toward the future. This 4-part multimbral synth uses Wave Acceleration Synthesis to deliver up to 32 voices of fat synth waves and entirely new waveforms. There’s also a full complement of knobs and sliders—plus analog-style drums, DSP effects and a killer arpeggiator—giving musicians desktop access to a range of stunning synth sounds at an unbelievable low price.

Wave Acceleration Synthesis

- Wave Acceleration Synthesis provides a total of 67 waveforms including standard synth waves as well as new waveforms like Spectrum and Noise.
- There are also 63 rhythm waves available for rhythm sets.
- 32-note polyphony and 4-part multimbral operation.
- The internal preset memory features 128 Patches and two rhythm sets. User memory provides 128 Patches, Two Rhythm sets as well as 64 Performances.
- Each Patch consists of up to two main oscillators and 2 sub oscillators with ultra-thick Subsonic mode. You can also apply pulse width modulation plus a choice of oscillator “hard” sync or ring modulation. Patches using oscillator sync will be monophonic.
- The Filter section features variable cutoff and resonance with a selectable Low Pass, Band Pass, High Pass and Peaking filters and a choice of -12dB or -24dB slopes.
- There are two ADSR envelopes. The first is a filter envelope which also features a depth control a key follow parameter. The second envelope controls amplitude.
- Two MIDI synchable LFOs, with a choice of 7 waveforms and variable depth, can be assigned to Osc 1, Osc 2, Filter, Amp (envelope) or pan.
- The on-board fully programmable arpeggiator can be used to create incredible user synth lines or drum patterns. The Arpeggiator can be programmed using step input or in real-time.
- There are a total of 64 Arpeggio styles and 64 Rhythm styles available.
- The Chord Memory function, with 64 Chord Forms, lets you produce complex arpeggios well suited for modern techno styles including trance. And with so many front-panel controls, programming is still ultra-intuitive.

Two High-Quality Effects Processors

- The first processor is a Loop (Send/Return) effect processor that gives you 10 varieties of reverb/delay effects.
- The second is an Insert effect processor that offers 35 multi-effects algorithms. These include everything from distortion, compressor and pitch shifter to proprietary Groove effects like Slicer, Lo-Fi and Isolator.

Inputs and Outputs

- 1/4˝ Left/Mono and Right output connectors.
- 1/4˝ stereo headphones output
- MIDI in and out connectors
- 1/4˝ TRS footswitch input

Additional Features

- Tempo variable from 20.0 to 250.0 BPM.
- Three character LED Display
- Dimensions: 11¾ x 9 x 3½˝ (WDH)
- Accessories: AC Adapter (AC1 Series/PSB-1U)
MIDI Keyboard Controller

The A-37 MIDI Keyboard Controller is designed with today’s MIDI musicians in mind. Whether controlling a rack of synths or a sophisticated computer-based setup, the A-37 puts you in control with 76 velocity- and aftertouch-sensitive keys, GM2 compatibility and an easy-to-use interface. And all of these practical features come in a cool-looking design that will appeal to your sense of style as well.

◆ Affordable 76-note controller keyboard for MIDI studios and performance
◆ Synth-weighted keys respond to velocity and channel aftertouch
◆ GM2-compatible; 128 User patches and 2 independent keyboard zones
◆ Easy to use with improved 7-segment, 3-digit LED and assignable Data Entry slider
◆ Convenient sequencer Start/Stop buttons, Clock TX and Transpose buttons
◆ Includes 2 independent MIDI outputs, MIDI In and Thru, plus Hold and Foot Pedal inputs
◆ Battery or AC powered

AX-7
MIDI Controller Keyboard

Building on the legendary design of the AX-1, the new AX-7 MIDI Keyboard Controller offers stage performers more freedom and expressiveness. Just strap it on and you’re front-of-stage with the band. A host of controllers—including a D-Beam—opens up a new dynamic for live players, while the AX-7’s attractive pearl white design looks great on stage. It’s also very easy to use, thanks to a new LED display, expanded patch memory and GM 2/GS compatibility.

◆ Stage-oriented shoulder keyboard in attractive pearl white body
◆ 45-note velocity-sensitive keyboard—perfect for solos and bass lines
◆ Intuitive operation via new 7-segment LED display
◆ 5 realtime controllers: Data Entry knob, Touch Controller, Expression Bar, Hold button and light-sensing D-Beam
◆ 128 patches with data backup via MIDI
◆ 2 MIDI zones for independent control of Upper/Lower parts
◆ GM 2/GS Compatible
◆ Battery or AC powered
The MC-909 Sampling Groovebox is Roland’s ultimate tool for professional music production. Combining an expandable synthesizer based on a custom wave ROM with a professional sampler and sequencer, this revolutionary studio offers power, flexibility and unrivaled ease-of-use. A USB port makes it possible to exchange samples and Standard MIDI Files with a PC, while onboard effects and mastering processors give producers the ability to create “finished” tracks. Audio and MIDI can be integrated, synthesized and sequenced together within a single, easy-to-use environment.

### An “SRXpandable” Sound Set
- 16-part multitimbral with 64-voice polyphony.
- 32MB of cutting edge dance-oriented ROM containing 800 Patches, 64 Rhythm Sets with 693 all-new waveforms exclusively sampled and created for this next-generation workstation. Each patch contains up to 4 tones.
- Sounds include everything from house pianos and organs to edgy techno hoovers and stabs—plus favorites like the JP-8000 “SuperSaw” waveform and distorted TB-303 sounds. There are also plenty of basses, pads and sound effects perfect for any track, with the most complete assortment of dance drum kits ever assembled.
- As easy to program as an analog synth thanks to a generous supply of knobs, buttons and sliders.
- An expansion slot is provided for adding an optional SRX-Series Wave Expansion Board. The SRX-05 “Supreme Dance” expansion, in particular, features special Patches that can only be accessed with the MC-909.

### Flexible Sampling
- 16MB of sample memory, expandable to 272MB using optional DIMMs.
- Audio can be recorded via the stereo analog inputs or digitally using the optical or coaxial S/PDIF inputs.
- Audio loops and phrases can be sequenced right alongside MIDI tracks as the MC-909 synchronizes your loops automatically.
- Samples can also be used as raw waveforms in the synthesizer section.
- Samples can be triggered chromatically via the velocity-sensitive pads or via an external MIDI keyboard.
- .WAV and .AIFF files can be imported from a computer via the onboard USB port.
- Upon completing your final mix, you can resample the output and export it back to your PC for CD burning.

### Pro Sequencing
- 16 track linear and pattern based sequencer with Tempo and Mute Control Track.
- 16-note drum machine-style keyboard with velocity-sensitive pads.
- 480 pulse per quarter note resolution and an approx. 1,300,000 note capacity.
- Tempo is variable from 5 - 300 bpm.
- Built-in “Piano Roll” style editing allows you to view multiple notes at once using the pads and LCD.
- Store up to 50 songs in internal memory.
- 128 Preset and 128 User Arpeggio Styles.
- Import and export Standard MIDI Files (Format 0/1) via USB.
- Patterns can be up to 998 measures.

### Chop, Stretch and Loop
- Numerous graphic Wave Editing functions are provided including truncating and looping samples.
- The Chop functions provides the means of slicing up a loop into individual beats that can be re-arrange and re-quantized to create customized grooves.
- The Timestretch function allows you to change a loop’s tempo, to match your song, without affecting pitch.
Club-ready Presets with all of the Latest Dance Styles

- 215 Preset patterns, programmed by professional producers, fully exploit the onboard synth and drum sounds. These hard-hitting grooves include many popular styles like UK hard-house, trance and the latest "broken-beat" hip-hop and R&B. Use the presets as a starting point for your own grooves or play them "as-is."
- You can create or customize an additional 200 of your own patterns plus you can store another 999 to using an optional SmartMedia card.

SmartMedia Storage

- A SmartMedia slot is provided for storing User data such as samples, Patches, Rhythm Sets and patterns—all on ultra-thin, 3.3V SmartMedia cards from 8 to 128MB.

Easy Operation and Performance Control

- The large LCD screen makes it easy to locate sounds, sample audio, edit waveforms and sequence MIDI arrangements.
- Almost all major parameters are accessible via dedicated knobs, sliders and buttons.
- The dedicated Part Mixer provides real hands-on mixing.
- The Turntable Emulation function uses real-time time-stretching to allow you to adjust pitch and time independently for MIDI or audio.
- The twin D Beams use an infrared beam of light for controlling patches, tweaking filters and more.
- Tempo can be dialed in directly or tapped with the dedicated Tap Tempo button.

Dedicated Mastering Effects

- The dedicated Mastering processor includes a 3-band compressor, with dedicated knobs for each frequency band, for creating “final” mixes that have incredible clarity, definition and punch.

Rear Panel Connections

- Two 1/4” inputs: input one is mic/line switchable, while input two is line only.
- 1/4” stereo headphone output
- MIDI In and Out connectors
- Coaxial and Optical SPDIF digital inputs and outputs
- The onboard USB interface makes it possible to import or export WAV/AIFF files with a computer, or even exchange Standard MIDI Files with software sequencers like Cubase, Logic and Performer.

Studio Quality Effects

- A 24-bit reverb is available for applying to each sequencer part.
- A dedicated compressor allows you to get tight bass and drums without sacrificing a multi-effect.
- Two independent multi-effects (MFX) provide the means of taking the internal sounds and your own samples into new dimensions. These effects include a steep 36dB/oct filter and an amazing Step Filter as well as up to four seconds of tempo-synced delay, phasing, distortion and a host of other proprietary effects like Lo-Fi, Slicer and COSM Amp Modeling.

Large Backlit LCD display with “piano-roll” and waveform editing screens

Six 1/4” line outputs configured as 3 stereo pairs
The BOSS SP-303 Dr. Sample offers DJs and musicians a compact, easy-to-use portable phrase sampler with CD-quality sound, 8-note polyphony, 26 onboard effects and a real-time pattern sequencer—all at a price unmatched by the competition. For sampling and effects processing anytime, any place, the SP-303 can’t be beat.

- Compact phrase sampler with 44.1kHz sound quality and 8-note polyphony
- Onboard sampling time expandable via optional SmartMedia cards
- DJ-friendly operation via large, luminous sample pads and three knobs
- 26 groove effects including new Vinyl simulation; internal resampling
- Realtime pattern sequencer with quantize function for easy song creation
- Selectable Gate, Loop and Reverse triggering of samples

The BOSS SP-505 Groove Sampling Workstation is the ultimate tool for working with samples, loops and laying down beats. This compact box gives you eight voices of CD-quality sampling, sophisticated sample editing tools including Chop, Pitch and BPM Sync, plus a 4-part sequencer for creating grooves using samples or onboard Tones. And with 26 killer DSP effects—plus an easy graphic interface with realtime control knobs—the SP-505 has everything groove musicians need to build cutting-edge tracks.

- Compact sampling workstation with onboard sequencing and effects
- 8 voices of CD-quality sampling, expandable up to 128MB via SmartMedia*
- Chop function divides loops and maps individual samples to pads
- Pitch function for playing back samples at new pitches as on a keyboard
- BPM Sync function instantly matches up to 16 phrases to the same tempo

- Accepts up to 64MB SmartMedia (optional) for sample/sequence storage
- Imports .WAV/AIFF files stored to SmartMedia cards. (Requires optional SmartMedia adapter or PCI adapter card.)
- AC adapter included

- 64 onboard Tones with drums, bass, keyboard, synth sounds and more
- 4-part Pattern Sequencer with Quantize for easy song creation
- Intuitive graphic LCD (with waveform display) and three knobs
- 26 effects like Tape Echo, Isolator and Vinyl Simulator with resampling and realtime control
- Imports .WAV/AIFF files via SmartMedia*; Coaxial/Optical Digital inputs

*SmartMedia cards sold separately; SmartMedia adapter or PCI adapter card required for .WAV/AIFF conversion.
DR-3 Dr. Rhythm

With the DR-3 Dr. Rhythm, guitarists and songwriters can add incredible-sounding drums and bass to their music. This ultra-affordable drum machine includes some of BOSS’ best acoustic and electronic drum kits and a selection of bass sounds. Great for jamming, the DR-3’s Rhythm Progressions and multiple variations make it easy to create a realistic-sounding drum track for any style of music. And with Total Sound Control, you can tweak your kits to perfection.

- BOSS’ most affordable drum machine for jamming or practice
- Realistic drum, percussion and bass sounds with velocity-sensitive pads
- New Rhythm Progressions with 3 variations each for Intro, Verse, Fill and Ending
- New TSC with Sound Shape function and Ambience for professional drum sounds
- 100 Preset Styles and 100 User styles programmable via realtime or step recording
- Footswitch input for easy live control; runs on AC or battery power

DR-5 Dr. Rhythm Section

The DR-5 Dr. Rhythm Section is an innovative new concept in rhythm composers. Designed for guitarists, songwriters, live performers or anyone, it features a programmable backing band including bass, drums and keyboards.

- 256 16-bit percussion/instrument sounds, 64 drum kits (48 Preset /16 User)
- 400 patterns (200 Preset + 200 User)
- 20 songs
- External pitch function for triggering the internal sounds from a guitar
- 4-track composer, MIDI In/Out for interfacing to external devices
- Guitar In with built-in tuner and amp simulator

DR-670 Dr. Rhythm

As the follow-up to BOSS’ hugely successful DR-550mkII, the DR-670 Dr. Rhythm stands as one of the most feature-packed and affordable drum machines in BOSS history. This compact rhythm-creation tool offers all the acclaimed sounds from BOSS’ flagship DR-770 model, while adding enhancements like velocity-sensitive pads, footswitch control and much more.

- Affordable BOSS drum machine with 255 superb-quality drum and percussion sounds
- Velocity-sensitive pads permit very expressive rhythm pattern programming
- New Bass part allows for programming bass lines using 16 different bass sounds
- 200 versatile preset rhythm patterns and 200 user-programmable patterns
- Large LCD for confirming pattern tempo at all times
- Foot control jack permits connection to optional footswitch for hands-free start/stop and fills
- Unique pad interface designed like a bass guitar neck for easy programming of rhythm/bass lines
- Direct Pattern Play function lets users assign internal patterns to pads for triggering “on the fly”
- Selectable battery or AC operation
The MOTIF 6, 7, and 8 are 61- and 76-note synth action, and 88-note weighted action keyboards respectively. All three models are potent music workstations that feature the equivalent of 85MB of wave ROM, onboard sampling with 4MB of RAM (expandable to 64MB), a high resolution 16 track sequencer with a 200,000 MIDI note capacity, studio-quality effects processing and extensive expansion options for customizing the MOTIF to suit your style and taste. The MOTIF’s real-time control modes allow the four sliders and real-time control knobs to function as 16 virtual sliders and 16 virtual knobs. These controls can even be used to as a 16 channel control surface for computer-based DAWs including Logic Audio, Pro Tools, Cubase, and Cakewalk. The MOTIF also features a vast arsenal of connectivity including dual 1/4˝ inputs and outputs, USB, high-speed SCSI, and an expansion slot that can hold a card supporting Yamaha’s mLAN interface. Or you can use that last expansion slot for the AIEB board which adds six assignable analog outs and S/PDIF. A Smart Media slot is also included to transfer data, using standard 3.3V media.

**FEATURES**

- The 61-key MOTIF 6 and the 76-key MOTIF 7 each feature synth action, FS keyboards with initial touch and aftertouch.
- The 88-key MOTIF 8 is a fully-weighted, balanced hammer effect keyboard with initial touch and aftertouch.

**AWM2 Modular Synthesis**

- 16-part multitimbred and 62-note polyphony (expandable with Modular Synthesis Plug-in System boards)
- 85MB of internal wave ROM (when converted to 16-bit linear format) containing many of the best waveforms from Yamaha’s highly acclaimed S80, 9000 Pro, EX Series and RS7000 synthesizers as well as a wealth of new and improved waves.
- 384 Preset voices, 128 GM voices and 128 User programmable voices ranging from expressive stereo acoustic instruments like pianos, drums, strings and brass to never-before-heard dance sounds and lush ambient textures.
- Voices are comprised of up to 4 elements (waveforms) and have access to a myriad of editing functions including a resonant filter (21 types), multi-waveform LFO, amplitude and filter envelopes and more.
- 48 Preset drum kits; 1 GM kit and 16 User programmable drum kits
- You can also create up to 128 User Performances each containing up to four voices. Each of the four voices can be layered and/or split to create even rich and more expressive sounds.
- The Category Search Function allows you to quickly search and browse sounds via a selected voice category (such as pianos or strings).
- A Favorites category provides easy access to the voices you need the most.

**Expandability**

- The MOTIF’s Modular Synthesis Plug-in System allows you to add up to three expansion boards, each of which adds a completely new, full-fledged synthesizer or sound processing “engine” to your arsenal.
- These expansion boards not only add new sounds, but you gain more polyphony and additional multi parts — without taking any processing power away from the keyboard itself.
- A diverse range of synthesizer expansion boards is available including analog physical modeling, FM synthesis, vocal harmony processing and more.

**Sampling**

- 4MB of sampling memory expandable to 64MB using affordable PC SIMMs for a maximum total sampling time of 6 minutes and 20 seconds (stereo, 44.1kHz).
- Reads sample maps and voice parameters for Akai S1000/S3000 and Yamaha A3000/A4000/A5000 samplers. you can also import AIFF and WAVE files.
The Arpeggiator can be synced to MIDI.

Arpeggio performances can be recorded.

A velocity window which opens up.

256 Preset and 128 User arpeggiator types.

The Arpeggio features an extensive range of MIDI and audio parts of your songs can be arranged in real-time using dedicated Section, Mute and Song Scene buttons. These buttons allow you to instantly audition different arrangement possibilities, and then record these performances as Pattern Chains. The Pattern Chains can then be edited using the detailed event editor, and upon completion, you can convert them back to a linear song format like SMF.

The Song Mode recording feature allows you to combine MIDI and audio data in a linear fashion from beginning to end.

The Slice with Sequence function takes a recorded audio phrases and slices it into pieces (based on amplitude peaks and divisions of the beat) and then generate an extremely accurate MIDI sequence to perfectly re-trigger each of the pieces. This will allows you to rearrange or change the tempo of grooves without effecting the audio phrase's pitch.

Groove-Oriented, Real-time Pattern Chain Record

The various MIDI and audio parts of your songs can be arranged in real-time using dedicated Section, Mute and Song Scene buttons. These buttons allow you to instantly audition different arrangement possibilities, and then record these performances as Pattern Chains. The Pattern Chains can then be edited using the detailed event editor, and upon completion, you can convert them back to a linear song format like SMF.

Effect

There are 2 categories of effects processors available: System Effects, and Insert Effects.

The System Effects section provides access to an independent Reverb (12 types) and chorus (25 types) processor. A Send control allows you to dial in the desired wet dry mix for each effect. In Performance and Song modes, you also have access to 25 different Variation effects including amp simulators, wahs, sonic enhancers, LoFi effects and more.

There are two Insert Effects available that can be used on a single voice or assigned to individually to different part, when used in Performance or Song modes. Insert 1 offers a choice of 25 effects types, while Insert 2 offers 104 types.

A Master 5-band Equalizer is also provided for fine tuning the overall sound before the final output stage.

SmartMedia Card Slot

Easily store your samples on a SmartMedia Card Slot card and transfer them to your personal computer for editing. This storage method also makes it easy to save and load Standard MIDI Files.

Inputs and Outputs

Two stereo pairs of 1/4” analog outputs plus an optical S/PDIF digital output.

Dual 1/4” analog inputs with gain control are provided for sampling.

1/4” stereo headphone output.

MIDI In, Out and Thru connectors.

The Built-in USB MIDI interface is ready to connect directly to your iMac G4 or newer G3 Macintosh computer as well as any USB-equipped Windows PC (Windows 98 or later).

The 25-pin SCSI Port allows you to connect an external ZIP, MO, or hard drive to MOTIF for easy storage of large amounts of sample data. The SCSI interface provides fast loading times expected by performing musicians.

Total Hands On Control

240 x 64 dot backlit LCD display.

Four physical sliders and four physical knobs are available on the front panel, with up to four functions available to each, can be assigned to edit the Reverb, Chorus, Pan, Cutoff, Resonance, Attack, Release and EQ as well as 4 user-assignable parameters.

In Mix mode, these sliders and knobs work in conjunction with the Track Select buttons to give you all the capabilities of a 16 channel digital mixer.

Mix mode can even be used as a real-time external control surface for your favorite sequencing software, including Emagic’s Logic Audio, Steinberg’s Cubase, Digidesign’s Pro Tools and Cakewalk’s SONAR.

Yamaha’s mLan protocol allows you to link together all your digital audio and MIDI data through a single high-bandwidth IEEE-1394 FireWire cable.

MOTIF is ready for the latest generation of mLan expansions and future mLan products, so you’ll be able to stay current with future possibilities.

Optional Multi-Out Expansion Board

The AIEB2 expansion board gives you 6 assignable 1/4” analog audio outputs as well as both optical and S/PDIF digital outputs.

Connect to the Future of MIDI and Audio — mLan

Yamaha's mLan protocol allows you to link together all your digital audio and MIDI data through a single high-bandwidth IEEE-1394 FireWire cable.

MOTIF is ready for the latest generation of mLan expansions and future mLan products, so you’ll be able to stay current with future possibilities.
Perhaps the most requested Yamaha product of '02, the Motif Rack is more than just a single rack version of the award winning Motif synthesizer — its newly designed sound chip that delivers 128 note polyphony and enough DSP to accommodate 8 simultaneous insert effects, in 16 Part Multi Timbral Mode. The core Voices of the rack are identical to the keyboards with the addition of two new Preset Voice Banks and 256 User Editable Voices (twice the size of Motif). Two Yamaha PLG cards slots allow for expansion of polyphony, effects and synthesis capabilities. To insure complete connectivity, the Motif Rack offers six 1/4˝ outputs (Stereo Main plus four individual assignable outs) as well as coaxial and optical digital outputs. Plus the Motif Rack comes with both standard MIDI and USB interfacing along with Voice Editing, File Utility, Multi Part Editing software, allowing you to take full advantage of your computer and the Motif Rack's MIDI capabilities. The Motif Rack is perfect for both Motif owners who want to expand the power of their Motif system or for those of you who already have plenty other keyboards and just want the Motif sounds in a convenient rack mount size.

**Features**

**Single Rack Space Tone Generator**
- A newly designed sound chip provides 128 notes of polyphony as well as up to 4 insert effects when used in the 16-part Multi Timbral Mix mode.

**768 Preset Voices and 59 Preset Drum Kits**
- 48M of onboard wave ROM (84M when converted to 16-bit linear format) with 896 Preset voices (including the General MIDI bank) and 65 preset drum kits - the core Voices of the Motif keyboard are all there plus there's an additional two new Preset Voice Banks.
- 256 User voices and 32 User drum kits

**Effects**
- System Reverb (20 types including 3 New "R3" type Enhanced Reverbs) and Chorus (44 types)
- Up to 8 Insert Effects (107 types) -2 for voice mode, 4 x 2 for Multi mode.
- Each of the 16 Parts has access to it's own 3-band EQ in Multi Timbral Mode.
- A 5-band Master EQ is also provided

**Multi Library**
- A Multi Library of 124 different Multis is provided, each with its own specially programmed effect, equalizer and other settings, and each designed particularly for a specific style of music or application.
- Since they are categorized according to music type, you can quickly and easily call up the settings you need.
- The Multi Libraries also serve as convenient templates to create new, original Multis – just select a Multi, then tweak it and customize it as needed.

**Expansion**
- Two expansion slots are provided for adding any of Yamaha's PLG Modular Synthesis Plug-in Expansion boards, resulting in new sounds, effects, additional notes of polyphony and new synthesis engines.
- Bundled with a Windows and Mac compatible CD-ROM that contains a dedicated Voice Editor and Multi-part editor.

**Arpeggiator**
- Onboard arpeggiator with 256 presets patterns.

**Inputs and Outputs**
- Stereo 1/4˝ main outputs plus four individual 1/4˝ outputs.
- Optical and coaxial digital outputs
- 1/4˝ stereo headphone output on the front panel
- Built-in USB MIDI interface plus MIDI In, Out, and Thru connectors

**User Interface**
- An intuitive user interface with a large data wheel and dedicated function buttons provide quick access to all functions.
- The 160 x 64 dot backlit LCD provides clear and easily viewable display of all the Motif Rack's parameters.

**Multi Library**
- A Multi Library of 124 different Multis is provided, each with its own specially programmed effect, equalizer and other settings, and each designed particularly for a specific style of music or application.
- Since they are categorized according to music type, you can quickly and easily call up the settings you need.
- The Multi Libraries also serve as convenient templates to create new, original Multis – just select a Multi, then tweak it and customize it as needed.

**Expansion**
- Two expansion slots are provided for adding any of Yamaha's PLG Modular Synthesis Plug-in Expansion boards, resulting in new sounds, effects, additional notes of polyphony and new synthesis engines.
- Bundled with a Windows and Mac compatible CD-ROM that contains a dedicated Voice Editor and Multi-part editor.

**Arpeggiator**
- Onboard arpeggiator with 256 presets patterns.

**Inputs and Outputs**
- Stereo 1/4˝ main outputs plus four individual 1/4˝ outputs.
- Optical and coaxial digital outputs
- 1/4˝ stereo headphone output on the front panel
- Built-in USB MIDI interface plus MIDI In, Out, and Thru connectors

**User Interface**
- An intuitive user interface with a large data wheel and dedicated function buttons provide quick access to all functions.
- The 160 x 64 dot backlit LCD provides clear and easily viewable display of all the Motif Rack's parameters.
Performance Synthesizers

The 61-key S03 and 88-key S08 are versatile, yet highly cost effective, performance synthesizers with full 64-note polyphony and 25 MB of wave ROM (at 16-bit linear conversion). Yamaha's AW M2 tone generation and over 700 incredible sounding voices, including full XG and GM compatibility, provide a complete palette of high-quality sounds: stereo grand pianos, funky basses, analog pads and pounding drum kits. A selection of onboard effects, including chorus and reverb and variations such as distortion and “wah,” may also be applied. You can create your own sounds (including analog-style synth sounds with the 64 resonant low pass filters) and store them in any of 128 user-voice memory locations. Panel switches, a large custom-designed LCD display and controllers that include pitch bend and mod wheels provide full control and access to all functions.

The portable S03 features 61 keys with Initial Touch, while the larger S08 features an 88-key balanced hammer design with Initial Touch. Both units feature left and right 1/4” outputs, a stereo headphone out, MIDI In, Out and Thru connectors, as well as foot switch and foot controller inputs. Both units come bundled with Yamaha XGWorks and Voice editing software for both the PC and Mac. The S03 also offers a TO HOST serial port for direct connection to a PC or Mac. The S08 offers a USB port for computer interfacing and has a smart media slot for MIDI file playback and patch storage.

FEATURES

- 64 note polyphony and 16-part multitimbral
- 25.2 MB wave ROM (in 16 bit linear format) with over 700 sounds including: 480 XG/GM compatible presets, 128 additional Presets and 20 Drum Kits
- 128 User presets and 2 Drum Kits are also provided
- 3 Effects Blocks with 64 types
- 32 user-definable Multis

High Quality Digital Effects

- Independent Reverb (11 types) and Chorus (11 types) processors as well as a wide selection of Variation effects (42 types) such as delays and distortions

User Interface

- Large custom backlit LCD display makes it easy to see the names of voices and other parameters at a glance.
- Quick Access and Category Search
- Pitch bend and modulation wheels

The S08 adds

- 88 key weighted (Balanced Hammer) action Synthesizer
- SmartMedia slot provides an cost effective
- Playback Sequencer for playing Standard MIDI Files direct from SmartMedia
- USB interface

XGworks lite V3.0A

- The included XGworks lite software is a comprehensive yet easy-to-use MIDI and audio sequencing package that gives you everything you need to produce fully arranged songs with your S03, including 100 MIDI/audio tracks for recording, a built-in database of music styles, full editing and mixing capabilities and more.
- The Voice Editor features an intuitive graphical user interface, making it a snap to edit the keyboard’s onboard voices.

Dimensions

- S03: 38¼ x 11¼ x 3¾” (Weighs: 12.56 lbs.)
- S08: 52½ x 15¼ x 6” (Weighs: 44 lbs.)
Music Synthesizer

The S30 is an expandable synthesizer with a 61-note keyboard, full 64-note polyphony, 64 multi-mode resonant filters, effects, an arpeggiator and 24MB of wave ROM. On-board voices include 256 presets with stereo-sampled pianos, strings, brass, as well as a complete sonic palette of other high-quality sounds. You can create your own sounds and store them in any of 128 user-voice memory locations. There are also 128 user-storable performances for layers, splits and multitimbral sequencer setups. A plug-in expansion slot allows the S30 to accept Yamaha's PLG Modular Synthesis Plug-in Expansion boards, which essentially adds new synthesizers and effects processors to the system.

The S90 is Yamaha's most feature-packed S series synth to date. It features an 88-note weighted Balanced Hammer Effect keyboard and a synth engine that contains the best sounds of Yamaha's flagship MOTIF synth with an exquisite three-layer grand piano sample. The S90 is also equipped with three expansion slots for Modular Synthesis Plug-in System boards, so you can add new and exciting synthesis capabilities as your musical needs dictate.

FEATURES

- 61 key synthesizer with initial and after-touch
- 64 note polyphonic and 16 multitimbral parts (17 parts with PLG installed)
- 256 Preset voices and 8 drum kits
- 128 internal and 128 external User voices plus 2 internal and 2 external drum kits.
- 128 internal and 64 User Performances.
- A SMF playback sequencer is provided with direct play from Smart Media and chain playback for up to 100 songs.

Effects

- Dedicated Reverb (12 types) and Chorus (23 types) processors as well as an Insert effects (92 types)

Controllers

- 4 zone MIDI master controller functions with 128 memory locations.
- 5 assignable and 2 data entry knobs plus 4 assignable sound control sliders.

Expansion

- 1 slot for PLG series Modular Synthesis Expansion Boards
- 3.3 volt SmartMedia memory card slot for expansion and storage (cards up to 128 MB are supported)

Inputs and Outputs

- Four 1/4” outputs: Stereo Main plus two assignable outputs.
- 1/4” A/D inputs
- To Host serial Port for interfacing with a PC or Mac.
- MIDI In, Out and Thru connectors
- 2 foot pedals inputs, 2 foot switch inputs plus Breath Controller input

Arpeggiator

- The onboard arpeggiator provides full MIDI capabilities and offers 128 patterns, (from standard Up and Down patterns to catchy melodies and drum patterns)

Bundled Software

- CDROM with XGworks Sequencer, Voice editor and card filer included

The S90 Adds

- 88 key weighted action keyboard with initial and aftertouch
- 110 MB wave ROM featuring a 25MB 3 layer S700 piano (in 16 bit linear format)
- 384 Preset voices and 48 drum kits plus 128 GM voices and 1 GM drum kit.
- 128 User voices and 16 drum kits
- 128 User performances
- 256 preset and 128 user Arp patterns
- 3 PLG slots for Modular Synthesis Expansion System Boards
- USB port for easy computer interfacing

Dimensions

- S30: 39% x 13% x 3%” (Weighs: 17.6 lbs)
- S90: 53% x 15% x 6%” (Weighs: 51 lbs.)
Yamaha’s Modular Synthesis Plug-in System is a revolutionary expansion system that adds a COMPLETE SYNTHESIZER or SOUND PROCESSING ENGINE to any Modular-Synthesis-Plug-in-compatible synthesizer. This amazing plug-in board lineup, which includes the PLG150 Professional Series and the PLG100 Standard Series, not only gives you new sounds, but also new synthesis architecture, new effects processors, extra polyphony and more. It’s like placing an additional synthesizer or digital effects processor inside your existing keyboard— but at a fraction of the cost!

Once a plug-in board is installed, you can directly access any of its voices and edit them from the front panel of the host synthesizer. You can also use a PC-based software editor (bundled with each plug-in board) to edit any of the voices in detail. Many voice parameters are MIDI controllable, which, when used in conjunction with MIDI sequencing software, allows you to record realtime edits, such as filter cutoff frequency and effect levels, for automated voice transformation during playback.

**PLG100 STANDARD SERIES**

**PLG100-VH**
MIDI Controllable Vocal Harmonizing
- 4 types • Vocoder harmony
- Chordal harmony • Detune and Chromatic harmony

**PLG100-XG**
XG Wave Set
- 32 note polyphonic • 3 effects blocks • 16 Part Multi-Timbral

**PLG150 PROFESSIONAL SERIES**

**PLG150-PF**
64-note Polyphonic Piano Tone Generator
- 16 MB Wave ROM • 132 voices

**PLG150-DX**
Vintage FM Synthesizer Plug-in Expansion Board
- 900+ preset voices • 16 note polyphonic • 64 custom voices
- Part EQ

**PLG150-AN**
Analog Physical Modeling Tone Generation
- 5 note Polyphony • AN1x compatible

**PLG150-VL**
Virtual Acoustic Plug-in Expansion Board Monophonic
- 256 preset, 64 internal, 64 custom voices • Compatible with VL70M

**PLG150-DR**
Live Room Drums
- 80 preset kits (New Ambient Drums + Motif core kits)
- 8 User kits • Built in editable effects
- CDROM includes patterns, phrases and PLG editing software

**PLG150-PC**
Latin Groove Factory
- 80 kits (Afro-Cuban + Brazilian Percussion)
- 8 User kits • Built in editable effects
- CDROM includes patterns, phrases and PLG editing software
The Yamaha RM 1x is a complete Dance Music Workstation that combines a powerful AWM2 tone generator with realtime performance controls and a professional suite of sequencing tools. An intuitive “hands-on” interface provides realtime control over synth parameters, pattern playback functions as well as the three, fully editable effects processors. The 32 part polyphonic, 16 part multitimbral synth engine offers access to over 650 voices and 46 drum kits covering all major music styles. The RM 1X’s 16 track sequencer section delivers a professional-level timing resolution of 480 ppqn and a sizable memory of 110,000 note events. To help get you right into the groove, the RM 1X provides a library of over 7,000 drum, bass, guitar, percussion and keyboard phrases organized into various styles including: Trance, Trip Hop, Hip Hop, Acid Jazz, House and Techno.

**Features**

- MIDI synthesizer tone generator, professional sequencing, and a real-time MIDI controller surface.
- **700 Dance Oriented Sounds**
  - 16-part multitimbral, 32-note polyphonic, synthesizer with 654 sounds and 46 drum kits designed specifically for today’s dance oriented music genres.
  - In-depth voice editing parameters allow you to customize voices using a comprehensive range of envelope generator, LFO, filter and other parameters.
- **Styles, Patterns and Phrases**
  - 60 Preset and 50 User Pattern Styles each containing up to 16 Patterns for a total of 960 preset and 800 User patterns.
  - Each pattern can playback up to 16 Phrases at a time, such as a bass line or kick drum pattern. You can create up to 256 phrases per pattern.
  - You can easily mix and match a variety of rhythm, bass, and chordal/melodic phrases to create a virtually unlimited range of new patterns quickly and easily.
  - The Patch function make it easy to select from the huge selection of 7,726 preset phrases.
- **16 Track Sequencer**
  - Powerful 16 track, 64-note polyphonic sequencer allows you to record using a variety of record modes: real-time replace, real-time overdub, punch-in, step and grid and has a large 110,000 note memory along with a 480 pulse per quarter note resolution.
  - You can easily record MIDI data via the two octave keyboard or an external MIDI keyboard using features
  - Detailed sequence editing functions allow you to refine and shape your musical ideas with extraordinary precision.
  - Because sequence data can be transmit via MIDI you can integrate outboard synths and samplers into your compositions.
  - The Pattern Chain mode, allows patterns to be easily “chained” together for automatic sequential playback.
  - Up to 20 Songs and 20 Pattern Chains can be stored in internal memory.
  - The floppy disk drive allows you to load both type 0 and type 1 Standard Midi Files generated by other sequencing applications.
  - Track data can be freely moved back and forth from Song mode (linear tracks) to the looped-based Pattern tracks.
- **Real Time Controller Knobs**
  - The two octave keyboard not only allows you to trigger MIDI events; it is also a real-time interface for accessing a range of functions including track selection, transposition, numeric data entry, track mute/solo, and section selection.
  - Eight controller knobs provide realtime access to virtually every parameter including: synth parameters such as filter cutoff and resonance, envelope decay; pitch bend; effects and more
  - Controller knob movements can be recorded in real-time, or applied to the sequence data and edited.
  - The knobs can also be used transmit MIDI control change data for real-time control of external MIDI instruments and devices.
  - Editing detailed sequence parameters, adjusting track pan or volume, or tweaking effect send levels is made easy thanks to the large 64 x 240-dot backlit graphic LCD and control interface including 4 multifunction knobs located directly beneath the display.
  - Tap BPM entry lets you define tempos on the fly without entering specific numbers.
  - The mute memory function lets you specify groups of tracks, which can then be instantly muted or un-muted, by pressing a single-key.

www.bhphotovideo.com
Three Fully Editable Effects
- A fully editable multi-effect system provides independent Reverb, Chorus and Variation effects processors that can be used to add anything from studio-quality reverb and subtle ambience, to delay, modulation, distortion, and an extensive range of other effects.
- There are 11 Reverb types, 11 Chorus types and 42 Variations to choose from.
- The dedicated Digital Low Boost function delivers earthshaking bass allowing you to boost and cut the main output signal ±24dB over a 50Hz to 2.0kHz range.

Play Effects
- An extensive Play FX section includes a number of real-time MIDI processes that can be applied dynamically to song data as it plays. These include the harmonizing of parts with octave and unison parameters, clock-shifting to move instrument tracks forward or backwards in time, note-duration quantizing and the ability to modify note velocity offset.

Arpeggiator
- You can create your own arpeggios via an easy-to-use grid interface.
- Arpeggio data can be transmitted via MIDI, and recorded to the internal sequencer.
- There are five different Arp types to choose from: (Up, Down, Alternate 1, Alternate 2, Random)
- You also have control over octave range and hold.

Sample Factory
The SU700 is a powerful and professional multi-functional music production center which is a hybrid combination of a phrase sampler, 42 track sequencer, tone generator and drum machine. It is an ideal workstation for the DJ and hip-hop artist as well as a valuable compositional, live performance and recording tool for the professional musician.

Quick and Easy Sampling
- Sampling times range from 44.1 kHz 16-bit stereo down to 11.025 kHz 8-bit mono.
- Eight velocity-sensitive composed loop pads.
- Includes 4MB of sampling wave memory expandable to 64MB.
- Sample from a CD-ROM or audio CD, transfer the audio information into the SU700, then edit it, chop it up and slice it any way you want.
- Adjustable data format (16-, 12-, or 8-bit).
- The Groove Function is a time-slicing function divides loops into discrete sections that can be individually manipulated to create new and interesting rhythms.
- Instantaneous Time compression and expansion without pitch change — simply assign a loop or phrase to one of the Auto Loop tracks and you’ll instantly have a looping rhythm that automatically matches any selected tempo.
- 64-note polyphony
- An LFO with variable rate and depth can be assigned to a sample's pitch, filter or volume for adding tremolo, wah and vibrato effects.

Built-in Multi-Effects
- Access up to 3 simultaneous effects from a total of 43 high-quality types including: rich-sounding reverbs, warm choruses and MIDI sync'd delays as well as a wide selection of bizarre effects for creating unique textures.
- You can even process any external audio source, such as a vocal mic, a keyboard, or a turntable, using the SU700’s audio inputs.

Sequencing
- 42 track sequencer with Real Time and Step recording modes.
- Tempo is adjustable from 40.0-299.9 BPM, and has a resolution of 480ppqn.
- Built-in 3.5” floppy disk drive for saving songs.
- Up to 8 Audio Loops can be synced to MIDI clock.

Realtime Control
- 12 assignable knobs for realtime control of sound, groove, LFO, Filters, effects and more.
- Use the Ribbon Controller to scratch a sample over your mix.
- The unit’s sampling, looping, ribbon controller and multi-effects processing capabilities are perfect for the lo-fi, vinyl, scratch approach used by hip-hop music.
- You can store up to 8 scenes containing the machine's current knob settings, mute settings, and effect settings, and recall them all at the touch of a button.

Inputs and Outputs
- Dual 1/4” (L/Mono, R) outputs
- 1/4” stereo headphone output
- MIDI In and Out connectors
- 1/4” footswitch input
- Left and right 1/4” line outputs
- Left and right 1/4” mic/line inputs
- 1/4” stereo headphone output with high output level
- MIDI In and Out connectors
- Optional SCSI interface

RS7000

Music Production Studio - Integrated Sampling Sequencer

The RS7000 is a complete desktop studio designed to meet the needs of modern music production. It offers a unique and powerful feature set including sampling, a AWM 2 tone generator, sequencing and effects with an intuitive user interface and real-time control of virtually every parameter. Perhaps the most unique function is the ability to seamlessly integrate audio and MIDI data. You can import samples from a variety of formats, sample actual sounds from external sources—or even created unique loops and phrases by re-sampling internally sequenced sounds within the RS7000 itself. The Integrated Sampling Sequencer (ISS) automatically breaks the samples into discrete parts (based on amplitude peaks and divisions of time) and generates a corresponding MIDI sequence. This allows loops and phrases of differing tempos to be synched together and processed using MIDI controls to change the Tempo, Swing or any other musical parameter controllable by MIDI. Add to this a plethora of studio and DJ-style effects, SCSI and SmartMedia storage and you realize that the RS7000 is the ideal nerve-center for your next remix, electronica or hiphop project.

On-Board Synthesis
- Internal 62-voice AWM 2 tone generator with over 1,000 onboard ROM-based synth voices and 63 drum kit sounds.
- Six types of filters, including 24dB / 18dB / 12dB Low Pass, Hi Pass, Band Pass and Band Eliminate all controllable with a multi-stage envelope.
- The LFO section includes a number of BPM-sync’d waveforms plus a unique user programmable wave for creating unique BPM-sync’d effects.
- Sounds edits are stored as part of the song and pattern data, so a virtually unlimited range of user sounds can be created.

Sampling
- 4-MB of onboard sampling memory, expandable to 64 MB.
- Import samples in RS7000, Wav, Aiff, Yamaha A3/4/5000 and SU700, and AKAI S1/3000 format. Export RS7000 format, WAV.
- Re-sample internally sequenced sounds to create new audio loops and phrases.

Advanced MIDI Sequencing
- The MIDI sequencer offers a choice of pattern-based recording with 16 sections of 16 tracks each, and linear sequencing with a 200,000 note-per-song capacity and a 480 ppqn resolution.
- Real-time recording with input quantize, step recording and grid style recording methods are all supported. Advanced editing macros help refine sequences.
- Different arrangements can be performed and auditioned in real time using the dedicated section buttons. All pattern and section data can be easily converted to linear sequence song format for final tweaking.

Arpeggiator
- Type (Up, Down, Alternate1/2, Random), Sort, Hold, Octave range

Hands On Control
- 18 assignable knobs and two pads for subtle or radical real time control over sounds, samples and MIDI sequences.
- Knobs can be assigned to control the synth and sound parameters, onboard MIDI processors like MIDI echo, harmonize and beat stretch, or to standard MIDI CC messages for controlling external devices.

Inputs and Outputs
- 1/4" stereo headphone output
- Dual 1/4" inputs and outputs with 20-bit D-to-A and D-to-A conversion
- One MIDI IN and two MIDI Outs
- 1/4" foot switch input

Storage
- SmartMedia Card Slot
- 50-pin half pitch SCSI port for accessing HD, removable and CD ROM drives

MRT-3 Micro Rhythm Trak

Zoom's M RT-3 Micro Rhythm Trak is an incredible stand-alone drum machine, and is also the perfect add-on to any digital audio recorder that lacks a built-in rhythm programming. It has a consistent appearance and functions with the MRS-4 4 track digital recorder. The MRT-3 features 7 velocity sensitive drum pads, 50 preset and 20 user drum kits (user can make an original drum kit), 200 preset and 99 user patterns, 99 song memory (maximum notes/events: 10,000), 21 note polyphony, quantizes to 96 PPQN, and tempos of 40-250 BPM.

Connections include a Mono out (Line) 1/4” phone jack, Stereo out (Line and Headphone) 1/4” stereo phone jack, a MIDI Input and a Control foot switch jack. The unit is powered by 4 "AA" batteries or an optional AC adapter. The MRT-3 links to the MRS-4 4 track, sending its output to the MRS-4’s AUX input and is synchronized through the MIDI clock, acting like a built in drum machine.

◆ Works seamlessly with MRS-4
◆ 7 Velocity sensitive Drum pads
◆ 50 Preset, 20 User Drum Kits (User can make original drum kit)
◆ 200 Preset, 99 User Patterns and 99 Songs
◆ 10,000 Maximum notes/events
◆ 21 note Polyphony
◆ Quantize: 96 PPQN
◆ Tempo: 40.0-250.0 BPM
◆ Stereo out (Line and Headphone): 1 x 1/4” stereo phone jack
◆ MIDI In
◆ Mono out (Line): 1 x 1/4” phone jack
◆ Control In: 1 x Foot switch
◆ Optional AC Adapter: AD-0006D
◆ 4 AA-size battery

RhythmTrak RT-123 - Drum Machine

The functionality of RhythmTrak 234 in a compact body. Play cool backing patterns made up of two drum tracks and one bass track. 297 preset patterns provide a wide variety of popular rhythms. 99 additional patterns can be programmed and stored by the user.

◆ Create a backing sequence with up to 99 patterns. As many as 99 songs can be stored.
◆ Self-lighting pads indicate when sound is produced.
◆ Choose from a variety of 105 built-in super-realistic drum and bass sounds.
◆ LINE IN jack allows connection of external instruments.
◆ Simple and intuitive controls make it a snap to operate even if you have never used a drum machine or sequencer before.
◆ Groove play mode allows changing patterns during play simply by tapping pads on the unit.
◆ Optional FS01 foot switch allows pattern start/stop control or tempo switching. You can also operate an assigned sound such as bass drum or open/closed hi-hat.
◆ MIDI IN connector allows synchronization with external MIDI sequencer or control of the RT-123 from other MIDI equipment.

RhythmTrak RT-323 - Drum Machine

◆ 500 Rhythm Patterns (400 Preset + 100 User)
◆ 55 Bass Programs
◆ 128 Drum Kits (64 Preset and 64 User)
◆ Store up to 100 songs
◆ Assign 12-note Scale for Melodic Bass Patterns
◆ 13 Velocity Sensitive Backlit Pads x 3 Banks
◆ 32 Voice Polyphony
◆ Smart Media Storage Capability
◆ Edit PS-02 Drum / Bass Patterns
◆ Groove Play and Sound Jammer Slide
◆ MIDI In and Out
◆ (6 x AA) Battery or AC Adapter Operation
◆ Large Custom LCD easy-to-read Display
◆ Line Input / 2 Control Inputs / 2 Sub Outputs
YAMAHA

P60 • P60S

Digital Pianos

The P60 or P60S are the perfect pianos from someone who is just starting out and wants to learn to play piano or for the accomplished player who wants a very light weight, portable instrument. It comes in two striking designs – the P60 in Black and the P60S in Silver.

It features the same the GH (Graded Hammer Effect) keyboard found on more expensive Yamaha digital pianos. The GH action of the P60 has the right keyboard feel to insure correct technique and inspire you to play more. The hi quality AWM (Advanced Wave Memory) sampled sounds feature Grand Piano with 30 different sample points for an accurate digital emulation of the nuances of a Grand Piano. The built-in speaker system is specifically designed to reproduce all the tonal quality of the P60's voices including the built in digital reverb to add the ambience of a concert hall to your living room. The MIDI in/out/thru allow you to expand the P60's musical and educational capabilities by connecting it to a home computer.

◆ Graded Hammer 88 Note weighted action keyboard for realistic piano feel
◆ 32 Notes of polyphony
◆ 10 Voices including Grand Piano, EP, Pipe Organ and Strings
◆ Dual voice mode to combine two sounds
◆ Digital reverb
◆ 20W x 2 amplifier
◆ MIDI IN/OUT/THRU

P120 • P120S Stage Pianos

Whether you’re practicing at home, playing with the band, or doing a live solo performance, the Yamaha P series offers a range of models with just the features you need. All boast superb acoustic and electric piano voices along with a number of other essential instruments such as organs, bass, and even strings. And thanks to their GH (Graded Hammer effect) keyboard, the action on these digital pianos is as close to the real thing as you can get. Of course, what else would you expect from the world’s leading manufacturer of acoustic pianos. The voices onboard the P-120/P-120S are among the very best available on the market today. In addition to their rich and expressive stereo-sampled piano voices, they also feature a range of other essential instruments including electric pianos, harpsichord, organs and strings.

◆ 88 key weighted Graded Hammer action
◆ 64 note polyphony
◆ 2 Stereo acoustic and 2 electric piano voices, 2 organs, strings, bass, harpsichord, Clavichord and more each with Variation
◆ Split and layer modes
◆ Sustain pedal with half-pedaling capabilities
◆ 3 song 2 Track 10,000 note sequencer
◆ 2 effect processors
◆ PC interface
◆ Stereo Speakers with On/Off/SW (sub-woofer) switch
◆ 120 Black/Mahogany
◆ 120S Silver/Cherry
◆ Optional Stand LP120 & LP120S

**Portable Professional Piano**

As the successor of the famous P-80 the P-90 recommends itself as a professional portable Digital Piano for the stage. Due to the triple Dynamic Stereo Sampling (DSS) and special sustain and key-off samples its piano sound is incredible natural and accurate. With its 64 notes polyphony the P-90 stands even long sustained passages. 24 Voices include not only piano sound, but organs, strings, choirs and basses, too. Using the Split or Layer functions two Voices can be played simultaneously - in two separated keyboard ranges (Split) or unison or layered (Layer). Eight digital effects do the polish on the sound. The Graded Hammer keyboard is responsible for the realistic touch - like on an acoustic piano the weight of the keys increases to lower notes. Its 2 headphones jacks and many internal demo songs make the P-90 ideal for music lessons. MIDI In/Out and the TO HOST interface recommend it as a master keyboard for large setups or computer aided music production. Power adapter, music rest and a sustain pedal are included.

- 88 weighted keys (Graded Hammer)
- 24 Voices
- 64 notes polyphony
- 8 effects: Room, Stage, Hall 1, Hall 2, Chorus, Phaser, Tremolo, Delay
- Dual/Split mode
- 2 track sequencer
- Build-in stereo-amplification
- 2 Headphones jacks
- MIDI In/Out, integrated TO HOST interface

**P250 Professional Stage Piano**

The P250 features three levels of Yamaha CFIII Grand piano stereo samples for dynamic selection according to your touch on the keyboard. The result is a delicacy of tone and expression that emulates the experience of playing a real piano. And to give the P250 an even more richly detailed sound, note off samples, string resonance samples and sound board samples simulate the acoustic interaction between different notes. The sound is unmatched, and so is the touch, thanks to the GH (Graded Hammer Effect) keyboard. The GH keyboard uses weights and mechanical linkages to achieve an entirely new level of realism. And to go even further, the key weight is graded from heavier in the lower registers to lighter in the higher, exactly the same as a grand piano's. To deliver the sampled instrument voices and 128 notes of polyphony with all the power and authority they deserve, the P250 features a new speaker system and high power stereo amplifier. The P250 features 16cm polypropylene woofers and a 30 watts per side stereo amplifier. The result is astonishingly lifelike power.

- Graded Hammer 88 Note weighted action keyboard for realistic piano feel
- 128 Notes of polyphony
- Acoustic Piano Voices with Three Velocity DSS (Dynamic Stereo Sampling), Note Off samples, String Resonance samples for realism and expressiveness
- 38 Panel Voices plus an extra 480 XG voices for a complete palette of sounds
- 16 Track Song Recorder with 223 Songs and 770 KB of Internal Flash Memory
- Digital reverb and digital effects, Dual mode and split mode, MIDI/TO HOST PC interface
- Built-in Speaker system with 16cm polypropylene woofers and 30 watts stereo amplifier

Contemporary Keyboard

The PF500 brings the Yamaha's years of experience in creating great sounding digital pianos to a new market with the fresh contemporary design of the new PF series of products. The Yamaha engineers built the ultimate piano sounds into the PF500: AWM with Dynamic Stereo Sampling (DSS). The PF500 features three levels of Yamaha CFIII Grand piano stereo samples for dynamic selection according to your touch on the keyboard. The result is a delicacy of tone and expression that emulates the experience of playing a real piano. And to give the PF500 an even more richly detailed sound, note off samples, string resonance samples and sound board samples simulate the acoustic interaction between different notes.

The sound is unmatched, and so is the touch, thanks to the GH (Graded Hammer Effect) keyboard. Unlike conventional digital piano keyboards that use springs or oil dampers to simulate a piano feel, the GH keyboard uses weights and mechanical linkages to achieve an entirely new level of realism. And to go even further, the key weight is graded from heavier in the lower registers to lighter in the higher, exactly the same as a grand piano's.

To deliver the new sampled instrument voices with all the power and authority they deserve, the PF500 features a new speaker system and high power stereo amplifier. The PF500 features 16cm polypropylene woofers and a 30 watts per side stereo amplifier. The result is astonishingly lifelike power.

FEATURES

The PF500 includes all the features you would expect from a Yamaha Digital Piano including:

- Graded Hammer 88 Note weighted action keyboard for realistic piano feel
- 128 Notes of polyphony
- 16 Track Song Recorder with 223 Songs and 770 KB of Internal Flash Memory
- 16 voice demo songs, 50 preset songs
- Custom 3-foot pedal (Damper, Sostenuto and Soft) with half pedal effect
- Selectable dual mode and split mode

AWM Dynamic Stereo Sampling

- Acoustic Piano Voices with Three velocity DSS (Dynamic Stereo Sampling), Note Off samples, String Resonance samples for realism and expressiveness
- 38 Panel Voices plus an extra 480 XG voices for a complete palette of sounds including strings, brass, woodwinds, synthesizers, drums and more
- Digital reverb, chorus and brilliance
- Bundled CD-ROM with USB driver, File Utility and demo software

- Built-in Speaker system with 16cm polypropylene woofers and 30 watts stereo amplifier
- MIDI In, Out and Thru, To Host and USB ports
- Two 1/4” stereo headphone outputs
- Dual Aux Inputs and Outputs
- Pedal and Aux Pedal
- Keyboard stand, music rest and Three Pedals included
- Dimensions: Main unit with keyboard stand 56½” x 19½” x 30” (92 lbs., 9oz)
The PF1000 features a weighted action 88 note GH keyboard, 96 notes of polyphony and three velocity layer Dynamic Stereo Sampling to provide the highest quality piano sounds and performance available on the market. It also features unique home entertainment features including auto accompaniment music styles and lyric and notation display. Dynamic Stereo Sampling features three levels of Yamaha CFIII Grand piano stereo samples for dynamic selection according to your touch on the keyboard. The result is a delicacy of tone and expression that emulates the experience of playing a real piano. And to give the PF1000 an even more richly detailed sound, string resonance samples and sound board samples simulate the acoustic interaction between different notes.

The addition of styles adds instant musical enjoyment no matter the level of your musical skills. A new 240 X 340 LCD makes operation incredibly easy and offers a score display for more performance versatility and learning support than ever before. So it’s easy for anyone to grow, learn and enjoy music on the new Yamaha PF1000. For a new level of performance versatility, Yamaha offers a huge selection of over 800 voices. Besides incredibly realistic Piano voices and XG voices, these include new Sweet, Live, Cool and Natural voices. You get a choice of built-in Normal, Session, Pianist and Piano Combo accompaniment styles covering virtually any musical genre. What’s more, each style has three intros and endings, four variations, four fill-ins and one break. Using these accompaniment styles lets everybody, even beginners, give accomplished solo performances. Music Finder offers an extensive range of music styles with pre-programmed voices and effects setups.

**FEATURES**

- Graded Hammer 88 Note weighted action keyboard for realistic piano feel
- 96 Note Polyphony
- Large 320x240 LCD for ease of use and for displaying musical scores and lyrics
- 194 Music Styles each with 3 Intros & Endings, 4 Variations and 4 Fills
- Tunings include: Flat/Stretch (Natural Piano Voice only) Equal Temperament, Pure Major/Pure Minor, Pythagorean, Mean Tone, Werckmeister/Kirnberger, Arabic 1/2

**AWM Dynamic Stereo Sampling**

- Acoustic Piano Voices with Three velocity DSS (Dynamic Stereo Sampling), Note Off samples, String Resonance samples
- Huge selection of high-quality voices (308 panel + 480 XG + 16 drum kits)
- 6 blocks of digital effects (Reverb, Chorus, DSP)
- Custom 3-foot pedal (Damper, Sostenuto and Soft) with half pedal effect
- Score/lyrics display function and video output
- Built-in Speaker system with 16cm polypropylene woofers and 30 watts stereo amplifier
- Two 1/4” stereo headphone outputs
- Keyboard stand, bench, music rest and Three Pedals included
- Microphone Input
- MIDI In, Out, and Thru A & B
- To Host Connector for PC
- Dimensions: Main unit with keyboard stand 56⅝” x 19⅝” x 30⅝”
- Weighs 94 lbs., 13 oz.
**PSR172**

- Full-size keys
- 100 AWM voices
- Yamaha Education Suite 2
- Portable Grand
- DJ button
- MIDI In/Out
- 100 Preset rhythm styles
- 4 Multi-pads for drum sounds or musical phrases
- Multi-fingering auto accompaniment
- 100 “One Touch” settings
- 16 Note polyphony
- Large LCD screen
- 100 Demo songs with Music Minus One and Song Book
- Headphone jack
- Stereo speaker system with bass ports
- Music rest
- Sustain Pedal jack
- Power: 6 ‘D’ batteries or PA3C power adapter
- Bundled with Portable Keyboard Survival Kit

**Portable Digital Keyboard**

The PSR172 represents a remarkable value in a 61 key, MIDI capable keyboard, complete with 100 voices and styles and educational components in the form of the Yamaha Education Suite. Finally, a portable keyboard in this price range designed specifically for the demanding needs of Music Retailers. The PSR172 is perfect for the beginning music enthusiast on a budget. Yamaha quality at an affordable price.

**PSR273** **Portable Digital Keyboard**

The all new PSR273 is a breakthrough in sound quality for a keyboard at such a low price. For the first time in this price position, Yamaha has included its famous XG-Lite voice compatibility resulting in the very best sound while still being GM compatible. XG-Lite also results in more voices. A lot more voices! The PSR273 is perfect for computer/internet use with a dedicated “PC” button that makes connectivity fast and easy. With GM compatibility, a touch sensitive keyboard, backlit screen, the Yamaha Education Suite, and more, the PSR273 is more value and performance than has ever been offered at such an affordable price point.

- First model in line that has a backlit LCD
- General MIDI compatible: Internet ready
- Touch Response: expressive touch like a piano
- XG Lite offers 100s of high quality Voices & DSP effects for better Internet compatibility
- PC Button: Memorizes your favorite computer setup
- “Portable Grand” button with stereo-sampled piano
- Yamaha Education Suite: helps you learn to play
- 100 Internal songs with Song Book
- 100 “One Touch” Settings
- 100 Styles
- 32 Note polyphony
- Dual & Split mode
- Transpose
- Headphone jack and Sustain pedal jack
- Music rest (included)
- Power: 6 ‘D’ batteries or PA3C power adapter
EZ150 Lighted Key Keyboard

The new EZ150 represent the second generation of lighted key technology. The EZ150 brings Yamaha sound quality, the learning support of lighted keys, and the Yamaha Education Suite to a new, lower, price point. With 100 built-in songs, you'll be playing in minutes. The LCD display actually shows the notes on a staff so that you can see what you're playing. This second generation lighted keyboard takes all this form and function to a lower more affordable price point. It's all good.

EZ250i Lighted Key Keyboard

The EZ250i marks a new direction in Yamaha Portable Keyboards. Portables with MIDI connectors and General MIDI compatibility have always been a natural fit for computers and the Internet. The EZ250i brings that relationship even closer with the addition of a USB connector and associated software. EZ250i, with its lighted keys and educational functions and features, is the first Yamaha portable to be bundled with Konami's Keyboard Mania software. Making playing the keyboard fast, fun, and easy, is what this combination is all about. Kids relate to the gaming and parents relate to the learning.
YAMAHA

PSR350

The PSR-350 comes complete with a remarkable new Music Database. Simply choose from over 200 song titles and the entire keyboard prepares itself for that song; it couldn't be easier. It also helps that the PSR-350 includes a beefed up version of the popular Yamaha Education Suite 2.

The sonic quality has also been ramped up with an incredible selection of 128 General MIDI voices, 480 Extended voices and significant increases in voice memory and new bass ports. Plus, the PSR-350 gives you the ability to write Standard MIDI files to disk so you can send music over the Internet for others to enjoy.

PSR550

Yamaha PSR-500-series keyboards have always been powerful, now they're also colorful. The PSR-550 is one of the first portable keyboards in its price range to include a backlit, multi-color LCD display. The color changes by function to simplify operation. The EZ Navigator — Yamaha's great interactive help — has also been improved to make the PSR-550 still easier to use.

Yamaha's remarkable new Music Database makes playing songs a simple proposition as well. Choose from over 200 song titles in the database and the PSR-550 will set itself up for that song. Yamaha improved the PSR-550's sound over its predecessor by more than doubling the voice memory and by adding new voices and styles.
The first thing you’ll notice about the PSR1100 and 2200 are the displays. Large, back lit, bit mapped graphic displays are able to show lyrics, scores and tons of information available in seven different languages. Just put in a disk, push play and the song starts, the sheet music is displayed and the words to the song appear in time to the music. If you care to sing along, the PSR2200 includes a microphone input with vocal harmony technology. As the song plays through the PSR2200, you read the words in the display as you sing through the microphone, and the PSR2200 harmonizes with you in your voice in real time. Amazing.

Improvements over previous models include double the voice wave ROM memory and new and improved style and voice content for spectacular sound, a USB connector for fast and easy computer connectivity, and improved operating functions. Added to the PSR1100 over its previous model is the ability to display scores like the PSR2200.

### PSR1100
- Contemporary new look
- 61 Full-size keys with Touch Response
- Huge Bitmap Screen displays both Lyrics and Score
- USB Connection makes computer hookup a breeze
- Download & Play Scorch XF Files (Piano Score with Lyrics & Chords) from the Internet using built-in styles
- Double the Wave ROM and Flash ROM of the PSR-1000 translates to better sound and more User Memory for storing Songs, Registrations & other data
- First in the line with 4 Auto Accompaniment Variations & includes many new Styles
- Over 700 Realistic instrument voices including stunningly realistic “Sweet” and “Cool” Voices and 169 Preset Rhythm Styles
- 16-Track Sequencer
- Music Finder provides hundreds of keyboard setups by Song Name
- 32 Note polyphony
- 74 Digital effects
- 22 Harmony types
- 3.5” “Disk Direct” disk drive
- Pitch bend wheel
- 4 Multi-pads
- MIDI In/Out
- Multi-fingering auto accompaniment
- 676 “One Touch” settings
- “Direct Access” button
- Help wizard in 6 Languages
- Footswitch and foot volume jacks

PSR K-1

Portable Digital Keyboard with Karaoke

The Yamaha PSR K-1 is new from the ground up with innovations never before available in this price point and some never before available at any price. Start with the new, bitmap graphic display that, in addition to the standard information, displays the score and lyrics during song playback. USB replaces the standard MIDI jacks and make connecting to a computer a breeze. The all-new “Performance Assistant” function allows you to play along with the song. You can’t play a wrong note. Save your music to the smart media card, another first at this price point. And, for the singers among you, sing through the included, handheld microphone. There’s something for everyone and every member of the family in the PSR K-1.

SURVIVAL KIT 2

Portable Keyboards are just that — portable. So if you’re looking for the perfect accessory for your Portable Keyboard, this is a must-see. The Survival Kit 2 consists of a Yamaha bag that will protect your keyboard when you want to take it with you and a lightweight, but sturdy, X-Style stand for putting your keyboard on when you get where you’re going. There’s even a pouch for your music!

FEATURES

- Custom Yamaha keyboard bag
- Sturdy X-Style stand
- Padded shoulder strap
- Limited lifetime Warranty
- Bag dimensions: 46 x 20”

STAND DIMENSIONS

Height range: 25.63 x 38.75”
Length range: 31.50 x 11.0” Width: 13.75”
**Portable Grand**

The DGX500 is the first Portable Keyboard with piano keys and is the flagship in a new series of instruments from Yamaha called Portable Grand. It is packed with functions and features designed specifically for the new piano user. Included with the DGX500 is a furniture-type stand that completes its piano image. The Yamaha Portable Grand feature in the DGX500 is immediately apparent when you see the large, piano-shaped button in the center of the front panel. When you push it, the best piano is automatically chosen, the auto-accompaniment is turned off, putting the keyboard in full keyboard mode — just like a piano. A piano accompaniment style is automatically selected and is waiting for you if you choose to use it. Next to the piano button is a metronome-shaped button, giving you a built-in metronome for practice.

**DGX300 Portable Grand**

This is the keyboard that Yamaha customers have been asking for. The DGX300 has all of the incredible features of the DGX500* in a more compact 76-key body.  

- 76 note touch sensitive keyboard  
- 3.5" disk drive records your settings and musical creations  
- 135 upgraded styles  
- 610 high quality sounds including a incredible sample of a real Yamaha Grand Piano  
- 6 track recorder to create your own performances  
- Music Database gives you instant access to a keyboard set up of a well known song  
- Yamaha Education system will help teach you to play  
- PC ready button makes it easy to use with a home PC  
- Large Back lit Blue LCD screen  
- New speaker system

*Keyboard stand and sustain pedal optional.

Abstract Hip Hop
Prepare yourself for the deepest Hip Hop CD on the market. Caspar returns with some deep, vibe turntable phunk, packing out this disc with pure Hip Hop and R&B nastiness. From the producers of Strictly Hip Hop, Strictly RnB & XTcFiles of Hip Hop, this joint is jammed with deep, groovy, dubby, smooth & jazzy construction kits, music loops, drum-loops, beats & breaks, sounds, chords, vocals, drums, guitars, bass loops, FX & tons of the phunkiest kicks, toms & percussion hits.
Format: Acid, AKAI S5000, AKAI Z4/Z8, Cakewalk, Cubase, Digital Performer, EXS24, GigaSampler, HALion, Kurzweil, Live, Logic Audio, ProTools, Reason, Sonar, Triton, Unity, WAV
Audio/WAV ................................................................. 89.95

XTc Files of Hip Hop
Packed with phat breaks, sloppy fills, ghetto bass, funky licks, crackling Rhodes and wild-style FX. Plenty of loops and samples from the masters of ol' dirty Wu Boy beats construction kits, master cuts, drumloops from 77-121 bpm, horror FX, guitars, strings, brass, bass, fills, vinyl FX, keys, pads, ambience, drum hits and more!
Audio/WAV ................................................................. 89.95

Wall of Vinyl 3
This 2-CD set SLAMS down the baddest Hip Hop, Rap and R&B - sure to hang your music on the wall in gold! Crackly, poppy, clean construction kits, hits, horns, picks, snare, guitar, bass, synths, pads, strings, vocals, percussion, and even some xylophone! "... this CD is worth the price of admission for its drum loops and breakbeats alone. . suitable for almost any style of music that relies on sampled loops of live drumming." 5 out of 5 - Remix
Format: Analog sampling devices; Software that can extract files from an Audio CD
Audio................................................................. 89.95

Vinylistics 3
Another massive amount of stretchin' & bendin' of ol' Ruffstyle breaks, keeping all the dust and dirt! Ruff Hip Hop and Funk breaks with that distinguishing Vinylistics sound... over 1,000 measures of new Hip Hop and R&B beats and breaks filled to the brim with loops and variations, plus the component drum samples that made the loops.
Audio/WAV ................................................................. 89.95

Strictly R 'n' B
Are you a remixer? A DJ? A producer of Soul? Do you need some smooth, dope loops? From the makers of XTcFiles of Hip Hop & Vinylistics comes Strictly R'n'B. 800 exclusive swing and soul, loops and samples with variations and all the drum samples that made each loop. A great mixture of slo & groovy loops from 60-100 bpm.
Audio/WAV ................................................................. 89.95

Strictly Hip Hop
From the makers of Strictly R'n'B and Vinylistics, comes this new collection of the most groovy, freaky beats and breaks! Jam-packed with 'em from 59 to 112 bpm, plus variations and the drum samples that made each loop. Lush, slo grooves mixed with mad, hectic double-time beats, in Street, Hip Hop, R&B and Soul- get busy and make ya own wildstyle traxx!
Audio/WAV ................................................................. 89.95
Big Beat

In the battle for the biggest beats, Big Fish has gone behind enemy lines to bring you a Mega-ton of them! We've plundered and pillaged our way across the war-torn landscape of modern Breakbeat dance music to bring you the fourth in the Megaton Bomb series. Big Beat is a 2-disc arsenal of the freshest, meanest, toughest sounds around - packed with insane construction kits, drumloops, hits, percussion, ruff-n-tuff background noises, vocals, ambient & atmospheric sounds from 85 to 150 BPM.

Format: Analog sampling devices, Software that can extract files from an Audio CD

Audio ........................................................................................................ 89.95

Breakbeat 2

We've raised the bar on Hip Hop drumloops with this one. All new, all fresh, all never-before-heard breaks for you beatheads and digital funk-masters. The disc features extended breaks with variations - no filler! If you're looking for the sound of a drum machine, look elsewhere; but if you want only hot, greazy, honey-suckin' beats with the hits from every loop... you know who to call.

"If the urban thing is where you and your music live, you'll find tons of stuff ripe for picking... strictly for producers who want to add some fresh beats to their library..." - Keyboard

Audio ........................................................................................................ 29.95

Hit Zone

From deep inside the war-riddled Pop Chart bunker come the beats that'll bump the charts for a thousand years. Timbaland to Max Martin, Neptunes to Jimmy Jam & Terry Lewis, that clean, defined R&B/POP sound - a true Top 40/R&B/Hip Hop assault. Basses, beats, keys, licks, guitars, fx, and more. Ready for use in your sampler or software.

Multi-Format: Audio/WAV/Acid ........................................................... 99.95

Breakbeat 3

More nasty, dirty breaks, with all updated sounds. Live splice-n-dice drums, with subtle electronic sounds. Perfect for hip hop, R&B and dance. Contributions come from major label recording artists Jamie Myerson (Columbia Records), as well as up-n-coming producers Alan Moore and Sean Dvorak. Tempos from 70-126, emphasis in 80-100 range. Long loops of 8-16 bars, variations every two bars, hits at the end of each, plus a section of 2-bar loops.

Format: Acid, Cakewalk, Cubase, EXS24, GigaSampler, HALion, Live, Logic Audio, ProTools, Reason, Sonar, Unity, WAV

Multi-Format: Audio/WAV/Acid ........................................................... 89.95

Hardcore Breakbeat Action

Construction kits with big bonus section of drumloops from HUGE producers. Aimed at the breakbeat/big beat producer, with a focus on nu-school breaks, as well as old-school hardcore (i.e. fast-tempo breakbeat). Modern style elements of hip-hop, breakbeat and drum-n-bass, elements of happy and dark hardcore, and the occasional guitar-based riffs of big beat. Incorporates both the west coast funk-breaks sound, as well as the hi tech sound of the UK.

Format: Acid Cakewalk, Cubase, EXS24, GigaSampler, HALion, Kontakt, Live, Logic Audio, ProTools, Reason, Software that can extract files from an Audio CD Sonar, Unity, WAV

Multi-Format: Audio/WAV/Acid ........................................................... 89.95
Electric Ghetto

Electric Ghetto is the toughest Rock/Rap/Industrial disc ever produced and only followers of the likes of Limp Bizkit, Korn, Ministry, NIN and Zombie will be pleased by the groove-grinding madness of these sounds. Two audio CDs and 2 Acidized .wav CD-ROM's of extended construction kits that develop and change for ultimate variation, self-contained songs, guitar, synth, bass, guitar riffs, Hip Hop beats, creepy atmospheres and more crazed mayhem sure to set fire to your mix! Insert this nastiness only if you dare.

Format: Analog sampling devices; Software that can extract files from an Audio CD

Multi-Format: Audio/WAV/Acid ..................................................89.95

R&B Backline

Chicago has a rich African-American music tradition and has been the birthplace of many soul and R&B groups over the last fifty years. Features loops from Chicago's best rhythm section. Chuck Webb on bass (David Sanborn, Grover Washington Jr., Ramsey Lewis, Joe Sample & many others) and Khari Parker who currently has the hottest drumming gig in the business - Destiny's Child. Funky, laid-back bass & drumloops in construction kit format, with section variations.

Format: Acid, AKAI S5000, AKAI Z4/Z8, Audio CD Player, Cakewalk, Cubase, GigaSampler, HALion, Kontakt, Kurzwell, Live, Logic Audio, Mac, PC, Reason, Sonar, Triton, Unity, WAV, Yamaha

Here's the follow-up to the highly acclaimed Strictly RnB. Nu Groove RnB finds its inspiration from Timbaland- the genius future funk guru. Check the awesome, phat compressed loops, & if you're into the sound of the current R&B charts, you can NOT afford to miss this groove euphoria. With an audio CD and Tc WAV CD-ROM , there's no stoppin'!

Audio/WAV ....................................................................................89.95
**Funky Jazz Funky**
Get your freak on with Rich Mendelson, the critically acclaimed producer of Phatter Phunkier! Rich assembled the East Coast's premier session talent, and contributed his own amazing production & programming skills to make this set pop like no other! Construction kits, drumloops, fills & sounds, bass loops, riffs & sounds, percussion loops & sounds, guitar, trumpet, trombone, flute, synths & more - plus midi files! With all this, it's a breeze to customize the loops and swap samples.

Format: Analog sampling devices, MIDI Files, Software that can extract files from an Audio CD

**Old School Funk Bass**
The funk stops here! World renown session bass player and producer Josquin des Pres captures the essence of Old School Funk Bass with over 500 of the funkiest bass loops, each performed along with other live musicians, then isolated, ensuring to capture the true feel of these nasty, stylistic grooves. Look no further!

**SloFunk**
Having trouble adding the funk to your R&B creation? Need some funk with a little R&B flavor? Now you can funk up your mix with a little nastiness from the veterans of live funk: the funkmasterz of Freaky Jazzy Funky, Phatter Phunkier and Big Fish Audio. SloFunk takes you on a trip to the slower side of funk with construction kits, loops, sounds, guitars, bass, keys and piles more - all from 84 to 120 bpm.

Format: Acid, AKAI S5000, AKAI Z4/Z8, Audio CD Player, Cakewalk, Cubase, GigaSampler, HALion, Kontakt, Kurzweil, Live, Logic Audio, Mac, PC, Reason, Sonar, Triton, Unity, WAV, Yamaha

**Tower of Funk**
David Garibaldi is a true drum legend. His unmistakable style is the foundation of the 1970's icon funk/R&B band Tower of Power. Without David Garibaldi, Funk, R&B and Hip Hop would just not be the same. The most comprehensive loop and sample library by one of the greatest innovators, most imitated funk drummer in history.

**Funk Stew 2**
There's no way to fake the funk, and every jam comes out funkier with a little flavoring courtesy of Funk Stew 2. It serves up the funky stuff in a two-disc portion. It's all here - three way harmony wah wah guitars (performed by Dre's and Time's studio talent), down & dirty live bass, hundreds of phat, live East coast and smooth West coast beats - plus Hammond, Rhodes, Moog, amazing scratches, sax squeals and too much more to list.

"Funk Stew 2...a real winner!" 5 out of 5 - Sound on Sound

Format: Analog sampling devices, Software that can extract files from an Audio CD

**Phatter Phunkier**
The long-awaited follow-up to Rich Mendelson's Phat & Phunky is finally here! This critically acclaimed producer of Funky Jazz Funky has done it again, and done it right! This set breaks out with 3 discs, including midi files. PACKED with construction kits, synth bass, drumloops, guitar, bass loops, drums, horns, sax loops, scratches, some funky strings, FX & way more! Whatever your production calls for, it's in here. There's 215 minutes of Hip Hop, Trip Hop, Phunk & Live production to add to your music.

Format: AKAI MPC2000, AKAI S1000, AKAI S2000/3000, AKAI S5000, AKAI Z4/Z8, E-mu E4, Ensoniq, EXS24, GigaSampler, HALion, Kontakt, Kurzweil, MIDI Files, Roland 700 Series, Sample Tank, Triton, Unity, Yamaha

Mike Cartellone - Power House Drums
Michael Cartellone's work as a band member and touring/studio drummer with Lynyrd Skynyrd, Damn Yankees, John Fogarty, Freddie Mercury, Adrian Belew, Peter Frampton and others makes him one of the most sought-after musicians on the scene. Michael's ability to capture the essence, feel and groove of many genres, coupled with his technical precision, is the guarantee for success to the modern composer/producer.
"Michael Cartellone is my favorite Damn Yankee ...one of the all-time greatest drummers in the world today....rocks with spirit and attitude." - Ted Nugent
Audio/WAV .................................................................89.95

G-Force Drums
Rock-solid session drummer, Andrea Ge, lays down some serious rock drumloops. All the drum grooves were played by this highly sought-after Italian rock drumming legend. He used three different drum kits: an all maple drum kit, a "Roswell" aluminum set and "Bonsai Kit" made from birch. Six different snare drums: brass, maple, steel, aluminum and bronze plus tons of different cymbals. Recorded at Pickaboo Studio and Umbi Studio in Milan, Italy, these drum grooves are a serious necessity for the rock producer.
Format: Acid, Cakewalk, Cubase, EXS24, GigaSampler, HALion, Live, Logic Audio, ProTools, Reason, Sonar, Unity, WAV Multi-Format: Audio/WAV/Acid ..................................................89.95

Ross Garfield Drums 1
The industry standard for quality, quantity and bang for the buck. Over 1,200 samples, multiple ambience and up to 6 velocities per instrument. From the first kick drum to the last conga, these are the best drums on earth.
"Top-notch ... great-sounding instruments recorded in great-sounding rooms with excellent mics. Kicks are excellent... snares are beautiful... hi-hats are exquisitely EQed... " 5 out of 5 - Keyboard
Format: Aiff/SampleCell, AKAI S1000, Audio, E-mu E4, Kurzweil, Roland 700 Series, SampleCell/WAV, Synclavier AIFF/SampleCell or AKAI S1000 or E-mu E4 or Kurzweil or Roland 700 Series or SampleCell/WAVT ........................................169.95 Audio.................................................................71.95

Ross Garfield Drums 2
Over 1500 samples from the Doctor's library. Ross Garfield has dramatically raised the standard for the best drums on Earth. More than 350 kick samples & 800 snares, hundreds of toms & cymbals plus an extensive percussion selection. With most having five velocity levels per instrument, you just can't get better sounding drums!
Format: Aiff, AKAI S1000, AKAI S2000/3000 & S5000, AKAI Z4/Z8, Audio CD Player, GigaSampler, HALion, Kontakt, Kurzweil, Roland 700 Series, SampleCell, SampleTank, Sonar, Triton, Unity, Yamaha GigaSampler or AIFF/SampleCell or AKAI S1000 or Kurzweil ........................................169.95 Audio.................................................................71.95

Hadeeth — Arabic Rhythms

There's nothing like old world rhythms to add flavor and essence to tracks that would seem otherwise a bit ordinary. These Arabic rhythms are just that- traditional percussion rhythms that will add the authenticity that makes any traditional track or film score come alive, but also modern rhythms that add an edge off to the traditional, and add a new flair to the ancient rhythms that originally inspired dance. Hadeeth was recorded by seasoned Arabic professionals and contains loops and hits from tabla, taar, duff, tamborine with skin, congas, sakat (hand cymbals) . . .

**Dread: The Reggae Collection**
Reggae is a hugely popular art-form, and yet rarely has it been represented properly in a sample CD, so Big Fish is extremely pleased to present Dread. Quit planting that stuff in your back yard, get back inside and make some sweet rhythms. These construction kits are gorgeous...the drums are authentic, the bass is low and throbbing, and in the 'pocket' like it should be. Also included: extra drum hits, loops, keyboard bits, guitar and bass loops, and lots more. This fat one will take you from dirty ol' ragamuffin dub to joyous island sounds, you can’t find a better reggae disc.

“If you want to ‘Marleyfy’ your music-making then this’ll be just the ticket.” - Computer Music

# Loopzilla

## Loopzilla Underground
The monkey is back! He's been lurking in the underground, gathering the newest and freshest sounds, waiting for the perfect moment to emerge. That time is now. Loopzilla busts up through the streets of America's urban landscape to *yet again* dictate the course of Hip Hop! From the producers of the acclaimed Loopzilla and Wall of Vinyl, comes the deepest construction kits, hits, scratches, guitar stabs, breaks, Rhodes, bass, horns and more!

**Format**: Acid, AKAI MPC2000, AKAI S1000, AKAI S2000/3000, AKAI S5000, AKAI Z4/Z8, Cakewalk, Cubase, E-mu E4, Ensoniq, EXS24, GigaSampler, HALion, Kurzweil, Live, Logic Audio, M ac, PC, ProTools, Reason, Roland 700 Series, Software that can extract files from an Audio CD, Sonar, Triton, Unity, WAV, Yamaha

**WAV/Acid or Audio** ................................................................. $89.95

## Loopzilla Funk, Guitar & Bass
Can you smell the funk?! All you producers of Hip Hop, R&B, Rap and Trip Hop know that nothing funks up programmed rhythm tracks like live guitar and bass. Loopzilla Funk Guitar & Bass is the answer, and this set is packed with top quality funk! Featuring players from the Gap Band, Boo-Ya Tribe and Dr. Dre's posse, this set covers everything from clean & jazzy to low-res greasy- played by pros who understand what Hip Hop feels like. Featuring wah-wah, multi-guitar harmonies, motron, clean and distorted funk, plus a ton of variety guaranteed to make a straight track swing and a good track great!

**Audio** ............................................................................... $89.95

## Loopzilla 1
This Hip Hop monster is still tearing the roof off from coast to coast! Still the leader in authenticity and usability, and the standard for Rap and Hip Hop construction kits! Loopzilla is two discs jam-packed with some of the phattest construction kits ever made! Way over 1,000 Breakbeats, bass loops (greasy old electric, stand-up and synth), funky wah wah guitar loops, scratches and FX. There's West Coast Gangsta, Acid jazz, Old School and more top quality Hip Hop Funk for your trunk than anybody else is selling anywhere.

**Audio** ............................................................................... $89.95

## Loopzilla 2
The monkey is back with two discs jammed full of the phattest grooves and construction kits in funky, soulful music for R&B and Hip Hop! Loopzilla 2 combines the best elements of programmed grooves and live playing with new melodic & hook elements destined to be the hallmark of the new sound. Breakbeats, guitar, bass, analog synth loops, horn hits, organ, silky vocal harmonies & pop hooks, combined in slow jams, R&B & Hip Hop from Atlanta, Miami, New York, Oakland and So Cal schools of Hip Hop, Funk and R&B.

**Audio** ............................................................................... $89.95

## Loopzilla 3
Loopzilla busts out the cage with 145 minutes of brand new drums, guitar, bass, rhodes, vocals, horns, turntable wizardry and much, much more! The monkey will take you from mad, hard Hip Hop Funk to silky Hip Hop Soul! Quality makes the difference! This 2-disc set features the veterans of Loopzilla 1 & 2, plus new talent from Boo Ya Tribe and The Dazz Band. There's nothing about this set that ain't great - so c'mon and get your groove on with Loopzilla 3!

**Audio** ............................................................................... $89.95

## Rizing Drum and Bass
T J Rizing finally lets you in on a few of his drum & bass secrets. Rizing Drum & Bass is a collection of some of his best construction kits from 165-180 bpm, bass sounds, keys and FX, sub bass, 808 bass, Rhodes, kicks, snares, hats, percussion and more! Produced by legend TJ Rizing and mastered by the same team who brought Underground Garage, this audio CD is brand new and ready to be used. The loops are tight, the sounds are superb and the production is right in the pocket!

**Format**: Analog sampling devices; Software that can extract files from an Audio CD

**Audio** ............................................................................... $99.95

## Drum 'n Bass: Journey to the Light
When it comes to Drum 'n Bass, Jamie Myerson needs no introduction. America's premier Drum 'n Bass producer has finally made a sample CD, and it slams! This set features a variety of construction kits and loops, ranging from hard 2-step to dreamy Lookin' Good-style beats. This is a must-have for all you Jungle/Drum 'n Bass fans.

“...a drum’n’bass offering...comes packed to the hilt with 764 samples...on two CDs in both audio and wav format.” - Computer Music.

**Format**: Acid, Cakewalk, Cubase, EXS24, GigaSampler, HALion, Live, Logic Audio, ProTools, Reason, Sonar, Unity, WAV

**Multi-Format**: Audio/WAV/Acid ........................................ $89.95
Platinum Essentials

Keith Clark, a.k.a Clizark, is the best kept secret on the West Coast! Shhhhh, don't tell no one, but he's lettin' you in on his multi-platinum bag of essentials! His wicked versatility as a producer can be heard on albums like the debut of Def Jam Recording Artists "The Dove Shack", Snoop's first album with No Limit Records "Da Game Is To Be Sold Not To Be Told", along with his follow-ups – including Suited N Booted on Snoop's brand new "Paid Tha Cost to be Da Bo$$" and multi-platinum hits from B-Legit, Mack 10, Kurupt, Eastsidaz and TRU. These hits propelled Keith to multi-platinum status in a matter of minutes! Now he is among an elite group of producers putting it down on the West Coast and lapping up the worldwide recognition. "Platinum Essentials" is JAMMED with construction kits, beats, sounds and more from his bag of platinum sounds! This joint is so hot, a few of the tracks even got sold before it was done. Now you're hearing them on the radio. You want the platinum? Pick up the essentials.

Metriam

Metriam is your gateway to parallel dimensions; the ancient ambiances, ritual rhythms and shaman sound effects on this CD will elevate your music to another level... or just make it a little more interesting.

Metriam is stacked with tribal drum beats, rhythmical mood loops, shimmering backgrounds, walls of noise, ethnic-electric percussion sounds and more. If you ever find a sample collection as unique as this one, you're dreaming.

The sounds and loops on Metriam are ideal for soundtrack composers, perfect for technoheads and dance music producers, and indispensable for makers of ambient and chill-out music.

Drumwise: Single Drum Sounds
Rhythmbeds: Harmonical, rhythmical pads and beds.
Soundwise: Atmospheric add-ons.
Pads/Plains: Two-dimensional pads and backgrounds. Shallow

LA Drum Sessions

Prepare yourself for the ultimate collection of drum performances to date. Phat, thick, luscious beats, in about every style you can think of, with so much variation, you won't need anything else for a long while! Three discs of acidized WAV, divided up into folders containing a number of related loops in a given style and tempo. Allows you to construct a song in your style by picking from similar loops. A variety of recording setups were used in the studio, to fit the needs of each style being recorded. There are three versions of each performance: dry recording, room-mic recording only and mixed (dry and room-mics together). The mixed versions have been mixed for each style separately to create an appropriate mix... but if you don't like it, you can mix your own version! Over 80 categories of styles; over 6000 loops; Jazz, Rock, Disco, 60's Fun, Funk, Punk, Country, Blues, Texas Shuffle and more. Call up your own session drummer today, and add the quality only real session pros can offer.

Styles include: Jazz, Big Band, Rap/Rock, Hard Rock/Metal, Slow Rock, Fast Rock, Pop-Rock, 60's Fun, Slow and Fast Surf-Rock, Disco, Slow Groovin', Funk, Gypsy/Bossa, Punk, Reggae, Blues (slow, fast, chicago, etc.), Country Waltz, Texas Shuffle...and more.

Dirt Keeps the Funk

The mothership has landed! Inspired by Parliament, Funkadelic and other P-funk pioneers, the live played loops and grooves on this unique CD are sure to shake any booty. Dirt Keeps The Funk is jam-packed with bubbling, Bootysrific bass guitar lines, laid-back drum beats, wah-wah rhythm guitars, go-go style percussion and psychedelic synth riffs, all waiting to tear the roof off your sampler. PiFunk!

**Mark Walker - Latin Drums**

Mark Walker lays down slamming Cuban, Brazilian, Puerto Rican and other Latin American rhythms* but this is not your typical Latin Percussion disc of traditional timbales and congas. What sets this one apart from all the others is that the loops are played on a full drum kit plus a complete assortment of hits and cymbals. The loops cover a huge variety of tempos and feel plus a section of superb rock hits that get up to nine levels of velocity!* some say the best ever recorded. If you liked Peter Erskine - Living Drums, you're going to LOVE this!

**NYC Percussionworks**

The follow-up to the blockbuster NYC Drumworks, Percussionworks is a 2 audio or 2 CD-ROM set featuring 7 of NYC's hottest percussionists. Hundreds of percussion samples, hits and loops, all meticulously recorded. Whether you're looking for that perfect conga part or a Hip-Hop tambourine groove, it's all here. The best part is that this library is totally interactive with NYC Drumworks (in tempo and style). Sammy Figueroa, George Jinda, Steve Thornton, Emily Rivera, Mark Johnson, Todd Isler and Mark Johnson give it to you straight!

Christian Lane - Ultimate Marimba & Vibes
This gorgeous library features a Marimba One five octave rosewood marimba, and a Musser Gold Century set of vibes. 4 sets of mallets to choose from with each instrument which should give you an idea of possibilities that await your compositions. The marimba patches include 4 velocity strikes, rolls, muted strikes and rattan handle strikes. The "marimba extra's" patch includes resonator strikes, glisses, various runs & more. The Vibraphone patches include 3 velocity strikes, pedal up strikes, bowed vibe & many ethereal sounds. 3 selectable motor speeds are programmed via the mod with each mallet of the vibes. The days of dealing with one velocity and one mallet choice are finally over!

Vol. 46 Flamenco

Recorded exclusively in Spain, this CD captures a wealth of traditional and modern rhythms and flavours played by original respected Flamenco musicians - names such as Ketama, Tino De Geraldo and Pedro Andrea among others. Includes guitar rhythms, Male Cantaor and Female Cantaora (vocals), tapping feet, solo tapping, castanets, shouted vocals and Cajon rhythms. Bring out the gypsy in your music!

"All ... you need to add either a hint of Flamenco to an existing track or construct your own Spanish-style dance floor smash... the feel of true Flamenco music ...." (SOUND ON SOUND, UK).

EAPS46....................................................44.95

Vol. 47 Breakbeat 3

Returning to the "rawfunkindirtyassboogiebeats" that have made the Planet Of The Breaks series such a phenomenon, Emre Ramazanoglou delivers a huge selection of fresh and raw grooving breakbeats. Edgy and tough, small, large, fast, fat, lo-fi, hi-fi, mid-fi, broken, smashed, cuts, drops and extreme funk with quintessential quirk! Shawn Lee (Creator of the 5 star, Key Buy Award, Platinum Award 'Planet Of The Breaks' and 'Beneath The Planet Of The Breaks') was blown away when he heard these beats. 

Return To The Planet Of The Breaks will add that extra dimension of groove to your projects and tracks.

EAPS47....................................................44.95

Vol. 48 Disco Fever

Very hot stuff from smash CD Disco De Luxe - authentically produced for disco/house/frenchhouse/funk&soul productions. inspired by often-sampled disco vinyl for hot club burners. contains construction kits, drumloop kits, strings, brass, flute, guitars, basses, vox, single sounds. Relight your fire!

EAPS48....................................................44.95

Vol. 49 FX_Area

An essential fx library for music, film and webdesign, well-sorted professional effects: button / signals / movements / mechanical gears, data stream, guns, robots, scanners, crafts, clocks. / electricity, air.. / vox: robots, alien / atmos: explosion, time-trip, underwater space, control-room.. / and even background-loops.

EAPS49....................................................44.95

Vol. 50 Real Guitars

Guitars from Pure Guitars by Yellow Tools. Real Guitars - as if they were played live! Nylon Concert, Steel Pick, Steel Fingered, 12-String, Bass Fingered. The best guitars and basses were used. Offers the user authentic, realistic (unlooped), and dynamic guitar performances. In addition, there are different FX volumes, chords and harmonics.

EAPS50....................................................44.95
Compatible, convenient and competitively priced, 2rAw is the sample product you've been waiting for! These CDs feature sounds in ReCycle (Rex) files, Reason refill and Acidized wav files for enhanced use with all the hottest Mac and PC music creation software. No matter which program you use, getting the sounds into your project is quick and easy, so you spend less time converting and editing files and more time creating!

**Funkmaster**

If you want real, pure, original funk, you have to go to the source, James Brown. The Funkmaster Jabo Starks is on more James Brown classics (Sex Machine, Good Foot) than anyone and kicks out some of his funkiest beats, along with a slamming virtual band - including bass, guitar and percussion played by top notch funksters.

This library contains the following 201 Acid/wav loops: Drum, Bass, Guitar, Percussion, 163 Rex2/Refill files: Drum, Bass, Guitar, Percussion, Construction kits, 112 Drum hits and variations of The Jabo Starks Redrum Kit.

**ExtremeROCKFUNK**

ExtremeRockFunkRage collection is geared to fill the needs of samplers, with some of the extremely powerful and contemporary rock grooves, riffs and loops that are so prominent in much of today's music. The construction kits are played by Unstoppable, one of the LA's most underrated and influential rock trios, with a unique blend of hard rock and pocket funk, PLUS plenty of extra guitar, bass drum and vocal scream riffs with an Extreme attitude.

Compatible, convenient and competitively priced. Feature sounds in ReCycle (Rex) files, Reason refill and Acidized wav files for enhanced use with all the hottest Mac and PC music creation software. Getting the sounds into your project is quick and easy!

New World Order 1
The New World Order series scans the globe to bring you unique loops from around the world. NWO 1 contains drum and percussion loops and grooves from India, Africa, Cuba, the Carribean, Japan, Ireland, Texas - that's right Texas, and Brazil. Awesome grooves from instruments like the tabla, the talking drum, the daf, the dumdum, the bodhran, the djembe and more. Control the world with these acidized and rex2fied beats.

Multi-Format .......................................................... 44.95

New World Order 2
The New World Order series scans the globe to bring you unique loops from around the world. NWO 2 contains music loops and phrases from instruments like the Balalaika from Russia, the Gombri from Algeria/Morocco, the French Hurdy Gurdy, the Kora from Senegal, Balinese Gamelan, Key Harps from Sweden and different stringed instruments from India and Ireland.

Multi-Format .......................................................... 44.95

Club Spectrum
Lab tools for the Remixologist. Club Spectrum provides a killer variety of the necessary essentials for making dance music. 4 the floor beats, bass lines, synth riffs to create house, trance, techno, electro, retro, drumnbass.. all in Acid/wav, and REX2 formats to easily work with a song’s tempo. Mix in time, Mix and refine.

Multi-Format .......................................................... 44.95

Uptown Breaks
PowerFX drops the BOM B!!!! New breakout beats for the NOW feel in R&B/Hip Hop/Nu Dance Pop. Wicked beats and syncopations with variations for butt moving connotations. Ultra modern-futuristically hip, Uptown Breaks is the real deal!

The formats included in this package are Reason, REX 2 & Acidized WAV

Multi-Format .......................................................... 44.95

FX in Time
This collection features loops supplied in Acidized .wav and .rx2 (REX) file formats, as well as a Reason ReFill.
The loops are the result of performances involving hand tools, power tools, garden and household equipment and lots of other mechanical bits and pieces "played" in a musical manner – for anyone who wants out of the ordinary loops and rhythm patterns to give their projects a very unique and distinctive edge. An unusual and creative palette of sounds and textures.

Multi-Format .......................................................... 44.95

Club Track Builders
Six top dance producers from four countries make Club Track-builders a unique and versatile tool for anyone creating club music with an edge! House, techno, 2-step, drumnbass styles with beats, bass and synth loops in rexFill-acid-wav file formats. Spend more time creating great dance music.

Contains: 304 Acid/wav files, bass, beats, rhythm, synth 304 Rex2/Refill files - bass, beats, rhythm, synth files.

Acid/Reason .......................................................... 44.95
Audio ................................................................. 89.95
Without a doubt, BT is one of the fastest rising artists in today's music scene. He has written the score for the #1 box office hit “Fast and the Furious”, as well as scores for “Driven”, “Go”, and “Under Suspicion”, produced N'Sync’s single “Pop”, released his own album “Movement in Still Life” (which received rave reviews), and most recently released the double re-mix album “R & R”.

**Breakz From the Nu Skool**

The first of two sample CDs in BT’s signature collection. Features cutting edge breakbeats hand mangled through hundreds of plug-ins, stomp boxes, pressed to vinyl, you name it! From Kyma to Reason, Breakz from the Nu Skool streams through on all frequencies of subconscious awareness. Best of all this CD is sample accurate! No more flaming as you stack loop upon loop. Drop them into any AKAI compatible Sampler and you’re off and sprinting. Also included is a bonus Audio version for fast auditioning. Once you’ve busted some Breakz from the Nu Skool, you won’t look back!

Audio/WAV ................................................................. 89.95

**Monster Beats**

A double CD set (audio plus WAV CD-ROM) loaded with over 75 minutes of in-your-face Rock, Funk, Fusion and Alternative grooves ranging from 60 to 203 bpm. Recorded and mixed with state of the art recording technology at a number of London’s top studios, Monster Beats showcases the talents of an acclaimed session drummer and recording engineer at the top of their game. The drums are played with attitude, but never overplayed as on some drum CDs...

Monster Beats has a usability that no other loop based CD can beat. With extreme re-mix variations of EACH groove utilising some of the most sought after outboard FX and eq, plus custom analogue modular synthesizers. Complete drum performances, precisely timed Wav files are included - ensuring each and every beat can be looped at any point with exact accuracy!

MONSTER BEATS is produced by Chris Whitten and Peter Henderson and features 89 live drum kit performances based on Chris’ favourite tracks, from rock to fusion with a large dose of alternative grooves. Monster Beats features natural born grooves, played with a real human feel serving up clean, gritty and raw beats, including sections without kick drum, solo hi hat and more drum fills than have ever been available before. Sound on Sound recently said, “The loops are tightly played and extremely well recorded, with just the right amount of grit and grime... Producers and composers from all genres looking for something extra to spice up their drum tracks will find plenty to use here”.

AUD/WAV ................................................................. 89.95

**Brutal Beats**

From the producers of the KEY BUY and award-winning CHEMICAL BEATS! Loaded with the most intense and aggressive drum grooves ever. Recorded and mixed with state of the art recording technology (SSL 9000J) in one of the world’s top drum rooms (Townhouse Studio 2’s Stone Room in London), Brutal Beats is a tour de force of loud, rocking, edgy loops. With extreme re-mix variations utilizing propriety software and hardware and some of the latest processing devices, it has an edge that no other loop based CD can beat. With precise timing for each and every beat, grooves can be looped at any point with exact sample accuracy!

This library features 47 live drum kit performances based on classic 70’s rock tracks by Geoff Dugmore, one of Britain’s most in-demand session players. The beats include intros, fills, verse & chorus grooves etc. A massive variety of grooves are provided, including straight and shuffle feels, slow blues, odd-time patterns and many more. You will find a huge range of tempos from under 60bpm to over 200!

All performances were recorded with full 24-track digital recording mixed down to stereo. ‘Straight’ (mildly compressed) and ‘Compressed’ (pumping) mixes of all performances are provided, with up to TEN stages of digital and valve compression and limiting. Over 100 radically mutated dance remixes are included. The individual hit library is also provided to allow maximum flexibility and creativity.

This Bosendorfer library provides the greatest possible control during the softest pianissimo, through crescendos to the reserves of power needed for the loudest fortissimo. By utilizing new technology to optimize the mechanical performance of the action, Post Musical Instruments has created a product which leaves the pianist in total control of dynamic response, timbre and touch. PMI has finally captured a grand piano with "breath". They recorded both dry samples and ambient samples. The dry samples are recorded fairly close to the piano strings. The wet samples are recorded at a distance so that the hall acoustic is captured.

You can experience a concert hall type of sound and control the amount of ambience until you play it absolutely dry.

Over 2 GB of samples, up to 16 recorded layers of velocity, separate sustain pedal up and down samples... separate "dry" and "wet" samples that can be mixed for ultimate ambience control.

Giga ......................................................... 219.95

This Steinway library was recorded with the best grand piano they could find: a 1965 premium condition Steinway model D3. It was fully refurbished by Steinway Hamburg in 1999. This piano served the Rotterdam 'DOELLEN' concert hall for several decades, where hundreds of famous musicians, from Claudio Arrau to the Rolling Stones, performed for live audiences and broadcast concerts. Up to 6 articulations were captured (PPP, PP, P, MF, F, FF and FFF) for sustain pedal up, sustain pedal down and 4 articulations for the release triggered samples. Samples were recorded using the finest digital equipment available. Prism Sound, a 24-bit ProTools TDM Mix+ system and Waves processing was used. They mapped up to 16 levels of velocity, true multiple velocity release layers, ultimate staccato, and sustained pedal-down samples with a carefully chosen amount of resonance. The library has 5 GB of samples. The end result was tested by several concert pianists, who helped develop a sampled instrument which could meet their highest expectations. There is no doubt in our minds that this is the best sampled piano ever.

EAST WEST's BOSENDORFER 275 sampled grand piano features up to eight stereo dynamics per note for unparalleled expression and realism. The Bosendorfer Grand Piano was recorded in Switzerland by the producer of the critically acclaimed FIVE STAR Sample Library THE ULTIMATE PIANO COLLECTION, Olivier Truan. It is a 1995 BOSENDORFER 275 (9 foot 1 inch) Concert Grand built in Austria. It has an extra range down to F0, 92 keys. Almost every note was sampled in 8 stereo velocities, 4 with the pedal up, 4 with the pedal down for unparalleled realism and expression. 736 stereo samples were recorded in total, without any looping (up to 2 minute decays). The piano was digitally recorded and edited direct to disc to achieve the highest possible quality.

Advanced Orchestra Compact

The ever-growing need for orchestral samples and the continuing success of the "Advanced Orchestra" library created a lively demand for an affordable "light" version of this internationally renowned library. The Compact Edition contains - thanks to some clever "compression techniques" - the most useful samples from the "big" library which need much less RAM than the "big" samples do.

Contents: Strings ff & mp (sustained, tremolo, con sordino, staccato, pizzicato), Brass & Woodwinds ff & mp (staccato, sustained); Orchestral Percussion, Harp.

AKAI S1000

Advanced Orchestra Volumes 1-5

Available Individually

The new standard for symphonic samples from the producer of the quadruple FIVE STAR sample CDs “Orchestra” and “Orchestral Colors” - Peter Siedlaczek. Advanced Orchestra consists of 5 CD-ROMs (the Emu format has 6 CD-ROMs) containing 5,455 samples of all instruments and instrument groups, as well as a large symphony orchestra.

Advanced Orchestra Volume 1

String Ensembles contains: 14 Violins, 10 Violas, 8 Cellos, 6 Basses
Also included: 14 Violins, 10 Violas, 8 Cellos, 6 Basses in Mono 22 kHz.
Above instruments played Con Sordino, Short detache, Sustained notes, Pizzicato, Col legno, Tremolo, Crescendo, Trills, Grace Notes, Short Chords, Runs (major & minor), Arpeggio (major & minor), Glissando.
Also available in Audio, EMU, GigaSampler and Roland.

AKAI S1000 ........................................... 149.95

Advanced Orchestra Volume 2

Solo Strings contains: Solo Violin, Solo Viola, Solo Cello
You’ll find all the above instruments: Short detache, Sustained Notes, Spiccato, Solo expressivo, Con Sordino, whole tone ascending notes, Trills, Runs (major & minor), Short chords, Arpeggios (major & minor), Slow & Fast Glissando, Tremolo, Pizzicato, Crescendos.
Also available in Audio, EMU, GigaSampler and Roland formats.

AKAI S1000 ........................................... 149.95

Advanced Orchestra Volume 3

Woodwinds contains: 3 Flutes, Flute, Alto Flute, Piccolo Flute, Oboe, Bassoon, Contrabassoon, Solo Clarinet, English Horn
You’ll find the above instruments:
Staccato, Grace Notes, Runs (major & minor), Flutter tongue, Sustained notes, Crescendo, Trill, Mordent, Solo Vibrato, whole tones and half tones ascending and descending.
Also available in Audio, EMU, GigaSampler & Roland formats.

AKAI S1000 ........................................... 149.95

Advanced Orchestra Volume 4

Brass & Effects contains: 3 Trumpets, Solo Trumpet, Piccolo Trumpet, Tuba, 3 Trombones, Crescendo, Solo Trombone, Solo French Horn, 4 French Horns,
You’ll find the above instruments in: Staccato, Sustained Notes, Fast, slow & short glissando, Trills, Valve flutters, Flutter Tongue crescendos, Lip trills and more!
Also included are effects:
FX “blowing for the wind”, FX “shock treatment”, FX “Short & Percussive events”, FX “unsingable melodies for everyone”, FX “clusters & longer events”, FX “the wonderful world of animals”, FX “breath of a wind player”
Also available in Audio, EMU, GigaSampler & Roland formats.

AKAI S1000 ........................................... 149.95

Advanced Orchestra Volume 5

Percussion and Harp contains:
Cymbals A Due American Symphonic, Cymbal 24”, Cymbal 18”, Timpani, Gran Casa, Snare Drum, Orchestra Bells, Large Tam Tam/Gong, Thai Gong, Chinese Opera Gong, Triangles, Xylophone, Vibraphone, Marimba, Harp, Tubular Bells
You’ll find the above instruments: single crashes, glissando, single strokes, tremolo, crescendos, single hits, strokes, various effects and more!
Also available in Audio, EMU, GigaSampler & Roland formats.

The EASTWEST / QUANTUM LEAP Symphonic Orchestra was recorded where orchestral instruments sound their most natural - in a ‘state of the art’ concert hall. Listen to the pure beauty of the “critically acclaimed” Symphonic Orchestra and “state of the art” 125 million dollar Concert Hall that were captured, using custom built recording equipment, by audio legend - Prof. Keith O. Johnson - recipient of two GRAMMYs, plus eight additional GRAMMY nominations for his 90 plus classical recordings.

The Complete Symphonic Orchestra Library
Volume One - STRINGS     Volume Two - WOODWINDS
Volume Three - BRASS    Volume Four - PERCUSSION

Features
- This is the first 24-bit orchestral sample library to include three simultaneous stereo mic setups (close, stage and hall), so users can mix together any combination of mic positions to control tonality and ambience.
- Concert hall environment offers a surprising amount of tonal control, virtually eliminating the need for EQ; and the ambient control, using any combination of these three stereo tracks, eliminates the need for artificial reverb (which usually sounds artificial).
- Create the sound “you” want. With other orchestral libraries, you get what they give you, and apart from adding reverb and EQ, you have virtually no control over the sound of the instruments. The control of tonality and ambience in the Symphonic Orchestra enables each user to “design” the sound of the orchestra to suit the work that is being created - no other orchestral collection offers this!
- In addition to this unprecedented control of tonality and ambience; the real ambience of the hall, combined with the automatic sample switching of up and down strokes that is built into the NATIVE INSTRUMENTS audio engine and interface (included with each volume of the library), has eliminated the “machine gun” effect when playing fast repetitions.
- Use the stage mics for a typical big Hollywood sound; boost certain instruments by adding a hint of the close mics; add in the hall surround mics to create a surround sound mix, or to add natural hall reverb. Finally, you can say goodbye to lifeless, dry studio recordings.
- All of the players were recorded in position. All of the instruments and sections were chromatically sampled, with multiple dynamics, with extremely dynamic and expressive articulations, and - although the library is huge, it has been programmed to be “extremely easy to use”. For example, an efficient method of composing would be to use just the “close mics” or the “stage mics” during the composition stage, adding a combination of the three stereo pairs to adjust ambience and tonality in the final mixing stage.
- Each volume comes as a Virtual Instrument which includes a high-performance Native Instruments interface powered by the efficient KONTAKT audio engine (see page 1099 for details) including Direct-from-Disk streaming for Mac and PC.
- Each Virtual Instrument in the collection combines intuitive handling with excellent sound quality, and functions as a plug-in instrument, without the need for a sampler, in hosts such as Cubase, Digital Performer, Logic, Nuendo, Pro-Tools, Sonar etc.
- Professional sound quality with advanced 32-bit processing; eight-part multitimbrality and 256 voice polyphony allow for lush arrangements.
- Clean and intuitive interface never lets the technology get in the way of your creativity. All important instrument parameters can be immediately adjusted without the need to page, scroll, or fumble through a manual.
- For the sonically adventurous, many sound shaping tools have been built in to the interface. Powerful multi-mode filters, envelopes, and LFOs give a wealth of creative possibilities. Integrated high-quality reverb, chorus, and delay effects are also provided.
- Producers Doug Rogers from EASTWEST and Nick Phoenix from QUANTUM LEAP, have collectively received over 30 international awards for the sample libraries they have created.

Prof. Keith O. Johnson has spent over 30 years developing a reputation for innovative thinking, technical achievement and musicianship which has elevated him to a position in the audio industry occupied by only a handful of visionaries. His intensive investigation of electronic behavior and acoustic perception has led most recently to his development (with digital engineer Michael Pflaumer) of the revolutionary High Definition Compatible Digital encoding process, produced and marketed by Pacific Microsonics (recently acquired by Microsoft). His 90-plus recordings have long been considered the standard for high fidelity, and include two GRAMMY award-winners and eight additional GRAMMY nominations.
Downtown Beats

If you are looking for the latest Nu Pop/Hip Hop/R&B beats that can be heard on records but not found on any current sample CDs, check out “Downtown Beats". Need the hottest and latest breaks a la Cherion Studios (Britney, N’Sync, BackStreet Boys) or Destiny’s Child, Outkast or Dirty South, the groove is right here. Beats, breakdowns, hits - organized in the meticulous PowerFX way. Wicked beats to write hits on. Plain and simple.

Audio..................................................89.95

Downtown Strings II

This is an impeccable collection of pristine, 24 bit Wav, quartet arrangements organized into 5 separate categories: Cinematic, Disco, Hip-Hop, Pop & Rock and Modern Classic. Features string quartets containing each instruments part as a separate file as well as an "all" section where the instruments play the piece together.

WAV ..................................................89.95

Downtown Orchestra

Downtown Orchestra is the MODERN MASTERWORK sample cd from PowerFX. Strings, brass, woodwinds and percussion loops and samples beautifully written, played and recorded specifically for contemporary production. You get entire orchestral parts and sections, plus a killer set of “low string riffs” that rock the house. The highly inspirational phrases in this offering scream to be turned into your “latest and greatest" composition. Audio + Wav discs included.

Audio/WAV ........................................89.95

House Musique

Fresh & funky disco house material. Inspiring, dynamic construction kits. Extra lick & loop material: e-bass (73'stringray), funk & wahwah guitars (65'strat), flute, clavinet (D6), organ (B3), acoustic piano, e-piano (mk1); plus useful drum & percussion collections for exs24, halion & kontakt; all sounds also in .wav on CD2.

Audio/WAV ........................................89.95

Beats Working - Pro Tools

Zero-G's BEATS WORKING offers an indispensable first-call toolbox of immaculately recorded, highly usable drum performances grouped in versatile song construction sets, with Intro, Verse, Bridge, Chorus, Drops and Fills of every performance, covering a diverse selection of musical styles from Classic Pop to Big Band.

The world’s first Professional Drum Performance Library recorded in 10 channels for mixing to 5.1 surround sound (and beyond). Recorded at the legendary ABBEY ROAD Studio 2 in London by top recording and mix engineer Haydn Bendall, and performed by top session drummer Ralph Salmins, the sound and performances are impeccable. Utilising high-end esoteric microphone pre-amps, and a direct signal path to a Euphonics R1, it is hard to imagine a purer, cleaner signal path.

In addition, multiple kicks, snares (both modern and vintage), toms, cymbals and hats were recorded at multiple velocities, giving you the ultimate flexibility to design your own kit.

9 disc ProTools version (24-bit SDII files - 10 channels of audio for each performance) .................................................445.00

Welcome to the Sampledome

In 1987, PUBLIC ENEMY redefined rap music and Hip-Hop culture with their explosive debut album, "Yo! Bum Rush The Show". Their subsequent six albums, released over the better part of the next decade, sold millions of copies worldwide. The New York Times named Public Enemy's "It Takes A Nation of Millions To Hold Us Back" to their list of "25 Most Significant Albums of the Last Century", and Entertainment Weekly listed their "Fear Of A Black Planet" album to be one of the most important records of the '90s.

Now, with the release of WELCOME TO THE SAMPLEDOME, a "beats and loops" collection, PUBLIC ENEMY have become the first major Hip-Hop act to release such a project.

The 2-disc set features over two hours of brand new "beats and loops", presented in a "construction kit" format (fully mixed loops and all of the individual samples used to make up the entire loop). Users can "customize" each loop by using as much or as little of the original.

Drumkit From Hell
Features Tomas Haake from Meshuggah on Ludwig and Sonor kits. CD-1 contains samples, and CD-2, "Loops From Hell", contains programmed loops. The sound of the drums is left gratifyingly natural with a degree of ring and ambience following each hit. This makes it easy to treat the sampler output as a set of conventionally recorded drum tracks for the application of gates or EQ. Each drum is multisampled with both left and right hand grip, from soft to hard hits. For example, the snare consists of 10 different hits from soft to hard with both left and right hand grip. In addition to that, 10 hard left hand hits, all with a slightly different approach plus a variety of useful hits such as rolls and sidestick.

All cymbals are also multisampled with different types of hits. Each sample has two different stereo samples, one is the drum itself (with all the other mics turned on), and the other one is the room/ambient mics. With this feature you’re able to process the closely miked all the other mics turned on), and the other one is the room/ambient sample has two different stereo samples, one is the drum itself (with

Aerosmith’s Joey Kramer Drum Loops
If you are looking for the absolute best pop/rock drumloop collection on the planet - look no further!

JOEY KRAMER "the engine" behind the legendary rock group "Aerosmith," has put together the most comprehensive collection of "Pump & Thump" drum loops and samples available anywhere. Never before has the percussive thunder of a Rock & Roll Icon been offered for use to the general public.

Meticulously recorded and painstakingly assembled to offer you the best collection available anywhere of truly usable rock solid drumming. This collection contains no fat! Every loop and every sample are the stuff of rock at it's best. So strap yourself in and collaborate with a master of this genre!

This 2 Audio CD collection features all of the loops and samples mixed both "Dry" on CD-1, and "Wet" on CD-2. Both versions were recorded and mixed by Richard Chycki and produced by Marti Frederiksen.

Skunkworks
SKUNKWORKS features rhythm guitar grooves and solos from legendary Steely Dan guitarist JEFF "SKUNK" BAXTER. Jeff is the recipient of many industry awards, including twenty six gold and platinum records, two Grammys (plus six more Grammy nominations!), and is widely regarded as one of the greatest rhythm guitarists of all time.

The sounds in this collection, as you would expect, are killer! After all, Jeff has been a design consultant for Roland, Guild, Vox, and Gibson - and has his own signature series electric guitars. His playing on this collection is impeccable, including super tight rhythm guitar licks that have never been offered before in any sample collection. But that’s not all! There are guitar licks for all musical applications from acoustic to heavy metal, and everything in between. An additional BONUS disc of WAV files is included with the package. How often have you been able to musically collaborate with one of the greatest guitarists of all times? Well, now you can!

AKAI $1000 ............................................................. 89.95

Steve Smith Rhythmic Journey
Features drum loops and individual drum samples from ex-Journey drummer STEVE SMITH, recorded by Aerosmith engineer Kevin Elson at Fantasy Studios in San Francisco. Steve Smith is one of the world's most revered drummers. With the group Journey, Steve established himself as a tour-de-force groove master. RHYTHMIC JOURNEY was co-produced by East West producer Doug Rogers and David Frangioni, who collectively have produced many top-rated sample collections.

Needless to say, the grooves on RHYTHMIC JOURNEY are flawless and sound phenomenal - premixed by Rogers, Frangioni and Elson. They are also individual sounds for drum replacement or those that want to construct their own grooves using Steve's sounds. The combined experience of Rogers, Frangioni, Elson and Smith has produced one of the best sounding and best performed drum loop CDs of all time. Power on your sampler and get ready, as the journey has only just begun.

'56 Stratocaster

Introducing a next generation sample library from East West and Quantum Leap producer Nick Phoenix on 4 CD-ROMs that captures the pure tone of a '56 strat played through a Super Twin Reverb amp. 3000 chromatic samples were taken using multiple pickup settings and multiple picking styles at 4 different dynamics. This innovative library features groundbreaking new sampling methods. Features include: realistic chord strumming and chugging, pitchless strum and chugging patches, attitude and pick angle control, true legato notes for flowing leads, grace notes, slides, harmonics, mutes, pops, vibrato, non vibrato, power chords and FX. The biggest Sampled Instrument ever!! 2.5 Gigabytes!! Please note: This product is HALion PC compatible- will not work with MAC version.

GIGA ................................................................. 269.95

Rare Instruments

Features 16 groundbreaking, ethnic, multi-sampled instruments. Rare Instruments is the most expressive ethnic library ever created, including up to 54 variations for some instruments on 3 CD-ROMs. In some cases the natural range of the original instrument has been expanded, thereby creating instruments that are more playable than the original!! Meticulously recorded in studios, not in some village in Africa on a home recorder; consequently the recording quality and standard of programming is superior to all other ethnic collections. Leap Rare Instruments is the Rolls Royce of ethnic collections!

AKAI S1000, GIGA .................................. 445.00

Voices of the Apocalypse

A breakthrough sample library from East West and Quantum Leap producer Nick Phoenix on 3 CD-ROMs. Voices of the Apocalypse - Classical Choir. Every vowel and consonant sound sampled at multiple dynamics, programmed in a way that allows you to create realistic words, sung in any language. Sounds nothing like any other choir library you've ever heard, because the producer fearlessly went after the full spectrum of a Wagneresque choir. He chromatically sampled a 3 octave range of both men and women in a fabulous sounding hall. Everything from Angelic to downright evil!!

GIGA ................................................................. 449.95

Guitar & Bass

Nick Phoenix is a Los Angeles based session musician. Nick recorded and programmed this huge 600Mb collection himself because he couldn't find any other guitar sample library that enabled him to express himself on a keyboard as a guitarist would on his guitar - the result is a stunning, brilliantly programmed collection that is so realistic you would never know the sounds were coming from a keyboard with your eyes closed. Quantum Leap Guitar & Bass is a revolutionary guitar & bass library comprised of incredibly expressive lead & rhythm patches. This CD-ROM contains the most comprehensive collection of guitar samples ever assembled, as well as nine unbelievable bass patches. Up to six samples are assigned to each note! Grace notes, bends, trills, pops, chugs, slides etc. are all included within each patch making the library very easy to use. Styles include: Blues, Rockabilly, Surf, Pop, Jazz, Steel & Nylon String Acoustics, Psychedelic, Rock, Grunge, Funk, Fretless, Electric Sitar & Hawaian. Ingenious Programming, Super B Sound Quality!! - There's nothing else like it!

AKAI S1000, Roland, Unity ................................................................. 224.95

### Jungle Warfare for REASON

Over 1600 DrREX Loops, Over 1000 patches/samples for NN19/NNXT. Over 1.6 Gb of data (raw). The whole Jungle Warfare Series expertly converted to ReFill format, in a single multi-disc set. This library was awarded 5 stars (SOS) and a Key Buy Award (Keyboard USA) - and it's still the world's best full-blown Drum & Bass sample collection. Hardcore guerrilla dancefloor ammo for speed freaks. A massive collection of ultra-fast techno & funk grooves, construction kits & samples - lethal dance production weapons in the right hands. If you need the RIGHT material to produce Drum & Bass this binding collection has to be on your unmissable list.

Includes - Special Drum & Bass loops, Massive drum rolls & mega rhythm fills, Jungle percussion loops and kits of component samples, Intense Jungle pads & chords, Aggressive digital synth pads, Jungle chords and hits, In-yr-face Bass notes, Manic Jungle FX, Nasty vocals. Contains all three original Jungle Warfare releases.

**Reason** ................................................................. **116.95**

### Ambient

Features the combined contents, in full, of both of the original AMBIENT audio sample CD libraries (AMBIENT Vol. 1 and AMBIENT Vol.2). Over 470 Mb of stunning sounds produced by highly acclaimed British electronic musician, Ian Boddy. An array of dreamy NN19 atmospheric and FX patches for use in ambient dance, trance, film soundtracks or futuristic/spacey/trance music. Combining the hypnotic charms of Jarre, Floyd, Tangerine Dream and so on with current dance trends, “Ambient” is designed to mellow you out with relaxing washes, laid back rhythms and awesome sound effects.

An impressive inventory of analogue and digital synths were used to create these well organised stereo samples. There are digital drums, pads and effects (all very lush stereo) conjuring up deep space hyper-drives through sinister alien landscapes, etc.

**Important:** “Ambient” can ALSO be used with any software that imports WAV data.

**Reason/Audio** ........................................................... **89.95**

### Ambient Textures REASON

Features 1000 brand new patches created in Reason 2.0, including 300 Subtractor patches, 201 Malstrom patches, 259 NN-19 Sampler patches, and 240 NN-XT Sampler patches.

Synthesizers used: Microwave XT, Technics WSA1, Supernova 2 Pro X, Micro Q, Alesis QS

The Producer, Jonathan Heslop, has been creating electronic music for the past eight years. He has composed music for various independent films, computer games and even some patches for the Reason 2 Soundbank. During that time he has created a large number of synth patches, the best of which are on this superb ReFill CD.

(Notes: The Malstrom and NN-XT patches only work with REASON version 2.0 or later. All samples on the disc are contained within the single Refill. This sound library was previously available direct from Jonathan Heslop’s website (www.funk-station.co.uk) but the Zero-G version is now the only one available).

**Important:** The Rex Files contained in this collection can only be accessed using Reason.

**Reason** ............................................................... **89.95**

### Chemical Beats

‘Chemical’ beats are loops with masses of attitude, huge drum sounds and FX crunched through advanced signal processors, and massive grooves to kick start your imagination. Years of playing, programming and engineering expertise at your fingertips! To complete this awesome package, there are extra mad percussion loops, thunderous basses, radio loops, cutting edge synth & guitar FX, plus a vast collection of drum & cymbal bits.

All the samples are contained within a single REFILL file, and also provided again on the same disc as separate and individual REX2, NN19, ReDrum Kits and ACIDized WAV files.

Can be purchased in other formats: Chemical Beats Audio CD; Chemical Beats CD-ROM for AKAI S3000 series samplers (includes the Audio CD version free in the package); Chemical Beats GIGA or choose the smaller ProSamples version Volume 7 Future Beats 1 which is in multiple native formats and compatible with all samplers.

The sequel to the world’s greatest drum sample collection. Includes over 4000 different drum, percussion and new drum machine samples. Hundreds of ready to play drumkits for modern dance music styles: Hip Hop, real Drums, Disco, House, Drum’n’Bass. All samples are sorted and categorized. Laid out in keygroups, programs, presets or volumes - ready to be played!!!

AUD/AK/EMU ................................................................. 89.95
**Pure Hip Hop**

Nu school Hip Hop from ZERO-G. Fusing the old with the new, Pure Hip Hop brings you a raw slice of gritty beats, the fattest basses and toughest street vibes to build a Hip Hop masterpiece. Construction kits and loads of extra beats & samples make Pure Hip Hop a deep resource for the Hip Hop connoisseur. This multi-format sample collection gives you the ultimate in sampler and software compatibility - Acid ready WAV files, AIFF files, Emagic EXS24 sampler instruments, AKAI (and compatible) sampler instruments (compatible with Steinberg HALion), Steinberg REX2 Recycled files and of course Audio! BPMs and keys are given to make your life so easy. Pure Hip Hop is a must for all your Hip Hop producers who want to add some new beats to their tracks!

**Multi-Format** ................................................................. 44.95

---

**Pure R’n’B**

Extensive toolkit for assembling polished R’n’B including 35 song ready musical pieces divided into their separate elements, plus extra helpings of beat loops, bass notes and EP chords. These quality building blocks are spread over a 2 disc Audio/CD-ROM which includes Audio/AKAI/REX/WAV and are also “Acid ready”!

Features classic sounding soul breaks and exclusive swing and soul loops and samples. These are grooves from the heart of soul and swingbeat. Includes stacks of R’n’B construction kits (grooves plus all their component samples) plus extra drumbreaks, basses, Rhodes piano and organs. Add these pure R’n’B elements into your mix to give your music a refined edge and put a cool and effortless vibe into your grooves.

**Multi-Format** ................................................................. 44.95

---

**Pure Brazilian Beats**

Enjoy the unmistakable flavor of Latin America in the 21st Century - the feel, the groove, the life. Recorded in Brazil by Duda Maura, Pure Brazilian Beats is an incredible collection of completely authentic Brazilian rhythms with an infectious feel, suitable for anyone with a desire to add rhythmic life to their productions.

Features acoustic drum groove/loops including: samba, baiao, axé, bossa nova, ijexa, samba reggae, samba rock, batucada, samba do ilê, pagode, samba enredo, samba funk and other Brazilian fusion experiences.

Two Multi-format Sample CDs are included, giving you the ultimate in sampler and software compatibility.

**Multi-Format** ................................................................. 44.95

---

**Pure Trip Hop**

It’s difficult to define trip hop, and most trip hop artists deny they are part of any scene at all. Often described as “instrumental hip hop”, emphasis is on the music itself but every DJ producer has their own way of keeping a track alive so there can never be a distinctive trip hop sound. It takes ideas from jazz, blues, hip hop, Dub, Ambient, even Classical music, but it’s only through the sampler that trip hop happened at all. It vastly expanded the way music can be created. You can play with raw sound and experiment with new found frequencies, tempos and tones to make previously unimaginable music. Thirty musical pieces divided into their separate elements, plus extra helpings of beat loop samples, bass lines, EP chords and drum hits.

**Multi-Format** ................................................................. 44.95

---

**Pure Mayhem**

Pure Mayhem from ZERO-G brings electronic warfare to your sampler. Mangled beats, fuzz arps, technoid FX, PWM, noize and more noize. This is one Sample CD package that brings you mayhem in it’s purest form, Pure Mayhem. Pure techno aggression. Pure Mayhem delivers killer Drumloops, Sequences, FX Loops, Guitar loops, Ambient Loops and Bass Loops. Everything you’ll need to produce your next hit record.

Gives you the ultimate in sampler and software compatibility Acid-ready WAV files, AIFF files, Emagic EXS24 sampler instruments, AKAI (and compatible) sampler instruments (e.g. compatible with Steinberg HALion), Steinberg REX2 Recycled files and Audio!

**Multi-Format** ................................................................. 44.95

---

**Pure Tabla**

An unbelievable range of sonic beats created entirely with Tablas! ZERO-G bring you extreme remixes of incredible Tabla performances, with rhythmic adventures unlike anything you’ve heard before. Whether it’s dance or pop, Pure Tabla will give your rhythmic tracks a cutting edge inspiration. This multi-format sample collection gives you the ultimate in sampler and software compatibility - Acid ready WAV files, AIFF files, Emagic EXS24 sampler instruments, AKAI (and compatible) sampler instruments (compatible with Steinberg HALion), Steinberg REX2 Recycled files and of course Audio! All BPMs and Keys are given where applicable.

**PURE PHOTO - VIDEO - PRO AUDIO**
The Vienna Symphonic Library First Edition

Produced by top composers, played by musicians from Vienna’s world-renowned orchestras, recorded in 96kHz/24-bit and perfected by 30 highly specialized editing engineers, the Vienna Symphonic Library is a sample library of unprecedented sonic dimension. Recorded in a specially constructed recording stage designed expressly for the rigorous demands of orchestral sampling, the Vienna Symphonic Library is simply unsurpassed in both size and quality. Complete, the library consists of 1.5 million single-note samples and performance elements. Until now, many of these instruments have never been recorded for a sample library. For example, the bass trumpet, contrabass trombone, and contrabass tuba bring closure to the sampled brass category, while the world’s lowest-pitched gong, the deepest tubular bells, and others from the large and rare percussion collection owned by the Vienna Radio Symphony Orchestra are captured as well.

“Silent Stage” Recording

◆ The samples are totally devoid of background noise (80 – 100 dB signal-to-noise) and have absolute clarity, even in the pianissimo performances.
◆ The “Silent Stage,” as it is called, was designed specifically to record samples of orchestral instruments.
◆ The recording technology used (stereo throughout with full mono compatibility) makes it possible to produce everything from epic Hollywood film music to chamber music arrangements or solo pieces.
◆ An entirely new component system consisting of so-called Performance Elements means that playing techniques such as legatos, runs and repetitions, which have had limited implementation in previous orchestral sample libraries, are now completely and intelligently integrated to make possible a realism unobtainable until now.
◆ Special mappings make it easy to adjust the timing and note lengths within the performance elements and even to manipulate these authentic passages in real-time.
◆ Because each instrument is mapped the same way across its entire range, the user can find any instrument or sound quickly and dependably, despite the vast number of individual instrument and ensemble samples.

The Orchestral Cube

◆ A massive collection of string, percussion, brass and woodwind samples (over 42,000), totaling 44 GBs, the Orchestral Cube contains single note samples with a variety of dynamics options, as well as a variety of multi-note samples including trills and tremolos.

The Performance Set

◆ 36,000 samples covering over 45 GBs, the Performance Set lets you play real legato in real-time with multiple dynamics.
◆ Legato performances contain up to 3 dynamic layers with optional vibrato, and the string samples are available with and without slides. Also features repetition performances, available in legato, portato and staccato with tempos ranging from 60 to 200 BPM and appoggiaturas.

Sample content of the Orchestral Cube, Strings, Brass & Woodwinds, Percussion

Single tones with consistent dynamics
• chromatically sampled
• up to 5 dynamic layers
• up to 3 articulations (especially solo brass): soft, normal, marcato
• without vibrato, soft and strong vibrato, progressive vibrato
• different lengths for short notes: 0.1 sec, 0.3 sec, 0.5 sec
• 2 sampled variations of the same note for each short note
• long notes (1 to 20 seconds) with release trigger

Single tones with progressive dynamics
• 3 dynamic intensities slight, e.g. p<mp, f>mf etc. up to 4 dynamic layers
• medium, e.g. pp<mf, ff>mf 2 dynamic layers
• strong, e.g. pp<ff 1 dynamic layer
• crescendos - diminuendos, e.g. p<mf>p
• fp, sfz, sffz
• lengths from 1 to 6 seconds
• with and without vibrato
• Trills slow and fast variations, accelerations
• Tremolos cresendo and diminuendo patches
### Synclavier Essential Percussion

“Essential” is the key word here. Impactive drums, hits and cymbals, plus popular world percussion like steel drum, bongos and congas, not to mention electric bass, make this disc crucial to your production. Features hundreds of Kicks, Snares and Toms. 1,000+ samples.

**CD-ROM Available for AKAI, Kurzweil, Roland, SampleCell .......179.95**

### Synclavier World & Orchestral Percussion

Includes all the percussion one could want, including a full orchestral set complete with vibraphone marimba, bass marimba, xylophone, celesta, gongs, chimes, crash cymbals, timpani, bass and snare drums and more! Plus an encyclopedia of world percussion from Anklungs to Wuhan Gongs. 1,000+ samples!

**CD-ROM AKAI, Kurzweil, Roland, SampleCell .......239.95**

### Synclavier Keys and Guitars

A gorgeous Concert Grand Piano with four velocity steps — great for classics or rock. Hundreds of synth sounds from such greats as the MicroWave, Sequential V5, MiniMoog, Oberheim and the monster Synclavier itself. Plus a real Rhodes or Wurlitzer Electric Piano, some rockin’ Acoustic and Electric Guitar . . .

**CD-ROM AKAI, Kurzweil, Roland SampleCell ..................................................239.95**

### Synclavier Strings

Unprecedented warmth and emotion. Solo violin, cello and double bass samples in bowed, pizzicato articulations; cello and viola sections played as sustains and staccatos; violin section: pizzicatos, tremolos, staccatos and lush sustains. Exceptional harp . . . single note and various arpeggios. Bonus: Human voices and vocal effects.

**CD-ROM AKAI, Kurzweil, Roland, SampleCell ..................................................239.95**

### Synclavier Brass and Winds

A complete set featuring Trumpet, Trombone, Tuba, Flugelhorn, 2 and 4 Trumpet unisons, 2 Trombone unisons, French Horn and Saxes. Plus Clarinet, Oboe, Bass Clarinet, Bassoon, English Horn, Flute and Exotic Winds. Multiple articulations make expressive performances a breeze!

**CD-ROM AKAI, SampleCell ...............239.95**

### Propeller Island’s Complete Gamelan

Sounds from the edge of the world - allowing you to create liquid metallic textures and intricate rhythms which produce a hypnotic effect on the listener.

**CD-ROM AKAI (Emu, Giga, Software Sampler compatible) ...............239.95**

**CD-Audio ........................................... 99.95**

### Propeller Island’s Giant Gongs

Finest quality recordings, made at Propeller Island’s studios and the ambient Salvatore Church in Berlin. Pure, unretouched performances; many versions of the gong sounds which have been heavily processed using filters, EQ’s and wide variety of other-worldly computer enhancements. Rich resource for special ambience!

**CD Audio ........................................ 99.95**

### Propeller Island’s Legendary M400

A trip back to the 60’s and an exploration of the world’s first keyboard “sampler.” All original sound sets on each key of the instrument.

**CD-ROM AKAI (Emu, Giga, Software Sampler compatible) ..........145.00**

**CD-Audio ........................................ 99.95**

Vol. 10 Acoustic Drums
For all musical styles. Many kits that have one thing in common: the sounds were captured without any processing, so that you can apply the right treatment or leave them raw. Processed section features equalized and compressed drums sounds, and additional treatments for up to date sounding kits. 745 samples (496 in drumkits / 249 sorted samples); 58 audio tracks / AKAI partition: 29 volumes / Wav-Acid/Aiff: 583 MB / 18 drumkits (BD, SD, HH, Toms & cymbals)
USBCDSC010...49.95

Vol. 11 Dance & Groove Drums
Dozens of kits for many different music styles: Dance, Electro, Groove, House, Techno, Trash, Jungle, Disco, Lo Fi, New York & Vinyl... Unique. Samples organized in style-oriented kits, then in separate samples (BD, SD, HH...). Will be instantly useful and should become your favorite modern drums collection. 1895 samples (1132 in drumkits / 763 sorted samples); 91 audio tracks / AKAI partition: 52 volumes / Wav-Acid/Aiff: 137 MB / 130 drumkits (BD, SD, HH...)
USBCDSC011...49.95

Vol. 12 Analog & Synth Bass
The widest possible selection of classic synthesizers, including analog greats such as Moog, Prophet, Yamaha CS70m, Oberheim, Studio Electronics, and a Yamaha: both Matrix 12, MS 20 and Roland Jupiter 8, Mks 50, SH 101 & Juno 106. Digital synths, such as Yamaha DX7, Roland JD 800 & 990, Kurzweil K2000, Korg O1/W & Wavestation. Usable and efficient... 227 samples (120 anal. bass /101 dig. bass); 78 audio tracks / AKAI partition: 39 volumes / Wav-Acid/Aiff: 129 MB / Categories: Funk/Newjack, Disco, Ragga, Sub, Garage, Pop, Acid...
USBCDSC012...49.95

Vol. 13 Ethereal Atmospheres
Writing New Age or Jungle? Scoring to pictures or looking for a great Hip Hop intro? Ethereal Atmospheres offers you tons of original & dreamy textures. Majestic, ultra wide layered pads created using a mixture of tones, breathtaking “chords”, ultra spacious sounds directly usable. Bonus: Large selection of ethereal pad sounds from the best analog and digital synths. 177 samples (53 Chords / 44 Stacks / 80 Nice Pads) 46 audio tracks / AKAI partition: 46 volumes / Wav-Acid/Aiff: 503 MB / 46 multisamples set
USBCDSC013...49.95

Vol. 14 Twisted Special FX
Uses the latest in sound manipulation software, the finest high-end hardware and the rarest of sound generators. Sounds sensibly grouped into self explanatory categories – quickly locate what you need: Ambient, M od, radio, Sub waves, Electricity, Hits, M eta sounds, Insectronics. Add high quality effects to your productions. 200 samples (150 long / 50 short); 44 audio tracks / AKAI partition: 40 volumes / Wav-Acid/Aiff: 572 MB; Categories: SubWave, Suspense, Ambient Atmospheric, Insectron...
USBCDSC014...49.95

Vol. 15 Acoustic Percussions
An outstanding collection of Latin and ethnic percussion with the highest standard of quality and originality: Anklung, Bell Tree, Bongos, Cajon, Castanet, Chekeres, Chimes, Clave, Congas, Cowbells, Cruche, Cuica, Djembe, Guiro, Maracas, Rainstick, Rattle, Shaker, Step,Tabla, Talking Drums, Tambourines, Timbales, Triangles, Whistle, Wind Chimes, Wood Blocks... 888 samples / 84 audio tracks / AKAI partition: 51 vol. / Wav-Acid/Aiff: 162 MB / 51 Categ: Agogo, Shakers, Congas, Triangle, Wind Chimes
USBCDSC015...49.95

Vol. 16 Bossa Brazil
Straight from Brazil. A superb “bossa” compendium. Drums and percussions, guitar and bass were performed together - sampled separately for maximum flexibility. The drums & percs are divided in sticks, brushes and mallet loops which express well the nuances of bossa performances. The key is given for both the guitar and bass loops. 270 samples (42 drumloops / 228 bass & guitar loops); 66 audio tracks / AKAI partition: 40 volumes / Wav-Acid/Aiff: 503 MB; Tempo : 120 - 140 BPM
USBCDSC016...49.95

Vol. 17 Acoustic Keyboards
A full-fledged Piano in the S OUNDSCAN range! A Steinway D and a Yamaha: both available in several memory requirements, from a glorious 32 M B version down to the most exciting 8 M B piano patches you've ever played. A HonkyTonk piano is also included. Bonus two Harpsichord (French & Flemish) sampled... 592 samples (114 Jazz Piano / 96 Grand Piano / 98 Honky Tonk Piano / 284 Harpsichord) – 14 audio tracks / Wav-Acid/Aiff: 380 MB / AKAI partition: 14 volumes.
USBCDSC017...49.95

Vol. 18 Funky Vocals
An excellent selection of dry and processed vocals: melodies, phrases and soulful wails, hits and shouting... a broad range of emotions. From flanging effect, to AutoTune, Vocoder, square wave tremolo and other creative tools. Bonus: the biggest and funkiest collection of Talk Box samples "a la" Roger ever done in a sampling product. 647 samples (188 natural / 288 Talk Box / 171 processed); 42 audio tracks / AKAI partition: 30 vol. / Wav-Acid/Aiff: 482 MB; Categories: Ad Lib, Hooks, Ragga, Talk Box, Computer, Autotuned

**SAMPLE LIBRARIES**

**Vol. 19 Hip Hop & R’n’B**

You think you’ve heard it all? Think again! Enormous kick, dynamic snares, and a simplicity in programming— the best. Everything delivered in construction kits, which include silky sounds, nasty tones and dark effects...

(This volume is also available in MPC2000 format)

515 samples (123 Timba / 46 Teddy / 143 R’n’B / 122 Hip Hop FX / 91 Hip Hop Melodic)

72 audio tracks / AKAI partition: 36 volumes / Wav/Acid/Aiff: 563 MB / Tempo: 67 – 106 BPM

**USBCDSC019** .................................................. 

**Vol. 20 Fresh Disco House Vol. 1: Drumloops**

Dance floor lovers: This Disc kicks off with drum samples, both dry and processed. Samples are brand new – also included: classic TR tones for your convenience.

Loops – with a strong Disco House or Latin flavor. For maximum flexibility you’ll find variations, separate loops broken down from the full mix, and the individual sounds.

937 samples (350 drumloops & kits / 587 single hits); 73 audio tracks / AKAI partition: 38 volumes / Wav/Acid/Aiff: 426 M B; Tempo: 125 - 129 BPM

**USBCDSC020** .................................................. 

**Vol. 21 Fresh Disco House Vol. 2: Instruments**

Basses, guitars, electric piano, clarinet and more. Disco House needs. Breathless variety of sounds: low sub-bass, hits and stabs, suitcase piano, clarinet loops and riffs, funky guitar licks, mouth-tube, octave, vintage wah, bass section, groovy loops, licks, slap, Latin, analog bass, brass riffs, synth hit, soaring leads, pads, piano chords...

704 samples (182 clav / 217 guitar & bass / 305 misc.); 41 audio tracks / AKAI partition: 41 volumes / Wav-Acid/Aiff: 402 M B

**USBCDSC021** .................................................. 

**Vol. 22 Vintage Guitar Loops**

Authentic riffs and patterns using the best guitars and amps going through a vintage trident desk, with no effects or digital processing – to get the warmest guitar sound. Includes blues, rock and classic uses of mildly distorted tube-driven guitar amps. Minor and major patterns, solos, strums and arpeggios...

602 samples (314 Riffs & co / 217 Licks / 71 single notes); 45 audio tracks / AKAI partition: 45 volumes / Wav-Acid/Aiff: 431 M B; Tempo: 63 - 150 BPM

**USBCDSC022** .................................................. 

**Vol. 23 Historical Instruments**

A groundbreaking collection of rare vintage instruments often impossible to find in synth or samplers: 5 harpsichord multisamples demonstrating the variety of tones available, Piano Forte, 3 Accordion, Celtic Harp, Viol and baroque flutes are presented here with outstanding quality and a very good usability.

490 samples (187 Harps / 36 Piano Forte / 91 accordions / 64 celtic harp / 89 Viola / 25 flutes) – 16 audio tracks / AKAI partition: 15 volumes / Wav-Acid/Aiff: 407 M B

**USBCDSC023** .................................................. 

**Vol. 24 Industrial Loops**

Straight from the weirdest of all build site large impacts, metal hits and a wealth of superfly sound-designed percussive samples. All those ingredients are mixed with electronic percussions in a tasteful way. Dark Ambience, spacey “electric” patterns, hyperdensified tracks, electro industrial beats... The variety of sounds – difficult to describe with plain words.

406 samples (267 loops / 139 single hits); 62 audio tracks / AKAI partition: 35 volumes / Wav-Acid/Aiff: 511 M B; Tempo: 50 – 202 BPM

**USBCDSC024** .................................................. 

**Vol. 25 Big Beat Volume 1 Drumloops**

Distinctive loops make this new, exciting style what it is: acoustic loops with attitude, fills. Furious construction kits full of the most creative stuff. Loops are powerful like never before, from the classics to brand new loops tailored to push the boundaries of Big Beat. Will keep a remixer happy for years.

567 samples (444 construction kits / 123 drumloops); 47 audio tracks / AKAI partition: 27 volumes / Wav-Acid/Aiff: 490 M B; Tempo: 125 - 147 BPM

**USBCDSC025** .................................................. 

**Vol. 26 Big Beat Volume 2 Samples & More**

Enhances volume 25.

Tons of awesome samples and loops: a comprehensive distortion library, guitar and bass loops, crazy drum fills, separate sounds (hi-hats, claps, kicks, snares, cymbals, noise, vox, textures) and processed samples (brass, piano & organ, alarms, reverse texture, stack sounds).<br>

808 samples (332 drums-percs / 48 Licks / 79 synth ses / 398 others); 43 audio tracks / AKAI partition: 43 volumes / Wav-Acid/Aiff: 513 M B; Tempo: 105 - 130 BPM

**USBCDSC026** .................................................. 

**Vol. 27 Reggae, Ragga & Dub**

Drum and instrument loops and samples, effects and special textures. Special care to match the cool of true Ragga, the spaciousness of Dub style, without being victim of hype or harsh sounding recordings. Fills, sequences, construction kits, and a special mention for the outboard effects used. Outstanding quality.

1096 samples (302 construction / 485 drums / 109 sounds); 79 audio tracks / AKAI partition: 59 volumes / Wav-Acid/Aiff: 622 M B; Tempo: 130 - 175 BPM

**USBCDSC027** ..................................................
Vol. 28
Acoustic & Synth Choirs
These original multi-samples use beautiful children’s choirs, male choirs and female choirs. Recorded in Europe, these choirs will bring an organic element of beauty to your musical creations. There is also a section of complex productions and jump right out of your mix!
481 samples (181 children / 83 men & women / 60 women / 158 synth choirs); 61 audio tracks / AKAI partition: 61 volumes / WAV-Acid/Aiff: 425 MB
USBCDSC028
49.95

Vol. 29
Killer Brass Riffs
Do you really need more of an explanation? The name says it all! Many producers have waited far too long for a brass disk that is laid out to be useful for any style of music. From trumpet to flugelhorn, sax to trombone, it’s all here - with just the right flair to any mix. Bonus section: tons of hits and stabs.
845 samples (533 Riffs / 166 Riffs Solo / 146 hits & stabs); 46 audio tracks / AKAI partition: 46 volumes / WAV-Acid/Aiff: 420 MB; Tempo: 63 - 133 BPM
USBCDSC029
49.95

Vol. 30
Bass Grooves
Features lots of styles and playing techniques, from pop, rock and even hard-rock to funk, from Jazz, Latin and soul to R’n B. Over 60 folders – each with an easily identifiable selection of loops, tagged with tempo and key. Lively bass grooves, with all the cool ingredients to make a successful track: fantastic timing, unobtrusive line, excellent sound!
338 samples (14 demos / 219 bass loops / 105 single notes); 64 audio tracks / AKAI partition: 67 volumes / WAV-Acid/Aiff: 558 MB; Tempo: 54 - 135 BPM
USBCDSC030
49.95

Vol. 31
Rock & R’n B
Miro’s Grooves
A hybrid collection containing tons of electric guitar and bass phrases, expertly played by J.M Miro. In order to fully understand the power of this library, you will find a bunch of construction kits produced by the producer of the Soundscan volume 19 Hip Hop / R’n B – the best selling Soundscan ever.
380 samples (404 loops, riffs & licks / 176 single shots); 50 audio tracks / AKAI partition: 50 volumes / WAV-Acid/Aiff: 480 MB; Tempo: 82 - 127 BPM
USBCDSC031
49.95

Vol. 32
Roots Disco
Break out your fur coats, put on that afro, and get yourself into those tight bellbottom blue jeans once again — the FEVER has just hit! Roots Will take you back to the days of Charlie’s Angels and Ponch & John! Drumloops, construction kits, hits and some Starkey & Hutch style bass, strings and guitar! Captures what it took to sound good in the 70s.
774 samples (289 loops, riffs & licks / 425 single shots & co); 58 audio tracks / AKAI partition: 58 volumes / WAV-Acid/Aiff: 600 MB; Tempo: 113 - 150 BPM
USBCDSC032
49.95

Vol. 33
Disjointed Textures
Following in the heritage of SoundScan Volume 13 - Twisted Special Effects, Disjointed Textures displays yet another avenue of sound design that’s fresh, new, just waiting to be used. From the most beautiful ambience to the most frightening sonic textures, this is a film scene just waiting to happen!
244 samples (152 textures / 53 pads FX / 39 drums FX); 50 audio tracks / AKAI partition: 50 vol. / WAV-Acid/Aiff: 671 MB / Categories: Space Sounds, Pads & FX, Sciences, Vox Loops, Devils...
USBCDSC033
49.95

Vol. 34
Burning Grunge Hip Hop
The nastiest, low-down set of hip hop loops available. From construction kits to drum loops to nasty, grungy guitar and bass – sure to put some serious attitude into your mix! Will give your stuff that authentic underground sound your Hip Hop project has been needing. A grab bag of sounds heard nowhere else.
328 samples (164 loops, riffs & licks / 374 single shots & co); 52 audio tracks / AKAI partition: 52 volumes / WAV-Acid/Aiff: 550 MB; Tempo: 88 - 116 BPM
USBCDSC034
49.95

Vol. 35
The Dark Side of Trip Hop
These grooves have that unique “ fallback” quality that sets them apart from any other slow loop. Dark Trip Hop is not to be mistaken with anything else on the production side, each of the kits is instantly identifiable by its fat sound. Inject a loop, and your current mix will feel a lot heavier. New musical style.
246 samples (211 drumloops & kits / 35 special FX); 72 audio tracks / AKAI partition: 72 volumes / WAV-Acid/Aiff: 574 MB; Tempo: 56 - 94 BPM
USBCDSC035
49.95

Vol. 36
Percussions Loops
These essential loops have a priceless quality: they are simple! The featured instruments are: Congas, Bongos, Claves, Shakers and tambourines, but also Guiros, Agogos, Djembes, Steel and wood Latin percussion. Latin at heart – a staple of percussion work in contemporary music.
394 samples (96 shakers/43 triangles / 71 congos / 12 tamb.) / 58 audio tracks / AKAI partition: 66 volumes / WAV-Acid/Aiff: 300 MB; Tempo: 60 - 150 BPM
USBCDSC036
49.95
Vol. 37 Pop / Rock Drumloops
Ranging from the most timeless patterns to the most contemporary rock loops. Delivers a wealth of variation for each groove, sufficient to build a complete song, with cymbal add-ons, tom-tom variations, Hi-Hat builds and adapted fills. Impeccably looped. These eternal classics will be simple essentials for a long, long time.
384 samples (86 main / 174 variations / 174 fills / 75 hits); 22 audio tracks / AKAI partition: 22 volumes Wav-Acid/Aiff: 464 MB; Tempo: 96 - 152 BPM
USBCDSC037 .................................................. $49.95

Vol. 38 Funk & Groove Drumloops
This library is unique in many ways: one CD is enough to tackle all the known variations of the classic "funky drumming" and provide a wealth of variations for each of the main loops: cymbal, tom-tom, hi-hat alternates, and matched fills. This is timeless funk for all your needs, between 80 and 120 BPM, whether you're into pop/rock, trip-hop, R'n'B, etc.
453 samples (112 main / 163 variations / 62 fills / 116 hits); 28 audio tracks / AKAI partition: 28 volumes / Wav-Acid/Aiff: 584 MB; Tempo: 78 - 128 BPM
USBCDSC038 .................................................. $49.95

Vol. 39 Brushed Drumloops
Brushes and Hot Rods, playing groove, trip hop, jazz and Latin drum patterns, with comprehensive variation for each of the main grooves. The slow and dark ambience of the slower tracks are complemented by hellish speed trains and other brush classics. Perfectly matches the sounds of the Soundscan 38 and 39.
309 samples (89 main / 173 variation / 47 fills) 25 audio tracks / AKAI partition: 25 volumes / Wav-Acid/Aiff: 500 MB; Tempo: 72 - 200 BPM
USBCDSC039 .................................................. $49.95

Vol. 40 Complete Accordions
The styles grouped here are quite varied, ranging from Canadian folklore to French "bourrée", while also approaching polka, German traditional and Beeres stuff, even Celtic traditions. Each folder starts with accordion rhythm patterns, followed by themes played unaccompanied in various harmonic combinations...
340 samples (180 Chords riffs / 115 Solo / 45 single shots); 59 audio tracks / AKAI partition: 32 volumes / Wav-Acid/Aiff: 500 MB; Tempo: 80 - 135 BPM
USBCDSC040 .................................................. $49.95

Vol. 41 Roots Funk
Whether you're producing R'n'B, pop or Dancefloor-oriented tracks, it's all for the groove now! A typically 70's CD, with superb drum loops reminiscent of the era; inspired by hellish speed trains and other brush classics. Ambience of the slower tracks are complemented by the main grooves. The slow and dark parts, which provide a wealth of variations for each of the main loops: cymbal, tom-tom, hi-hat alternates, and matched fills. This is timeless funk for all your needs, between 80 and 120 BPM, whether you're into pop/rock, trip-hop, R'n'B, etc.
395 samples (127 main / 163 variations / 62 fills / 116 hits); 28 audio tracks / AKAI partition: 28 volumes / Wav-Acid/Aiff: 584 MB; Tempo: 78 - 128 BPM
USBCDSC041 .................................................. $49.95

Vol. 42 Celtic Flavors
Features phrases and samples of all the typical instruments that thrive in Brittany, Ireland and Cornwall: celtic guitar, violin, concertina, acoustic guitars, Irish flute and mandolin - as well as biniou (small bagpipes) and bombarde (french shawm). Styles approached all part of the Celtic tradition. Multi-samples, with biniou, bombarde, celtic guitar and flute.
514 samples (412 loops & riffs / 102 single shots) 52 audio tracks / AKAI partition: 52 volumes / Wav-Acid/Aiff: 498 MB; Tempo: 80 - 160 BPM
USBCDSC042 .................................................. $49.95

Vol. 43 Arabian Traditions
This volume is dedicated to the wonderful sound of Arabian voices and instruments. With the included loops and phrases, the traditional melodies of Arabia come alive, allowing you to include that unique ingredient in your productions. Featured instruments are: luth, male and female voices, violin and percussions.
332 samples (289 loops & riffs / 43 single shots) 39 audio tracks / AKAI partition: 38 volumes / Wav-Acid/Aiff: 460 MB; Tempo: 80 - 140 BPM
USBCDSC043 .................................................. $49.95

Vol. 44 African Traditions
A truly unique meeting of tradition and more modern parts, this collection focuses on typical sounds from Africa. From marimba and kalimba to djembe and bongos, the percussions are all oozing with authenticity. You'll also find male and female voices, typical African guitar parts, and many other African music staples. USBCDSC058 .................................................. 49.95

Vol. 59 Spanish & Gypsy Traditions

Created by natural-born musicians and excellent Gypsy performers. Guitars, vocals, palmas and many other specific loops almost impossible to record in the USA or Japan, for lack of trained players. Impeccable looping; accurate tempo.
626 samples (355 loops/solos / 271 single shots) 61 audio tracks / Wav-Acid / Aiff / EXS24 / Halion / Reason2 / AKAI Z4-Z8 / M ach5 / REX2: 651.9 MB / AKAI partition: 28 volumes; Tempo: 70 - 133 BPM

USBCDSC059 .................................................. 49.95

Vol. 60 Asian Traditions

Truthful Asian ambience is really difficult to produce, mostly due to the unavailability of credible loops. Addresses the need for traditional music from Asia: vocal, percussion and highly exotic instrumental loops. An excellent source of mystery and disorientation.
412 samples (162 loops / 250 single shots) – 38 audio tracks / Wav-Acid / Aiff EXS24 / Halion / Reason2 / AKAI Z4-Z8 / M ach5 / ReX2: 500 MB

USBCDSC060 .................................................. 49.95

Vol. 61 SFX Toolbox Vol. 2

Second volume of our SFX library. Mostly short sounds and household objects. Starts with impacts (metal, glass, wood). Includes ambient sounds like water, doors, appliances, computers and office sound effects. Switches, buttons, plates, dishes – as well as bottles, bowls, money, lighter, matches, etc.
770 samples (impacts); 78 audio tracks / Wav-Acid / Aiff / EXS24 / Halion / Reason2 / AKAI Z4-Z8 / Mach5: 509 M B / AKAI partition: 76 volumes

USBCDSC061 .................................................. 49.95

Vol. 62 Complete Harp

The coveted harp is used in many classical compositions. Starts with a nice selection of musically inspiring phrases. Benefit from the subtleties of Glissando and Bisisogliando. Mesmerizing and enchanting.
380 samples (36 loops / 35 bisisogliando / 39 chords / 29 cascades / 133 glisses / 108 single shots); 33 audio tracks / Wav-Acid / Aiff / EXS24 / Halion / Reason2 / AKAI Z4-Z8 / Mach5 / REX2: 513,6 M B / AKAI partition: 33 volumes; Tempo: 70 - 140 BPM

USBCDSC062 .................................................. 49.95

Vol. 63 Balkanish Traditions

A very original music style. The Balkans’ great variety of instruments include Accordion, Double bass, Violin, Saxophone, Derbuka, Strings, Percs, Voices - in musical recordings of Vlaje, Srba, Paldouchko, Freilakh, Jovamo and many more. Bonus section: instrument multisamples.
626 samples (355 loops & solos / 271 single shots) 61 audio tracks / Wav-Acid / Aiff / EXS24 / Halion / Reason2 / AKAI Z4-Z8 / Mach5 / REX2: 651.9 MB / AKAI partition: 28 vol.; Tempo: 70 - 133 BPM

USBCDSC063 .................................................. 49.95

**Heart of Africa Vol. 2**

Music plays an important role in all cultures across our planet. Yet its heart and soul truly must reside in the great continent of Africa.

Heart of Africa Volume 2 features rare performances recorded live at a two week tribal competition in Kenya. Most of the 8000 participants (primarily children) had traveled many miles by bus to perform their music. From huge feather head pieces and masks to shields and brilliant robes, the outfitting represented serious commitment.

A fascinating compilation of authentic choir and vocal shouts, chants and polyrhythmic percussion ensemble grooves from the Masai, Kikuyu, M'uru, Pokot, and Nandi peoples. A collection of powerful primal and untamed tribal ensemble phrases & SFX. This volume is an intriguing disc for your next film score, remix or album project.

**CD-ROM** AKAI (Emu, Giga, Software Sampler compatible) ........................................$189.95
**CD-Audio** 2-disc Set ............................................................................................................$99.95

**Supreme Beats**

A Percussion Library by Bashiri Johnson. Supreme Beats comprises an exhaustive collection of over five hours worth of inspiring acoustic percussion grooves and comprehensive instrument samples. Recorded over six months in top NY and LA studios, the production is state of the art. The Supreme Beats Percussion series is an essential resource for the modern composer, producer, director and remixer, that is destined to become a classic. It features Bashiri Johnson (Whitney Houston, Donald Fagen, Madonna), Luis Conte (World renown latin percussionist & LA session ace) and Cyro Baptista (Brazilian master), and many others.

The key to Supreme Beats is that each percussion groove is presented in three temps, first in a full mix, and then with each percussion element solo'd, allowing for the most flexibility in how the loops can be combined and applied to your music. A full compliment of single hits of all of the instruments are included as well.

In addition to the many traditional and ethnic percussion instruments used on Supreme Beats, unusual live sources such as elevator shafts, breathing, human stomping and many others were creatively incorporated into the grooves, giving these rhythms a truly unique sonic quality.

“...a feast of human feel, energy and emotion...enough material to feed an army of samplers...one of the most exhaustive and impressive percussion libraries we've seen, and it sounds even better than it looks! ... If we had three thumbs we'd turn 'em all up... Supreme Beats is a winner.”

**BackBeat**

If you tired of searching through piles of overcooked, pretentious loops, just to find a solid groove for your song. Backbeat is just what you're looking for...great feeling, rock-steady grooves with attitude, but without overplaying. Producers Eric Persing and Bob Wilson recorded four world-class drummers in numerous legendary studios, with some of the best drum rooms on the planet. The latest technology was used to capture a stunningly Hi-Fi, yet very natural sound.

The featured players include: Gregg Bissonette (Santana, Joe Satrani, Don Henley); Bob Wilson (Liquid Grooves, George Benson, The Crusaders); John Ferraro (Larry Carlton, David Benoit, Albert Lee, Aaron Neville), Eric Boseman (Liquid Grooves, James Newton-Howard).

Create your own complete drum track with Song Construction Elements including Variations, Fills, Fill Bars, Intros, Breakdowns, Ride and S节stick patterns, add-on cymbals and more. The power, feel and subtlety of a live drummer, combined with all the editing control of your MIDI sequencer results in a quantum leap in what can be achieved with drum loops.

Note: The Backbeat CD-ROM includes a Mac/Windows Data Disc, which contains the Groove Control sequences and high resolution WAVE files of all the loops. You can use the WAVE files for auditioning grooves in Soundfinder, and for direct use in software like Acid, Logic, Cubase, Reason, or Pro Tools!

**CD-ROM Multi-Disc Set** (AKAI/Emu, Roland) includes Groove Menus and .WAV files ...................................................... 189.95
**CD-Audio (Loops only)** ............................................................ 99.95

**Retro Funk**

The sonic texture of these loops makes them ultra-flexible, bringing massive "vibe" to any modern track. Producer Eric Persing's mixes create a unique, dry sonic attitude in this library, making it ideal for layering with other groove elements. Vintage mics, warm analog tape compression and antique drums all contribute to the funkiness. And with Groove Control, the grooves are at your command, effortlessly blending their timing and human feel to match your music. Turn a GoGo groove into Deep House, a JB Boogaloo into Drum & Bass, a Fatback P-Funk groove into Alternative Reggae, or an R&B stomp into a Pop Ballad!

The featured players on Retro Funk include Gregg Bissonette (Santana, Joe Satriani, Don Henley), Bob Wilson (Liquid Grooves, George Benson, The Crusaders), John Ferraro (Larry Carlton, David Benoit, Albert Lee, Aaron Neville), and Eric Boseman (Liquid Grooves, James Newton-Howard).

Create your own complete drum track with Song Construction Elements including Variations, Fills, Fill Bars, Intros, Breakdowns, Ride and S节stick patterns, Add-on Cymbals, Claps, Vinyl noise and funky live Percussion loops too! This massive stash of grooves is destined to be a legend.

**CD-Audio (Loops only) ............................................................ 99.95**

**Bass Legends**

A World-Class sampling library featuring three of the greatest bassists on the planet: Marcus Miller, John Patitucci and Abraham Laboriel. Their distinctive performances have been fundamental to literally thousands of great recordings, including the classic albums of musical giants like Stevie Wonder, Donald Fagen, Chick Corea, Scritti Politti, Bryan Ferry, Elton John, Joe Zawinul, Aretha Franklin, Joe Sample, Dave Grusin, Ry Cooder, Al Jarreau, Robbie Robertson, Quincy Jones, Luther Vandross, George Benson, Michael Jackson, Chaka Khan, David Sanborn, Natalie Cole, Boz Scaggs, Herbie Hancock, Miles Davis, and.......well, you get the idea!

Bass Legends is one of the first sample libraries to offer you both intricately multi-sampled instruments and chromatically sampled grooves and phrases called Chromazones.

For bass sequencing applications, the 650MB CD-ROM collection is recognized worldwide as the most complete and musical Bass Instrument Library on the market. The players' instruments cover a tremendous variety of tones, ranging from 4, 5, 6 & 8 string electrics to Patitucci's Poli- man Acoustic, and were all recorded with the finest in vintage tube technology and captured from within a musical context.

**CD-ROM (AKAI [Emu, Giga, Software Sampler compatible], Roland) bases and grooves ......................................................... 284.95**
**CD-Audio (grooves only) .......................................................... 99.95**

**Symphony of Voices**

An extensive collection of voices produced by Eric Persing, with a breathtaking variety of multisamples, phrases and FX from some of the most prestigious singers.

Disc 1 is devoted to richly detailed samples of the 80-voice London Chorale recorded in a large cathedral in England. Variations include multiple dynamics of multisampled ah, oos, ohs, ees, humming, intense staccato stabs, natural crescendo/decrescendo swells, octaves, moving vowels, vibrato versions and even whistling!

Disc 2 brings you the power of classical soloists, with a wide variety of license-free Operatic Tenor and Soprano phrases (with words and melismatic), in addition to the natural multisamples of each singer. It also contains London Choir FX samples, Major, Minor and Suspended Chords with high & low chord voicings, thick clusters, Twelve-Tone and Ligeti fx, whispering and more!

Disc 3 focuses on an English Boys Choir and a Gregorian Mens Choir. The Choir FX samples, Major, Minor and Suspended Chords with high & low chord voicings, thick clusters, Twelve-Tone and Ligeti fx, whispering and more!

Disc 3 focuses on an English Boys Choir and a Gregorian Mens Choir. The Choir FX samples, Major, Minor and Suspended Chords with high & low chord voicings, thick clusters, Twelve-Tone and Ligeti fx, whispering and more!

Disc 4 offers an overwhelming variety of Lush Multitracked Pop Stacks, created from over 10,000 perfect vocal performances! Comprehensive multisampled vowels, moving vowels, washes and “scooped” notes. Gorgeous male and female textures will add that smooth silk to your next hit!

**4-CD-ROM Set** (Roland, AKAI/Emu, Kurzweil, SampleCell) .............. 474.95
Liquid Grooves

Grooves that have existed only in your imagination. Fluid rhythms forged by a synthesis of propelling live drum grooves and unusual, organic percussion loops. The live elements, performed by some of L.A.'s most creative session players, have been transformed into a unique sonic texture via ground-breaking signal processing techniques and state of the art instruments such as the Korg Wavedrum.

These highly original grooves have lots of space and are presented in a Construction Kit format similar to the Supreme Beats collection. Many of the grooves are presented in both “Natural Acoustic” and “Hybrid Remix” versions for a new level of versatility. If you’ve been frustrated at the lack of slow tempos on most loop disc, this is the library you’ve been searching for. Tempos start at a laid-back 52 BPM and go to a cruising 126 BPM.

The liquid concept is 2-fold: Sparse “hand-played” grooves that feel great, combined with a focus on uncharted sonic territory.

CD-AUDIO Grooves only.................................................................99.95
CD-ROM Complete library
(Roland, AKAI/Emu/ASR, Kurzweil and SampleCell) .........................189.95

Burning Grooves

Finally, a drum library that delivers maximum impact. Killer Kits and blazing live drum grooves laid down by L.A. drummers Abe Laboriel Jr. (Seal, Steve Vai, Joe Sample) with extreme re-mixes by producer Eric Persing.

The diverse selection of unrelenting alternative, power funk, progressive soul, rock & roll and grungehead loops in a wide variety of tempos (56-215 BPM) puts this collection in a class by itself. Each groove has a unique mix (edge, hi-fi, ambient, distorted, lo-fi, etc), and some have both Hi-Fi and LO-Fi re-mixes. It is one of the only libraries to include different time signatures (3/4, 5/4, 6/8, 7/8, 12/8), and those hard to find Tom-Tom and Sidestick grooves. All the loops have been “pre-tweaked” for synchronization at the listed tempo, saving you a ton of time.

Burning Grooves offers versions of the grooves played without kick drum and without snare drum for unprecedented flexibility in customizing the loops to your music. This allows you to create your own kick or snare patterns within the loop, breakdowns and makes it easier to layer Burning Grooves with other loops. Separate fills and intro loops are available to help smooth transitions, and create the “live vibe”. The fills and grooves don’t have any Cymbal Crashes limiting their usefulness. Add your own when you need them.

The CD-ROM version includes “Smokin’ Kits” – an entire drum hits library! These are some of the punchiest and most expressive kits ever assembled, since they were sampled within a musical context. If you’re looking for attitude, search no further. Where there’s smoke, there’s fire!

CD-Audio (grooves only) ...............................................................99.95
CD-ROM (Roland, SampleCell, AKAI/Emu/ASR, Kurzweil) Includes Audio CD. Grooves & Smokin’ Kits .............................................................189.95

Liquid Grooves

Groove Control

The unique and inspiring grooves from the timeless library “Liquid Grooves” are now available in a Groove Control version. This revolutionary new method allows you to mix and match grooves in any tempo, and will even follow tempo changes from your sequencer! Groove Control also allows you to easily change the pattern, feel and pitch of the rhythms to your music simply by using the MIDI editing capabilities of your sequencer. Imagine being able to tune the Wavedrum grooves to the key of your song in real-time, without the rhythm changing! You can also program your own original patterns and fills with the same sounds and mixes from this library!

If you’re new to Liquid Grooves, this is the only version you will need. If you’re an existing Liquid Grooves CD-ROM user, you can upgrade to the new Groove Control version.

CD-AUDIO Grooves only.................................................................99.95
CD-ROM Complete library
(Roland, AKAI/Emu/ASR, Kurzweil and SampleCell) .........................189.95

GROOVE CONTROL

ILIO and Spectrasonics have teamed up to create Groove Control activated libraries that give you independent control over the tempo of live, stereo sampled loops, without affecting pitch. What’s more, you can use your existing sampler and sequencer!

Change a straight backbeat groove into a funky shuffle with just a few clicks. If a drummer’s performance was a little too laid back for you, simply quantize it a little. Let’s say your bass line riff is pushing too hard against the kick drum – just nudge the kicks over until they’re “on the money.” Or completely change the pattern.

Simply load a groove from the CD-ROM into your sampler, then open the included sequence on your Mac or PC, and you’ve got Groove Control. Since you’re already working in the sequencer of your choice, there’s no learning curve. It just works! And since it works inside your sequencer, the grooves automatically follow your tempo changes. Plus, you can use MIDI controllers to automate mix levels, filter sweeps, drum tunings, or you can stack many different layers of grooves on top of each other, automatically locking them to tempo. It all adds up to unprecedented control and inspiring flexibility.

The first Groove Control activated libraries will feature some of the most famous drummers and percussionists in the world - names like Gregg Bissonette, Alex Acuña, Bashiri Johnson, Bob Wilson, John Ferraro, Eric Boseman and many more to come!

How Do You Use Groove Control?

1. Find the groove you want to use.
2. Load the Groove Control version of that groove into your sampler.
3. Load the corresponding Groove Control sequence into your sequencer.

That’s it! Once you copy the sequence into your own song, the groove automatically snaps to tempo. Feel free to quantize, alter the feel, change time signature, change drum tunings, or even layer more grooves. Do what ever you want, and your Groove Control groove will follow right along!
**Metamorphosis**

Get ready to take it to the next level. Acclaimed producer Eric Persing's newest creation features an entire library of his trademark, cutting-edge loop manipulations. Each one of the hundreds of amazing remix grooves are truly unique in texture and feel. From floating, atmospheric Trip Hop pulsations, to experimental euro-club beats...and all the way to intense, Drum ‘N Bass fury, this is an extremely versatile library for creative film composers, producers and remixers. The latest tools like Reactor, Reason and over 100 hardware and software devices were used and abused to great effect in the development of this remarkable library. The processed rhythmic inspirations range in tempos from 50 to 180 BPM and beyond.

For the first time on any library, every groove is presented three different ways: First as a standard loop, then in innovative, tempo-matched Groove Menus which offer amazing real-time groove layering at any tempo, and most importantly in Groove Control activated versions. There are literally thousands of combination possibilities right at your fingertips.

Metamorphosis brings a one-of-a-kind sonic palette to the already powerful combination of Groove Control activated products. Because of the three unique approaches presented, Metamorphosis is much more than simply a collection of inspiring loops — it’s an invaluable creative tool for forging your own rhythmic innovations for years to come.

High resolution WAVE files of all the loops are included on the Mac/Windows Data Disc - both for auditioning in Soundfinder, and for direct use in software like Acid, Phraser, Logic, Cubase, Reason or Pro Tools!

**CD-ROM Multi-Disc Set** Groove Control (AKAI/Emu, Roland, GIGA) includes Groove Menus and .WAV files .......................... 189.95

**CD-Audio Loops only** .................................................................................................................. 99.95

---

**Vocal Planet**

An epic five-disc CD-ROM set produced by Eric Persing and Roby Duke, with an awesome variety of over 12,000 samples of male and female singers. These incredible one-of-a-kind sounds have all been pre-cleared for your musical use without any additional licensing fees! The main categories on Vocal Planet are:

GOSPEL: A collection of Black Gospel Choir multisamples, shouts, hums, praises and phrases, Urban Youth Choir, Claps, Snaps and Stomping samples and loops, Worship Ambiances, Holy Spirit moaning, soloists and screamin’ preachin’!

R&B/DANCE: Greasy multisampled background licks available in Chromazones, Soulful R&B phrases from the top LA singers, Doo-Woppers, Hip-hop and DJ beats, scorching Dance hooks and shouts, “street corner” acappella groups and hundreds of human percussion grooves!

JAZZ/BLUES: Incredible jazz vocal ensembles (ala Take-6) - multi-sampled doo, daahs, bahs, accents, sfx, bends and F-X: Scat singers, Base Voice phrases and multisamples, Sampled Jazz Vocal Chords with intelligent voice leading! Songs and stories from moaning Mississippi Delta Blues men!

VOCAL FX: Wild mouth noises, Rock ‘N’ Roll screamers, hambone loops, breathing, chaotic utterances, strange vowel drones, sfx, animalistic noises, thousands of vocal percussion samples, processed vocals, yells, etc.

WORLD: Tuva throat singers, Colombian, Peruvian and Mariachi yelps, Native American chants, Rastafarian toasting, haunting Indian vocalizing, ethereal phrases, ancient sacred singing, African and Middle Eastern wailing, Nordic folklore, Black Sea, Balkan, Zulu chants, Yodelers, Saharan, Macedonian, Qawwai, Himalayan, Gaelic and Celtic folk songs and more.

Includes a Mac/Windows Data CD with a Soundfinder system for quickly finding the right phrase. Groove Control allows you to independently change the tempo, feel and key of more than 175 Human Percussion loops from your sequencer. A bonus Vocal Planet Rebirth mod is included too!

5 CD-ROM Set (more than 8 hours of audio material)
AKAI (compatible with Giga and software samplers), Roland .................. 379.95
World renowned composer Hans Zimmer is currently experiencing the most prolific time in his distinguished career. In 1994, Zimmer created the score for the phenomenally successful film, The Lion King, Disney's highest grossing animated film of all time which also proved to be the most successful soundtrack in the history of Walt Disney Records, selling over 12 million copies worldwide.

Zimmer is a pioneer in the use of digital samplers and synthesizers, advanced computer technology, electronic keyboards and their integration with the traditional orchestra for film and television. He began his career as a composer writing jingles and teamed up with Trevor Horn and Geoff Downes as “The Buggles” to produce the worldwide hit, “Video Killed the Radio Star” and subsequent album “The Age of Plastic.” Among Zimmer’s musical achievements: The Last Emperor, Nature and the Beast, Wonderland, Burning Secret, A World Apart, Rain Man, Black Rain, Driving Miss Daisy, Bird On A Wire, Days of Thunder and Pacific Heights, Green Card, Thelma and Louise, Backdraft, Radio Flyer, Thriller, K2, The Power of One, A League of Their Own, Toys and True Romance, Cool, I’ll Do Anything, House of Spirits, Drop Zone and more...

**Hans Zimmer Guitars Vol. 1**

For the first time, Oscar & Grammy award winning film composer Hans Zimmer releases sounds from his private sample library. These powerful guitar textures are more detailed & expressive than any other Guitar library, with patches containing up to 12-way velocity switching, allowing for such nuances as dynamically-controllable string slides, pops & harmonics. The versatility of this collection is unmatched, ranging from a wide variety of pristine acoustics, vintage Telecasters, 32 meg leads, to a rare $11,000 Paul Reed Smith collector's edition “dragon” guitar! This outstanding library also includes Guitar grooves presented in every key signature and multiple tempos.

The current version of Zimmer Guitars Vol. 1 adds three additional new acoustic guitars - sampled without vibrato, in multiple dynamics: a beautiful new Nylon string, 6 string Folk Steel string & the unique Parker “Fly” Electro-Acoustic guitar. Also featured are major & minor acoustic guitar strum samples! These articulations are available in steel and nylon string versions, with both up and down strokes!

Hans Zimmer’s relentless pursuit of the ultimate samples for his private library has fueled his rich sonic approach on his scores for: The Lion King, The Rock, Crimson Tide, Broken Arrow, Rain Man, Driving Miss Daisy, Cool Runnings, Black Rain, True Romance, Thelma & Louise, A League of their Own, Toys & many others.

- **CD-ROM** (Emu, Giga, Software Sampler compatible), Roland ...............$284.95
- **CD-Audio** ..................................................................................................................$99.95

**Hans Zimmer Guitars Vol. 2**

A new volume of expressive instruments created for Hans Zimmer by veteran sound designer Bob Daspit. Many of the instruments feature velocity switching up and down slides, in addition to a new method for controlling vibrato with dynamics. Among the distinctive sounds are great new pop sounds including a rich, moody Jazz Guitar - a spirited 1909 Gibson A2 Mandolin - a 1947 Lap Steel Slide guitar for that Ry Cooder vibe - the Coral Electric Sitar, originating in the sixties, and revived by Pat Metheny - the deep twang of the Electric Baritone - and finally, a brand new Steel String Acoustic guitar that will become the most indispensable sound in your collection.

Among the most exotic instruments from South America are the Cuatro, a hollowed-out single piece of wood with 4 sets of strings that create shimmering tones with great sustain - the Charango, made from the body of an armadillo with round, sparkling tones - the Cavaquinho, a high pitched guitar whose characteristic tones possess great depth - and a bold Flamenco Nylon guitar whose tones, tremolo and rasgando will ignite passionate compositions.

Perhaps most rare in this collection are the string sounds of the Middle East (created for The Prince of Egypt score), including the Oud, a fretless 11-string guitar with full-bodied round tones - the Saz, a spicy six-string instrument perfect for traditional middle eastern arrangements - the Cumbus, like a 12-string with an Arabic accent - and the unusual Yavil Tambur, a long necked instrument capable of haunting drones and plucky melodies.

- **CD-ROM** Roland, AKAI/Emu, Kurzweil & SampleCell ..................................$284.95
- **CD-Audio** .................................................................................................................$99.95

**Bizarre Guitar**

If you’re a fan of the music and textures of Daniel Lanois, Brian Eno, Robert Fripp, Bill Frissell, Edge and Adrian Belew, this is a library you will not want to miss. This unique collection from visionary Guitarist Peter Maunu and Sound Designer Eric Persing, is an ideal companion to the Distorted Reality series.

Bizarre Guitar blazes a new frontier of Sound Design via guitar. It features the extreme contrasts of breathtakingly beautiful ambience beds to searing harmonic slashes, strange funk and unsettling washes. Created with tape loop techniques, e-bow, cutting edge signal processing tricks and the Roland VG-8 guitar system, these textures are truly one-of-a-kind.

The CD-ROM versions include the Audio CD and Groove Control method. This allows you to independently change the tempo and key of the rhythmic guitar loops, right from your existing sequencer!

- **CD Audio** (w/o Groove Control) ..................................................................................$99.95
- **CD-ROM** with Groove Control (Roland, AKAI/Emu, Kurzweil and SampleCell samplers, with sampler CD-ROM and Audio CD/ Mac/PC CD-ROM) ...............$189.95
American Heartland

If you need a resource for all things acoustic, then you won’t want to miss this library. American Heartland is a tour through the backroads of American culture, overflowing with a variety of earthy stringed, wind and percussion instruments. These multi-samples were performed by experienced musicians and recorded with authentic vintage equipment to capture the true nature of grass roots music. The most complete approach to presenting these acoustic instruments.

You’ll get Mandolin, Moutain Dulcimer, Dobro Slide, Pedal Steel, Banjo, Harmonicas, Pump Organ, Upright Bass, Tack Piano, Drums and more! Roland, Emu EOS, SampleCell, Kurzweil, Yamaha...AKAI Universal (Giga, Software Sampler Compatible), AKAI, commercials, soundtracks – or wherever that old country road takes you.

CD-ROM AKAI Universal (Giga, Software Sampler Compatible), AKAI, Roland, Emu EOS, SampleCell, Kurzweil, Yamaha..........................189.95

Interactive Drum Kits

Following numerous requests for a straight-ahead drum disc - kits only, no loops — the producers of this set have obliged with an aggressively purist approach that expands the boundaries of conventional drum kit discs.

Interactive Drum Kits is dedicated to capturing the purity of the world’s best studio instruments. Kicks, snares, toms, hats and cymbals, from the vintage Ludwig, and Gretsch sets to new top of the line Pearl and Drum Workshop kits, these are extremely realistic drums that you can wack from your keyboard or with your drum pad/triggers.

It takes more than a great drum kit to make a killer CD-ROM. It takes a seasoned performer to massage the best colors out of the instrument. The producers enlisted the talents of Toss Panos (Toy Matinee) and Nick D’Virgilio (Tears For Fears, Genesis) to tune, balance and perform the kits.

One of the unique aspects of this collection is the assortment of interchangeable snare programs. They feature upwards of 20 to 50 hits per snare, from center, to edge, to rim. When you load a single snare menu program, you get all the hits and nuances laid out for you, including drops, flams and ghost notes. It’s almost impossible not to get a life-like track out of these drums.

“...my new favorite drum sample collection... a drum collection that, with a little effort by the user, can be used to create extremely convincing drum tracks... for a drum library with which to create frighteningly realistic drum tracks, you owe it to yourself to audition Interactive Drum Kits & Snares” ~ KEYBOARD Review, Awarded Key

CD-ROM AKAI Universal (Giga, Software Sampler Compatible), AKAI, Roland, Emu EOS, SampleCell, Kurzweil..........................189.95

Concert Grand Piano

Tour the world’s top recording studios and you’ll notice more and more Yamaha Concert Grand showing up in the corners of these exquisite rooms. Unlike a lot of European and American concert grands, Yamaha pianos have become the choice of many studios and musicians because of their clarity and low-to-high consistency when going to tape.

Sonic Reality has successfully captured these instruments in this very well conceived and executed collection.

A Yamaha C7 recorded in-studio and a CFIII 9’ grand recorded on a well-known scoring stage. Pedal down notes with resonating harp included. These pianos respond beautifully to 88 note weighted controllers. Each dynamic is provided in stereo or mono – can be loaded together or individually for maximum flexibility with your setup. A slew of programming options for loud or soft music...useful variety of memory sizes ranging from 10 to 128 mgs.

Concert Grand Pianos also boasts the best sustain loops of any piano CD-ROM, with enormous, long sustains that rival the real thing. These pianos play beautifully and will add richness and depth to your tracks.

CD-ROM AKAI Universal (Giga, Software Sampler Compatible), AKAI, Roland, Emu EOS, SampleCell, Kurzweil, Yamaha..........................189.95

Interactive String Sections

Beautifully recorded Violins, Violas, Cellos and Basses in a variety of playing styles, including legato, marcato, staccato, pizzicato and tremolo for solo, medium and large sized ensembles. Recorded with minimal room ambience, these strings were designed for use with your own external processing — allowing for tremendous flexibility.

You’ll get performance oriented styles with separate or integrated arco attack elements, interactive timbre control and several types of alternate double bowing techniques to enhance the realism of your string parts. Combine solo and duo strings to create trios, quartets or quintets. Layer these elements with the full string sections for more texture and nuance.

And now, it’s now better than ever. Get more sections, articulations and effects variations – and even more detailed programming!

“Well-recorded samples. Ensembles of varying sizes allow building your own string orchestra in modular fashion. Thoughtful programming in the section patches, as well as in the multitimbral setups.

Samples sound great... recorded with care... looping is smooth... sound is full without being overblown.” ~ KEYBOARD

Modern Songwriter

Modern Songwriter is a complete sonic toolkit of acoustic and electric pianos, pads, strings, basses, synthesizers, brass, guitar, drums, beatboxes, percussion, and organs to inspire your next big hit! The sounds are easily accessible for fast creative performance.

Special features include virtual rhythm guitars that can be strummed in any key and any tempo with a wide variety of chords. Extra "in between" guitar performance elements like note/chord stops, fret slides and other sounds are mapped for use with all the chords when used in MIDI omni mode.

Plenty of GM mapped drum kits and percussion make it simple to swap sets within your songs. Silky pads, a huge variety of classic and synthesized electric pianos, deep basses and a wide variety of musical instruments and effects are packed onto this high performance collection. An indispensable tool for songwriters, composers, R&B artists, producers and anyone looking for a wide variety of instruments available from just one affordable disc. Shimmering bells, vocal textures and other inspirational sounds. Produced by Dave Kerzner.

CD-ROM AKAI Universal (Giga, Emu EOS, Software Sampler Compatible) .......................................................... 145.00

Vintage Timetraveler

It seems that every time you turn on the radio, you hear a hit song with classic synth, organ and electric piano sounds. Maybe it’s because nothing else sounds as rich and musical as these timeless keyboards!

This supersonic collection is packed with the coolest vintage keyboard sounds from the 60s, 70s and 80s. It features B3 Organs, Distorted Leslie Organs, Vox Continental, Farfisa, Optigan, Orchestraon, Mellotron, Novatron, Chamberlins, Wurlitzers, Rhodes, RM1, Planet, Clavinet, Arps, Moogs, Prophets, Jupiters, PPG, OSCar, Gleeman, Modular Synths. Plus, you get tons of far-out extras like Vibrato Fuzz Guitar Stack, Talk Box Guitar, Various Guitar FX, Ricky 4001 Bass, Fender 62 P-Bass, Hofner “Beatle” Bass — and to polish it off, Vintage Acoustic Drum Kits, Classic Drum Machines, and much more.

“How often I’ve checked out sampled renditions of these and other famous boards, only to be utterly disappointed! Not so with Sonic Reality’s “Vintage Timetraveler”... The acoustic drums and drum machine sounds absolutely kill... remarkable...” – KEYBOARD

“...a real toolkit of vintage sounds that isn’t confined to the usual classic synths. Hammond organ samples are lovely... electric bass sounds... solid and realistic.” – SOUND ON SOUND Five Star Review

Sonic Traveler Box Set AKAI Universal…………………………………………………………..Call

World Traveler

From the far corners of the globe comes one of the most diverse collections of ethnic instrument samples ever. World Traveler consists of rare playable multisampled instruments that can be used in many different styles of music.

You’ll get a lot of instruments not available together on any other world instrument libraries, including sounds from the Middle East, the Mediterranean, Africa, East Asia, Australia, Native America and Northern Europe.

This library features ethnic stringed instruments like a Greek Bouzouki, Turkish Saz, Indian Sitar and Tambura, Spanish Nylon Guitars, Russian Balalaika, Mariachi Bass, Finnish Kantele, Zither, Psaltry, Hurdy-Gurdy and Hammered Dulcimers including an Indian Sanoor. But, that’s just scratching the surface! World Traveler also has African, Latin and Exotic percussion maps, Accordions, Harmoniums and wind instruments like, Australian Didjeridoo, Native American Wood Flute, Pan Flutes and more instruments than we can list here! World Traveler is great for adding exotic textures and ethnic flavor to western music, or for playing in authentic styles of music from around the world.

CD-ROM AKAI Universal (compat. with Giga and software samplers) .....189.95
### Miroslav Vitous

#### Solo Instruments I

- Contains Bassclarinet, Bassoon, Basstrombone, Clarinet, Contrabassoon, Trombone, Trumpet, Viola and Violoncello—all in the highest quality. Very expressive. This is the first of two Solo Instrument discs—a must for anyone wishing to emulate orchestral solo performance.

Miroslav Vitous
Classical Choirs

At last, the first release from the legendary Miroslav Vitous since his groundbreaking Symphonic Orchestra Samples library. Classical Choirs has all the realism and depth you’ve come to rely on from this master musician and producer.

Gorgeous multisampled male and female choirs designed for large-scale choral settings, the vocal talent is immense, hailing from the rich classical traditions of Eastern Europe. 16 Men and 16 Women were recorded separately and together as a mixed chorus at the Rudolfinum Dvorak Concert Hall in Prague, with some additional recordings captured in a smaller setting nearby. The recording quality is superb – the talents of the best engineers using fabulous mics and converters to create clear, smooth and quiet recordings.

The men were recorded in three dynamics, ff, mf and mp, singing the long sustained open vowels (Ahs, and Ohs). There are Oos, Ehs and Es, plus pianissimo and mezzo forte Brumendos (M ms). Additionally there are Oh Expressivos and Staccato Gohs.

The women contributed dynamic renderings of Ahs, Ohs and Oos plus pianissimo and mezzo forte Brumendos, Expressivo Ohs and Staccato Gohs. The mixed choir features Ahs, Ohs, Uhs and Brumendos, in a mixture of octaves and unisons.

Another feature unique to this library is the inclusion of multi-sampled syllables, sung in both Porto (short sustained) and Staccato articulations. These syllables are offered chromatically and include do, re, mi, fa, so, la, si, mu and many more. In the Giga version, these are keyswitched to allow for fast and complex multi-syllabic passages, but in any platform this variety of utterances will provide an unprecedented reality when composing vocal performances.

Miroslav also includes a wide variety of vocal effects, like speech, murmuring, laughing and crying the quality of which you can only get from a well-trained ensemble of this caliber.

Miroslav Vitous
Symphonic Orchestra

The Miroslav Vitous Symphonic Orchestra is the standard by which all other libraries are compared. It was the first to convincingly capture the nuances of the orchestra through multiple articulations and highly detailed multi-sampling. Vitous applied his famed skill as a musician with his academic but practical knowledge of the orchestra to create a masterpiece.

"The sounds are the result of an intense and uncompromising process of playing and recording ... many hours of editing. Each instrument was played in a variety of ways in the studio and the symphonic hall ... to achieve the spatial positioning of a true symphonic experience. The true blending of harmonies can only come from instruments interacting with one another ... painstakingly achieved after hours of the most demanding recording sessions. I can assure the composer/producer that these orchestra and solo sets are the most realistic and expressive instruments that can be electronically produced." - Miroslav Vitous

CD-ROM 5-disc set AKAI, Roland, Emu EOS, SampleCell, Kurzweil and Giga native ....................... Call

Miroslav Vitous
Mini Library

A less expensive option for those who still want the highest quality in orchestral samples. Provides the very basic performances of all the instruments in mono, composer banks included. Composers looking for samples to use in their classical music may want to check out the M other library. Those of you looking for more "basic" orchestral sounds will find lots to choose from in the Mini Disk.

**Fretworks**

Featuring Legends of the Fretboard, this CD boasts an impressive roster of musicians playing an intriguing variety of stringed instruments, including Hiram Bullock on 6-string, 12-string and slide guitar, Nunzio Signore on a vintage 6-string Gibson, Mr. Bill Simms on his National Steel, C Nausbaum on mandolin, Nat Harris on guitar and Doug McCaskill on his custom baritone guitar.

This collection is a journey “off the beaten path”, capturing the soulful essence of Delta blues, Appalachian folk, and the roots of rock, bluegrass, swing and shuffle. The performances were recorded in a musical context with all of the raw energy and “happy accidents” that make a track live and breath. The phrases are tempo-tuned for easy sequencing, and most are provided in several tempos for flexibility. Divided into four or eight bar patterns and free-style riffs, they can be strung together in countless ways to create your own unique solos. The vast musical experience represented in these fine performances will bring your tracks to that next level of quality and musicality.

AKAI (Giga, Emu, Software Sampler Compatible), Roland ............. 99.95

**Hot Steel Blues**

Following in the footsteps of the legendary Fingerstyles guitar library, Hot Steel Blues reveals a soulful Blues attitude with low-down and greasy riffs played by legendary guitarist Terry Robb (Steve Miller, Buddy Guy, John Fahey) and produced by Dan Portis-Cathers (Fingerstyles, Phat Fingers, Heart of Africa).

You’ll find over 800 phrases divided into Patterns, Melodies and Endings arranged into Construction Kits that can be assembled and mixed to create complete, seamless tracks. Both “plugged” and “unplugged” styles traverse the entire Blues genre, from Waters to Clapton.

These hi-fi riffs and licks were recorded using top-notch mics and preamps. Both acoustic and electric guitars are featured, including a Martin 000-28, a 1920’s Weissenborn lap slide, a Gibson B25 upright slide, a Laguna L-29, a Fender Duo Sonic, and Fender Stratocaster. Both solid state and tube amps were used get that classic, fat and furious sound. This combined with Robb’s unbelievably tasty playing makes Hot Steel Blues the most authentic, and musical, Blues guitar library to date!

**CD-ROM** includes Audio CD:
AKAI (Giga, Emu, Software Sampler Compatible), Roland .......... 189.95
AKAI (Giga, Emu, Software Sampler Compatible), Roland .......... 99.95

**Phat Fingers**

Produced by Dan Portis-Cathers, this collection delivers hundreds of funkified guitar and bass patterns, slides and fills arranged into over 30 song construction kits. The grooves are incredibly tight, tempo locked and tuned to the key of the song. Most songs consist of bass patterns, slides, fills and some endings, guitar patterns, and occasional lead solos. Tempos range from a very greasy 75 to a blistering 160 BPM. The grooves are performed by famed axe wielder Shane Roberts, a funk and fusion fanatic who plays regularly with phenomena Stan Lassiter, Reggie Wooten, drummer Chester Thompson and sax player Jeff Coffin. Imagine combining his riffs with Spectrasonics’ Retro Funk or Backbeat drum libraries and Memphis Horns!

By far the most ambitious in the Fingerstyles Series, this project includes a wide range of funk and fusion styles – with influences from James Brown and Curtis Mayfield, P-Funk and Soul, to Reggae, New Jack Swing and edgy Rock/Funk Fusion a la Primus. Often hard driving, sometimes smooth and sexy, but always with a lot of phat and grease.

**CD-ROM** (includes Audio CD)

**CD-Audio** .............................................................................. 99.95

**FingerStyles**

The most authentic Acoustic Guitar library ever created, this approach to Acoustic Guitar sample libraries is so useful, that you’ll wonder why no one had thought of it before. Produced by Dan Portis-Cathers (Hot Steel Blues, Phat Fingers, Spectrasonics’ Heart of Africa), Fingerstyles consists of Guitar Patterns, Melodies, Cadences and Endings arranged in Construction Kits which can be assembled and overlaid to create complete, seamless tracks.

Music styles include New Age, Blues, Folk, Country, Pop, Ballad, Rock and others – nearly 40 compositions in all, each with as many as a dozen strums, riffs, patterns and melodies. Plus you get a variety of additional strummed chords, including extensions, for more flexibility. Quickly create full-length, ultra-realistic guitar parts. It’s the perfect solution for soundtrack composers on a tight schedule, or anyone looking to add rich sounding fingerstyles to their mix. The six string acoustic steel is expertly played and recorded, and each performance is tempo-tuned so you can sequence the patterns with complete confidence.

Skippy's Noizbox

A new drum loop library from John “Skippy” Lehmkuhl, the creator of the hugely successful Skippy’s Big Bad Beats – well-known worldwide for his amazing feel, sound and the astonishing variety of loops his mind can conjure up. Noizbox has more processed elements with an aggressive Euro attitude. Solid and inventive grooves.

More than half of Skippy’s Noizbox is over 120 BPM, and features a vastly creative palette of Hi and Mid-Fi sounds, skillfully woven together in Skippy’s unmistakable style. Of course, it’s also 100% Groove Control activated, so you can manipulate all of this spectacular sound and groove design any way you like!

Every groove is provided with several different mixes; grooves are separated into thorough Construction Kits. When you play all of the elements together, you can fully recreate the Full Mix version of the loop, with no missing parts! This is a rarity for Construction Kit libraries.

If you’re not familiar with the work of this self-described loopaholic, you owe it to yourself to check out both Big Bad Beats and Skippy’s Noizbox!

Skippy’s Big Bad Beats

From the mind of groove guru John “Skippy” Lehmkuhl. This funkified library combines old school attitude with totally new grooves, presented in ultra hi-fi sonic fidelity to light your tracks on fire. Not just another remixed loop library, BBB gives you tons of new grooves (66BPM - 145BPM) each with multiple mix variations, including full mix, simple mix, no kick, no snare, high-end only, old record mix and more, so you can actually write a complete song with breaks and turnarounds. And with Groove Control, your options for changing tempo, feel and mix are truly limitless.

The sounds are fresh, fat and in-your-face. The grooves will hit you where it hurts. The loops are perfect for R&B, Nu-School, Hip Hop, D’n’B, Techno, Acid Jazz, Trip Hop, Modern Break Beats or any style you can dream up when using them with Groove Control. It also features multi-sample menus made with groove slices.

If you’re looking for some very ‘now’-sounding drum loops and need maximum flexibility combined with easy access, Big Bad Beats will not only deliver but might even represent the future of the sample CD.

Stark Raving Beats

Here’s a wicked set of hard and fast grooves, based on live drum kit performances, mixed and remixed with wildly processed electronics and banging percussion. 100% Groove Control activated for endless tempo, feel and mix possibilities, SRB will bring out the monster in you!

All Go, No Slow! SRB starts at 105 BPM and accelerates to 170. Speed it up further with Groove Control! Every groove has an aggressive style that can burn rubber at any tempo. Great for Progressive, Jungle and D’n’B styles, but use your imagination to dissolve, distort and destroy these gems any way you like.

Hundreds of loops to mix and match millions of ways. Its extreme separation makes it a natural to combine with Skippy’s Noizbox, Big Bad Beats, Ethno Techno, or any of the Groove Control activated libraries from Spectrasonics!

Performing and remixed by loopologist Chris O’Brien. SRB fulfills your need for speed and passion for aggression!

Ethno Techno

Produced for ILIO by Eric Persing, this is Bashiri’s first sample project since his ground-breaking Supreme Beats percussion library. Features hundreds of astonishing loops from the mind of one of the world’s masters of timing and feel.

One of the great features of this collection is its use of custom invented, hand-made instruments with interesting names like Kissing Fish, Double Drink, Tributaries, Galaxy, and Satellite Flashdance. Other off-the-wall sounds include Computer Cans, Styrofoam w/Spring, Plastic Pail, Pipes, Toy Cow, Metal Sheet, and Garbage Can. Combined with ethnic instruments like Bamboo Slits, Mini Dumbek, Udu, Cora, Talking Drum, Nigerian Bata, Surdo, Shakas, TamTam, Angklung, Sabar, Waterphone, Mini Djembe, Dun Dun, and Serimbau, this disc is a glorious journey through heart-pounding terrain.

Tempos range from to 70 to 166 BPM. Get a range of sultry rhythms with origins from all corners of the world, but evolved to a place that is definitely extra-terrestrial.

Digital Boy: Modern Synths and Dance

Jam-packed with over a gigabyte of powerful, evocative sounds, this 2-disc CD-ROM set lets you focus on what's important - your music. Modern Synths and Dance is extremely well programmed, for expressive, spine-tingling performances.

Swirling, evolving atmospheric synths and lush, dreamy pads; huge, intense analog/digital hybrid stacks and haunting synth voices; snappy, high-energy re-synths and dramatic filter sweeps; funky, "old school" analog synths and booty-shakin' basses; "in-yo-face" hits, stabs, and industrial FX; a vast assortment of superb pop synths including bells, brass, claves, organs, electric pianos, and lead synths; essential acoustic sounds such as guitars, strings, brass, and more; and the most extensive collection of hard-hitting contemporary drum and percussion sounds ever assembled.

Almost all the sounds are extensively multisampled (in stereo of course) making them consistent and playable across the full range of the keyboard. Each sound's envelopes, filters, LFO's, and controllers are expertly programmed for maximum responsiveness and playability.

CD-ROM (Multi-Disc Set) AKAI (Giga, Emu, Software Sampler Compatible), Roland .................................................................285.00

Analog Meltdown

Here's a new twist on your average synth library. Designed, engineered, blown up and re-animated by mad programmer Kevin Wakefield, Analog Meltdown has the brains of one synth and the body of another. Wakefield adds an array of mod wheels, faders, breath controllers and pedals to each program, making this one of the most playable synth libraries ever.

The sounds are wild and freakish, clamorous and whimsical. They have a unique personality, unpretentious and in-your-face. Analog Meltdown is truly the "Edward Scissorhands" of sample libraries.

A wide assortment of textures - including stunning leads, power pads, FM (no really, it's FM!), plucky sounds, sweeps, bubbly effects, stellar grand prix, electro-shock treatments, sci-fi weapons and transporters, stingers and resonators, and more. Active sounds, designed to be featured and loud.

Caution: When handling the contents of this disc, be prepared to alter the course of your creativity due to the unpredictable effect of these sounds on your psyche.

CD-ROM AKAI (Giga, Emu, Software Sampler Compatible), Kurzweil .................................................................189.95

Keys To The City

Look no more for an intelligent way to get the hottest studio production elements into your tracks. Keys To The City was created and produced by one of the fastest rising stars of the keyboard, Michael Bearden. This library delivers tons of synth and keyboard grooves organized into multi-tracked compositions. The grooves are provided as complete mixes and individual elements for astounding flexibility - perfect for Dance, Hip Hop, R&B, Pop, Funk and Electronica. The sound is first class. The Bass-ment grooves are all individual bass lines that can be used alone or to accompany Studio loops - which are single layer comps, Duplex - which are dual layer grooves, Triplex, three layer grooves, or Penthouse - which contain four or more layered parts.

Michael's enormous talent has catapulted him to the top of the industry, recording and performing with the likes of Jennifer Lopez, Destiny's Child, Madonna, Michael Jackson, Brandy, Whitney Houston, Lenny Kravitz, Stevie Wonder, Christina Aguilera, Ricky Martin, Babyface, and so many more. He's also frequently called by Paul Shaffer to substitute for him on the Late Show with David Letterman.

TranceFusion

Fast becoming a cult classic among remixers, electronica gurus, composers and producers, TranceFusion is an indispensable collection of sonic mania for adding drama and intensity to any music.

Trancefusion is hundreds of noise sweeps, spectral climbs, glides, fills and morphs. Other tricks include percussion sweeps, swell-stabs, vocal rantings and big hits to spice up your transitions, plus rave and trance style arpeggios and pads.

The whole purpose of this disc is to energize your tracks. By layering one of these massive glides or climbers at the end of an 8-bar loop, for instance, you can trigger that crucial, thrilling emotional reaction in your audience as they anticipate another slamming 8-bar beat. Many of the sweeps start softly, climax and fade slowly. Others have hard starts, ramping up to full intensity and stopping cold. Many are pitched glides (a la THX), while others are noise-based or searing reso-sweeps. All of them are thick with movement and intensity.

Build screaming transitions from one groove to the next, to carry the groove into a break or to add some unexpected madness to the mix.

Memphis Horns
Wayne Jackson and Andrew Love have dominated the Rock, Soul and Funk scene since the 60's and to this day offer up their multi-tracked sound on tons of Billboard hits. Their list of Gold and Platinum records is impressive: Respect by Aretha Franklin, Dock of the Bay by Otis Redding, Sledgehammer by Peter Gabriel, and hundreds more. Amazing Trumpet, Trombone, Baritone and Tenor sound!

Delivers hundreds of phrases in multiple keys and tempos, the phrases are presented both in their original complete form and divided into flexible short phrases, so you can easily integrate them any way you like. Styles range from Slow Soul and Passionate Pop, to Funky. Includes phrases ranging in tempo from 70 to 140 BPM, each in five harmonically related keys. You also get chromatically multisampled unisons, chords in minor, major, minor 7, minor 9, and chord swells. Additionally, there's a great variety of unique brass effects like flutters, unisons, chords in major, minor, major 7, minor 9 and chord swells.

Dirk Campbell’s World Winds
Acclaimed UK composer and multi-instrumentalist Dirk Campbell brings you the evocative sounds of many rarities like the Bansuri (Indian flute), Turkish and Persian Ney flutes, Kaval (Southeast European flute), African flute, Suling Slendro and Suling Pelog (Javanese flutes), Irish Penny Whistle, Irish Low Whistle, Fujara (Slovakian Contrabass Whistle), Japanese Shakuhachi, Andean Panpipes, Armenian Duduk, Indian Shenai, Egyptian Zummar, Turkish Zurna, Gaida Bagpipes (Greek and Bulgarian, three types), Irish Uilleann pipes (three types), Scots Highland pipes, Medieval Praetorius Bagpipes, Turkish Tulum, Arabic M'ezoued, Cretan Askomandura, Czech Dudy, Nafr (Moroccan trumpet) and African Kudu Horn.

Sweet, delicate to eerie, breathy and complex... evoking the beauty, stillness, depth and mystery of the natural world. In contrast, there are the wild, strange and stirring timbres of ethnic reed instruments, bagpipes and African horns.

For film, TV and media composers, World Music, Rock, Pop and contemporary Classical composers and performers, creative keyboardists and programmers, and anyone with an ear for great instrumental sounds!

CD-ROM AKAI (Giga, Emu, Software Sampler Compatible) ..................................................189.95

Double Platinum Drums
An unabashed approach to West coast rock drums. Recorded at L.A.’s renowned Sound City, the drums are flawlessly recorded and mixed with both dry and room ambience, evenly divided between multiple discs. A jam-packed multi-disc set with over 500 loops in 40 tempo/style combinations (66 BPM to 203 BPM) with intros, time (main body), fills and endings. Styles include Rock, R'n'B, Pop, Hard Rock, Slow Rock, Metal, Surf, Funk, 3/4 Ballad, Country, Latin, New Orleans... Full-fledged multi-velocity Kits include Drum Workshop, Tama, and Remo, while CD-ROM owners also get an extra Gretsch kit. Eight different snare drums to mix and match with, plus a vast collection of brilliant Zildjian cymbals.

Producer John Boylan, Exec Producer Tony Harris, and Engineer Paul Grupp pulled out all the stops (and the mics) to create a clean, impactful, and completely professional sound. Double Platinum Drums is a thrilling rock ‘n roll joyride.

CD-Data/CD-ROM Multi-Disc Set (includes WAV files) .........................................................189.95

Double Platinum Rock Piano
Finally, a piano that doesn’t require tons of EQ, compression and effects to be heard. This is the industry’s one and only true Rock piano, with all of the intrinsically natural brightness and depth you need to speak through your tracks. You’ve never heard a piano with better blending and stereo imaging.

The piano is a rare and famous vintage Steinway B, custom rebuilt and maintained strictly for studio recording. Its contribution to Rock history is etched in stone, having asserted its presence on multi-platinum records from Elton John and Tom Petty to Carl Perkins and Johnny Cash.

Chromatically sampled (all 88 keys), three velocities, looped and non-looped – an endless variety of patch combinations to choose from. The samples were recorded straight to digital on a vintage Neve console in Sound City’s studio A. Paul Grupp engineered the sessions using his masterful ears and years of experience to get phase-perfect stereo mic placement. Produced by John Boylan and Tony Harris as the best two-fisted piano sound in the world — captured on one easy-to-use CD-ROM.

SOUND IDEAS

GENERAL SOUND EFFECTS

Series 2000
The Series 2000 Library was the world's first collection of stereo effects to be recorded and mastered digitally. The sound quality is impressive and has set the standard for digital sound effects production worldwide. This collection of 22 CDs is invaluable on its own, or for added power in the studio. Works in perfect harmony with other Sound Ideas sound libraries.

2001: European FX: Ambiences, Crowds, Automobiles
2003: Traffic, European Telephones, Horses, Trains, Restaurants, Fairs, Crowds
2004: Airplanes, Animals, Automobiles
2005: Applause, Crowds, Laughter
2006: Automobiles
2008: Children, Clocks
2009: Chainsaws, Construction
2010: Dentist Sounds, Doors, Explosions, Fire & Fireworks, Guns, Arcades, Fairs & Roller Coasters
2011: Footsteps - Stone, Concrete, Pavement, Dirt, Grass, Hardwood, Leaves, Linoleum, Metal, Sand
2012: Footsteps - Sand, Snow, Water, Wood, Metal & Garbage, Farm & Tractor Sounds, Babies, Pancakes
2013: Helicopters, Hospitals, Squeaks, Sirens, Alarms
2014: Household & Industrial Sounds
2015: Motorcycles, Dune Buggies, Lawn Trimmers & Mowers
2016: Boats, Marine Sounds, Newsroom & Office Sounds
2017: Musical & Percussion Instruments, Whistles, Noisemakers
2018: Rain, Thunder, Bar & Restaurant Ambiences, Soda Fountains
2019: Space Sounds, Shopping Malls, Stores
2020: Sports, Military Tanks, Cannons & Battles
2021: Traffic, Trucks
2022: Water, Zipper

Series 2000 (22 Audio CDs) .......................................................... 589.95

SFX Kit
This massive collection — 20,000 sound files in .wav file format — is especially designed for the game and interactive entertainment industries. Produced by Tommy Tallarico, one of the most successful and accomplished video game composers in history, this essential and wide-ranging library contains 7 CDs of .wav files in 110 different categories, plus a searchable data disc - all configured for easy use with Mac and Windows systems.

TSK-01 (1561 FX / 424 MB): Airplanes, Automobiles, Doors, Machinery, Misc. Transportation, Steam, Trucks
TSK-02 (1725 FX / 512 MB): Alarms & Beeps, Ambiences, Foley, Menu FX, Pickups
TSK-03 (9,073 FX / 509 MB): Bodyfalls, Footsteps, Human Vocals
TSK-04 (2,606 FX / 414 MB): Monsters & Creatures, Mystical & Magic FX
TSK-DATA: The Data Disc

The SFX Kit Data Disc contains data files in the following four formats: MS Excel, comma separated text, tab delimited text, and a fully functioning version of FileMaker Pro version 5 that offers a searchable interface. Simply use the MS Excel or text files to import the collection's data into your own search software, or fire up the FileMaker Pro version to perform searches immediately. The Data Disc is compatible with Mac and PC. Place the disc in your CD ROM drive and either copy the MS Excel or text files to your hard drive for import, or follow the instructions for setup and use of the FileMaker Pro search software.

L2 SFX Library — General Collection from Hollywood

Produced by award-winning Hollywood sound designer Frank Serafine, the L2 SFX Library, is a must for everyone in the sound industry. Mr. Serafine is credited with the development of many digital audio techniques heard in blockbusters such as Star Trek, Lawnmower Man, The Hunt for Red October and Virtuosity. This innovative 10 disc set offers effects in eight exciting categories: animals, electricity and static, industrial (double disc), metal, science fiction (double disc), supernatural, transportation, and water. L2’s documentation provides clearly defined titles for each effect as well as more comprehensive descriptions of the sounds.

1: Animals
2: Electricity & Static
3: Industrial #1
4: Industrial #2
5: Metal
6: Science Fiction #1
7: Science Fiction #2
8: Supernatural
9: Transportation
10: Water

- FX-1: City and Transport
- FX-2: Home and Nature
- FX-3: Industry and Office
- FX-4: Leisure and Sports
- FX-5: Human and Special

**Digiffects FX (5 Audio CDs) ............. Call**

### Mixed Variables

A dynamic addition to your existing general effects collections, Mixed Variables from Crossing Point is a broad spectrum, 3 CD set created by Aarin Richard, one of the industry's top sound designers and an award winning engineer. This incredible collection features a stunning array of unique ambiances, everything from sci-fi to natural settings, plus a great selection of hard effects and Foley. Numerous tracks were recorded with the Neumann KU-100 binaural head (microphone), which creates exceptional stereo imaging and depth for playback over loudspeakers and truly amazing 3D qualities when listened to in headphones - very handy for games or special applications. Other effects are spatially enhanced over two speakers, and all 579 effects were recorded through world class equipment with meticulous attention to sound quality.

#### MV-01

It's all about ambiances. Create worlds that are mysterious, eerie, haunting, ethereal, serene or foreboding. Sci-fi interiors abound with regeneration chambers, rebirthing neuralizers, photon inverters, rotating arms, reactors and pulsing machine rooms. You'll also find yourself in creaking tunnels, wet sewers and with chanting monks, not to mention the very practical selection of natural settings that have been captured on this disc.

- Animals
- Automobiles
- Background Ambiences
- Bells & Whistles
- Birds
- Business & Telephones
- Comedy
- Computers & Electronics
- Crash & Destruction
- Drones
- Guns
- Hits & Explosions
- Human Groups & Solos
- Machines & Tools
- Monsters
- Pass Bys
- Percussion
- Space
- Sports
- Switches & Levers
- Water
- Weapons
- Whooshes
- Zips
- Zaps & Zings

**Mixed Variables (3 Audio CDs) .......................................................... 295.00**

#### MV-02

Wide variety of FX that make great production elements, including whacks, thwacks, crunches, whooshes, fly bys, machines, cars, tools, magic, water, wind, rain, metal, wood, latches, squirts, slurs, aliens, odd flying things, processed effects and much more.

#### MV-03

More hard effects, plus a series of Foley oriented sounds. Many useful sounds here that can just be dropped into your production.

### The Best of The Saul Zaentz Film Center

The Best of The Saul Zaentz Film Center is an outstanding collection of more than 200 feature film and general sound effects, representing some of the Center's finest work. This single CD offers a wide ranging selection of transportation, animals, props, Foley, creaks and crashes, explosions, ghosts and zombies, hits and impacts, rumbles, scrapes, tools, water and wind. It's a little bit of the best of everything...

Based in San Francisco, the Saul Zaentz Film Center has provided filmmakers with first class sound facilities and some of the best sound editors, mixers and Foley artists in the business since 1979. With more than 20 Academy Awards to their credit, Saul Zaentz and his team have produced many memorable major motion pictures, including One Flew Over the Cuckoo's Nest and The English Patient.

- Animals
- Biplanes
- Bodyfalls
- Crashes
- Creaks & Squeaks
- Riots
- Explosions
- Impacts
- Hits
- Rumbles
- Water
- Whooshes
- Wind
- Zombies

SOUND IDEAS

VINTAGE GENERAL SOUND EFFECTS

Series 1000 — World’s First SFX Library on CD

This is where it all began at Sound Ideas - the original Series 1000 SFX audio tape library was the first sound effects library of its kind to be made available on CD. Its 28 CDs contain over 3,000 professional quality analog sound effects in a wide variety of categories. This collection from the 1960s and 70s is also a valuable source of vintage archival effects.

1001: Airplanes
1002: Animals
1003: Airports, Archery, Applause, Automobiles
1004: Automobiles
1005: Baseball, Bells, Bicycles, Cameras, Clocks
1006: Birds, Boxing, Buzzers
1007: Children, Computers
1008: Construction
1009: Construction, Crashes, Crowds, Doors, Drawbridges
1010: Crowds
1011: Electronics, Earthquakes, Electricity, Elevators, Exercise
1012: Explosions, Fairs, Farms, Football, Fire, Guns
1013: Footsteps, Foreign Sounds, Gambling, Golf
1014: Helicopters, Horns, Hockey, GlassSounds
1015: Household Sounds
1016: Human Sounds, Jungles, Laboratory, Laughter, Logging
1017: Indians, Industry
1018: Naval Boats, Ships, Motorcycles
1019: Military Battles, Guns, Harps

Vintage SFX from Digiffects

Digiffects presents the Vintage FX Sound Effects Library - a 12 CD cross section of sound effects from the 50s to the 80s. With 1700 professionally recorded sound effects, this collection contains a very broad range of sounds - from insects to big explosions. Originally recorded on Nagra tape recorders these effects have been carefully selected and edited on today's state-of-the-art equipment.

The aim was to select sounds which are now very difficult or impossible to obtain. For example, it's not easy to record a horse and cart rolling through an old town, nor are old cars, trains or machines readily available. If you need sounds to match older movies or audio productions, this is the perfect collection. The sound effects are top quality, they sound great in any audio production, old or new. Many of effects are really unique. Just listen to some of the war sounds or airplanes.

VA1: Vintage City FX - Airports, Traffic, Other Environments
VB1: Vintage Domestic FX - Household Sounds
VC1: Vintage Rural FX - Forests, Weather, Water & Animals
VC2: Vintage Rural FX - More Animals and Tools
VD1: Vintage Transport FX - Trucks, Cars, Race Cars, Motorcycles & Scooters
VD2: Vintage Transport FX - Sirens, Traffic, Steam Trains, Horns, Ships, Motorboats, Sailboats, Airplanes
VE1: Vintage Industry FX - Factories, Workshops, Engines & Equipment, Tools
VE2: Vintage Industry FX - Watermills & Windmills, Equipment & Machines, Stretchers & Carts, Typewriters & Computers
VG1: Vintage Leisure FX - Bicycles, Boats, Swimming, Fireworks, Amusement Parks, Pinball, Cameras & Music
VI1: Vintage Human FX - Babies, Children, Laughter, Voices, Applause, Footsteps, Native Americans, Heartbeats
VJ1: Vintage Special FX - Hits, Breaks, Falls, Squeaks & Demolition, plus Guns, Cannons, War & Fight Sounds

Just Boom Trax

Specifically designed as a sweetener for use in the sub-woofer channel when mixing surround sound productions, Just Boom Trax offers more than 250 tracks of real life, fantasy and utility sound effects, all at low frequencies that allow the audience to feel the sound.

◆ Lower the boom and dig deep. Just Boom Trax enhances the depth and impact of your audio with a versatile toolbox of low frequency growls, impacts, hums, booms, throbs, rolls and drones.

◆ Also offers sci-fi and fantasy tracks, a set of oscillator tones, low frequency white and pink noise, and a selection of drum hits and synth accents - more audio goodies for your low frequency toolbox.

◆ Sounds drawn from real life:
  - aircraft carriers, jets & helicopters
  - boats, ships & submarines
  - automobiles, races & crashes
  - trains, trucks & motorcycles
  - animal growls, footsteps & cries
  - human hits & bodyfalls
  - thunder, wind, earthquakes, avalanches & volcanoes
  - weapons and military battles
  - construction, crashes & hits
  - explosions and impacts
  - doors, industrial & motor sounds, stampedes and the space shuttle's sonic boom.

◆ Includes 2 CDs and 2 DVDs of multi-formatted low frequency effects. This collection offers the following six multimedia formats:
  - 44.1k 16-bit - in both .wav and AIFF formats
  - 48k 16-bit - in both .wav and AIFF formats
  - 48k 24-bit - in both .wav and AIFF formats

Just Boom (2 Audio CDs, 2-DVDs) ............................................. 359.95

Renaissance SFX - Surround Sound Special Effects

The first sound effects library in the world that has been encoded and produced entirely in Dolby Surround. The Renaissance SFX Library offers awesome fully dynamic sound in a real 3D listening environment. The Dolby Surround encoding process makes it possible for a regular stereo source to deliver all four channels of sound. These sounds extend far beyond simple panning or standard MS techniques - you will hear complete sets of effects that literally move along the speakers and bathe you in true audio from all directions. In addition, you will be able to control the placement and movement of sounds in the different channels in order to recreate just the right audio environment for your productions.

The Renaissance SFX Library can be used in a regular stereo environment, but you will be even more impressed with the way a full surround sound system demonstrates the quality, richness and versatility of these recordings.

CD #1: World Ambiences
CD #2: Sounds From Nature
CD #3: Special Environments
CD #4: Impact FX
CD #5: Voice FX
CD #6: Emotional Voices

Renaissance SFX (11 Audio CDs) .................................................................. 1195.00

Renaissance 5.1

Renaissance 5.1 is the first sound effects library created for 5.1 production. A perfect complement to the Renaissance SFX library, it offers the best original recordings from the Surround Sound collection, digitally remastered in 24-bit 48 kHz 5.1 surround sound. Renaissance 5.1 uses Digidesign Pro Tools 5.1 name extensions, enabling the Pro Tools 5.1 user to load a 5.1 track as a single audio file. Remastering was accomplished through Renaissance Sound Technology’s proprietary psychacoustic software applications, and all files have been .aiff mastered for full PC compatibility as well.

CD #1: World Ambiences:
A selection of ambiances from Asia, Europe and America - markets, villages, a monastery, restaurants, traffic and urban settings.

CD #2: Sounds from Nature:
Ocean and sea sounds, Asian elephants, horses, jungle birds and insects, plus rural sounds from South America and the European Alps.

CD #3: Special Environments:
Percussion, doors & gates, glass & dish sounds, industry & machines, ship sounds, and a rifle range.

CD #4: Subwoofer FX:
Engine subharmonics, LFE impacts, hits, lasers & shots, wind & catastrophic storm subharmonics, earthquake & tremor vibrations, and a variety of waveforms: intermodulated, modulated harmonics, sine harmonics and square harmonics.

SCI-FI COLLECTIONS

Metropolis Science Fiction Toolkit 1

This Science Fiction Toolkit from the professional sound designers at Futurity contains a vast collection of whooshes, sweeps, releases, scans, accents, alerts, blasts, prompts, bleeps, whirls, flutters, synths, washes, impacts, lasers, sirens, pulses and buzzes, plus a great selection of science fiction ambiances and other electronic tools. Keep the toolkit handy for everything from odd jobs to universal productions.

Toolkit 1 .................................................. 109.95

Metropolis Science Fiction Toolkit 2

Taking design elements to new heights, the Metropolis Science Fiction Toolkit II CD contains over 200 new effects never heard anywhere before. This CD includes great mechanical, ethereal, whooshy, metallic, static, and ambiance effects, plus squeaks, scans, scrapes ... and lots more. If you’re looking for something off the beaten path, Metropolis II is here to open up a new frontier.

Toolkit 2 .................................................. 109.95

Jurassic Dinosaurs

An out-of-this-world menagerie, Jurassic Dinosaurs provides all kinds of creatures, from tiny to humongous. Included in this jammed CD are all manner of prehistoric, fantasy, alien, monster, supernatural, fairy and robot creatures, with many different varieties of cries and associated sounds.

Some of the effects come from real-life animal sounds, which were morphed into something else. Many others were created in the studio and fine-tuned to provide a full range of possible variations. Additionally, the animal and creature sounds represented here are immensely versatile. Use them for modern day exotic jungle beasts, prehistoric creatures, or futuristic aliens from other planets - the choice is yours!

The creatures represented in this collection include the following:

Organic Creatures, Small to Large:

Organic Body & Environment:
Creature Footsteps on Various Surfaces, Impact Tremors, Thundering Stampede, Eating Cracks, Crunches and Snaps, Wing Flapping on Flying Creatures, Flying Insects, Plant Monster FX, Broken Foliage FX

Alien, Robotic & Supernatural Creatures:
Android, Cyborg Language, Help Droidbot, Robot Footsteps and Servo Motor, Robot Start-Up, Overload, Electric Discharges, Radio Control Frequency & Squeaking Joints, Alien Creatures, Dragons, Werewolves, Shape Shifters, Ghost Vortexes, Classic Tinkerbell Winged Fairy

The Big Drone - Wide Variety of Simple and Complex Drones

Mysterious, sweeping, pulsing and enigmatic. The Big Drone - one hundred tracks that are ready to rumble. This two CD set features both simple and complex drones that have been designed to enhance many different kinds of scoring applications.

Big Drone (2 Audio CDs) .................................. 109.95

Drone Archaeology

This CD, produced by Numerical Sound, contains 99 stereo drones, ranging from 32 to 64 seconds in length. The drones are all steady in pitch, but have constant movement, thus they are never the same from one moment to the next. In order to aid multimedia and film production, the drones have been classified into seven categories as follows: Nature, Science, Drama, Industry, Voice, Bell and Drones.

Each drone is contemporary and original in nature, offering the film composer and musician an invaluable resource for creating soundtracks, sound beds, and sound design. Used as foundation material, these drones can be processed and transformed in any number of ways to assist the user in the development of their own unique sound.

The Science Fiction SFX Library

The Science Fiction Sound Effects Library offers a broad range of futuristic, space, alien and creature sound effects and ambiences. This 3 CD package provides a full audio galaxy, designed for versatile use in a wide variety of science fiction scenarios and sequences.

The collection also contains excerpts from a sci-fi audio drama called Space Fighter Duel, showcasing many of the library's effects and suggesting editing / mixing possibilities for them. Space Fighter Duel is provided as both a continuous track, and as separate indexes, and its available for use either in its entirety, or separated into specific effects.

Contains exciting and expressive source material in the following categories:

**Electronic Effects**
Bells, Bubble Up Effects, Communications & Telemetry, Beeps, Radio Bursts, Intercom Static & Space Radio Interference, Space Ambience

**Mechanical Effects**
Laser Bursts, Pneumatic Sliding Doors, Sinister Pulsating Machines, Vacuum Pump, Mechanical Computers, and Various Machine, Switch & Motor Sounds

**Weapons Effects**
Vindicator & Scavenger Weapons Fire, Spaceship Weapons Fire, Turbo Laser, Proton Torpedoes, Death Star Explosions, Hand Blasters, Hand Phasers, and other Weapons

**Fantastic Creatures**
Alien Creature Mumbling, Cute Droid, Mean Little Creature, Alien Intelligence and Computer Speech, The Id Monster, Cantina Creatures, Robot, Gargle & Growl Monsters, Weird Thing, Mad Martian Mouse, White Fang, and other Robots and Alien Radio Drop Ins

**Miscellaneous Effects**
Ominous Flying Saucer, Vibrations, Laser Tunnel Resonance, Radioactive Emanations, Disintegrator - Integrator Units, Launch & Catapult Effects, Meteor Showers, Personal Extra-Vehicular Thruster Units, Rumbles, Walls, Sirens & Sputters, Garbled or Coded Radio Communications, Phaser and Other Space Sounds

**Soundscapes & Music**
Solar & Cosmic Storms, Flying Saucer Landings & Take-Offs, Close Encounter with Mothership, Glass Tones, Mental Projection, Dark Swells, Interdimensional Madness, Nightmare Terror & Radioactive Crying, Humourous Zombies, Kaleidoscope, and other Musical Compositions

**Spacefighter Duel & Selected Elements**
Flights & Attacks, Launches, Blastsoffs, Flybys & Circling, Explosions, Battle, and a Roasted Toasted Alien

**Ambience Effects, Action Effects and Scenes**
Space Hangar Ambiences, Spacefighter Strafing Runs & Flybys, Squadron Formations, Moon Landing Sequence, Starship Bridge & Warp Drive Sequence, Space & Blaster Battles, Lift-Off to Orbit Countdown, Re-Entry Sequence, Computer Room, Mad Scientist’s Laboratory, Laser Cannon Blasts, Alien Weather & Lightning Bolts, Horror Heartbeat, and Engine Room Ambience

**Science Fiction SFX Library (3 Audio CDs)**

**Radioactive SFX Library (2 Audio CDs)**

Radioactive —Eerie and Sci-Fi Waveforms

Created by recording and processing shortwave radio signals as they bounce against each other and the upper reaches of Earth’s atmosphere, Radioactive is a sci-fi sound effects collection unlike any other. This collection of 200 eerie wave forms, pans, sweeps, phasers, communications, shimmers, bubbles, beeps, static, monsters and apparitions has a unique flavour all of its own, and a nearly limitless range of possibilities for your applications.

- Space Monster Screams
- Phaser Morph
- Shimmering Space Bells
- Ringing Soundscapes
- Space Ribbon with Whine
- Time Travel Reverb
- Shuttle Craft Engine Room
- Steady Bubble Gyro Delay
- Alien Tractor Beam Sequence
- Evil Diablo Wave

TFH (3-Audio CDs) .......................................................295.00

Thrillers, Fantasies & Hauntings

Acclaimed Hollywood sound designer John Peters (credits include Mars Attacks and Stargate SG-1) has produced another high anxiety collection of classic sci fi and horror sound effects—Thrillers, Fantasies & Hauntings.

This 3 CD set offers a complete torture chamber full of realistic and over-the-top sounds: ready to inflict pain, scare the living daylights out of your listeners, and send chills up your spine.

TFH-01
Grisly electric chair sequences electrical discharge effects, energy effects, magnetic waves & supernatural force, s energy streams & bolts shot/transmitted, Frankensteins classic laboratory power generator, flame throwers, stun guns and scanning devices, arrows, knives & axes being shot and thrown, torture devices — whips, the Boot, the Rack, the Pit & the Pendulum, medieval catapult fireball launches, chain effects, bodyfalls, stumbles & footsteps, human screams.

TFH-02
Strange heartbeats, gory body flesh rips, stabs and exploding heads, acid melts of faces, heads & bodies, monsters, creatures, birds & ghosts, dungeon doors creaking and slamming, object impacts, bounces & ricochets, weapons—blasters, lasers, proton, zapper and neutrino guns, plus heavy weapons fire, resonating force fields & radio transmissions, explosions, landslides, avalanches, asteroid pass bys.

TFH-03
Storm rumbles & ominous forces, spooks, haunted houses & poltergeist activity, horror and suspense atmospheres and backgrounds, suspenseful power drones & horror music, metaphysical lighting bolts & thunderclaps, howling, ghostly, wailing & alien wind effects.

TFH (3-Audio CDs) ..........................................................295.00
Thunder

Thunder bursts into your productions with two breathtaking CDs - a compilation of more than 100 thunder and rain effects gathered from some of the world’s best storm chasers and professional sound engineers. CD #1 contains single claps, cracks, rumbles, rolling thunder and lightning strikes. CD #2 offers a sky full of three minute storm ambience tracks, ranging from gentle rain showers to exploding thunder and fierce hurricanes.

Thunder (2 Audio CDs) ......................209.95

Foley Footsteps

The Foley Footsteps CD is a comprehensive all-digital collection of male and female footsteps, recorded on a variety of different surfaces and walking speeds. Surfaces available include cement, wood, grass, gravel, metal, and snow. Sounds of individual steps, paced steps, shuffles, running, jumping and climbing stairs are included. Each sequence is recorded in its entirety, while each individual footstep is also indexed to expedite the foley replacement process. Take a walk on the wild side with Foley Footsteps.

Foley Footsteps ................................109.95

Foley Footsteps Winter

Foley Footsteps Winter focuses on real winter situations, providing a great variety of surfaces, footwear and actions with:

• Real snow: Fresh Snow, Packed Snow, Corn Snow & Wet Snow
• Real surfaces: Linoleum, Metal Grate, Concrete, Wood Floor
• Real footwear: Ski Boots, Overshoes, Hiking Boots, Rubber Snow Boots and Snow Shoes

Over 1,700 winter effects, all digitally recorded and edited at a sample rate of 48 kHz 24-bits. The entire library was recorded on a foley stage wet room, by bringing the facility temperature down to 5°C (42°F) and loading the stage with real Canadian winter snow.

Foley Winter (2 Audio CDs) ..................250.00

Art of Foley

The Art of Foley contains a warehouse full of simulated sounds, both extreme and everyday, for Foley synchronization and audio sound replacement usage. Featuring a great selection of the very best from top Foley artist Dan O’Connell of One Step Up, and many gems from the Sound Dogs archives.

**Just Noise**

Just Noise is a unique collection of vintage media noise, static, buzz and hum. Just right when you need some authentic background crackles, whine, fuzz or hiss, and also ideal as a starting element for sound design. This 2 CD collection contains 140 tracks, representing more than 20 different sources of great old fashioned noise, including:

Need a way to age, weather or add realism to a track? Try some garbled reception, static and hum from classic 1940s and 1950s radios, or a bit of crackling noise from a 1960s tape recorder. Add a bit of transistor buzz, a sprinkle of LP record noise or some pulsing synthesizer pops. You'll also find a great selection of tape hiss, walkie talkie static and TV noise on this 2 CD collection.

• neon signs  • open wires  • tape recorders
• scanners  • LP records  • walkie talkies
• televisions  • tube & transistor radios
• wax cylinders and gramophone discs
• analog synthesizers  • reel to reel / cassette tapes

WORKS 8: Backgrounds: Packing, Shipping, Conveyors
WORKS 9: Backgrounds: Exterior Work, Labor, Industry
WORKS 10: Constant Tone Environments

The Works (10 Audio CDs) ............................................................. 495.00

Wind Tools — Wind and Air Movement Effects
A 12-CD sound effects library containing over 700 minutes of rushing, wafting, clustering, buffeting, groaning, rustling, droning, growling, shrieking and moaning, whistling, rumbling, whispering, sweeping and swooshing, buzzing, howling, gusting and whooshing — you can create effects for any type of wind or air movement, including tunnels, air locks, ducts, objects falling or moving through air, and horror or sci-fi background effects. Each digitally recorded effect is clean and ready to use. Alone or layered — create a custom mood or environmental texture.

◆ Of the 263 Blow Tools winds, 239 are “perfect loops.” The wind effects that are not pre-looped grow out of silence with ramps of varying length, then crescendo to full intensity and decrease to silence again. The wind effects also have a wide variety of character with varying texture, resonance, pitch, range, and activity.

◆ Blow Tools also includes more than 80 shorter blowing effects of amplitude variation - including flurries, gusts and quick bursts - plus 175 individual swooshes of 34 different types.

◆ Preview CD and documentation make it quick and easy to scan through the hundreds of wind textures. This special disc contains 5-second samples of each looped effect, plus an entertaining audio demonstration program. Use the Preview CD to determine the exact character or wind type you’re looking for, then follow the documentation directly to the library CD containing the full-length effect.

Blow Tools (12 Audio CDs) .................................................................. 539.95

Sounds of War
Authentic World War II Sounds
An authentic and historic gallery of period audio - single weapon, equipment and tank effects, aircraft sounds and effects, short scenario ambiences and full battle sequences (including an aerial attack, dogfights and an armoured assault). A complete World War II sound effects archive.

These sound effects had to be tracked down and salvaged from a wide variety of archival sources across Europe. All effects were then digitally enhanced through cedar processing and/or mixed into the longer scenario ambiences by skilled engineers with state-of-the-art equipment.

◆ A Hurricane fighter with its straining Rolls Royce Merlin engine taking off ...
◆ Heavy fire of an armored assault by Panzer Grenadiers, firing machine pistols ...
◆ Stukas screaming down on zig-zagging convoys while Royal Naval gunners throw up a constant wall of anti-aircraft fire
◆ Flying Fortresses thundering down their runways, hauling their full bombloads into the air, heading for the industrial heartland of Hitler’s Germany
◆ Boots on cobblestones as infantrymen fight through northern France
◆ Crack of rifle fire and the rattle of heavy machine guns of German defenders

Sounds of War .................................................................................. 109.95

Symphonic Adventures
Create your own high quality soundtrack with this professional interactive toolkit! Specially recorded for film, video & multimedia use. BPM (beats per minute) furnished.

Whole orchestra and individual instrument segments include: strings, brass, woodwinds, pianos and percussion.

Designed for music editors and film composers, this CD is a symphonic construction tool kit - any chosen segment can be looped with another, or used as a new start point.

Symphonic Adventures..............................................109.95
Noise Generator

Noise Generator is a motherlode of organically-based real sound design elements — a huge variety of real sounds grotesquely twisted, dismembered, smacked, & verbally abused. Sounds that would perfectly accent video transitions, graphic packages or footage of exploding livestock – creative, attention getting elements.

This 4-disc collection of sound design elements was designed to sound COMPLETELY different than the tired, old early 90’s FM-radio-ish lasers, white noise sweeps and synthesizer stuff that puts most of us to sleep. Our mission was to create a collection of sounds that would stand out and physically knock people off their feet.

Most of the 1,875 sounds on these discs started as real sounds, ie: banging the inside of a dumpster with a hammer, dropping a manhole cover (trust us: that’s LOUD) - even stuff like taking microphone feedback, processing the feedback, then feeding it back against itself again. We took these elements and processed the living daylights out of them using digital audio workstations and state-of-the-art digital signal processors (plug-ins and outboard gear). Finally, they were mastered through high-end gear to end up with a ton of sounds that resulted in an incredible sounding product - but incredibly unhappy neighbours.

Comes with 4-color coded, fully-indexed audio discs and a 40-page booklet, organized by type and sound length.

Noise Generator (4 Audio CDs) .................................................................................................................................995.00

Slam, Bang, Boom

Slam*Bang*Boom is a 2-CD, 1257 element sound design package, plus a corresponding CD ROM of WAV files. Over 89 categories of hits - including explosions, bursts, computer and Internet sounds, flashes, & bowel-loosening thunder and lightning hits, the second set in the 'Noise Generator' collection of sound design products is dedicated to making the world a far more sonically disturbing place.

More hits than Elvis and The Beatles combined! Useful for anything that uses sound - from radio to video to multimedia. Tools for accenting cuts, titles, flashes, exploding watermelons and for getting your audience’s attention.

The sounds on this collection come from a variety of sources, some real and some synthesized - mostly designed to sound different than anything else out there.

Comes with 2-color coded, fully-indexed CD, one CD ROM and a 24-page booklet, organized by type and sound length. Contains 16-bit, 44.1k, WAV files and is both Mac and PC-compatible. This CD ROM should also work in AKAI S5000/6000 series samplers with OS1.3 or later as well as any EMU or Kurzweil samplers that can import .WAV files.

Slam, Bang, Boom (4 Audio CDs & 1 CD-ROM) ............................................................................................................Call

Transitions

The ultimate arsenal of whooshes & transitional elements! Transitions is a 2-CD 1229 element sound design package, plus a corresponding CD ROM of WAV files. Crammed with over 100 categories of transitions - including powerups, beams, electrostics, fly-bys, vinyl sounds, rumbles, evolvers & grainy breakups.

Transitions is the third set in the ‘Noise Generator’ collections of sound design products, giving producers an edgier, more offensive, in-your-face selection of sound design.

First, a definition: a ‘Transition’ is defined (in almost 98% of the cases in this collection) as an event with a sloped attack that builds to an abrupt climax - or builds to a climax and then recedes. Good for aurally accenting wipes, fades, dissolves - or gaping holes in your audio that require covering up. Of course, radio can also utilize these sounds for sweeps and transitions, or just make their productions sound very, very different than what’s out there now. The sounds come from a variety of sources, some real and some synthesized - designed to sound different than anything else out there.

Comes with 2-color coded, fully-indexed audio CDs, one CD ROM, and a 24-page booklet organized by type and sound length. The CD ROM contains 16-bit, 44.1k, WAV files and is both Mac and PC-compatible. This CD ROM should also work in AKAI S5000/6000 series samplers with OS1.3 or later as well as any EMU or Kurzweil samplers that can import .WAV files.

- Full reference catalog with CD track index listing • Music by a variety of composers • Unique storage binder

Mix I

The Mix I Broadcast Music Library offers more than 10 hours of production-ready material, totalling over 1200 tracks plus a full CD of sound effects... all on 10 compact discs. This premier collection contains 2 CDs of Production Elements, including: Logos, Work Parts, Promo ID Beds, Weather Themes, Sports Themes, Stingers, Newscaster Openers, Sweepers, Traffic Themes, Bumpers, Tags, Orchestra Hits & Stabs, Harp Music, Halloween Accents, Circus Accents, and Bugle Calls, Drum Hits & Rolls.

Mix #1: Easy Listening & Classical
Mix #2: Soft A/C & Travel
Mix #3: Sports
Mix #4: Rock, Pop, Dance
Mix #5: Country & New Country
Mix #6: Jazz & Comedy
Mix #7: Christmas & Holidays
Mix #8: Production Elements 1
Mix #9: Production Elements 2
Mix #10: Sound Effects

Mix I (10 Audio CDs)...........................................................................419.95

Mix II

The Mix II Broadcast Music Library presents over 10 more hours of great production music, totalling more than 850 tracks ... all on 10 compact discs.

Mix #11: Easy Listening
Mix #12: Soft A/C & Travel
Mix #13: A/C #1
Mix #14: A/C #2 & News
Mix #15: Rock
Mix #16: Rockalikes, Period
Rock, Pop
Mix #17: Dance, Techno,
Funk
Mix #18: Action, Sports
Mix #19: Mixed Bag: Country, Comedy,
Electronic, Jazz and Drama
Mix #20: Christmas

Mix II (10 Audio CDs)...........................................................................419.95

Mix III

The Mix III Broadcast Music Library offers a superb package of almost 1,000 imaging elements of virtually every description. Featuring a wide variety of music and sound effects tracks, Mix III was designed specifically for broadcast production use. This 5 CD set is stuffed full of specialty beds, stingers, intros, segues, fanfares, underscores and drones ... and a whole lot more! Spark new life into your productions.

Mix #21: Rock Beds, Dance, Hip Hop & Funk, Stingers, Bumpers, Licks and Segues
Mix #22: Logos, FX and FX Music
Mix #24: Stagers, Sweepers, Lasers and Drones
Mix #25: IDs, Work Parts, MiniBeds and Promo Beds

Mix III (5 Audio CDs)...........................................................................334.95
Mix IV
The Mix IV Broadcast Music Library offers a host of music themes and sound effects – all royalty free. With more than 14 hours of first class production music and premium quality sound effects on 12 CDs, Mix IV boasts more than 1500 tracks and over 400 themes.

Mix #26 Romantic, Leisure
Mix #27 Bright, Light Activity
Mix #28 Bright, Light Activity
Mix #29 Industry, Drama
Mix #30 Country, Western
Mix #31 Children, Comedy

Mix IV (12 Audio CDs) .............................................. 419.95

Mix VII
Mix VII is a breath of fresh air for the airwaves, an inspired new mix of sixty, thirty and fifteen second music tracks. With over 1200 tracks on twelve CDs, and a full thirteen hours of music from a variety of composers, Mix VII provides great music in 16 high-demand categories, for any broadcast production need.

Mix #48 Adult Contemporary
Mix #49 Adult Contemporary
Mix #50 Easy Listening, Christmas
Mix #51 Pop, Percussion
Mix #52 Dance, Electronica, New Age
Mix #53 Rock

Mix VII (12 Audio CDs) .............................................. 419.95

Mix VIII
Mix VIII is a 5 CD series jammed with thousands of imaging elements (and a whole CD of sound effects) that you can’t afford to be without. Especially commissioned from many of the best music talents in the business, this collection’s quality is superb and the variety is impressive. Mix VIII includes the following very popular element styles:

• Hits • Sweepers • Communications • Telephone, Fax & Modem Tones
• Sounders • Drones
• Record Scratches • Music & Drum FX • Zips & Zaps
• Rewinds • Solo Rock Guitar Hits, Riffs, Runs & Licks
• Doors • Swipes • Wipes • Dissolves • Ambient Pads
• Loops • Whooshes • Electronic Stops, Hits & Kicks

19.9995.00

Mix X
The Mix Ten Broadcast Music Library is fresh and happening – more than 740 tracks in a great range of must-have categories: Rock, Soft Rock, Dance, Electronica, Solo Guitar, Country, Blues, Jazz, Drama and World music.

Mix X (12 Audio CDs) .............................................. 419.95

Ultimate Drums & Bass (Full Length)
Simply the best resource for underscore themes and work parts. This loaded CD contains over 90 tracks of playful, comic, dramatic, world, light attitude, extreme, rock and funk themes, over 50 tracks of riffs and grooves in six different categories, 13 different loopable phrases, and more than 65 broadcast edit tracks in nine categories ...................... 250.00
Looking for a full set of Mix Signature Collections? Your search has ended! The Mix Signature Collection Combo offers the entire series at an unbeatable combo price! The Mix Signature Collection Combo gives you the very best of The Mix - in 12 great music packages, bundled together for easy use and maximum value:

- **Rock Mix** .......................with Just a Little Attitude.......................2 CDs
- **Eazy Rock Mix** ..............Lots of Funk & Soul ...............................2 CDs
- **Corporate Mix**...............Music That Means Business...................2 CDs
- **Sports Mix** .....................Pumped, Powerful and Proud ...............2 CDs
- **Eazy Listening Mix**........Bright, Fresh, Warm and Gentle..............2 CDs
- **Lite & Easy Mix**..............Relaxed, Carefree & Breezy ......................2 CDs
- **New Age Mix**...............A New Wave for a New World..................2 CDs
- **Country Mix**..................Great Country & New Country................2 CDs
- **Lite Jazz Mix**...............Casual & Contented Moods ....................2 CDs
- **Jazz Mix**.........................Jazz & Blues Just for Y ou........................2 CDs
- **Classical Mix**.................A Varied Classical Selection..................2 CDs
- **Holiday Mix**..................Traditional & Pop Arrangements.............2 CDs

The Mix Signature Collection Combo - 24 CDs, 380 themes, 1,480 broadcast and full length tracks - it's Mix Heaven!

**OR—BUY THEM INDIVIDUALLY**

- **Rock Mix**
  Driven, punchy, kicking and cool - with just a dash of attitude. Rock Mix delivers 33 themes - a solid serving of electric guitar, percussion and saxophone tunes to gear up and drive your productions. Go the distance with this varied collection of heavy, Texas and southern rock, splashed with a dash of surf and blues. The Rock Mix - gutsy, energetic, rugged and rebellious.

- **Eazy Rock Mix**
  A little bit hip - a little bit bold; a smattering of funk - a sprinkle of soul! Eazy Rock Mix gives you 33 themes to stroll, saunter, swing and roll positive energy throughout your productions. Featured instruments in this collection include acoustic & electric guitars, piano, organ, saxophone, flute and fiddle, and there's also a sputtering of rap and soul to keep it cool. The Eazy Rock Mix - carefree, confident & laid back.

- **Corporate Mix**
  Corporate Mix delivers 30 bold, dynamic and dominant themes that feature orchestral, brass and sampled sound arrangements. Up tempo, progressive and ready to work - this is music that means business. Promote your productions with the Corporate Mix - it gets results.

- **Sports Mix**
  Sports Mix - a winning combination of 34 themes that breaks a sweat and counts the score. The Sports Mix offers driving, competitive and exhilarating compositions that feature brass, electric guitar and orchestral arrangements. Knock em out with the Mix Signature Sports Mix - an adrenaline rush that really delivers.

- **Eazy Listening Mix**
  Something bright & fresh; something warm & gentle. Eazy Listening Mix offers 31 themes - reflective, warm and soothing arrangements designed to relax, revitalize and recharge your batteries. The Eazy Listening Mix features instruments like acoustic & electric guitars, alto, tenor & soprano saxophones, electric and traditional pianos and flutes - a soft set that lets you get mellow, release your cares & unwind.

- **Lite and Easy Mix**
  Bright, flowing and carefree. Lite & Easy Mix - a fresh selection of 30 themes designed to keep things light and breezy. This 2 CD set provides a soothing selection of reflective, mellow and gentle compositions, featuring solo and acoustic instrument arrangements. Drift into a daydream with the Lite & Easy Mix.

- **New Age Mix**
  2 CDs and 120 tracks of electronic style music that echoes the rhythms of a modern age. Pulsing and abstract .... hypnotic and ethereal - the New Age Mix offers a varied sample of several electronic styles in this selection of original synthesized music. Explore new territory with the New Age Mix - music for a new world.

- **Classical Mix**
  Refine your productions with this varied classical selection of 23 different public domain compositions, offered in a full compliment of broadcast lengths. Classical Mix graces your productions with popular classical music from Mozart, Bach, Vivaldi, Tchaikovsky, Beethoven, Brahms, Dvorak, Pachelbel and others. Add a little elegance and polish to your productions with the Classical Mix.
SOUND IDEAS

SONOMIC ON-LINE LIBRARY CARD

Choose From Over 200,000 Samples and Sound Effects

With the Sonomic On-line Library Card, you can customize your own sound library. Choose from over 200,000 sounds online - the latest loops, hottest sounds, and rarest FX, with thousands more added every week. Audition as many as you want and download exactly the sounds you need. All sounds are online and searchable in seconds. Select only the sounds you want from some of the best sample and sound FX libraries in the world, including Zero G, Sampleheads, Universal Sound Bank, Q Up Arts, Sound Ideas, BBC, Valentino and many more.

Choose the card that's right for you: One card offers 50 samples or 20 sound FX, and another card is available that offers 10 samples or 5 sound effects.

◆ Available 24 hours a day, 7 days a week
◆ Sonomic’s search engine allows you to search by category or keyword. A few mouse clicks and you’ve created a custom list of the sounds you need.
◆ Every one of the sounds can be previewed before you buy them, so you always get exactly the sounds you need.
◆ Sonomic offers only professional-quality sound FX, samples, and multi-samples, which can be downloaded in any standard file format. Sounds are automatically stored in your SOUND-BAY enabling you to store, organize, access and re-download them from anywhere. All of the sounds stored in SOUND-BAY are secure and can be downloaded as many times as you like from wherever you’re working.

Three Easy steps:
1) Go to www.sonomic.com and click on Register
2) Enter the Online Library code found on back of card
3) Search, preview and download exactly the sounds you need!

SOLC — Library Card for Fifty (50) Samples OR Twenty (20) Sound Effects Download ..........29.95
SOMLC — Mini Library Card for Ten (10) Samples OR Five (5) Sound Effects Download ..........7.95

Lite Jazz Mix
Smooth, spirited & carefree - with a casual & contented mood. Lite Jazz Mix presents 34 sophisticated, stylish, breezy and flirtatious themes - ready to sound notes of optimism and introspection. With instrumentation that includes acoustic & electric guitars, alto, tenor & soprano saxophones, pianos, flutes, clarinets, trumpets, brass & trombones, the Lite Jazz Mix has everything you need to accent the hours of early mornings, easy afternoons and late evenings.

Jazz Mix
Mellow, seductive, sleek & cool - jazz & blues just for you. Jazz Mix offers a temptation of 34 different spirited, traditional, big band, swing & quartet jazz tunes, plus a selection of cool, laid back blues - all designed to create productions with classic, sophisticated appeal. The Jazz Mix features a variety of music styles and instrumentation, including trumpets, saxophones, pianos, guitars, drums, vibes, horns, clarinets & trombones - something for every taste and always delicious.

Country Mix
Rugged, lively and down home - great country and new country selections to reflect today's tastes. Country Mix serves up 34 satisfying themes from the heartland, the rodeo, the badlands and the urban frontier. This selection of rustic, freelwheeling, leisurely and wide open tunes provides dance, swing, open country and back porch flavours, and features a wide range of styles and instruments, including: steel, electric & acoustic guitars, fiddles, accordions, pianos, mandolins, dobro and harmonicas.

Holiday Mix
Celebrate Christmas, Hanukkah & the New Year with The Mix - a joyous gathering of 37 themes, both old and new. This selection of traditional and pop arrangements features many well-known holiday compositions and a small but satisfying feast of other seasonal music - perfect accompaniments to that special time of the year. Holiday Mix offers different and intimate arrangements of flutes, winds, harps, strings, guitars, pianos and percussion, and also the grandeur of orchestras and big bands.

People are always looking for better sound. The trouble is, without fixing your room acoustics, none of your equipment will sound as good as it should. Your room won’t let your gear’s true sound come through. Auralex has taken the guesswork out of acoustics and made it easy and affordable to improve your sound. Auralex offers four Roominators kits that can easily tame the sound problems many people run up against in commonly-sized rooms. Everyone from the novice to the pro can sound their best…no formulas, no mumbo jumbo, no physics required. Now you can have the big studio sound you’ve been looking for, but didn’t know where to find and probably thought you couldn’t afford. Auralex has packed the Roominators kits with the same exact features and performance that many famous clients have loved for years.

Roominators Kits contain:

- Studiofoam 2” Wedge Panels or Wedgies (Alpha1) to absorb early reflections and kill that hollow, “ringy” room sound.
- LENRD Bass Traps to smooth out rooms’ inaccurate and excessive low frequencies.
- Foamtak or TubeTak Adhesive to mount Studiofoam and LENRDs with minimum hassles.
- T’Fusor 3D Sound Diffusors (Deluxe and Pro Kits only) for that spacious ambience and wide sweet spot big-name studios have.

---

**Alpha1 Roominators Kit**

- (64) 1’ x 1’ x 2” Wedgies
- (4) LENRD Bass Traps
- (1) Foamtak Spray Adhesive

**Roominators Project2**

- (24) Studiofoam 2’ x 2’ x 2” Wedge Panels
- (8) LENRD Bass Traps
- (5) TubeTak Pro Liquid Adhesive

**Roominators Deluxe Plus**

- (24) Studiofoam 2’ x 2’ x 2” Wedge Panels
- (8) LENRD Bass Traps
- (6) T’Fusor 3D Sound Diffusors
- (2) Foamtak Spray Adhesives

**Roominators Pro Plus**

- (36) Studiofoam 2’ x 2’ x 2” Wedge Panels
- (12) LENRD Bass Traps
- (8) T’Fusor 3D Sound Diffusors
- (3) Foamtak Spray Adhesives

Roominators are available in charcoal gray.

- Improve the sound of everything you record, listen to or mix
- Reduce your monitoring volume - yet actually hear better
- Hear more of the subtle sonic details that your room’s inaccurate reflections have been burying
- Achieve better sound out of your existing equipment
- Improve your engineering skills, be more creative and get more enjoyment out of your equipment and your room!
It's never been this easy or affordable to tame the acoustics in your small studio, iso room, voiceover booth or control room. Each kit includes instruction sheets with installation suggestions.

If you’re the type who doesn’t know a lot about the physics of sound control.....and doesn’t WANT to know a lot about the physics of sound control.....then you owe it to yourself to check out all the Roominators kits: from the super-affordable Alpha 1 up to the top-of-the-line Pro Plus Kit. And, if you ever need to, simply add more Roominators kits as your budget and acoustical needs dictate.

See the chart below for some rough guidelines to help steer you toward the kit that’s just right for you. And, if your needs dictate, don’t forget that you can also “mix and match” your room’s solutions by combining more than one Roominators kit (of the same or different types) or by adding some of the other Auralex sound control products.

**ADHESIVES**

**TubeTak Pro Liquid Adhesive**
TubeTak Pro is a super-strong, permanent bonding adhesive that applies easily with a standard caulking gun or the optional TubeTak Pro Applicator. One tube mounts up to 32 square feet of foam or diffusors, depending on thickness.

**Foamtak Spray Adhesive**
The fast and easy way to mount foam products. Unlike TubeTak Pro, which is a more permanent adhesive, Foamtak can be applied lightly so that your foam is removable, or it can be applied heavily for a more permanent bond. Foamtak offers greatly improved long-term bonding power, is guaranteed not to oxidize Auralex acoustic foams, and mounts approximately 96 square feet, depending on foam thickness.

**Vel-X Mounting**
Vel-X panels are 22” square corrugated polypropylene panels that temporarily mount Auralex acoustic foam or MetroFusors on walls. The foam is adhered to the Vel-X panels with TubeTak Pro adhesive, then special Velcro dots are used to stick the panels to the wall. The panels are movable at will, allowing you to tune the room for a particular project or take them with you when relocating to a new facility. Vel-X panels are shipped with both TubeTak Pro and special Velcro dots. Minimum shipment is twelve 22 x 22” panels. Please note that 1” needs 40 panels per box of foam, 2” needs 24 panels per box of foam, 3” needs 16 panels per box of foam and 4” needs 12 panels per box of foam.
**Wedges and Pyramids**

Studiofoam Wedges offer excellent absorption, a sleek, high-tech look and minimal installation seaming. They come in many colors and are available in 1, 2, 3 and 4" thicknesses and 2' x 4' sheets. Each sheet is precision-cut for clean-looking installations, so you won't find any innies or outies, or have to hassle with out-of-square panels. Consistency, increased flame retardancy, industry-leading absorption and a long-lasting formulation add up to make Studiofoam wedges the hands-down value leader in the acoustics marketplace.

Studiofoam Pyramids offer a perfect combination of precision appearance and great sound control. With valleys running in both directions, they offer increased installation versatility (each pyramid is either 2" or 4" wide, making it simple to cut) minimal seaming, supply extra diffusion due to their 4-sided geometry and give your space tasteful, upscale looks and sound. Studiofoam Pyramids are manufactured in 2" and 4" thicknesses in 2' x 4' panels and are available in many colors. As they have less foam mass than Studiofoam wedges, Studiofoam Pyramids perform about 85% as well as Studiofoam wedges, but still outperform many competing brands.

1" Studiofoam Wedges

Perfect for environments that require good sound control, but where total dryness isn't required. 1" Studiofoam works most effectively on mid and high frequency sound waves and may be used to treat walls or, more commonly, ceilings (especially if they aren't parallel to the floor), even when the walls are treated with thicker Studiofoam. 1" Studiofoam absorbs as well as some competing 2" products, so if your budget is a bit thin, 1" Studiofoam might be just the ticket for you.

**NRC:** .50  **Qty:** 20 panels  **Coverage:** 160 sq. ft.  **Suggested adhesive per box:** 2 Foamtak or 5 TubeTak

2" Studiofoam Wedges

2" Studiofoam Wedges are Auralex's most popular seller and best overall performer. Use them to treat small- to medium-sized areas including vocal booths, control rooms and studios. They effectively kill standing waves and flutter echoes and, when used in conjunction with bass traps, or broadband absorbers, can effectively tame the full frequency bandwidth in virtually any room. 2" Studiofoam is the workhorse of the industry and is your safest bet if you're tuning your room without the help of a professional acoustician.

**NRC:** .80  **Qty:** 12 panels  **Coverage:** 96 sq. ft.  **Suggested adhesive per box:** 1 Foamtak or 3 TubeTak

3" Studiofoam Wedges

Twice as absorbent as 2" at 125Hz, 3" can do many of the same things 4" can do (especially when used with LENRD or Venus Bass Traps) and can provide a well-controlled, more accurate sound in any size room. Recommended for rooms with higher SPLs or more low frequencies such as drum or voiceover booths. Many rooms have low-end problems, so if you step up from 2" to 3", you will benefit from the extra low-end absorption 3" Studiofoam Wedges offer.

**NRC:** .90  **Qty:** 8 panels  **Coverage:** 64 sq. ft.  **Suggested adhesive per box:** 1 Foamtak or 2 TubeTak

4" Studiofoam Wedges

Recommended for medium to large areas like concert halls, gymnasiums and churches, rooms with pronounced low frequency problems or where sonic accuracy is mandatory and maximum absorption is required (e.g. voiceover or drum booths, forensic audio labs and mastering rooms). 4" Studiofoam Wedges provide 3x the low-end control of 2" and can effectively tame even the worst sonic anomalies. In some instances, using 4" Studiofoam can lessen the need for significant dedicated bass trapping.

**NRC:** 1.10  **Qty:** 6 panels  **Coverage:** 48 sq. ft.  **Suggested adhesive per box:** 1 Foamtak or 2 TubeTak
Sonomatt Acoustic Panels
The perfect product for the budget-conscious, yet acoustically-discerning customer. Sonomatt is cut in the industry standard “eggcrate” style to keep its price low and absorbs almost as well as 2˝ Studiofoam Wedges, so they yield a less dry-sounding space with a bit more “air.”

NRC: 0.70  Qty: 12 panels  Coverage: 96 sq. ft.
Suggested adhesive per box: 1 Foamtak or 3 TubeTak

Wedgies
Wedgies are 1´ squares of 2˝ thick Studiofoam and are a great solution for spot treating studios, home listening rooms, iso booths and more. With slightly more wedges per square foot than 2˝ Studiofoam, Wedgies feature maximized surface area for greater exposure to sound waves. Wedgies are a great solution for small flutter echo problem areas and, when spread apart a little bit, yield beneficial diffusion off their exposed edges. Available in charcoal gray only.

NRC: 0.75  Qty: 24 or 96 Coverage: 24 or 96 sq. ft.
Suggested adhesive per box: 1 Foamtak or TubeTak/24 sq. ft. - 1 Foamtak or 3 TubeTak/96 sq. ft.
The Metro Family blurs the line between those products that work well acoustically and those that yield the desired aesthetics that users desire. The Studiofoam Metro and the MetroFusor Diffusor afford minimal installation seaming because the left and right edges of the panel are the same height. They lend themselves to a variety of installations that look great and sound quite natural due to Metro's linear — and moderate — acoustical action.

**MetroFusor Sound Diffusor**

As a companion to the well-received Metro 2” Absorber and Metro LENRD Bass Trap, Auralex has developed the MetroFusor. It's custom made from high quality EPS (expanded polystyrene), so it's lightweight, affordable, easy to paint, easy to mount and inexpensive to ship. It features the same distinctive, proprietary surface contour as the Metro Absorber for a clean, consistent, architecturally-pleasing appearance that looks upscale and attractive in even the most highbrow of environments. The MetroFusor's surface contour yields both sound wave refraction AND time domain spread for improved modal response without removing a significant amount of sonic energy from your space. It's perfect for churches, boardrooms, performance venues, studios and more. It's also a significant bass trap below 400Hz, which is quite a desirable attribute (because low frequency diffusion would only muddy your sound).

Quantity: 12  
Size: 2’ x 2’  
Coverage: 48 sq. ft.  
Suggested adhesive per box: 2 TubeTak

**Metro LENRD Bass Traps**

Metro LENRD Bass Traps round out the Auralex Metro family. This triangular-shaped bass trap fits into room corners and/or wall/ceiling junctures perfectly, and provides outstanding broadband absorption (especially at low frequencies). Based on the design of the wildly successful original LENRD Bass Trap, the Metro LENRD gives a fresh look to a reliable, unbeatable sound absorber. Plus, it's available in 12 colors.

All three Metro products work together to provide sound absorption, diffusion and bass trapping, while the "cityscape" cut provides visual continuity to your room. The Auralex Metro family was designed with a professional, architectural look for use in studios, classrooms, home theaters, office buildings, churches or anywhere a more upscale appearance is called for.

Quantity: 8  
Coverage: 16 lineal feet  
Size: 2’ x 1’ x 1’  
Suggested adhesive per box: 2 TubeTak

**Studiofoam Metro**

The differing heights of protrusions on the Studiofoam Metro spreads sonic energy out in the time domain, as well as each absorbing a slightly different slice of the frequency spectrum. It takes slightly different amounts of time for sound waves to travel through the different sections of the Metro, strike the mounting surface and travel back into the room, so wavefronts are in effect softened rather than just being absorbed. This is why a Metro room will retain a bit more “feed” than a room that's treated with a stronger absorber like 3” or 4” Studiofoam Wedges or Pyramids and why, when coupled with a judicious amount of MetroFusors, a well-controlled, natural-sounding space will result.

Quantity: 12 panels  
Coverage: 96 sq. ft.  
Panel Size: 2’ x 4’ x 2”  
Suggested adhesive per box: 3 TubeTak

**MetroFusor Sound Diffusor**

As a companion to the well-received Metro 2” Absorber and Metro LENRD Bass Trap, Auralex has developed the MetroFusor. It's custom made from high quality EPS (expanded polystyrene), so it's lightweight, affordable, easy to paint, easy to mount and inexpensive to ship. It features the same distinctive, proprietary surface contour as the Metro Absorber for a clean, consistent, architecturally-pleasing appearance that looks upscale and attractive in even the most highbrow of environments. The MetroFusor's surface contour yields both sound wave refraction AND time domain spread for improved modal response without removing a significant amount of sonic energy from your space. It's perfect for churches, boardrooms, performance venues, studios and more. It's also a significant bass trap below 400Hz, which is quite a desirable attribute (because low frequency diffusion would only muddy your sound).

Quantity: 12  
Size: 2’ x 2’  
Coverage: 48 sq. ft.  
Suggested adhesive per box: 2 TubeTak

**Studiofoam Metro 4”**

NRC: 70  
Qty: 6 panels  
Coverage: 48 sq. ft.  
Panel Size: 2’ x 4’ x 4”  
Suggested adhesive per box: 2 TubeTak

**Studiofoam Metro 2”**

NRC: 70  
Qty: 12 panels  
Coverage: 96 sq. ft.  
Panel Size: 2’ x 4’ x 2”  
Suggested adhesive per box: 1 Foamtak or 3 TubeTak

**Studiofoam Metro 4”**

NRC: 70  
Qty: 6 panels  
Coverage: 48 sq. ft.  
Panel Size: 2’ x 4’ x 4”  
Suggested adhesive per box: 1 Foamtak or 2 TubeTak
In Which Rooms and Which Placement Is Diffusion Appropriate?

First of all, control rooms. Most studio designers will tell you that the front of the room (walls and ceiling) should be absorptive as far back as the engineer. The ceiling from the engineer back can contain a mix of diffusion and absorption, but many top designers feel the rear wall should feature a diffuser array surrounded by broad bandwidth absorption, especially in larger rooms. The side walls and ceiling from the engineer’s position on back can be alternately absorptive and diffusive.

Second, live rooms (studios). Personal taste, room size and room function determine how dry (absorptive) or wet (diffuse) a studio should be, but many famous rooms are absorptive in some spots and diffusive in others. Generalizations: rock studios should be more absorptive than classical or jazz studios, and rarely should they be totally “dead.” If you’ve got to be in a wet room, have the liveliness controlled by diffusion to yield a more pleasing and smoother overall room sound and reverb tail (decay).

Third, isolation and voiceover booths. Personal taste and room size come into play here, too. A voice talent sounds great in totally absorptive environments, while a drummer may prefer a combination of diffusion and absorption on all room surfaces with significant bass trapping. When recording sax players, violinists or solo sopranos, you might want some combination of the two; probably more diffusive than absorptive. It’s truly your call, but bear in mind that once bad (non-diffused) “room sound” is captured on tape, disk, etc., you can never get rid of it.

T’Fusors
Made from high-impact thermoplastic resin, T’Fusors, which are 23.75” square, drop perfectly into a suspended ceiling grid, and stand up very well to normal wear and tear. They are lightweight and nest into each other, dramatically lowering shipping costs.

T’Fusors mount easily to walls and ceilings using construction adhesive or mechanical fasteners, and are sized to facilitate alternating them with acoustic foam panels for better overall room sound. They have a 1” ledge in their back that permits insertion of SheetBlok, flat-cut acoustic foam, rigid fiberglass or Auralex Mineral Fiber insulation for greater versatility. They’re available in easily paintable white.

MiniFusor Sound Diffusor
Just like its big brother the T’Fusor, the MiniFusor is very versatile and affordable. It’s shape lends itself to various wall patterns and its cavity can be filled with acoustic foam or Auralex mineral fiber insulation to provide better diffusion and low frequency trapping. It is made from rigid thermoplastic resin and, like the T’Fusor, is super-easy to mount and paint.

Auralex MiniFusors offer a rare combination of great performance and a great price. So, if you’re in the market for diffusors and are on a tight budget, you owe it to yourself to give serious consideration to a MiniFusor array. MiniFusors are 12” x 12” x 5” and have a quantity of 12 per box (12 sq. ft.).

Where, and In What Quantities, Should You Install T’Fusors?
In most small control rooms it is recommended to install a group of at least 4 T’Fusors on the rear wall. Larger control rooms get at least four additional T’Fusors on the rear wall and, optionally, additional units placed on the ceiling from the mix position back. Discretionary placement: side walls behind the mix position, alternating with acoustic foam. Regardless of room size or function, groups of less than 4 T’Fusors are not audibly worthwhile. Also, for T’Fusors to work properly, the pattern should not repeat sideways or vertically in close proximity to itself.
LENRDs

LENRD Bass Traps
Low frequency sound waves are the most prominent and difficult to control, whether you're attempting to block their transmission to a neighboring space or trying to absorb them to clean up the low frequency response. LENRD's triangular shape traps bass buildup by putting a big chunk of Studiofoam right where you need it: in your trihedral corners (where two walls come together and meet the ceiling).

Each LENRD kit contains eight 2' tall LENRDs, enough to trap 16 lineal feet. If you've got 8' ceilings, one box would be enough to trap both your room's rear corners floor to ceiling. Or, if space permits, you could trap all four corners of your room from the ceiling down 4'. Due to LENRD's efficiency, you can achieve premium results by utilizing thinner Studiofoam for the bulk of your wall treatment.

Suggested Adhesive: 1 Foamtak or 2 TubeTak per box

Standard LENRD NRC: 1.35

MegaLENRD
At twice the width (extending 2' along each wall, not 1' like the standard LENRD), the MegaLENRD is substantial enough to handle low frequency problems in rooms of any size.

Quantity Per Box: 2  Colors: All

Stand-Mounted LENRDs
Stand-Mounted LENRDs are 4' tall instead of the standard 2', and come complete with the same stands utilized with Sunburst-360s. In "normal" mode, the LENRDs stand about 6' tall, but in "extended" mode, they can reach heights of nearly 8' or more.

Stand-Mounted LENRDs are the perfect complement to MAX-Wall Modular Acoustical Environment. They're portable, effective, highly affordable and because they're stand-mounted, there's no adhesive to worry about and no wall repair to do if you move and take them with you.

LENRD NRC: 1.35
Quantity Per Box: Four 4' LENRDs complete with 4 MAX-Stands
Colors: Charcoal gray, vivid purple and burgundy

VENUS BASS TRAPS

Venus Bass Traps
Many smaller studios and control rooms suffer from low frequency anomalies not only due to their lack of adequate trapping in general, but also due to their dimensions. Therefore, you may have tons of bass one place, but if you move 6', you've got none at all.

In a studio, it's easy enough to move a performer, amp or drum kit to a different spot. But in a control room, where everything's fixed in location, such standing wave occurrences become tougher to deal with...and much more important based on the nature of what a control room is for. The Venus achieves a prodigious level of low frequency absorption at your room boundaries—where low frequency problems begin. It exhibits a phenomenal coefficient of 1.63 at 125Hz, and ships in a 2' x 4' x 12" size. It is often cut in half to 2' x 2', then paired with a 12' Auralex CornerFill. Venus not only works well in smaller rooms, it really shines in larger rooms like gymnasiums, houses of worship and multipurpose rooms.

NRC: 1.30 Qty: 2 (16 sq. ft.)  Suggested Adhesive Per Box: 1 Foamtak or 2 TubeTak

MegaMAX
Sometimes, studios or tracking rooms have very pronounced bass anomalies that can't be totally mitigated by conventional placement of bass traps. The 2' x 4' MegaMAX panels are 9" thick and have a hole cut through them so that they can be mounted on MAX-Stands, enabling them to be moved easily to "fine tune" difficult low-end problems. Their portability allows them to be used as low frequency go-bos. The MegaMAX can be placed in problematic areas unique to particular applications.

NRC: 1.10, 1.32@125Hz Qty: 2 (16 sq. ft.)  Adhesive and MAX-Stands are optional
Sunburst Broadband Absorbers

Sunbursts feature a smart and unique male/female configuration that helps solve quite a wide range of acoustical problems. Because they offer a significant amount of both low frequency control in particular and broadband absorption overall, they work well in rooms that don’t have corners available for treatment with LENRDs or where you don’t need or desire large expanses of absorbent wall or ceiling treatment. (In other words, Sunbursts work well in rooms where you desire control but don’t want too dry a sound, or in rooms where you don’t have a lot of wall or ceiling space available for treatment.) Sunburst Females are often cut in half and used as “mini-LENRDs” or to frame Studiofoamed areas. They look great and deliver truly linear broadband performance. (They’re virtually flat!) Sunbursts contain 4 males and 4 females per box; males are 1’ x 4’ x 7”. Instructions and suggestions are included.

**NRC:** 1.10 (male yields 1.08 at 125Hz)  
**Size:** 1’ x 4’ x 7”  
**Quantity Per Box:** 4 males and 4 females (32 lineal feet)  
**Suggested Adhesive Per Box:** 1 Foamtak or TubeTak

The Sunburst-360

Eclipse Acoustical Environment

Sunburst-360s are wedge-cut, elongated, stand-mounted absorbers that offer adaptability, portability and affordability. When placed around a vocalist, instrumentalist, voice talent or control room mix position, they form an Eclipse Acoustical Environment, yielding superior broadband control of reflected sound waves in the nearfield and low frequency waves in the room in general. Sunburst-360s are so linear in their absorption that they exhibit a deviation of only ±1.9 Sabins across the entire test frequency spectrum from 100Hz to 5000Hz. This is the linear absorber the acoustics marketplace has been searching for all these years.

With an Eclipse Acoustical Environment, you can quickly, easily and affordably achieve world-class sound control in any environment. Sunburst-360s are shipped with 2 males and 4 females per box; males are 12” x 15.5” x 4’. 2 MAX-Stands with 18” extensions per box, allowing height of 4’ 6” to 9’. Available in charcoal gray, vivid purple and burgundy colors.

**BRIEF DEFINITIONS and STATISTICS**

**NRC (Noise Reduction Coefficient):**
A numerical rating given a material which tells us how much airborne sound the material absorbs. This rating generally applies to soft materials like acoustic foam, fiberglass, fabric, carpeting, etc. but also applies to much lesser degrees to harder materials like brick and drywall. A material’s NRC is an average of its absorption at various center frequencies between 125Hz and 4000Hz. The higher the number, the better an absorber the material is.

**STC (Sound Transmission Class):**
A numerical rating of how effective a material is at blocking the transmission of sound through itself. This rating generally applies to hard materials like rubberized sound barriers, concrete, brick and drywall but also applies to a much lesser degree to softer materials like mineral fiber (although it isn’t tested by itself; it’s tested as part of a wall system to verify its effectiveness). Virtually every material filters out some of the sound that travels through it, but dense materials are much better at this than are spongy materials.
CornerFills
CornerFills are sections of flat-cut Studiofoam that are beneficial in two ways. Aesthetically, they give you smooth, clean edges against which to butt your wall treatments and bass traps for a more professional appearance. Acoustically, they smooth out the excess low frequency energy that congregates in room corners. **Suggested Adhesive Per Box:** 1 Foamtak or 1 TubeTak

- 2" x 2" x 24" 36 per box (72 lineal ft.) ..... Call
- 3" x 3" x 24" 16 per box (32 lineal ft.) ..... Call
- 4" x 4" x 24" 9 per box (18 lineal ft.) ..... Call
- 12" x 12" x 24" 1 per box (2 lineal ft.) ..... Call

CornerFill Cubes
CornerFill Cubes are a terrific way to finish out trihedral corners where three LENRD Bass Traps come together. Simply install the Cornerfill Cube at the wall/ceiling juncture, then butt your LENRDs up to it for a finished, professional look and tons of additional low frequency absorption. Great for gyms and larger rooms. 12” x 12” x 12”. 2 per box (2 lineal ft.).

ATOM-12
This kit consists of four 12” CornerFill Cubes and 12 LENRDs. Installation’s a snap and what you end up with, in each trihedral corner of your room, is a configuration like the one pictured here. Installed in the “usual” way, LENRDs are the most effective small bass traps on the market and have no equal. But when you install them using 12” CornerFill Cubes, you’re really going to have serious low frequency accuracy in your room. All rooms need low frequency smoothing. Trihedral corners (where two walls and the ceiling come together) are the places where physics amplifies bass the most. Given these facts, you can see why the ATOM-12 is a smart way to begin giving your room the bass trapping it needs.

VersaTile
This next-generation broadband absorber combines a visually attractive absorptive panel with specially engineered air cavities that yield extraordinary sonic benefits. The VersaTile can be positioned to bridge a corner, creating a sizable air pocket that delivers great low frequency absorption. It can also be placed on walls and ceilings with either side out, allowing for some sophisticated looks while offering superior absorption characteristics versus thinner, flat acoustic foam panels. If room boundary space is limited, the VersaTile packs a ton of absorption into a minimal amount of cubic space.

**Quantity:** 6 or 24 panels  
**Coverage:** 16 or 64 sq. ft.

gramma
GIG AND RECORDING AMP & MONITOR MODULATION ATTENUATOR
The Gramma is used to float an amp or loudspeaker and yields nearly total acoustic isolation, resulting in a purity of tone that has to be heard to be believed.

- Get your own personal amp/speaker riser
- Isolate and decouple your amp and/or monitors from the floor/stage, resulting in much greater separation and clarity
- Makes engineering much easier due to less bleed and resonance
- Dramatically improve audibility on-stage and in the studio
- 23” x 15” x 2¼” LWH
- 1 or 2 GRAM MAs will support most amps, speaker cabinets, subwoofers and monitors
MAX-Wall’s are everything you’ve ever wanted from acoustical treatments — affordability, portability, expandability and adaptability. The interlocking MAX-Wall system can grow as your needs change. Add some Sunburst 360s or stand-mounted LENRD bass traps and you’ve got an incredible amount of acoustical control in a simple, portable package. MAX-Wall’s are perfect if you don’t want to mount anything to your walls, if your place needs to serve a variety of acoustical purposes or if you’re on a budget. They offer great broadband absorption (even at low frequencies) and are incredibly linear, with an overall NRC of 1.05. It offers excellent broadband control of sound waves throughout your room and in the near field, so you can play, record or mix great music or vocal tracks anywhere, anytime. The MAX-Wall panels are thick enough to yield a pretty high degree of sound containment, so a couple boxes of them can be used to set up a temporary pseudo-iso booth. It won’t yield total sound isolation, but will give you enough containment so that you can lay down a clean new track in a hurry and likely not have to monitor on headphones.

 Kits are available in charcoal gray, purple, or burgundy. MAX-Walls can be raised to 8’ by mounting them on MAX-Stands that have an extension. MAX-Clips are included for added support. To match your MAX-Wall, MAXPak Studiofoam features the same wedge-cut design. Corner Couplers are available to join MAX-Walls at 90° angles. (The 1141 VB Kit includes Couplers). The M-W-Window Kit can be purchased separately and includes a 48 x 20” panel with an 18 x 12” plexiglas-type window.
AURALEX ACOUSTICS

DESIGNER SERIES

Introducing the Auralex Designer Series
Auralex continues to lead the industry in acoustical performance with innovative products that the market demands. With the introduction of the new DST Designer Series, Auralex now offers DST versions of Studiofoam, LENRD, and Roominators with a more stylish look.

STUDIOFOAM DST
For the design-conscious looking for excellent absorption, a sleek, high-tech stylish look and minimal installation seaming, Studiofoam DST is for you! Available in 2 simple shapes, you can easily create a multitude of great patterns that adds a true designer-touch to your recording, listening or home theater environment at a great value.

DST-112
These 1’x 1’s provide a great design base, and can easily be cut in half to offer exciting combinations.
NRC: 0.60     Qty: 24 or 96 panels
Coverage: 24 or 96 sq. ft.     Color: Charcoal Gray
Suggested Adhesive Per Box: 1 Foamtak or 3 Tubetak (per 96 sq. ft.)

DST-114
The DST-114’s are also 1’x 1’s that complement the 112’s and other DST Studiofoam products. They can easily be cut in 3˝ shingles, allowing for many options when used singularly or with 112’s.
NRC: 0.65     Qty: 24 or 96 panels
Coverage: 24 or 96 sq. ft.
Suggested Adhesive Per Box: 1 Foamtak or 3 Tubetak (per 96 sq. ft.)
Color: Charcoal Gray, Burgundy, Purple, Forest Green

DST-244
The same cut as the DST-114, but in a 2’ x 4’ x 2’ Studiofoam panel. The “shingle” contour allows you to easily cut them to create great designs.
NRC: 0.65     Qty: 12 2’ x 4’ panels     Coverage: 96 sq. ft.
Suggested Adhesive Per Box: 1 Foamtak or 3 TubeTak
Color: Charcoal Gray, Burgundy, Purple, Forest Green

DST-422
The same cut as the DST-112, but running lengthwise in a 4’ x 2’ panel. Create great borders that finish off almost all Auralex products by easily cutting them down to 6” x 48”. If you “don’t want it to look like foam”, this is the product for you.
NRC: 0.60     Qty: 6 or 12 - 4’ x 2’ panels
Coverage: 48 or 96 sq. ft.
Suggested Adhesive Per Box: 1 FoamTak or 3 TubeTak (per 96 sq. ft.)
Color: Charcoal Gray, Burgundy, Purple, Forest Green

LENRD DST
Enjoy all the benefits of the ever-popular LENRD bass traps in a design that will make any DST install look stellar. When you need some low-end absorption, the DST LENRD is a great design alternative.

NRC: 1.20     Qty. Per Box: 8 (16 linear feet);
Colors: charcoal gray, burgundy, purple, forest green
Suggested Adhesive Per Box: 1 Foamtak or 2 Tubetak

ROOMINATOR DST
The newest member of the diffusor family is the Diffusive Sound Tile Reflector, or DST-R. Intended as the perfect compliment to the DST-112 and DST-114 Studiofoam Panels, they can be aligned in a number of ways to create a designer look. Only 1˝ thick, the DST-R is 1’ x 1’. It is the same shape as a DST-114 panel, making it a great option when installation depth is limited, such as a low ceiling. Made from high quality EPS, the DST-R is lightweight, can be installed and painted easily, and is a very low cost diffusive alternative.

Qty: 36 per box     Size: 1’ x 1’ x 1’
Coverage: 36 sq. ft.
Suggested Adhesives Per Box: 2 Tubetak
ROO MinATORS DST

Roominator-DST Kits span a wide variety of applications, addressing the acoustic and aesthetic needs of the small project studio as well as the most demanding professional mix/mastering environments. Whether it’s your first studio, a home theater, or a Pro Tools Suite, the Roominators-DST Kits are designed to dramatically improve your acoustics, and give you a great designer look.

D240xi Roominator DST Kit
The Big-Daddy of Roominator kits! It not only gives you plenty of product for superior acoustic performance, it provides all the components necessary for a fabulous look. It also includes a Gamma Isolation Riser and 10 MoPad Monitor Isolation Pads to properly isolate a sub-woofer and up to 5 monitors.
The kit includes:
(48) DST-112 panels
(12) DST-422 panels (96 sq. ft. in charcoal gray)
(96) DST-114 panels in your choice of their 4 colors
(16) DST-LENRD Bass Traps (charcoal gray)
(12) T’Fusor 3D Sound Diffusors
(6) Tubetak Pro Adhesives

D36 Roominator DST Kit
Perfect for spot treatment. The D36 offers you a starting point to reduce unwanted slap and flutter echo in your room.
The kit includes:
(18) DST-112 panels
(18) DST-114 panels in your choice of their 4 colors
(2) Tubetak Pro Adhesives

D108L Roominator DST Kit
All the components you need to attack the acoustics of a smaller Project Studio. Excellent for smaller home theaters. Two D108L kits may be appropriate for medium-sized studios and home theaters, as well as live rooms and rehearsal spaces.
The kit includes:
(54) DST-112 panels
(54) DST-114 panels in your choice of their 4 colors
(8) DST-LENRD Bass Traps (charcoal gray)
(6) Tubetak Pro Adhesives
SheetBlok Sound Barrier

SheetBlok is a dense, limp-mass vinyl material that is about 6dB more effective than solid lead at stopping sound transmission. It acts as a thin, dense sound barrier layer in walls, ceilings or floors and is most effective when used as one component of a multi-layered construction scheme. SheetBlok helps in decoupling (i.e. floating) floors and walls and, while not considered a finish product, is paintable with latex paint and can be the last layer in some cases. It can be used to wrap HVAC ducting, as a vent noise blocker, as a pipe noise insulator or under carpet/carpet pad. It holds up against harsh environments and cuts easily with a utility knife or scissors. SheetBlok can be doubled up, increasing its effectiveness from STC 27 to about 35.

**Available in:**
- **SheetBlok** 4’ x 10’ pieces (40 sq. ft.)
- **SheetBlok** 4’ x 30’ rolls (120 sq. ft.)

**Color:** Black or Clear (subject to availability)

**Thickness:** 1/8”

**Weight:** 11# per sq. ft.

**Service Temperature:** -40° to 180° F

**Tensile Strength:** 400 psi

**Tear Strength:** 70#/inch

**Flammability:** Rated UL94 S.E.”0”; Passes test MVSS-302

**Notes:** (1) STC stands for Sound Transmission Class, a rating of how effective a product is at being a sound barrier.

**SheetBlok-Plus**

Comes with pressure-sensitive adhesive already attached. Available in 4’ x 30’ rolls only.

Mineral Fiber Insulation

The best way to tighten up a room’s sound and make it more soundproof, is to design it right, build it tight and make the partitions as dense as possible. That’s where specialized Mineral Fiber comes in. It is very dense and is specifically designed for acoustical usage. It’s available in 2” and 4” thicknesses, and is designed to offer better bass trapping, overall absorption, thermal characteristics, moisture absorption and sound transmission loss (isolation) than any other product. For those of you in need of absorption, but for whom acoustic foam may not work for whatever reason (flame retardancy, looks, style, etc.), Mineral Fiber covered with specialized acoustical cloth is a viable alternative.

**2” Mineral Fiber Insulation** ............................................................... Call

**4” Mineral Fiber Insulation** ............................................................... Call

**Quantity Per Box:**
- 2” - 6 (48 sq. ft.)
- 4” - 3 (24 sq. ft.)

**Flame Retardancy:** Class A

**Advantages vs. Standard Fiberglass:** better sound isolation, better acoustic absorption, lower moisture absorption, better flame spread and smoke density, 1200° burn point vs. 650°

RC8 Resilient Channel

RC8 is a specially-formed, sturdy metal device that, when used to hang drywall (instead of just attaching the drywall to the studs or joists), greatly improves the sound transmission characteristics of the wall or ceiling system. RC8 should be installed horizontally at the bottom and top of your wall, then every 2’ or less in between. Up to 2 layers of 5/8” drywall and a layer of SheetBlok may be hung on RC8, even on a ceiling.

RC8 is available in handy 8’ lengths that are ground shippable. There are twenty-four 8’ pieces per tube.
Confidence Monitors

When your livelihood depends on the integrity of an electronic signal, an MS Series Confidence Monitor can give you blissful peace of mind. They provide assurance that analog audio, digital audio, or video signals are present and meet established quality standards before being broadcast, recorded, or otherwise distributed. The various models differ primarily in the types and number of signals they can monitor, though all are housed in compact, single space chassis that occupy minimal rack real estate. Monitoring is accomplished audibly (through speakers or headphones) and visually through meters and video monitors.

FEATURES

They All Feature

- Each model features a pair of built-in highly compact yet full range shielded stereo speakers, along with a Speaker Mute switch.
- An amply powered TRS output is provided for headphone listening. Speakers and headphone amps share a volume slide control, and non-video models have Balance sliders.
- Phase indicator displays the phase relationship of the left and right channels of the monitored source. Indicator glows green to amber under normal conditions, and red (conditions of total phase reversal), helping determine mono-compatibility.
- Each input is routed to a bright, 14-segment LED meter, which may be switched for VU or PPM ballistics and +4 or +8 dBu reference levels with front panel switches.
- Meter brightness may be adjusted with a dimmer control, to suit user taste and variations in ambient lighting.
- All front panel control and indicator labels are rear printed on a heavy duty, wear-free mylar overlay.
- All analog inputs and outputs are high common-mode rejection XLR balanced, and each is provided with a rear panel signal activity indicator for easy identification of system problems. Outputs also have ±6 dB Gain Trim controls.
- They are powered with an included UL-approved external power supply via a DIN 5 connector. For maximum reliability, they feature a clean, modular design with minimal cabling. And all include a Three Year Limited Warranty.

Analog/Digital Audio Models

- Models with digital monitoring capability are equipped with an A/D Select button and both front and rear bi-color digital signal activity indicator(s). Digital input(s) accommodate stereo digital signals sampled at up to 96 kHz, in AES/EBU format, via rear panel BNC inputs.
- A/D converters provide up to 8X oversampling, with a dynamic range of 95 dB.

Video Models

- Video models include a 1.8” LCD video monitor which automatically senses and displays either NTSC or PAL signals.
- Adjustments for color, brightness, contrast, and tint are provided on the front panel.
- Because the speakers in the MS Series are magnetically shielded, no special consideration is required for installation in critical locations near video monitors.

PL-8 Power Conditioner and Light Module

Featuring triple-mode varistor spike and surge protection, the PL-8 is the perfect accessory to any equipment rack, providing the basic power protection essential to every audio or video system. Install a PL-8 in the top slot of your rack, and the eight switched AC outlets on the rear panel will power up all your equipment while the two slide-out light fixtures provide discreet illumination of the controls for use on stages, in studios, or in any dark place. A dimmer control lets you adjust the lamp brightness to just the right level.

- Protects delicate electronic equipment by combining a high voltage surge and transient suppressor with an RFI/EMI interference filter. The fast-acting suppression circuit responds in nanoseconds, clamping spikes and surges to safe levels. The filter works to prevent electronic noise from fluorescent lights, electric motors and radio transmitters from leaking from the AC line into sensitive analog or digital circuits.
- The PL-8 can absorb a surge current of up to 6500 amperes for 10 ms without damage.
- Two slide-out, swiveling light fixtures for rack illumination.
- The lamps come supplied with 7 watt night-light bulbs. Bulbs are easily replaced without removing the unit from the rack. (Replacements are readily available and you can even use colored Christmas tree bulbs).
- Master switch controls the eight rear outlets and glows red when the power is on.
- Two slide-out, swiveling light fixtures for rack illumination.
- A separate switch for the lamps allows you to check your equipment settings before applying power to it.
- Dimmer control for lamp brightness
- Rated at 15 amps, the front-panel circuit breaker can be easily and quickly reset should the PL-8 be overloaded.

PL-PLUS Ultra-Level Protection with Voltmeter and Lights

An enhanced version of the PL-8, the PL-PLUS offers improved surge protection, RF noise filtering and an AC voltmeter. The 20 LED bar-graph voltmeter reads from 90 to 128 volts in 2-volt steps. The normal range voltages are indicated in green, with moderately and extremely high or low voltages in yellow and red respectively. The voltmeter’s accuracy is ±2 volts. It can easily be recalibrated if necessary. The sophisticated RFI filter network offers greatly improved capacity for stopping line noise. This filter incorporates a toroidal inductor and three high-voltage capacitors to achieve a common-mode noise attenuation of over 50 dB at 10 MHz. Finally, the PL-PLUS uses a longer power cable than the PL-8 (10’ heavy-duty 14 gauge power cable).

PM-8 Power Conditioner with Current and Voltage Meters

The model to choose when rack lights aren’t needed. The PM-8 has all the power conditioning features of the PL-PLUS, plus it has a ninth unswitched outlet whose front panel location makes it very convenient for equipment in temporary use. It has both a voltmeter and an ammeter. The ammeter reads true RMS current, so it will indicate reliably and meaningfully for all loads, including inductive and capacitive loads such as power amplifiers. (Ammeters that respond only to average AC current may give readings that differ widely from RMS-reading meters.) The PM-8’s voltmeter reads from 90 to 135 volts in 5 volt steps. The ammeter reads from 0 to 20 amps, in 2 amp steps.
**Metered Six Series**
The Metered Six are an extension of Furman's well-respected 15- and 20-Amp power conditioners. The "Metered Six" differ from their siblings by the inclusion of additional filtering for digital equipment, Digital AC voltmeter, and all (except the PL-PLUSD and PL-PROD) feature a Digital AC current meter. The current meter is a true R.M.S. variety, and both meters sport laboratory accuracy. The true R.M.S. (root mean squared) current meter, allows installers to read the total system current draw without the false readings typically experienced due to distorted AC voltages. Additionally, digital AC outlets provide increased filtering and inhibit contamination of neighboring components.

---

**FEATURES**
- **All units are single 19” rack space, and feature an attractive black anodized front panel, and rust proof chromat steel chassis for positive ground contact.** They can withstand a one-time power surge of 6500 amps (11,000 amps for Pro models).
- **Common and transverse mode noise is greatly diminished through Furman's three stage RFI/EMI filtering.** This prevents fluorescent lights, radio transmitters, and similar sources of "electrical pollution" from leaking into sensitive audio/video components.
- **Each unit features (4) digital and (4) analog AC outlets, which are activated by either a red backlit power switch, or a blue handled magnetic circuit breaker (Pro Series).**
- An independent power switch activates units featuring dual retractable lights. This allows you to carefully inspect an entire equipment rack's settings prior to turn-on.
- All power switches have been chosen to handle high in-rush peaks, typical in many high performance power amplifiers.
- Each features a 10’ heavy-duty power cord and full safety compliance for North America through C-UL listing.
- Metered Six units featuring dual retractable lights come supplied with one 7-watt night-light bulb per light tube. Replacements are available in 4 to 7-watt sizes at most supermarkets and hardware stores.

**Metered Six Models**
- **PL-PLUSD:** 15 Amp, dual retractable rack lights, digital volt meter ...................................................174.95
- **PL-PLUSDM:** 15 Amp, dual retractable rack lights, digital volt/current meter ..........................189.95
- **PM-8DM:** 15 Amp, digital volt/current meter 174.95
- **PL-PROD:** 20 Amp, dual retractable rack lights, digital volt meter ..................................................299.95
- **PL-PRODM:** 20 Amp, dual retractable rack lights, digital volt/current meter ........................299.95
- **PM-PRODM:** 20 Amp, digital volt/current meter ...............................................................289.95

**PRO Models (Only)**
- 20 Amp (2400 Watt) rating handles even the largest amps
- The three PRO units add an "extreme voltage shut-down" circuit. Useful in installations where faulty wiring and accidental 220v AC feeds are common, this circuit senses AC voltages that are either so high or low that operation would be impossible (under 80v AC or over 140v AC). The circuit then immediately shuts down all output power well before damage can occur.
- Additionally, “Protection OK” and “Ground OK” monitor the integrity of the wiring and protection devices.

---

**PL-PRO and PM-PRO**

**Non-Digital 20-Amp Power Conditioners**
The predecessors to the Metered Six series, the industry-standard PL-PRO and PM-PRO are almost identical to their respective digital counterparts (PL-PROD and PM-PRODM), except they use LED readouts instead of digital readouts, and they don't include the special outlets with filtering for digital equipment. Like the PL-PROD and PM-PRODM, they feature 20 AMP operation, Extreme Voltage Shutdown, critical functions are monitored by a "smart" microprocessor, and LED status indicators report on problems.
PS-8/PS-8R Ultra-Level Protection with Sequencing

The PS-8 Power Sequencer is needed whenever various kinds of equipment must be powered up or down in groups, rather than all simultaneously. In audio systems, sequenced powering is often necessary to allow turn-on transients from low level amplifiers and processors to settle down before any power amps are turned on, because simultaneous powering would result in a loud, annoying, and potentially destructive “pop” reaching the speakers. And in any large system whose components present an inductive load to the AC line (including electric motors, power supplies, and power amplifiers of all kinds), sequenced powering can avoid excessive inrush currents that cause circuit breakers to trip even though the steady-state currents are not excessive. The PS-8R is identical to the PS-8 except it can be remotely switched on/off from a distance.

◆ Using them is a simple and inexpensive way to apply and remove power in a controlled, repeatable, foolproof 3-step sequence. Ideal when large installations must be switched on or off by inexperienced personnel.

◆ There are three outlet pairs labeled Delay 1, Delay 2, and Delay 3, that receive power almost immediately, 5 and 10 seconds respectively after the power switch is turned on. When power is turned off, the sequence is reversed (Delay 3 loses power almost immediately, Delay 2 1 after 5 and 10 seconds. Intervals are preset but can be changed via internal trimpot adjustment.

◆ In addition to the delayed outlets, a single front panel outlet and a rear panel pair are unswitched.

◆ They offer all basic power conditioning features including 15 Amp operation, varistor spike and surge protection across all three modes, as well as a sophisticated EMI/RFI filter for blocking radio frequency line noise. Clean, filtered power is provided at all 9 outlets, even the unswitched ones.

◆ They can detects faults in AC wiring. Green and red neon indicators light in a specific pattern for normal wiring and in different patterns for various faults.

◆ If a fault is present, a chart next to the indicators will identify its exact nature.

PS-8 .......................................................... 212.50 PS-8R .................................................. 244.95

PS-PRO Pro-Level Protection with Sequencing and Remote

The PS-PRO Power Conditioner/Sequencer is capable of powering up a rack full of equipment in a 3-step delayed sequence. The sequence is reversed for power-down. The sequence can be initiated with either momentary or maintained switches, locally or remotely. A duplex outlet is provided for each delay step. A front panel screwdriver adjustment sets the delay time. A locking switch with a removable key is provided for maximum security. The PS-PRO also contains special circuitry to detect additional wiring faults such as reversed hot and neutral, missing ground or neutral, etc. One or more PS-PROs may be installed in remote locations and operated via low-voltage wiring.

PS-PRO Step-up Features:

◆ 20 Amp (2400 Watt) rating

◆ Multiple levels of protection components can safely absorb large spikes and provide highly effective RF filtering — the most comprehensive protection available.

◆ Extreme Voltage Shutdown guards against destructive wiring faults

◆ Critical functions are monitored by a “smart” microprocessor; LED status indicators report on problems

◆ Locking switch with a removable key is provided for maximum security.

◆ Heavy duty 10 foot, 12 gauge line cord

PS-PRO .................................................. 462.95
Voltage Regulators

Furman’s AR series are voltage regulators designed to protect audio, video, computer and other electronic equipment from problems caused by AC line voltage irregularities—sags, brownouts, or overvoltages that can cause sensitive digital equipment to malfunction, or, in extreme cases, to sustain damage.

They provide a steady, stable 120v AC output. The 15 amp AR-1215, 20-amp AR-1220 and 30-amp AR-1230 accept any voltage from 97v to 141v and transform it to a constant 120V, ±5V. (Voltages beyond that range may also be converted to usable levels, depending on how far out of range they are).

The AR Series has been designed specifically with the unique needs of audio and video in mind. Its technology differs from that of computer-oriented voltage regulators in many important ways. For example they don’t use a ferro-resonant transformer, which would be heavy and bulky, radiate a large magnetic field, and be too frequency-sensitive to be usable with generators. Instead, they use a design based on an eight-tap toroidal autoformer. The toroidal design assures minimal leakage of stray magnetic fields.

- Their circuitry monitors the incoming line voltage with each cycle, comparing it to an extremely precise voltage reference, accurate to ±0.15%. If a voltage fluctuation requires that a different tap be selected, the new tap is electronically switched exactly at the zero-crossing, to avoid distorting the AC waveform. (Some commercial voltage regulators using multi-tapped transformers switch taps at uncontrolled times, thereby creating voltage spikes, often creating clicks that can leak into the audio.) Since the AR Series design is not sensitive to small errors in line frequency, they are ideal for using with generators.

- They offer power conditioning that is truly in class by itself, thanks to the quantity, quality and configuration of the over-voltage suppression devices used. These include MOV’s and high voltage inductors and capacitors. This unique combination can safely divert large spikes as well as filter audible high frequency noise.

- For added safety and protection, the Extreme Voltage Shutdown function senses dangerously high or low voltages and shuts down the output before any damage is done. The output remains off until the overvoltage or undervoltage is removed, with an LED indicating the shutdown condition. This invaluable feature protects your equipment from accidental connection to incorrect line voltages (for example, 220v when 120v is expected).

AR-1215

The AR-1215 has eight 15 Amp outlets on the rear panel, and one on the front panel. All outlets are regulated, spike-suppressed, and filtered against RFI with a 3-pole filter. There are no controls except the circuit breaker/on-off switch. A bar-graph meter comprised of 10 LED’s indicates input voltage, while another LED indicates “In Regulation” status (i.e., that the output voltage is within ±5V of 120V.) Housed in a compact, single-space rack-mount chassis, 1.75” high and 8” deep and weighs only 12 lbs..................459.95

AR-1220 Step-up Features

The AR-1220 has twelve 20 Amp outlets on the rear panel, and two 15 Amps on the front panel. Housed in a two-space rack-mount chassis, 3.5” high and 17” deep, weighs 35 lbs.........929.95

AR-1230 and AR-PRO Step-up Features

The AR-1230 has one 30A, NEMA L14-30P twistlock inlet, one 30A NEMA L14-30R twistlock outlet, and six Edison outlets on the rear panel, plus two Edison outlets on the front panel. Housed in a compact, two-space rackmount chassis, 3.5” high and 17” deep, 39 lbs. Similarly, the 30 Amp AR-PRO delivers 120v AC ±4% anywhere in the world within ranges of 88 to 134 and 170 to 264v AC, 50/60 Hz. It has an input voltmeter barmeter with 21 LEDs. Monitor indicates low, normal, or high output voltage. 14 regulated, 20A conditioned outlets (2 front, 12 rear). It has a provision for remote turn-on/off; multiple units may be turned on simultaneously or in a delayed sequence. Weighs 50 lbs. AR-1230.........................1399.95 AR-PRO..........................1799.95
Balanced Power
Designed for the most critical, ultra-low-noise installations, the IT-1220 and IT-1230 supply 20 or 30 amps of balanced AC power to recording studios, video or film production facilities, broadcast stations, etc. They drastically reduce hum and buzz caused both by ground currents from power supply filtering and by radiation from supply cables into sensitive lines, particularly low level and unbalanced sources. (They have also been reported to noticeably improve dynamic range and sonic clarity. At the heart of these units is a specially wound and shielded toroidal isolation transformer with a center-tapped secondary. These precision transformers, in conjunction with wideband EMI/RFI filters and output spike protection, make these units excellent power conditioning solutions for any situation.

◆ The IT 1220 rear panels provide 12 outlets, the front panel provides two. The IT-1230 rear provides ten 20A outlets, one 30A twistlock outlet and one 30-amp twistlock inlet. The front provides two 15A outlets. All outlets are balanced and Ground Fault Circuit Interrupter protected.
◆ An IT-1220 can be installed in minutes without an electrician, the IT-1230 however, may require an electrician.
◆ Exclusive “Soft Start” circuit prevents the large inrush surge currents and spikes that would otherwise occur at turn-on and turn-off with such large transformers.
◆ Accurate, self-checking AC voltmeter measures not only normal voltages, but also flashes eye-catching special pattern alerts for off-scale but not extreme conditions (80-90 or 130-140 volts).
◆ They provide clean and completely safe power – there is no need to “lift grounds” or compromise the integrity of safety ground wires to achieve hum reduction.
◆ Extreme Voltage Shutdown circuit shuts down the unit if exposed to dangerous voltages (like accidental connection to 220v).
◆ The IT-1220 and IT-1230 occupy three rack spaces (5.25” high).

IT-1220 .....................................................................................................................1099.95  IT-1230 .....................................................................................................................1299.95

IT-REFERENCE
Discrete Symmetrical AC Power Source
The ultimate expression in AC power filtering, the IT-Reference provides transparent, ultra-low noise AC power for the most discriminating audio/video professional.

Same features as the IT-1220 plus:
◆ Discrete 5A windings for each set of outlets. This is critical, as modern video and digital components can couple performance-degrading noise into each other, even if the filtering from the source AC is the best money can buy.
◆ 20 Amp peak power, 12 Amp continuous power
◆ 4 high current ultra low impedance outlets for power amplifiers and powered monitors
◆ 4 pairs of individually isolated, electrostatically shielded, positive contact AC outlets designed for analog and digital audio and video components

Exclusive power correction circuitry gives all power amplifiers the ability to reproduce dynamics with extreme power, speed, and clarity that will produce startling three-dimensional images.
Signal Router/Monitor

The SRM-80A provides all of the flexibility and capabilities of large format console "Monitor Section" in an easy to use 1U device. Designed to simplify mixdown and dubbing from the single stereo output from DAWs, associated computer sound cards and digital I/Os, the SRM-80A provides signal routing and monitoring for four stereo mixdown devices such as DAT machines, cassette decks, CD burners, MiniDisc recorders, as well as three sets of studio monitors and/or headphone amps. The SRM-80A also simplifies mixdown and copying between different media types. Multiple copies can all be made simultaneously between DATs, CD Burners and other devices, through use of the SRM-80A’s “Source Select” switches.

- Use one power amp to drive two speaker pairs, also accommodates one pair of self-powered speakers.
- Monitor using three different speaker pairs, at the same loudness, using exclusive "set-once" level trims.
- Speaker button "A" switches line-level for driving self-powered monitors; B and C use a high power relay to redirect your power amp output to either of the two pairs.
- Gain adjust for each speaker pair allows for equal loudness when switching between them.
- High power headphone amp for private monitoring and mix checking.
- 40-segment high resolution metering for L/R monitor outputs
- VU meter display with peak hold function
- Peak or Average response switch
- Line level can be set to -10 or +4 dBu
- Ground lift switch
- DIM button reduces level by 15 dB during interruptions — an easy way to lower the listening level temporarily without having to adjust the listening level control
- Mono Sum let you check for radio compatibility, stereo imaging, and phase problems
- Optional remote allows five push button functions (MONO, DIM, and SPEAKER SELECT) to be at the listening location.

PGP-20/PGP-60
PlugLock PRO 20 and PlugLock PRO 60 Locking Outlet Systems

The PlugLock PRO 20 and PRO60 are locking outlet systems that provide unprecedented ease, versatility and reliability for professional rack applications. Both feature rugged, all-metal construction, and include a set of Furman’s metal PlugLock clamps that securely lock any plug or wall wart into place for reliable operation. The PGP-60 comes with 12 clamps, the PGP-20 comes with 8 clamps.

Rated at 40 amps, the PGP-20 provides 14 Edison outlets (10 on one circuit, four on the other) in a chassis that is only 30” tall and can be mounted vertically in smaller racks and other locations.

The PGP-60 provides 24 Edison outlets in its 60” tall chassis, and is designed primarily for vertical mounting in equipment racks. The PGP-60 is rated at 60 amps, divided into three 20 amp circuits to provide flexibility for multiple and varying applications. The included 3/4” nipple mount allows an electrical junction box to be mounted either at the top or bottom of the PGP-60. Power sequencing relays are also available. A local circuit breaker can be easily added to each of the 20 amp circuits if necessary.

Multimedia Studio Furniture

An elegant, ergonomic workspace for the professional

- Suitable for any production or editing environment including project studios, post production editing suites, learning labs, and broadcast facilities
- Factory-assembled systems are available in either a graphite or cherrywood laminate finish
- Essential features that professionals require are built-in — no need to purchase expensive options
- Desk systems are available in two sizes: 84” and 60” wide
- Overbridges are capable of accommodating multiple 21” computer monitors as well as large program monitors
- Two pivoting speaker platforms (standard on all Edit Center overbridges) allow you to place your audio monitors at the optimum listening angle
- Two overbridge styles are available to optimize your system: one features two 4-space rack bays angled for direct viewing, while the other features an open span underneath

Edit Center with Side Racks — are available with either single or dual 12 space racks, with or without doors. Racks with factory-installed gasketed doors (plexi front and solid rear) along with internal acoustical absorptive material reduce noise escaping from the enclosure by up to 22db. The rear doors feature an ultra low-noise cooling fan, a removable filter kit for air intake, and a brush grommet at the door bottom that allows cable exit while maintaining a seal for noise and air flow.

Producer/Client Desks

Introducing an elegant producer/client desk that perfectly matches the existing Edit Center desks and complements any studio environment. Both the 60” EDS and 84” EDL models feature the new X-Brace leg system, which provides extreme stability and allows these desks to be used independently with full-circumference seating capability. EDS and EDL desks are available in an attractive marbled graphite or cherry, and can be used with Edit Center side-bay racks.
Modular Studio Furniture System

- Well suited for project or professional studios
- Modular design allows components to be used together in any combination — you configure a complete system that accommodates the way you work based on your specific requirements
- There are four desk models to choose from, each finished in high-pressure graphite laminate with sturdy steel tube legs and overbridges that can accommodate audio or video monitors
- Optional accessories include a 12RU side rack with matching optional overbridge, as well as a connecting wedge for angling a rack.

MDV-DL Desk
- 59” wide footprint provides lots of workspace
- Overbridge accommodates multiple monitors and is set 6” above the desktop — the correct height for ergonomic viewing
- Standard 28.5” desktop height
- Can be used with either the Edit Center line of isolation racks or an MDV-R12

MDV-CNR1 Corner Desk
- A one-piece overbridge is user-configurable three ways: one 4 space rackbay in center, two 4 space rackbays on sides, or middle supports justified to outside to accommodate mixers up to 32”
- Overbridge provides 7” inside height clearance
- 28.5” desktop height

MDV-CNR3 Corner Desk
- 3-piece overbridge accommodates mixers with tall meter bridges
- The overbridge center section can be adjusted to 11½” inside height clearance, or 16½” inside height clearance
- Center section provides 30” inside width clearance
- 28.5” desktop height

MDV-DSK Straight Desk
- Overbridge can be user-configured as two 4 space rackbays, or remove center section to accommodate mixers up to 39” wide
- Overbridge provides 7” inside height clearance
- 28.5” desktop height
MDV-R12 Side Rack
- Add to any MDV desk for additional rackmount capacity and desktop space
- 12 racker spaces
- Accepts optional casters
- 26.5 x 23 x 28.5˝ (H x W x D) $220.00

MDV-OB4 Overbridge
- Mounts on top of the MDV-R12 rack
- Provides additional 4 racker spaces
- When placed beside any MDV desk, a contiguous surface is maintained
- 7.875 x 23 x 15˝ (H x W x D) $125.00

MDV-W Connecting Wedge
- Connect any MDV component at an ergonomic 35° angle
- Mounting hardware is included $95.00

MDV-CK Caster Kit
- Includes four wheels, two metal caster saddles and mounting hardware. Fits MDV-R12 racks ..................................................72.00

SPEAKER STANDS
Although designed as an accessory for the Edit Center system, these elegant speaker stands can easily integrate into any production environment including the multiDesk Video System.

- 36˝ high speaker stands that are optimized to accommodate near and mid-field audio monitors in video and audio production and editing facilities
- High-mass all wood construction for resonance damping
- Includes carpet spikes and rubber feet to accommodate all floor surfaces
- Unique dual cable channels separate audio and AC cables (when using powered monitors), and include a wide molded cover
- 15˝ x 15˝ platforms and bases are reversible to show either a graphite or cherry wood laminate surface
- Elegant curved supports are finished in a durable black texture-lac £300.00 a pair EC-SPK36

Cable Management Kits
These convenient cable management kits effectively organize the mass of cable typically found in digital video and audio systems. Kit consists of spiral wrap to contain cables, and flat panels with tie-points to manage cable under-desktops.

CM-L: Cable management kit for 84˝ desk system, includes 8 cable managers and 20˝ cable wrap ........................................70.00
CM-S: Cable management kit for 60˝ desk system, includes 4 cable managers and 20˝ cable wrap ........................................60.00

OAK EQUIPMENT RACKS

OBRK Series 18” Deep Racks
- Attractive 3/4” oak laminate rack blends natural elegance with value-oriented engineering
- Assembles easily with the included concealed 1/4-turn fasteners and threaded inserts
- Factory-installed 11-gauge, 10-32 threaded rackrail
- Available in 8, 12, 16 and 20 rack spaces

OSR Series Sloped Racks
- The same construction as the OBRK series with a gently sloped rackface that facilitates easy equipment viewing
- Included casters enhance mobility
- Available with 16 and 24 rack spaces

- SL-18 Computer Chassis Slide Kit
  - Allows you to slide rackmount computer chassis out for servicing
  - 18˝ extension length
  - Sold in pairs...

- RM-MM Computer Monitor Rackmount
  - Adjustable clamps accommodate most 14” to 17” monitors
  - Clear plexiglass window protects screen
  - Hinged front door provides access to controls
  - 15 7/8” (9 space)

- RM-KB Rackmount Computer Keyboard
  - Includes high-quality 101-key AT style keyboard, trackball and padded wrist rests
  - Articulating arm provides effective cable management
  - Complete with 12’ keyboard and trackball cables, including PS/2 connectors and a DB9 serial adaptor.
  - Hinged cable manager in rear
  - Occupies 1.75” (1 space)

- KB-SS Keyboard Sliding Shelf
  - Rackmount shelf occupies 1 1/8” (1 space)
  - Accommodates most standard small-pattern keyboards
  - Articulating arm provides effective cable management
  - Durable black powder coat finish

$145.00
Install any component (up to 18¾” wide) in a standard 19” enclosure without making modifications
- Custom cut for a perfect fit and no gaps
- Over 6,000 component specifications are available in Middle Atlantic's database
- Racks include rear brackets, have a ventilated bottom, and assemble easily in minutes
- Bottom depths of 11¾”, 14, 15½”, 17½”, or 20¾” are available
- Individual faceplates are also available in a black textured finish (SFACE), or a black brushed anodized finish (AFACE)
- Optional RSH clamps secure components to the shelf - rubber lining maintains a tight grip without scratching

RSH-4S Black textured anodized finish .................................... 120.00
RSH-4A Black brushed anodized finish .................................... 120.00

Ordering Instructions
- To see if the component you want to rackmount is available in Middle Atlantic's database of over 6000 models, simply go to www.middleatlantic.com and search their custom Rack Finder utility or, call us up at B&H and we'll be more than happy to check for you
- In the unlikely event that your component is not in the custom rack database, you can fax the measurements to Middle Atlantic

W = Faceplate width
H = Faceplate height (not including the height of the feet)
F = Height of the feet only
** W, H and F dimensions must be within 1/32”. Depth must be within 1/8”

Wide Unit Shelf System
Accommodating components too wide to fit the 17¾” inside width of standard rackshelves, these shelf systems fit units up to 22½” wide, and either bolt into millwork or to the mounting angles of standard rackrail. Occupies three rackspaces, the WUSS system comes complete with a pair of ears, a bottom, and appropriate assembly hardware.

WUSS11.5  11.5” depth ........................................... 54.00
WUSS15.5  15.5” depth ........................................... 58.00
WUSS17.5  15.5” depth ........................................... 60.00
WUSS20.5  20.5” depth ........................................... 65.00

Trim Strips
As a final aesthetic complement to any installation, finishing trim strips offer a quick, clean, and effective method of covering rack screws once the job is complete. Each channel-shaped trim strip measures 45 spaces (78½” long), and features internal grooves that fit into the supplied snap washers. Offered in brushed black anodized or black powdercoat finish, trim strips are cut easily with a hacksaw. A cutting service is also available. Included decorative caps trim the ends, if required. Sold individually.

Front-Loading Media Holders

Store DATs, CDs, DVDs, VHS tapes, cassettes, LPs and other recorded media in our rackmount media holders. Partitioned to prevent the contents from tipping, each model features a 16-gauge flanged aluminum face and a brushed, black anodized finish. Selected models are available with a textured black powder coat. All stored media protrudes 3/8˝ to allow quick retrieval.

UD Series Drawers

Drawer contents always remain inside with the UD series fully enclosed rackmountable utility drawers. Full extension ball bearing slides smoothly extend a full 14˝ to reveal inside dimensions measuring 15 1/2˝ wide by 14 1/2˝ deep. Storage height is only 1/2 less than the actual racking height. Each model comes with a face mounted drawer pull. A user-installed latch and keylock are optionally available. Black powder coat finish.

**WL-60 Magnetic Work Light**

Designed for use when installing and servicing equipment, the WL-60 provides convenient illumination in rack enclosure interiors. The unit features a strong magnetic base that attaches to any metal surface, and a quadruple-jointed support arm makes it easy to aim the light, which stays where you put it. The WL-60 includes a 60 watt “rough-service” bulb, aluminum shade with on/off switch, and an ultra-long 18’ line cord that eliminates the need for an extension cord. WL-60 ........................................... 58.00

**Acoustical Panels**

Acoustic wall panels provide effective acoustic treatment for problem rooms. They are faced with 100% polyester fabric, which are easy to clean, and will not rip, tear, or crack like foam products. They feature resin-hardened edges which are beveled for aesthetics. In addition, due to superior materials used, AP series 2” thick panels offer the same sound absorbing rating as 4” thick panels. Acoustic panels are available in 4 sizes and two attractive colors, all 2” thick.

**The Claw**

The unique dual-size “claw” configuration of this versatile wall-mount cable hanger provides efficient storage for all cables large and small. Convenient side trays hold small items. 16” wide x 3½” deep. Black powder coat finish ........................................... 14.95

**MD-KB Computer Keyboard Tray**

Designed for under-desk use, the MD-KB computer keyboard tray is equipped with a padded wrist support. The unit’s built-in mouse tray can be pulled out to either the left or right side and retracts out-of-the-way when not in use. All mounting hardware included. (Does not work with MDV-CNR1 or MDV-CNR3) ........................................... 99.95

**High Density 24-Outlet 15 Amp Slim Power Strip**

High-density power strip boasts a unique feature in that while containing 24 power outlets, 11 of these outlets have been spaced to accommodate plug-in power supplies, resulting in no wasted outlets! Measuring 1¼” deep by 1¼” wide, this power strip provides maximum usability while taking up a minimum of space. Ships with 10’ power cord terminated with a NEMA 5-15P plug, 15 amp circuit breaker and mounting system PD-2415SC-NS................................. 96.00
Stainless Steel Speaker Mounts

For over 25 years OmniMount has been an innovator in the field of audio mounts. Today, the OmniMount name is synonymous with superior quality and has become the choice of professional installers and the brand most recommended by speaker manufacturers. Their mounts offer numerous advantages, including durable ergonomic designs, ease of installation and omni-directional positioning. OmniMount’s Stainless Steel series is a unique, top-of-the-line speaker mounting solution assembly, tops for functionality, safety, ease of installation, appearance, and multi-angle usage.

FEATURES

- Built with stainless steel hardware for strength, durability, and quality. Perfect for outdoor as well as indoor use
- Critical areas are polymer injected for less resonance, producing a more precise range of sounds
- All-inclusive combination of threads and/or mounting plates is designed to fit any model of speaker
- OmniMounts patented ball joint rotates and holds in any direction making it the most flexible solution
- Unique black, white or gray braided sheath included to hide steel finish if desired

5.0 Wall/Ceiling

- Contains both wall and ceiling mount options
- Drill bit and all necessary mounting hardware included
- Supports speaker up to 5 lbs
- Stainless Steel shaft with 4mm and 5mm thread
- Available in Black, White, or Grey........199.95

10.0 Wall/10.0 Ceiling

- Sold separately as wall or ceiling mount, the 10.0 mounts are designed for bookshelf-size speakers
- Drill bit and all necessary mounting hardware included
- Supports speakers up to 10 lbs
- Stainless Steel shaft with 1/4˝-20 thread
- Available in Black or White

20.0 Wall/20.0 Ceiling

- Sold separately as wall or ceiling mount
- Stainless Steel shafts and all necessary hardware included.
- Supports speakers up to 20 lbs.
- Available in Black or White .................319.95

30.0 Wall/30.0 Ceiling

- Sold separately as wall or ceiling mount
- Unique ball and clamp assembly
- Supports speakers up to 30 lbs
- Available in WA, WB, CA, & STMP configurations
- 1/2˝-20 thread pattern
- Available in black or white

60.0 Wall/60.0 Ceiling

- Sold separately as wall or ceiling mount
- Includes all necessary mounting hardware
- Supports speakers up to 60 lbs.
- Available in WA, WB, CA, & STMP configurations
- 5/8˝-18 thread pattern
- Available in black or white

120.0 Wall/120.0 Ceiling

- Sold separately as wall or ceiling mount
- Includes all necessary mounting hardware
- Supports speaker up to 120 lbs
- Available in WA, WB, CA, & STMP configurations
- 1/2˝-20 thread pattern
- Available in black or white
**QUIK Lok**

**WS-500**

**All-Steel Modular Workstation System**

The arc-welded, all-steel WS-500 is ideal both for the musician who needs a versatile, fully adjustable work place, as well as for home recording, project studios and schools. It features height adjustable shelves and tiers, and is capable of securely holding plenty of audio and computer equipment. All shelves are supplied with soft rubberized cushions that hold the gear firmly in place. Assembly requires no tools.  

**Height Range**........24.25 to 32.5”  **Depth Range**............26.8 to 31.3”  **Width Range**......................29.2 to 46.4”  **Weight**............................64 lb.

---

**COMPONENTS**

**WS-550**  
**Height Adjustable Base Unit**

Used as the base for the WS-500 workstation. All legs are independently height adjustable and can be swung into position to conform to any keyboard, synthesizer or mixer.

- **Height Range**........24.25 to 32.5”  
- **Width Range**...........29.2 to 46.4”  
- **Depth Range**............17.3 to 27.4”  
- **Folded Width**............29.2”  
- **Folded Height**............24.6”  
- **Frame Tubing Size**........30mm  
- **Weight Capacity**..........250 lb.  
- **Weight**........................18 lb.

**WS-551 / WS-552**  
**Utility Shelves**

Solid metal, height adjustable, utility shelf can be used for holding mixers, drum machines or multi-track recorders, etc. Shelves can be rotated 360° for exact positioning.

- **Shelf Depth**........11.8” (WS-551); 9.8” (WS-552)  
- **Weight Capacity**.................40 lb.  
- **Shelf Width**........11.8” (WS-551); 19.6” (WS-552)  
- **Weight**........4.4 lb. (WS-551); 5.5 lb. (WS-552)  
- **Height Adjustment Range**, measured from main tier to top of shelf.................0 to 8”

**WS-553**  
**Width Adjustable, 90° Fixed-Angle Speaker Shelves**

Arc-welded steel construction with rubber padding. Height-adjustable anywhere along workstation spine with a rubber-coated attaching clamp that won’t scratch the stand.

- **Shelf Depth**...............11.8”  
- **Shelf Width**...............11.8”  
- **Weight Capacity**...............60 lb. (30 lb. each shelf)  
- **Weight**..................9 lb.  
- **Width Adjustment Range**, measured from outside edge of shelves........26.4” to 43.3”

### KEYBOARD STANDS

**Keyboard X-Stands with the Quik Lok Locking Mechanism**

Keyboard stands that use the “Original” locking disc are by far the most popular among the most demanding professionals. This battle-tested disc system has been accepted as the industry standard since 1978. Musicians around the world have relied upon this line of stands for their durability, ease of use and dependability.

**Tiers**

Second Tiers offer 5-position height adjustment and allow a QLX-4 Mic boom or QLX-5 music holder to be added.

**QLX-2 Height Adjustable, Fixed-Angle Second Tier** - 90° fixed angle allows top keyboard to be moved closer or further away from user

**QLX-3 Height, Tilt and Angle Adjustable Second Tier** - with four-position angle adjustment

**QLX-4 Fully Adjustable Telescopic Mic Boom** - swivels to any position, five position height adjustments, extends to 40.5˝

**QLX-5 Fully Adjustable Sheet Music Holder** - Five position height adjustment. Folds easily for transport

**QLX-662 Large Metal Shelf** - Perforated metal shelf with reinforced steel bracing converts any full-sized X stand or second tier into a convenient table for holding drum machines, multi-track recorders or any kind of table top equipment. The QLX-662 can be used on the following X stands and tiers: T-10, T-20, T-14, QLX-11, QLX-21, QLX-2, QLX-606, QLX-609, QLX-646 & BS-619

The simplest of designs, these knock down economy racks are black oak laminate over 5/8˝ medium density fiberboard. They provide a very economical yet attractive means for rack mounting audio gear in home studios or smaller installations. Assembly hardware and 11-gauge steel rack rail are provided. An optional swivel base (S-10) allows for 360° rotation for either the ER-8 or ERS-10. Perfect for use on table or desktop. Furniture grade nylon hooded casters are optional on all models.

ER SLANTED ECONOMY RACKS

These economy racks are constructed with heavy duty 3/4˝ medium density fiberboard, attractively finished with a black oak laminate. All three units are shipped knocked down and assemble in minutes with the hardware kit provided. Rack rail included is of 11-gauge cold rolled steel. Furniture grade casters are standard equipment on these slant racks. A great combination of form and function.

RAXXESS

CONFIG-U-RAXX

Modular Workstation Furniture System

The Config-U-Raxx studio furniture system from Raxxess is a completely modular workstation designed to compliment the modern studio environment. The Config-U-Raxx line consists of an array of desktop surfaces, side wings and shelves, as well as add-ons such as doors and keyboard trays. Each component can be easily interfaced with any other component in the system, allowing for an almost endless variety of configurations. Future expansion of the system will be just as easy.

A wide range of components allows a system to be configured to suit any room size and shape, while the new height adjustment system allows any desktop surface to be adjusted from 26” to 31” above the floor.

These features make the Config-U-Raxx system just as comfortable for the MIDI composer as it is for the audio engineer.

The Config-U-Raxx line consists of an array of desktop surfaces, side wings and shelves, as well as add-ons such as doors and keyboard trays. Each component can be easily interfaced with any other component in the system, allowing for an almost endless variety of configurations. Future expansion of the system will be just as easy.

Supported by an all steel substructure, this furniture is designed to provide years of trouble-free service and rock-solid performance.

The Config-U-Raxx system is available in maple and ebony fleck finishes with silver T-mold trim. All steel surfaces are coated with an attractive silver hammer tone finish.

**FEATURES**

- All steel substructure
- Metal portions finished with an attractive Silver “Hammertone” finish
- Steel side wing racks available in your choice of 2 heights:
  - 12 rack spaces - 26” height
  - 14 rack spaces - 30” height
- Maple or Ebony side wing racks available in 14 rack spaces
- All center desks are adjustable in height to fit either height side wings
- The Config-U-Raxx line consists of an array of desktop surfaces, side wings and shelves, as well as add-ons such as doors and keyboard trays. Each component can be easily interfaced with any other component in the system, allowing for an almost endless variety of configurations. Future expansion of the system will be just as easy.
Center Desks
Center Desks are the “centerpiece” of your Config-U-Raxx system. They are available in maple or ebony fleck with silver trim and are height adjustable from 26”-30” for use with 12U or 14U Side Wings (sold separately). Start by choosing the center desk that best suits your needs.

**Etude**

Perfect as a studio keyboard workstation or learning center, the Etude's side supports are constructed of 1” by 2” 16-gauge tubular steel. The fabricated bottom cross member is 1½” by 6”. The generous 55” wide and 16” deep keyboard shelf supports an 88-note keyboard. The contoured upper shelf, which also measures 55 x 16”, can easily accommodate audio and video monitors. A computer keyboard shelf can be mounted to either of the two standard shelves using the hardware provided into pre-drilled holes. Both the keyboard shelf and the optional printer/CPU shelf (not shown) that mounts to the lower portion of the frame are adjustable in 1” increments up to 5”.

**RMPC-4ATX Computer Chassis**

- 4 space chassis fits any ATX style motherboard
- 20.3” deep with 2” removable handles
- Supplied with a 300w ATX power supply
- 7 Expansion Slots with Card Braces:
  - Includes 2 internal and 1 external 3.5” drive bays, plus 3 external 5.25” bays

![RMPC-4ATX closed]

Front Panel Features:

- Switches for power, reset and alarm
- Power and drive activity LED indicators
- Alarms for fan and temperature
- Hinged locking plate for security
- AT style “plug and play” keyboard connector
- 4.5” filtered intake fan keeps components cool and dust-free.

![RMPC-4ATX open]

**IsoRaxx**

Recent developments in recording technology allow today's audio professionals and enthusiasts unprecedented control over the quality of their work. But along with the benefits provided by these great new products comes additional noise created by fans and hard disk drives. The IsoRaxx is the solution to mechanical noise problems in your studio.

- Keeps equipment safe and quiet — reduces fan and hard drive noise by an average of 21dB
- Electrostatic filter intake keeps dust out
- Equipment is easily visible through the clear lexan panel in the front door
- Separate passages for signal, AC and computer cables
- Dual variable-speed fans
- Key-lockable rear door with removable hinges ease equipment installation and maintenance
- Constructed of 3/4” thermally fused melamine
- Comes assembled; they are available in ebony fleck or maple finishes; casters included

**Optional Accessories**

- SFD Studio Furniture Rack Door - For the Lonestar, Golden Gate, Big Apple and Big Easy. Features matching ebony fleck melamine with solid oak trim, a clear lexan door and flush mount hinge system. Keylock included. Can be set for left or right swing and will retrofit to existing furniture systems. $119.95
- ERK-4 Four-space elite rack, sits flush on all shelves $104.95
- CBS Center bridge support for heavier loads $39.95
- KBS-1 28” Keyboard & Mouse Shelf For all workstations. Finished in matching ebony fleck while the front edge is trimmed in solid oak. $99.95
- Studio Furniture Casters Fits all workstations except the Daytona $31.95

**Order & Info.** (212) 444-5088 • FAX: (212) 239-7770 (800) 947-7008 1-800-875-6951 • www.bhphotovideo.com
**UTS Utility Shelves**
16-gauge, cold rolled steel shelves that allow the rackmounting of otherwise non-rackmountable equipment. One-piece construction. Finished in durable black baked enamel.

- **UTS-1** 11” x 1.75” (DxW). 1 space .................................................. $27.95
- **UTS-2** 14.50” x 3.50” (DxW). 2 space ........................................... $35.95
- **UTS-3** 14.50” x 5.25” (DxW). 3 space ........................................... $39.95

**UNS Universal Rack Shelf**
One space, 14-gauge shelf has a hole-pattern in the bottom for mounting a variety of half-rack equipment. Comes with two each 6/32, 8/32, and 10/32 machine screws. 10 x 1.75” (DxW). Finished in durable black baked enamel. ........................................... $18.95

**SLE Economy Sliding Shelf**
Supports equipment up to 35 lbs. Ears attached to the rear frame allow the unit to be secured to the back of any enclosed rack. 12” sliders with nylon roller bearings allow a smooth sliding movement. Sliders provide positive lockout, for the black laminated wood shelf .................................................. $51.95

**SLS Sliding Shelf**
Extra heavy duty shelf occupies just one rack space. Supports up to 100 lbs. with a safety factor of 100% if properly secured. The 14 gauge steel shelf is finished in black baked enamel. Extra heavy-duty ball bearing sliders extend a full 14” for a usable surface area of 16 x 14” (WxD), and are equipped with a mechanism that locks the shelf in the out position. Rear rack rail provided .................................................. $125.95

**SLS 1.5 Sliding Shelf**
Steel shelf measuring 17.50 x 14.5” (WxD) locks both in and out. Extending on 14”, full extension, ball bearing sliders and occupying one and a half rack spaces. Supported by an all steel frame and extension ears for rear support.............................................. $97.95

**TR Trap Shelf**
Constructed of 16-gauge cold rolled steel, it is finished in durable black baked enamel. Comes complete with 2 fully adjustable hold down bars that “trap” equipment. Bars are padded to protect the finish on your gear. Returns on the front and rear edges of shelf provide additional lateral strength.

- **TR-2** 14.25 x 17.25 x 3.50” (DxWxH). 2 space trap .............................. $38.95
- **TR-3** 14.25 x 17.25 x 5.25” (DxWxH). 3 space trap .............................. $44.95
- **TR-4** 14.25 x 17.25 x 7” (DxWxH). 4 space trap .............................. $48.95

**UTVS-3 Vented Shelf**
A 16-gauge steel shelf that is finished in black powder coat, handles up to 60 lbs. of equipment and occupies 3 rack spaces. Slotted bottom allows for ventilation and the slotted rear return allows for cable management.

- **UTVS-3-14** 3 space, 14” deep ........................................................................ $38.95
- **UTVS-3-18** 3 space, 18” deep ........................................................................ $42.95

**ADS-3 Adjustable Shelf**
This three space, 16-gauge steel shelf has three position adjustable ears that allows you to move equipment from flush with rack rail to 8” forward of rail. Its dimensions are 19 x 17 x 5.25” (WxDxH) ........................................................................ $44.95

**VCS-2 Cantilvered Shelf**
Occupying two rack spaces, this 16-gauge steel shelf allows you to bring equipment well forward of the rack face. Vented for air circulation, this shelf is 18” deep and will support up to 50 lbs. It features built-in cable management and is finished in black powder coat ........................................................................ $45.95

**WMS Wall-Mount Shelf**
Provides a secure, yet inexpensive way to mount non-rack mountable equipment to a wall. With a vented bottom for air circulation and conduit knockouts for cable passage, this 16-gauge steel, fully welded unit has a 200 pound capacity. Finished in rugged black powder coat, it can also be used to house the ER or ERK series of racks ........................................................................ $64.95
ESD - Economy Sliding Drawer
16-gauge steel, fully enclosed construction with a black semi-gloss finish. The 12” cabinet grade slides allow for full extension. The rackmount drawers feature a laser cut knockout on the front panel for adding an optional key lock, as well as a laser cut knockout in the rear for cable passage if needed.

ESD-2 2 space .......... 79.95  ESD-3 3 space .......... 81.95  ESD-4 4 space .......... 89.95

SDR - Sliding Rack Drawer
Heavy duty sliding rack drawer available in 2, 3 or 4 spaces. Cabinet grade 14” full extension sliders provide smooth action. Features include a large flush mount latch, a 13 gauge drawer front and black textured enamel finish. A laser cut knockout on the front panel allows you to add an optional lock, while the laser cut knockout in the rear allows cable passage should you want to store an electronic device in the drawer.

SDR-2 2 space .......... 90.95  SDR-3 3 space .......... 100.95  SDR-4 4 space .......... 111.95

Lock for ESD and SDR Drawers
The ESD and SDR feature laser cut knockouts on the front panel for adding a key lock at any time. (LOCK) .......... 9.95

PB - Project Box
These project boxes are of two piece, cold rolled steel construction. Perfect for the do-it-yourselfer. Black baked enamel finish. Available in one or two space configuration. Front to back measures 6”.

PB-1 1 space .......... 29.95  PB-2 2 space .......... 32.95

RKV - Rack Vault
Secured storage of otherwise loose equipment, tools, tapes, CD’s, papers and other personal items; all steel construction; flush mount latch and keyed lock. Perfect for any audio rack, in the studio, on the road or at the installation; black baked enamel finish.

RKV-3 3 spaces. 17 x 9 x 5” (LWH) .......... 51.95  RKV-4 4 spaces. 17 x 9 x 7” (LWH) .......... 58.95

Mounting Bracket for Fostex 6301B Speakers
A kit for rackmounting a pair of the Fostex 6301B speakers. Finished in black powder coat .......... 83.95

Media Holders
Convenient way to store compact discs, DAT tapes, or audio cassettes in you rack.

RDT 3 space. Holds 27 DAT tapes .......... 49.95  RCH 3 space. Holds 20 cassettes .......... 51.95  RCD 4 space. Holds 40 CDs .......... 58.95

**Custom Mounting Kits for Consumer A/V Components**

An easy and attractive solution for rack mounting non-rackmountable components. Perfect for custom home installations, office suites or any other location where aesthetics are as important as sound. These kits will give your installation the “custom” look that clients love. Each kit includes the aluminum faceplate with anodized or textured paint finish, cold rolled steel rack shelf, and rear braces that prevent shifting. Optional clamping bars are available when maximum stability is required. Call today for more information.
**Cable Depot** (CBLD)
16-gauge steel cable reorganizer keeps cabling off the floor, out of the way and kink-free. Fourteen fingers extend to hold up to forty cables. Maximum cable diameter is .25” .......................................................... 11.95

**Headphone Hangers**
A convenient way to hang headphones. The HH-1 comes straight out of the rack while the HH-2 projects out at a right angle, taking the place of any rack screw already in your rack. Simply screw it in until it is in the desired position and tighten the nut.

HH-1 Straight headphone hanger ........................................................ 6.95
HH-2 Right angle headphone hanger .................................................. 6.95

**Button Mount Utility Shelf** (RB-UTS)
16 gauge cold rolled steel utility shelf that mounts easily to rack buttons and removes just as easily. Flat black powder coat finish................... 28.95

**Button Mount Tool Rack** (RB-TC)
Convenient way to keep tools at hand when working on rack or gear. 16 gauge cold rolled steel tool rack mounts conveniently to buttons. Finished in black texture powder coat finish...................................... 27.95

**Button Mount Cup Holder** (RB-CH)
Keep your drink close at hand. 16 gauge cold rolled steel with black textured finish................................................................. 19.95

**Button Mount Guitar Holder** (RB-GH)
Button mount guitar holder keeps your guitar where you need it when not being played. Padded to eliminate marring the finish. Removes easily and stores in small spaces................................................................ 17.95

**Console Lamp with BNC Connector** (CL-1H)
A high-powered 12 volt, hooded mixing console lamp that illuminates the mixer and enhances isolation in low light environments. 12” sturdy goose neck, BNC connector, and black matte finish .............. 17.95

**Accessory Riser** (AR-5)
A handy little device that mounts under an amplifier handle or on a mic stand. It can act as a third hand or save valuable rack space. Perfect for tuners or other small devices. 3 x 5 x 5” (HxDxW) ....................... 11.95

Sorbotech Isolation Barrier (SORBO)
Vibro acoustic damping barrier for six rack spaces of gear, a proven shock absorber and electrical isolator. Kit includes rack rail barrier, shoulder washers and copper braided grounding strip......Call

Rack Mount Power Distribution
The PD-800 is an attractive, high-quality and economical rack mount power distribution solution. The PD-800L features pullout lights with an on/off switch and dimmer control. Both the PD-800L and the PD-800 feature a heavy-duty 12´ AC cable and 9 unevenly placed outlets, so you don't have to give up an extra outlet each time you plug in a wall-wart.

◆ Long (12´), 14-gauge AC cord
◆ Nine unevenly spaced outlets conveniently accept wall warts
◆ Front mounted circuit breaker
◆ Spike and surge protection
◆ 15 amp rating  ETL approved
◆ RFI and EMI surge protection on both sides of the power line
◆ 14-gauge cold rolled steel faceplate with durable powder coat finish

PD-800 Rack Mount Power Distribution..............................51.95
PD-800L Rack Mount Power Distribution with pullout lights, on/off switch and dimmer control .................................84.95

SC-6 - Low-Voltage Sequencing Controller

Allows remote sequencing of up to six AC circuits. Using standard CAT-5 cable or terminal strips (12 or 24V), the user can send relay control messages to our PM series power modules. Jumper switches inside each module allow you to assign a circuit value to each module. A trim-pot on the SC-6 allows you to adjust the power on/power off delay time. Four SC-6 units can work in parallel or series. This will allow you to daisy chain multiple sets of sequenced circuits for a cascading array of delayed power-on circuits.

The PM-1 modules are available in both Modular Power Strip and stand-alone versions with your choice of CAT-5 or terminal strip connectors.

A wall-mounted remote on/off switch (SC-6RS) is available for remote activation of the SC-6.

- UL listed power supply
- Connects to other Raxxess power sequencing products CAT-5 cable
- Up to four units may be connected, allowing up to 24 sequence steps
- 24VDC terminal strips provide to interface with existing power products
- Dry-contact closure terminals for remote power sequencing

SC-6 Low Voltage Sequencing Controller ........................................349.95
SC-6RS Wall switch for SC-6/SPD-6 remote control ....................45.95
SC-6RSK Key switch for SC-6/SPD-6 remote control..................51.95

---

**MPS - Modular Power Strip**

Available in just about any configuration to meet any power distribution/sequencing needs. The MPS Modular Power Strips can be ordered in an almost infinite variety of configurations, including current levels, receptacle type, remote sequencing modules, color-coded pig tails, etc.

- 32.5” (7 devices) or 64” (14 devices)
- 1 to 6 individual circuits
- Mounting plates for 1, 2, 3, 4 or 6 devices
- Choice of receptacles - Edison 15 or 20 amps, TT-30, L5-30, Isolated Ground, IEC 320, Hospital Grade
- 20 and 30 amp sequencing power modules available for MPS with TT-30, L5-30 and duplex receptacles.

MPS-32 32” Holds 7 receptacles...............................................Call
MPS-64 64” Holds 14 receptacles..............................................Call

**LPPS - Low Profile Power Strip**

Available in three sizes with 6, 9, or 12 Edison duplex receptacles in your choice of 15 or 20 amp versions. Up to 3 independent circuits.

- Three lengths available - 34” (6 duplex Edison), 46.5” (9 Duplex Edison) or 59” (12 duplex Edison)
- 1 circuit standard - 2 or 3 optional
- Available in 15 or 20 amp versions

**Converta Racks**

Maximizes rack storage in a minimum of vertical space. Ideal for the DJ or musician who wants to get on and off the job as fast as he can.

- Removable top cover exposes 10 or 12 rack spaces that can be tilted to any of 8 positions from zero to 45°
- Available with 6 or 10 vertical rack spaces
- Removable rear cover provides easy access for connecting cables
- Rugged plywood construction
- Internally braced
- Heavy-duty butterfly latches, releasable hinges and nickel-plated corners
- Rugged, gray carpeted exterior

**Also Available — Recessed Converta Racks**

Includes recessed spring-loaded handles and latches, black carpet covering and heavy-duty metal corners.

**Elite Converta Racks**

The functionality of Converta Racks in a semi-portable furniture style cabinet. Perfect for houses of worship, schools, corporate meeting rooms or any venue where A/V equipment must suit the decor.

- 10 or 16 vertical rack spaces in the lower section
- 10 rack spaces on top anchored by a ratchet system that can be tilted to any of 8 positions from zero to 45°
- Constructed of 3/4” fused melamine
- Locking, smoked lexan front door provides security and visibility
- Heavy-duty key-lockable panel covers the mixer section, retracts on sturdy cabinet sliders and lays flat against the rear of the rack
- Locking rear door with breakaway hinges allows easy equipment installation and maintenance
- Includes furniture-grade hooded casters
- Passages in the bottom of the rack allow for easy cable management
- All hardware is brass plated to compliment the cherry finish
- Ships assembled via common carrier only

Gangable Audio Rack (GAR)
- Fully welded gangable rack, constructed of 12-gauge (top and bottom) and 14-gauge (side posts) cold rolled steel
- Available in 2 depths, for equipment 22.50” and 27.50” deep
- Adjustable 11-gauge steel rack rails, in both front and rear positions
- Punched rack rail supports with multiple cable tie offs
- Vertical cable passageways
- 3 sizes of conduit knockouts in three locations, including the solid roof insert
- Slotted vents at the front frame top
- Durable black powder coat
- Optional front and rear locking doors for left or right swing, plus perforated solid and fan roof inserts are available.

Enclosed Audio Rack (KAR)
- Fully welded, 16-gauge cold rolled steel construction with fully adjustable front rack rail
- Front adjustable 11-gauge rack rail
- 16-gauge steel rack rail supports
- Available in 2 depths, for equipment up to 20” and 25”
- Variety of conduit knockouts are located at the top and bottom rear
- Punchable rack rail supports with multiple cable tie off
- Perforated sides provide ventilation
- Optional front and rear locking doors are easily removable for left or right swing
- A removable 3 space solid roof insert allows for interchangeable panels for fans or passive cooling
- Black powder coat finish

Sectional Wall Rack (SWR)
- Fully welded 12 and 14-gauge construction, internal bracing, reinforced hinges and integral center section supports for maximum strength
- Adjustable 11-gauge steel rack rail, ventilated sides and top and bottom conduit knockouts
- Keyed locks between the center and rear sections
- Center section and optional door can swing left or right
- 6” square knock-out for cable passage
- Tie off strips for cable management
- Attractively finished in durable black powder coat
- Optional locking rod and locking door available
- Hinging system eases installation and provides greater security

Wall Mount Rack (WMK)
- Compact audio enclosures for smaller installations
- 16-gauge steel, finished in durable black powder coat
- 11-gauge rack rails
- Top and bottom conduit knockouts and slotted sides for passive cooling
- Key hole slots on rear panel allow for secure attachment to wall
- WMK-10 utilizes a rear mounting pan with a laser knockout for cable passage
- Mounting pan facilitates servicing equipment and uses a locking rod for real rack security
- Front locking door can swing from left to right and is 1.5” deep

Rotating Rack System (ROTR)
Perfect for installing in existing cabinetry or new millwork, the Raxxess Swivel Rack system comes in sizes from eight to twenty-four rack spaces. Available in a two or four slide formats capable of supporting 150 and 300 pounds respectively. The rack extends a full 20” from its frame and is then capable of rotating 90° in either direction, allowing unobstructed access to components regardless of their depth. The system locks in the closed position with security panel and screws provided. Easy and effective cable management system and eight-space rear rack rail are included.

- ROTR-2
  2 sliders, specify height..................335.95

- ROTR-4
  4 sliders, specify height..................384.95

Skeleton Rack (SKR)
- A “Bare Bones” approach to racking audio equipment
- Constructed of four pieces of 11-gauge steel rack rail (cut to any length up to 42 spaces 73.50”) and a top and bottom pan of 16-gauge cold rolled steel
- Surprisingly strong, yet assemblies in less than five minutes with a standard wrench
- Optional side panels are available (12, 24 and 42 spaces) in either 16-gauge steel with a black powder coat finish or Elite panels in ebony fleck or mahogany laminate with solid oak edging

Security Door
Button mount security door attaches directly to rack rail. Can be removed with ease and no tools.

  12 space button mount........64.95

- SCDR-16B
  16 space button mount........77.95

- SCDR-20B
  20 space button mount........89.95

Captive ROTR Rack (ROTR/CAPTIVE)
Installing and maintaining equipment in traditional commercial racks can be a time-consuming and tedious process. While moving a rack around on casters can provide some degree of accessibility, Raxxess has a better way. Designed to save you time and money on service calls by enabling unprecedented access to installed equipment, the new Captive ROTR rack is an idea whose time has finally come. Available in 35 rack spaces, the Captive ROTR rack consists of a rollout 22” deep rack frame on heavy-duty 4” casters and a 16-gauge welded steel housing. A ball-bearing swivel base sits between the caster base and the reinforced 12-gauge rack frame allowing 90-degree rotation when the rack frame is at full extension. Heavy duty 28” full-extension telescoping sliders allow the rack frame to move smoothly in and out of the housing. Our unique “OMEGA” shaped, 3” wide cable passage cutout in the roof combined with ample cable tie-off points in the rack allow for easy cable management.

- CPROTR-35
  35 spaces .................................................................1119.00

- BAN-3 .......................................................... 7.95
- BAN-6 .......................................................... 7.95

#### Hubbel Twistlock Module
HUB-1 .......................................................... 7.95

#### Neutrik NL8MPR Module
NL-8 .......................................................... 7.95

#### Modular Wall Box
Modular panels allow users to create a custom connector system using stock panels. Available as a 19" rack frame (one piece construction) or as a 2, 4 or 6 panel attractive wall box. Panels are aluminum and measure 3⅛ x 3⅛". Wall boxes (MWB) are of 16-gauge steel construction.
- MCP - Modular connector panel, aluminum ............................................... 7.95
- MCF - Connector Frame .............................................................................. 13.49

#### Modular Blank Panel
3.5" square aluminum panel with no connector punchout.
Fits MCF or MWB .......................................................... 7.95
Monitor Speaker Stands
Ultimate Support monitor stands feature cabinet-quality top plates, cable management, metal base spikes, and the ability to add shot or sand internally. They are also great for living rooms to get those expensive speakers up to ear level and produce the sharpest and clearest sound possible.

<table>
<thead>
<tr>
<th>Cabinet Quality Medium-Density Fiberboard Top Plate</th>
</tr>

</table>

Choosing a Stand Height
When seated in the mix position, measure the distance from your ears to the floor and choose the stand height (36” or 42”) that will place the monitor tweeters at ear level. Low frequency sound waves are large and fill a lot of space. High frequencies come from smaller, direct waves. Studio monitors are designed so that on-axis response (direct parallel path from monitor to ears) yields the most accurate sound.

TS-80 Series Speaker Stands
These high-quality aluminum and steel tripod speaker stands feature a built-in socket adapter that accommodates both 1 3/8" and 1 1/2" speaker sockets. A glass-reinforced telescoping collar has a die-cast metal clamp for maximum security and durability. The secure leg collar slides smoothly on the tube for easy set-up.

- Glass reinforced polycarbonate fitting at the leg juncture uses a metal clamp over the fitting to minimize over-tightening and breakage.
- The stands raise and lower with the turn of a knob, locking tightly for secure support. Metal clamps minimize over-tightening and breakage.
- The connector tube, which telescopes up to accommodate 1 3/8" speaker sockets and down for 1 1/2" sockets. Locks firmly into desired position. Minimizes the need for adapters. The telescoping tube lock prevents accidentally pulling out the center tube.

TS-90 Series Speaker Stands
A step-up from the TS-80, the TS-90 tripod speaker stands features a telescoping tube lock that increases safety and prevents accidently pulling the center tube. It has an internal friction mechanism with three settings. In the "RAISE" setting, the mechanism grips and holds the tube, allowing you to incrementally pull the center tube up to the required height. "LOCK" the collar in place for extra security. In the "LOWER" setting, TeleLock eases off and assists lowering the center tube. This unique design safely takes the strain off you!

### Telescoping and Leg Collars
Die-cast metal clamps fit snugly over glass-reinforced polycarbonate fittings creating the strongest and most durable telescoping collar and leg collar possible. Since the handknob actually tightens the metal clamp and not the plastic directly, these collars aren't easily overtightened, snapped or cracked!

*The TS-88L and TS-99BL are Leveling Leg Tripods. The leg adjusts in length to level the stand on uneven surfaces.*
MUSIKA TS-70B ECONOMY SPEAKER STAND

The Musika TS-70 tripod speaker stand was designed to bring Ultimate quality to the masses with a more affordable speaker stand. Although it is not a heavy duty stand like the TS-80 or TS-90 series, it still brings quality and innovation to this segment.

- Glass reinforced telescoping collar secures the telescoping tube without slipping. A safety pin is also included for extra security
- Glass reinforced tripod leg fitting secures the base of the tripod. By using a glass reinforced plastic ultimate tripods are stronger and more durable than the competition
- Like all tripod speaker stands from Ultimate, the TS-70 includes an adapter for 1 1/2˝ speaker sockets as well as 1 3/8˝ sockets

MOUNTING BRACKETS

BMB-200K Large Mounting Bracket
- External 4 x 6” bracket securely mounts any speaker cabinet with a flat bottom on an Ultimate tripod (1 1/2” tube)
- Glass-reinforced polycarbonate fitting holds 100 lbs.
- All hardware included for installation

TMB-400K Slide Mounting Bracket
- Low-profile external 4 x 4” bracket securely mounts any speaker cabinet with a flat bottom on an Ultimate tripod (1 1/2” tube)
- Two-piece design: the plate attaches to the bottom of the speaker, and the slide-in base connects securely to the tripod
- All hardware included for installation
- Strong glass-reinforced polycarbonate fitting holds 100 lbs.

TAD-100 Adapter Stud (ULTAD100)
- Converts a 1 1/2” tripod top tube to mount a speaker cabinet with a 1” inside diameter socket
- Strong glass-reinforced polycarbonate fitting holds 100 lbs.

TAD-138 Adapter Stud (ULTAD138)
Same as above but converts 1 1/2” top tube to 1-1/8”

BAGS

BAG-80 Zippered Tote Bag (ULBAG80)
Holds one TS-80 or TS-90 series tripod stands. 5.9 x 5.9 x 48” ................................. 19.95

BAG 80D Zippered Tote Bag (ULBAG80D)
Double bag—holds two TS-80 or TS-90 series tripod stands. 5.9 x 11.8 x 44.5”...35.00

BAG-88 Zippered Tote Bag (ULBAG88)
Holds one TS-88 or TS-99 series tripod stands. Also holds a TS-88BL or TS-99BL tripod. 5.9 x 5.9 x 63” ................................. 24.95

BAG-88D Zippered Tote Bag (ULBAG88D)
Double bag—holds two TS-88 or TS-99 series tripod stands. Also holds two TS-88BL or TS-99BL tripods. 5.9 x 11.8 x 63” ....34.95
IQ X-Stands
These high-performance stands offer many features including:

**Memory Lock**
Set the stands to different positions - memory lock opens to your choice every time.

**Stable Stand**
Large footprint and tubing make these stands extremely stable. Adjustable end-caps stabilize the stand on uneven surfaces.

**Cable Management**
Clips throughout stands and tiers.

**Reinforced Connectors**
The IQ-1500, 2000 and 3000 stands have connections between the leg braces and top/bottom tubes that increase strength and durability over welded x-stands.

### IQ-1000
- 14˝ support arms, 20˝ leg lengths
- 100 lb. load capacity
- Memory Lock system with 4 height adjustment settings
- Off-set leg braces make more leg room and space for pedals
- Adjusting end caps
- Accomodates IQ-200 set-position second tier

$35.00

### IQ-1500
- Same as above, plus–
- Reinforced connectors between leg braces and top/bottom tubes increase strength and durability over welded x-stands
- Accomodates optional IQT-200 fully-adjustable second tier

### IQ-2000
- Same as above, plus–
- Sturdy, double brace stand
- 150 lb. load capacity
- Accomodates 2 optional IQT-200 fully-adjustable second and third tiers

$54.00

### IQ-3000
- Same as above, plus–
- 19¾˝ support arms, 22˝ leg lengths
- 300 lb. load capacity (for the lowest 2 settings, 25˝ and 27˝, load capacity is 250 lbs.
- Memory Lock system with 9 height adjustment settings
- Accomodates optional IQT-100 and IQT-200 fully-adjustable second and third tiers

**IQ-200 Set-Position Second Tier**
Second tier holds a 2nd keyboard. For the IQ-1000 ................................................................. 29.95

IQT-100 and IQT-200 Tiers are height, depth, width and angle adjustable. Height and depth from 1˝ to 12˝, tier angle and width in 7.5˝ increments. Tiers come with a 3-year warranty.

**IQT-200 Adjustable Tier**
Used as a 2nd tier on the IQ-1500; a 2nd and 3rd tier on the IQ-2000; and a 3rd tier on the IQ-3000........... 42.00

**IQT-100 Adjustable Tier**
Used as a second tier on the IQ-3000 .................. 49.00
Apex AX-48BP Column Keyboard Stand

The Apex column keyboard stands have set the standard in the industry for performing musicians. Ingenious design makes them incredibly easy to set up, adjust and transport.

◆ Sleek, hollow column becomes its own carrying case. Sets up in seconds with no tools
◆ Sturdy column stand is stable, even with large 88-note keyboards
◆ Arms firmly support the keyboard yet detach and slide into the top of the column for easy transport. Includes two column tiers that are expandable to three with Apex accessories
◆ Legs slide out into place for quick set-up or store neatly inside column base for transport.
◆ Durable black anodized aluminum looks great on any stage.
◆ 46” height with angle adapter. It weighs 19 lbs., has a load capacity of 125 lbs per tier; 220 lbs. total. The collapsed length is 52”
◆ Comes with two standard clamps and two sets of 13” tribar arms

AX-48BP Apex Plus
Same as above, includes an Apex Mic Boom plus a Super Clamp and 18” long tribars to accommodate a larger keyboard $162.00

AX-48BLX Apex Deluxe
Comes with one standard clamp, 13” tribar arms one super clamp and 18” long tribar arms to accommodate a larger keyboard Call

Deltex DX-48B Keyboard Stand

An economical yet high quality choice for musicians with lighter keyboards.

◆ Sleek triangular column design with a durable black anodized finish.
◆ Sturdy column holds up to two keyboards
◆ Arms firmly support the keyboard yet detach for easy transport
◆ Folding legs detach and store in the optional tote bag
◆ Durable black anodized aluminum looks great on any stage.
◆ 47” height; weighs 14 lbs, it has a load capacity of 50 lbs. per tier (100 lbs. total). It’s collapsed length is 45”

DX-48BP Deltex Plus
Includes a DX-48B plus the BAG-88 tote bag Call

BAG-88 Zipper Tote Bag
Heavy-duty nylon tote bag holds one Deltex stand.
Dimensions are 10½ x 60½” 24.95
Apache Triple Tier A-Frame Stand

The Apache Triple Tier frame is a versatile option for stage or studio. Each tier is height and tilt adjustable, while the back legs can be positioned vertically to optimize valuable studio space. It is available in 5’ and 4’ widths, and comes with three tiers, three pairs of 14½” support bars and a tote bag. (The top tier on the 60” wide Apache has 20” support bars.) This frame is easily expandable with a wide variety of accessories.

- BRC-190B - 5/8" flatbar; 19" long............12.95

### End Caps, End Plugs
Support Tiers offer added stability. Tiers come with two T-fittings.
- FCP-150 - Foot cap for 1/2" tubing...........95
- ECP-150 - End cap for 1/2" tubing...........50
- ECP-162 - End cap for 1/4" tubing...........20.00
- ELP-150 - End plug for 1/2" tubing...........50
- ECP-151 - End plug for thick-walled 1/2" tubing..............................50
- ECP-162 - End plug for 1/4" tubing...........50

### Fasteners
For use with T-fittings and collars.
- TSS-150 - T-screw and spacer, 1/4-20......1.00
- ZKB-175 - 1.75" length handknob with washer. Use on TS-80/88 stands......3.50
- ZKB-137 - 1.37" length handknob with washer..........................3.50
- HEX-100 - Hex nut, 1/4-20........................20
- SHS-100 - Socket screw, 1", 1/4-20............20

### Tools
For mounting standard 1 1/2" tubing out of a 1 1/4" tube.
- BAL-100 - Ball driver 3/16.........................Call
- CUT-100 - Tubing cutter..........................Call
- AWR-316 - Allen wrench 3/16...................1.00

### Boom Jointers
Connects two standard tubes in line.
- BJR-150B - Black color..................17.50
- BJR-150 - Silver color..................16.00

### CLA-200 Clip Assembly
The CLA-200 holds notes, sheet music, etc. Mounts on 1 1/2" tubing.............70.00

### CST-150 Caster Assembly with Swivel Mounts in the end of standard tubing where adjustable angles are desired..................24.95

### EXT-222 Pin Extension Pair
Slide over existing support bar pins for securing front slanted instruments....Call

### Microphone Mounts
- MIC-150 - Microphone End Mount. Adapter mounts mic booms or goosenecks to the end of standard tubing .............19.95
- MTM-587 - Microphone T-Mount. Adapter mounts mic booms or goosenecks along a standard tube..................24.95

### PVF-150
Connect two tubes at various angles..............8.00

### Rack Rail Pairs
For mounting standard 1 1/4" rack equipment; hardware included.
- RL-05B - 5 space rack rail pair.............Call
- RL-10B - 10 space rack rail pair.............Call

### Shelves
Lightweight black polymer shelves support smaller equipment on keyboard tiers.
- SHF-185 - 13" x 18½"..........................34.95
- SHF-415 - 13" x 41½"..........................56.00

### Swivel Joints
- SJI-150 - Swivel joint, tube-to-tube. Forms an adjustable joint between two 1 1/2" tubes...........29.95
- SJT-150 - Swivel joint, tube-to-fitting. Extends a half-tier to the side of an A-Frame stand. Regardless of position, the SJT-150 keeps the HT-15B on a horizontal plane..............24.95

### Velcro
- VCA-100 - Adhesive velcro-hook (per foot)..............................Call
- VCA-200 - Adhesive velcro-loop (per foot)..............................Call
- VCS-712 - Velcro strap pair. Used for cord control.......................4.00

### TCR-150 Telescoping Collar
Used to telescope 1 1/2" standard tubing out of a 1 1/4" tube........6.00

### TFG-150 T-Fitting
Forms a rigid 90° joint between two standard 1 1/2" tubes..............5.00

### HT-15B
Hatched T-Fitting
Two-piece T-fitting is strong and convenient for adding items to existing stands...........6.00

### Adjustable T-Fitting
Set any angle in 7.5° increments.
- ATG-150 - For 1 1/4" tubing...........14.95
- ATG-133 - For 1 1/2" and 1 3/4" tubing...........14.95
- ATG-125 - For 2 1/4" tubing...........14.95

### UNF-150
Universal Fitting
Used to attach flatbar to standard tubing............................4.00

Choosing the Right Guitar Cables

A guitar cable is the primary cable connecting an electric guitar’s output to its amplifier’s input or to the input on the first effect pedal in the musician's pedalboard. Guitar cables are also used to hook basses to bass amps and keyboards to mixers. The broad category for these types of cables is “instrument”. Guitar cables are constructed using single-conductor audio cable (also called coax) with an overall shield, terminated in 1/4˝ phone plugs.

There is a wide variety of guitar cables because there is a wide variety of guitarists. It is almost impossible to get two guitarists to agree on what a truly great “sound” is. Even if they did, one of them would change his/her mind by midnight. Therefore guitar cables come in a wide variety of lengths, each with different standards for reliability, shielding, sonic quality, flexibility, appearance and price.

The primary guitar cable is the most abused on stage (besides the lead singer’s microphone cable). Therefore, it must be built to withstand extreme trauma during performance. Also, in acts where appearance is critical, it also has to look like a million bucks. Although the patch cables used between the effect pedals and between the last effect and the amplifier (or pre amp) need to sound good and be very quiet, the stress on them is not as severe as the stress on the primary cable. Light duty patch cables can be used here without much fear of failure.

Because of the placement of the output jack on some guitars, a right angle plug may be needed, especially if your output is on the face of your guitar.

Here are the three most important rules governing guitar cables:

◆ Buy the shortest cable you can live with
◆ If it doesn’t have a copper tip on the connectors, don’t buy it
◆ Find a cable that is as flexible and tangle-free as you need for your performance.

The wire in your cable must be flexible and sturdy. “Thin” is generally not as reliable as “thick” cable, and thin is generally not as flexible as thick. The things that matter most in guitar cable construction are strength, flexibility, sonics, shielding and appearance. Strength in a guitar cable’s wire is derived from the size (gauge) of the center conductor, the type and percentage of coverage of shield, and the thickness and material making up the jacket.

Guitar cables carry minuscule signals that must be kept away from noisy light dimmers and audio frequency interference that can jump into a cable’s signal path at any time. The cable’s shield helps to prevent this. Braided shields work better than spiral shields.

Choosing the Right Mic Cables

In pro audio, microphones are low impedance (Lo-Z) and terminate in 3-pin XLR connectors:

◆ Pin 1 (X)ternal Shield
◆ Pin 2 (L)ive Hot (+)
◆ Pin 3 (R)eturn Cold (-)

Another configuration includes an XLR female (the output of all professional mics is a 3-pin XLR male) connector to a 3-pin mini male (1/8˝ or 3.5mm) connector for inputs to laptop computers and other devices where space is at a premium. Most professional mixer's microphone inputs are designed with “balanced” circuits to help decrease or eliminate noise and unwanted radio frequency interference (RFI). Lo-Z microphones can also be wired “unbalanced” and “Hi-Z” high impedance) microphones are available, for high impedance sound systems. Hi-Z cables allow the user to plug Hi-Z microphone directly into the input of, say, a guitar amp or the input of a Hi-Z mixer. Unbalancing a balanced microphone by using an unbalanced cable allows it to sometimes be used in the input of a Hi-Z mixer. This does not always work, depending on the input impedance of the mixer. When this does not work, a Lo-Z to Hi-Z transformer must be placed in line at the end of a standard Lo-Z mic cable. These commercially available transformers make the proper change from XLR to 1/4˝ for you.

Microphone wire consists of a twisted pair of copper conductors (typically 22 - 24 AWG — American Wire Gauge). These conductors are covered with one of three types of shielding: braided, spiral (also called “serve” shield), and foil shielding which includes a drain wire. Foil shields work great in snakes, but prove to be unreliable in cables designed for portable use. Braided shield is best for mic cables and spiral is a little more flexible and less expensive than braid.

Choosing the Right Speaker Cables

When buying speaker cable, there are two basic things to remember: Less is best. Buy the shortest cable possible for the application. More is best. Buy the largest gauge cables you can afford (the smaller the gauge number, the bigger the wire).

The three basic types of connectors used for speakers in live performance are: 1/4˝ connectors (the same ones used in your guitar’s output), dual banana plugs, and Neutrik Speakons, wonderful connectors designed specifically for speaker applications. There are other methods of connecting amplifiers to speakers (spade lugs, bare wire) but these three connectors, 1/4˝ phone plugs, dual banana plugs and Speakons are the standard.
The Hosa Philosophy
Since they started making cables almost 20 years ago, Hosa's philosophy has been that less-expensive doesn’t have to mean “cheaper”, and that it simply isn’t necessary to connect your equipment with “NASA-approved” gold-plated cables thick enough to tow an eighteen-wheeler. Meaning, if you pay more for a cable, your music won’t necessarily sound better. So, if you’re like the rest of us and can’t afford to spend a week’s salary for a few cables, then look no further than the regular Hosa brand for professional cables that work as hard as you do. In the regular Hosa line, strict attention is paid to the basics of cable design and construction. Hosa makes sure that cables are well-shielded from external sources of radio-frequency and current-induced noise and that they’re of the proper gauge and of high copper purity to ensure low capacitance. In addition, they use correct soldering techniques to eliminate “cold-solder” joints which could cause intermittent connections or “ground hums”. And finally they make sure that the jacket and head-shell/strain-relief combination are rugged enough to withstand the rigors of the intended application. Hosa provides all of these benefits in every cable and backs them up with a Limited Lifetime Warranty. However, for those desiring the ultimate in purity of conductors and esoteric dielectric materials, and are unencumbered by budgetary restraints, Hosa offers their very-high-end Zaolla Silverline line of ultra pure, solid silver interconnects for S/PDIF, microphone, guitar, and audio equipment hookup.

Premium Quad-Type
Four inner wires are twisted together in pairs to form the “hot” and “cold” conductors. These are surrounded by a braided shield. Excellent EMI/RFI rejection.

Microphones require cables that can protect their very low-level output signals and deliver them to the console at full frequency response and without adding noise. Hosa’s CMK and M M K-Series cables are chosen every day by professionals who know an amazing value when the see one. Featuring Neutrik-brand XLR connectors, oxygen-free copper conductors in your choice of 20 or 24 gauge (AWG), dense braided shielding for strength and EM I/RFI noise rejection, and tough, protective neoprene-type jacketing, these mic cables get the job done right.

Choose the CM K or CXP-Series for single cable runs. The 20-gauge conductors are incredibly rugged and road-worthy. Use the M M K or M X P-Series 24-gauge cables if you intend to bundle multiple cables together. Their smaller diameter helps keep the bundled runs more flexible.

Hosa is world famous for precision-tooled injection-molded terminations, and with good reason. They ensure a tight, positive, reliable connection while providing excellent signal transmission at an unbelievable price. Dense spiral shielding allows flexibility and keeps out unwanted interference, for noiseless audio. Thick protective cable jacketing, your choice of balanced or unbalanced wiring, all the right connectors: Look no further for your studio or stage rig. Hosa has it all.

Cables—the Final Link

Monster Cable’s legendary microphone and musical instrument cables, found in many of the world’s top recording studios, are used religiously by engineers, producers and musicians alike. In fact, Monster’s cables are acknowledged as the reference standard for some of today’s hottest artists. These professionals recognize that the quality and sound of their cables play a crucial role in delivering the very best possible sound reproduction. And in the highly competitive world of music, Monster gives the artist and recording engineer that extra edge to turn an ordinary performance into something extraordinary.

How Monster Cables Maximize the Sonic Performance of Musicians and Recording Professionals

ENGINEERED FOR BETTER SOUND

While other cables can smother sound, increase distortion and flatten bass, Prolink cables utilize unique patented technologies such as multi-gauge Bandwidth Balanced wire networks and Time Correct windings to transfer complex music signals between components with greater accuracy and proper phase alignment.

Monster’s MicroFiber dielectric employs an intricate process of winding an air-core fiber around each individual conductor to reduce dielectric losses and electromagnetic distortions. MicroFiber increases dynamic range, extending high frequencies and reducing background noise.

In addition, Monster’s MultiTwist construction, ultra-dense shielding and conductive polymer dielectrics are used to eliminate hum, interference and handling noise. Wider frequency response and more natural reproduction of harmonics are just some of the improvements musicians discover with Monster’s Prolink microphone and studio interconnect cables.

SNAKE, PATCHBAY, SPEAKER AND INTERCONNECT CABLES FOR A COMPLETE HOOK-UP

In addition to their outstanding mic and instrument cables, the ProLink line features high performance snakes, patchbay cables and speaker cables, as well as line-level audio, video and digital interconnects for every possible hook-up. Monster recognizes the importance of a high integrity, long lasting connection. Their connectors are designed for maximum signal transfer and the ability to withstand and the rigors of stage and studio environments. Monster’s ProLink cables deliver sonic refinements to improve the quality of every note you play, every track you lay down, and every recording you monitor. Plug in and listen. You’ll hear the difference with Monster Cable.
Standard 100 Microphone Cable

An economical introduction to Monster high performance microphone cables, the high clarity Standard 100 is an entry-level microphone cable that delivers low noise and exceptional performance.

- Special Prolink windings engineered for low noise and improved signal transfer at a budget price
- Basic Bandwidth Balanced (twisted-pair) construction for clarity, low noise and smooth frequency response
- High density (87% coverage) copper-braid-ed shield reduces outside RFI (interference) and EMI (hum) for a lower noise floor and increased resolution
- Duraflex jacket offers maximum flexibility, durability and reliability—performance after performance
- Heavy duty black Neutrik XLR connectors provide durability with a professional look

Performer 500 Microphone Cable

A high quality, high resolution professional mic cable, the Performer 500 offers clear, dynamic sound for recording and professional performance applications on a budget.

- Two Time Correct multiple gauge (high and low frequency) wire networks for even frequency response and natural sound reproduction
- Bandwidth Balanced construction for controlled impedance and optimum signal transfer
- MicroFiber dielectric increases clarity and transient response time
- High density (95% copper) braided shield reduces outside interference

Studio Pro 1000 Microphone Cable

Studio reference, ultra high resolution microphone cable for professional recording and performance applications.

- Three Time Correct multiple gauge networks for extreme accuracy in imaging, depth and soundstage. Signals are phased-aligned for open, accurate, natural sound.
- Bandwidth Balanced construction for controlled impedance and optimum signal transfer.
- MicroFiber dielectric reduces high frequency loss and increases transient response time
- MultiTwist™ construction with dense 97% copper braided shielding to reduce the effects of EM and RF interference.
- Carbon-infused polymer minimizes handling and vibration noise.
- Heavy duty black Neutrik XLRs with 24k gold contacts.

Designed with the Musician in Mind...

Monster’s Performer 500 Series of instrument cables are specifically engineered for the style of music you play. Style-specific cable designs unlock the full potential of your instrument’s tonality and feel, and add a signature-quality to your personal sound. For example, Monster Rock brings out the bite in your guitar, while Monster Jazz enhances deep, full-bodied tones. Whether you play rock, jazz, bass, or keyboards, Monster has a cable designed to enhance your sonic signature.

For the ultimate in transparency and accurate audio reproduction, there is Monster’s Studio Pro 1000 line—the mic and instrument cables that are so popular with top professionals around the world, both in the studio and during the live performance. On a budget? Monster Standard 100 instrument, mic and speaker cables deliver improved performance at an affordable price.
Studio Pro 1000 Instrument Cables

Monster’s state-of-the-art reference instrument cable, Studio Pro 1000 cables are used by top recording artists to get every nuance of timbre and tone from their instruments. Utilizing patented Time Correct windings, multiple gauge networks, MicroFiber, and Bandwidth Balanced construction, these cables deliver unmatched detail, clarity and depth. Signals are phase-aligned as they travel through the conductors, resulting in a surprisingly accurate, open sound. Built with an extra-dense braid shield and twisted-pair design, Studio Pro 1000 is ultra quiet and noise free. Heavy duty 24K gold-plated plugs with strain relief ensure the best signal transfer and a positive connection year after year.

- Multiple gauge high and low frequency wire networks for accurate, natural sound reproduction.
- MicroFiber dielectric-wrapped wire networks for the fastest transients, maximum clarity, definition and presence.
- MultiTwist impedance-balanced construction for maximum signal transfer and noise rejection.
- Double shielded with 97% coverage copper braid and carbon-infused dielectric for superior noise rejection.
- 24k hard gold contact, heavy duty, high-current connectors are durable and corrosion resistant.
- Brings out the live, full sounds from digitized or harsh signals for a more natural and open keyboard feel.

Performer 500 Series Instrument Cables

- Multi-gauge Time Correct windings for phase aligned signals with a sharp edge delivers natural reproduction of midrange frequencies.
- MicroFiber inner dielectric insulation provides better isolation of magnetic fields for faster transient response time, clear highs and vivid harmonics.
- High density 95% coverage copper braided shield and conductive polymer insulator for superior RFI and EMI rejection for a lower noise floor and increased resolution.
- Carbon-infused dielectric reduces microphonic cracks or pops for a noise-free cable design.
- Iso Tec vibration isolation technology further reduces the effects of handling noise.
- Durable & corrosion-resistant 24k hard gold plated connectors with strain relief for a strong, high integrity connection.

Performer 500 Series

- **ROCK INSTRUMENT CABLE**
  High performance lead/rhythm guitar and effects cables deliver aggressive sonic character and dynamics for rock musicians. Delivers more bite and aggressive sound qualities than ordinary instrument cables.

- **BASS INSTRUMENT CABLE**
  Powerful low end response and extended dynamic range from a cable specially designed for the bass player. This maximum performance bass guitar cable incorporates two thick bass frequency conductors to improve voltage and current transmission for maximum punch and an extended low end.

Performer 500 Series

- **JAZZ INSTRUMENT CABLES**
  Specially designed smooth, rich, high quality sounding instrument cable for jazz and acoustic guitars. Emphasizes the natural timbre and complex tones generated by your instrument. Same features as above, PLUS—
  - Bandwidth Balanced construction delivers a warm, robust tonal character.
  - Dual multi-gauge (high and low frequency) Time Correct wire networks for rich harmonic texture and accurate timbre reproduction
  - MultiTwist (very tightly winds negative and positive conductors together) impedance balanced construction for accurate signal transfer and superior noise rejection.
MONSTER CABLE

INSTRUMENT CABLES

Monster Keyboard Instrument Cables
Specifically designed instrument cable for analog or digital keyboards, sound modules, DSPs and samplers. Brings out the live, full sounds from digitized or harsh signals for a more natural and open keyboard feel.

- Specially designed conductor layering in multiple helical bundles for improved high frequency signal alignment
- Bandwidth Balanced controlled impedance technology for optimized electronic interfacing and full, rich tonal quality
- Multiple gauge high and low frequency wire networks for accurate, natural sound reproduction
- MicroFiber dielectric core for accurate lows and extended frequency response
- Dense copper braid and carbon-infused insulating shields for maximum protection from electromagnetic noise
- IsoTec vibration isolation technology eliminates cable microphonics
- Corrosion resistant 24k hard gold plated connectors with strain relief for increased conductivity and a strong connection

Performaer 500 Digilink MIDI
Flexible, high speed MIDI cable for error-free performance. Offers improved electronic instrument timing, fewer data errors, smoother control, and tighter music.

- Monster’s precise Current Mode construction for high speed MIDI data transfer with fewer errors, even over long runs.
- Engineered to control current and voltage transients for reduced jitter and edge distortion, and minimum delay.
- Sturdy nickel-plated connectors with strain relief for strong, reliable, and long-lasting connections in the studio or on the road.
- Great for in the studio or on the road.
- Wired for standard MIDI. (3 Pins Hot)

FURMAN PlugLock
PlugLock is an inexpensive outlet strip that holds your wallwarts securely in place. Equipped with a heavy duty 14 AWG cord, five 15-amp receptacles and five locking clamps with knurled thumbscrews, PlugLock ensures that securing wallwarts and plugs will never be a problem again.

- Outlets spaced widely enough for five bulky transformer “wall warts”
- Clamps securely lock wall warts into place
- Mounts in the back of your rack
- Heavy duty 5’ three-conductor cord
- Circuit-breaker protected
- All steel construction
- Three Year Warranty
- Dimensions: 12.6 x 2.3 x 2.5”; weighs 2 lbs 10 oz
- Mounting hole spacing: 11.61”
- Clamps adjust from 0.4” to 2.1” above outlet

ONE HOUR FREE PARKING
AT 349 W. 34th STREET (with purchase of ’100 or more)
High Performance, Great Sounding Audio Interconnect Cables

The StudioLink 500 series provides excellent sonic performance in professional and home studio applications.

- Multiple gauge high and low frequency wire networks for accurate, natural sound reproduction
- Precision wound Time Correct construction provides extremely accurate musical reproduction
- Open soundstage, precise imaging, tight bass and smooth highs
- Ultra-flexible, durable jacket for ease of use and prolonged life, even in the tightest situations
- Easily distinguishable colors (red, blue, and black) for quick assignment identification
- Available with Gold Plated RCAs or 24k hard gold contact 1/4” connectors in several configurations

MONSTER CABLE

ProLink DIGITAL INTERCONNECT CABLES

Monster offers a full line of high resolution low loss digital cables for all applications. These include AES/EBU, S/PDIF and high performance fiber optic cables.

StudioPro 1000 Silver
Digital AES/EBU Cables

The professionals choice for the most accurate, musical sounding AES/EBU digital audio connections.

- Polished silver plated OFC conductors for fastest rise time and detailed, transparent sound
- Low capacitance, precision 110-ohm construction for reduced jitter and accurate signal transfer even over long runs
- Dense shielding resists leakage and outside interference
- Heavy duty black Neutrik XLRs
- Close-tolerance impedance and extra-wide bandwidth exceeds AES/EBU specification for 110-ohm digital systems

M Series Silver (M1000D)
Digital S/PDIF Cables

Low attenuation, precision S/PDIF digital coaxial interconnect cables.

- Accurate impedance matching design for detailed, more natural sounding music
- Low capacitance with fast rise time construction reduces jitter
- Extra-wide bandwidth for accurate signal transfer and smooth, accurate music reproduction
- Gas-injected dielectric prevents bit errors, even over long runs
- Double shield prevents digital emissions
- Patented 24k gold Turbine RCA connectors with Split-Tip center pin for a superior construction
- Duraflex jacket for flexibility and long-lasting good looks

Interlink LightSpeed 200

Higher technology fiber optic cable delivers the most accurate bitstream transfer for the clearest, smoothest possible sound from CD Players, MiniDisc, DVD Players, outboard DACs, and Digital Satellite Receivers

- Monster designed pressure connection keeps fiber in perfect alignment with components
- Metal shell connector for lifelong durability
- Graded index optical fiber greatly reduces jitter for enhanced clarity and definition
- Spring-loaded connector keeps fiber in optical alignment for maximum data transfer
- For use with DVD, CD, MiniDisc, DACs, S/PDIF, and Dolby Digital audio applications

Interlink LightSpeed 100

High performance fiber optic cable with special polished low-loss connections for CD, MiniDisc and DAT Players

- Monster’s precise fiber optic connection delivers higher sonic performance than standard cables

- Tuned spectral attenuation for optimum signal admittance and low loss
- High velocity of propagation for lower time smear
- Special low-loss fiber delivers clean, clear sound with enhanced transparency
- Available in standard fiber optic to mini fiber optic configurations

- ILS100-1M 1 meter fiber optic toslink-to-toslink ....................... 39.95 ea.
- ILS100-2M 2 meter fiber optic toslink-to-toslink ....................... 44.95 ea.
- ILS100-4M 4 meter fiber optic toslink-to-toslink ....................... 59.95 ea.
- ILS100-20FT 20’ fiber optic toslink-to-toslink ....................... 74.95 ea.
- ILS100TM-1M 1 meter fiber optic toslink-to-mini optical .......... 39.95 ea.
- ILS100TM-2M 2 meter fiber optic toslink-to-mini optical .......... 44.95 ea.
The reference standard for studio and sound reinforcement multi-channel cable, StudioLink 500 Snake cables deliver the ultimate clarity and consistent quality resolution, in multichannel connections to consoles, tape machines, workstations, and effects racks. Available in 4, 8, 16 and 27 channel configurations.

- Two multiple gauge Bandwidth Balanced wire networks for clarity and punch with extended frequency response
- Precision-wound Time Correct construction provides extremely accurate musical reproduction
- Extra fine copper stranding for improved signal transfer and wide bandwidth frequency response
- Tightly twisted-pair construction with 100% shield and drain for each channel rejects external noise and crosstalk
- Each channel is individually jacketed, color-coded, and numbered
- Durable, flexible outer jacket UL-listed for in-wall installations
- Ready for balanced or unbalanced termination schemes

Ready for balanced or unbalanced termination schemes.
High performance, great sounding, durable patchbay cables, the StudioLink 500 series provides excellent sonic performance and consistent quality sound in professional and home studio patch applications.

- Two multiple-gauge Bandwidth Balanced wire networks for clarity and low end punch with extended frequency response.
- Precision wound Time Correct construction for extremely accurate musical reproduction.
- Open soundstage, precise imaging, tight bass and smooth highs.
- Ultra-flexible, durable jacket for ease of use and prolonged life, even in the tightest situations.
- Prolink Studiolink 500 TT available in 6 colors for quick cable identification when multiple cables are used: black, red, blue, green, yellow, and ivory.
- Five easily distinguishable colors (black, blue, green, yellow, and ivory) for quick assignment identification for 8 pack TTS.
- Two easily distinguishable colors (black and blue) for quick assignment identification for certain 8 pack TTS.
- Available with heavy-duty, high conductivity TT, long-frame, or 297-style stereo 1/4” connectors.
- Available with heavy-duty, high conductivity TT, XLR’s or 1/4” TRS connectors.

### StudioLink 500 27-Channel Snake Cable

- **Model:** SL500-S27-250 27-Channel Snake (250 ft. Spool)
- **Price:** $12.60 ft.

### StudioLink 500 16-Channel Snake Cable

- **Model:** SL500-S16-250 16 Channel Snake - 250 ft spool
- **Price:** $8.30 ft.
StageMASTER Series (SoniMaxer, AudioFlex)

Designed and built by Neutrik in China, StageMASTER's low-impedance mic cables are available in 3 to 50-ft. lengths and offer a 3-year warranty. An overmolded boot adds an excellent strain relief. Spiral shield coverage is 78% or better. The AudioFlex series is an inexpensive yet reliable (3-year warranty) low-impedance mic cable featuring Amphenol IDC-type XLR connectors with 224SM small diameter wire. Also available with black Amphenol XLR connectors (AXMB).

Excellines Series (ExtraFlex)

Designed to provide all the clarity and power you need for great sounding vocals, the ExtraFlex cable offers superior transient response for a quick, yet natural sound. With genuine Neutrik XLR connectors and ArmorFlex outer jacket, this cable is built for years of rugged use. 24-gauge, high-purity copper conductors, 92% spiral copper shield and high-dielectric insulator. 10-year warranty. For Hi-Z applications, the ExtraFlex Hi-Z cable is available with nickel shell silver contact 3-pin XLR to 1/4˝ BigFoot phone plug. Also available with Hi-Z to Lo-Z transformer. Excellines come with a 10-year warranty.

ExtraFlex Hi-Z

Designed to provide all the clarity and power you need for Hi-Z applications, this cable offers superior transient response for a quick, yet natural sound. Pin 2 is hot as standard, and pin 3 is also available. With high quality connectors and ArmorFlex outer jacket, this cable is built for years of rugged use.

- Nickel shell silver contact XLR -female to 1/4˝ BigFoot Phone Plug
- 20 AWG Pro Co 120S1 Wire in Black
- 55% Coverage Copper Spiral Shield

ExtraFlex Hi-Z with Transformer

Nickel shell silver contact XLR -female to Neutrik 1/4˝ transformer with 224S spiral shield wire
Guardian Series (Merlin)

Watertight with Kevlar reinforced wire...bi-wire technology, bullet-proof and incredibly flexible! Stainless steel shell, heavy-duty gold contact three pin waterproof XLR connectors with 424BXXK quad wire with Kevlar. Quite possibly the world's best microphone cable, Merlin provides all the clarity and power you need for great sounding vocals. Kevlar reinforced for unmatched strength and dependability, Merlin cables utilize Proco's low-noise, hum-bucking AmeriQuad bi-wire geometry which reduces noise up to 20dB over 2-wire designs. Custom watertight Neutrik XLR connectors feature a machined stainless steel housing with gold contacts.

This page is part of an advertisement for ProCo Sound's microphone cables, specifically highlighting the Guardian Series (Merlin) and Lifelines (Ameriquad, Mastermike) cables. The text describes the features and benefits of these cables, including their construction, performance, and reliability. It also includes tables listing the cable lengths, models, and pricing for both the Lifelines and Merlin Series products. The page provides contact information for ordering and includes a website address for further information.
Lifelines
Perfect for players on a budget, Excellines speaker cable is engineered to flawlessly deliver the full range and power provided by your amplifier. Encased in Proco’s ArmorFlex outer jacket for durability and tangle-free flexibility, this cable is terminated with heavy-duty connectors (1/4˝ phone plugs, banana plugs, or Neutrik Speakon connectors) for years of trouble-free use. Includes a 10-year warranty.

**Lifelines (PowerPlus)**

PowerPlus speaker cables use ProCo's low capacitance, low inductance PowerPlus wire, made of high-purity, stranded copper for a crisp, clean sound. They also feature specially designed oxygen-free ShowSaver's brand speaker connectors and ProCo's exclusive ArmorFlex outer jacket (black), providing you with a durable, yet highly flexible cable. Available with phone or banana plugs, or Neutrik Speakon connectors. 20-year warranty.

### 11 AWG Speaker Cable

ProCo's 13-gauge 8-conductor cable was designed to fit into Neutrik 8-conductor Speakons, the largest gauge of stranded wire that ProCo could practically fit into these wonderful speaker connectors.
Fat Max

Fat Max is the ultimate speaker cable. A massive 8-gauge cable consisting of four 11-gauge conductors in a special bi-wired geometry, Fat Max is designed to deliver the maximum damping factor for tight, chest-slamming lows and a wide, clearly defined audio spectrum. The unique AmeriQuad geometry reduces crossover network interaction and cable inductance, resulting in less stray capacitance for the cleanest possible high-frequency response and superb sound stage. Designed for a lifetime of use and abuse, Fat Max features sonically welded terminations and the best connectors made today (unbreakable 1/4˝ gold plated, copper tipped phone plugs, banana plugs, or Speakon connectors).

RMS1A Monitor Speaker Switch Box

Designed with the small recording studio in mind, the RMS S-1A is a stereo speaker selector ideally suited to the use of “nearfield” monitors or headphones in addition to large main speakers, all selectively driven from a single power amp. The rugged, black-epoxy-painted steel chassis is perfect for free-standing use or custom installations.

- The RMS S-1A routes the outputs of a stereo amplifier to one of three pairs of speakers.
- Switching logic allows fast and easy "A-B" comparison between any two pairs of speakers.
- The heavy-duty toggle switches safely carry loads as high as 1800 watts.
- All inputs and outputs are via standard color-coded 5-way binding posts, allowing the connection of spade lugs, banana plugs or stripped wire ends for cabling from amplifiers and speakers.
- In addition, the ALT B outputs are wired through a standard 1/4˝ stereo jack for easy connection of a Proco HJ-6 Headphone Junction Box using a single cable. Especially useful in personal studios where the “control room” doubles as the “vocal booth”!
An innovator and leader in the cable business for over 20 years, Proco pays very close attention to every aspect of what goes into the products they sell you. Everything from solder to stranding, plugs to packaging is scrutinized before a cable is allowed to leave the factory. Every cable is built to rigid specifications. Each connector comes from the finest manufacturers of audio connectors in the world. Proco offers four cable lines categorized by quality—StageMaster (good), Excellines (better), LifeLines (best) and Guardian (amazing). Most of what distinguishes one from the other is the type of cable used and the warranty.

**Guardian**
Incredible sound in an indestructible cable – simply the best cable made today. Backed by a lifetime warranty - any excuse, even abuse.

**LifeLines**
Professional grade cables constructed of high-quality components for outstanding performance in a durable cable. Lifeline cables are backed with a 20-year warranty.

**Excellines**
An EXCEL-lent mid-grade cable, these are a great choice for light-duty professional and amateur applications. Excellines come with a 10-year warranty.

**StageMaster**
Proco's most economical cable line, StageMasters deliver respectable performance at an exceptional price. Backed with a 3-year warranty.

**PROCO SOUND**

**INSTRUMENT CABLES**

**StageMASTER Series (Champion and Crusader)**

Providing the "best-bang-for-the-buck", StageMASTER cables utilize new product development and manufacturing procedures with new parts selection and certification to offer improved quality with dramatically lower prices. Perfect for practice, rehearsal, or the learning musician, the cables are constructed from quality materials and built to withstand everyday use. StageMASTER instrument cables are available in two versions: Champion and Crusader.

Each are 1/4" instrument cables with unbalanced tip sleeve configuration for guitar, synths, samplers and effects processors. The Crusader series is the best cheap guitar cable on earth and is good for patch work as well. The Champion series are inexpensive and reliable 1/4" guitar/unbalanced patch cables, with heat shrink on each end for strain relief.

**EXCELLINES Series (Excellines, Silent Knight)**

Engineered to accurately reproduce every sound you create, Excellines cables provide outstanding sound quality and durability. The world standard "workhorse" cable, Excellines feature Proco's 120S1 single-shielded 26-strand, 20-guage high-purity copper conductor with 100% coverage extruded barrier PVC shield plus 55% coverage copper spiral shield to flawlessly deliver the full range of your signal with superior transient response. Available with G&H's 1/4" BigFoot phone plug and RightFoot right angle plugs. For those who want to switch their guitars on stage and live, without the pop, the Silent Knight includes all the features of the Excelline with Proco's specially engineered silent plug.

</tbody>
</table>

**Silent Plugs**

Proco's Excellines ⅜" instrument cables are available with a Silent Plug which automatically breaks the contact between the tip and the sleeve of the ⅜" jack when unplugging a cable from active equipment.

**HOW THE SILENT PLUG WORKS**

Before inserting the plug, a spring keeps the sleeve and tip in contact. When inserted in a jack, the pushing action slides the sleeve back, breaking the contact between the tip and sleeve.
LifeLines Series (Excalibur, StarGuards, LineCable)

Ideal for musical instruments and unbalanced equipment hookup and patching, Excalibur and StarGuards both use Proco's low-capacitance 20-gauge 120SX wire with a 90% spiral and 100% semi-conductor barrier shield to provide a clean, low-noise performance. In addition, the Excalibur instrument cables feature Proco's exclusive ArmorFlex oversized outer jacket for increased mechanical strength and improved flexlife, as well as gorgeous high luster 1/4” nickel phone plugs and barrel. The StarGuard comes with a BigFoot silent plug that allows you to change your electric guitar to acoustic/electric guitar, silently! (Excalibur cables are also available with or without BigFoot silent plugs).

The original ground lifted instrument to amp cable, the LineCable series features a telescoping shield configuration whereby the shield is lifted at the instrument and tied at the amp for lower noise. The LineCable series also incorporate’s 223B wire with bi-wire technology. Normally found in low-impedance mic cables and balanced line instrument connections, this two-conductor shielded wire helps reduce noise from single coil pickups. The cable offers 94% coverage copper braid shield and is also available with right-angle plugs.

**Anatomy of The Instrument Cable**

- Center Conductor: carries current (signal) from the source (instrument)
- Insulation: separates the conductor from the shield
- Extruded Barrier: reduces handling noise
- Shield: helps to prevent outside interference (from lights or AC) from entering the audio signal
- Outer Jacket: for protection and appearance

**The LineCable Process**

LineCable instrument cables utilize a unique construction process to seal inner conductors along with the solder connection, in an inert plastic resin. The cable is reinforced with two layers of thermal compression sleeving for protection and the ultimate in noise rejection.

1. Solder connections are permanently encapsulated for extra strength and insulation
2. Heat-shrink tubing is applied over the plug's strain relief for added reinforcement at the flex point
3. Metal bonding cement is applied to the plug's threads to weld the metal parts together
4. An outer layer of protective heat-shrinkable tubing is applied to complete the double-sleeved strain relief

Guardian Series (Black Jack, Defender, Sir Tweed)

**Black Jack** - Elegant and Bullet-Proof
If you're in need of an elegant, great-sounding instrument cable that will last a lifetime, Black Jack is the one! Kevlar reinforced for unmatched strength and dependability, Black Jacks are low inductance, ultra-flexible cables which provide tight bass, unmasked midrange and clean, open highs. Unlike highly-resistive steel inserts and tubing in other products, Black Jacks feature custom G&H connectors with gold plated, machined brass components and an oxygen free copper center conductor which will never break off.

**Defender** - The Humbucking Guitar Cable
Designed to be the last instrument cable you'll ever need, Defender is the best sounding, most reliable cable you can buy today. Utilizing Proco's hum-bucking AmeriQuad bi-wire geometry, which reduces noise up to 20dB over standard designs, Defender can quiet even noisy single coil and hum-bucking guitar pickups. Kevlar reinforced for unmatched strength and dependability, this cable features the unique Lifelines construction process and is terminated with gold-plated, machined brass tip and sleeve with an oxygen free copper conductor.

**Sir Tweed, Sir Tweed Woody** - Vintage look... unsurpassed flexibility
Great looks, great sound and indestructible construction- Sir Tweed is the choice for guitarists who want the best cable available. With a true nylon overbraid and Kevlar reinforced core, Sir Tweed is built for a lifetime of use and abuse. The 41-strand center core conductor and copper shielding provide superior signal flow and noise rejection with low capacitance. Sir Tweed is terminated with the best connectors made; gold plated machined brass with a solid, oxygen free copper conductor in the center that will never break off.

With the same great specs as the original Sir Tweed, the Sir Tweed Woody features a solid-wood plug barrel for added distinction. The 41-strand center core conductor and copper shielding provide superior signal flow and noise rejection with low capacitance.
The Benefits of Kevlar

There are typically two places where a guitar cable will break. One is at the connector. Constant tugging and stretching (and trying to whip a cable out of the amp from 5 feet away) will put continuous stress at the delicate solder points. Having Kevlar strands intertwined with the center conductor provides an unbelievably strong strain relief. The other place most prone to abuse is about two inches down from the connector. By wrapping their cable around their strap button night after night, an unbelievable amount of stress is put on a very small section of the cable, stretching it over time and eventually breaking it. The unstretchable Kevlar will keep the cable from stretching and breaking over time.

A by-product of the Kevlar which isn’t as apparent is that it actually keeps the cable from becoming noisier as it becomes older. How? A normal cable itself will actually stretch over time. Over the course of a few years a 20ft guitar cable may actually stretch about 6 inches. Besides the obvious stretching of the center conductors, the shielding will also stretch and, therefore, become thinned out. A cable with a shield covering 95% of the wire may only have a coverage of 92% after a period of time, increasing the cable’s susceptibility to noise.

Defender (Same as Black Jack except)

- Designed to be the last instrument cable you will ever need—ideal for use with noisy single coil pickups.
- AmeriQuad Conductor configuration—24-gauge, high-purity copper conductor are bi-wired in two pairs to reduce inductance and cancel noise for crisp distortion-free sound—reduces noise up to 20dB over standard designs
- Organic Fiber – Low-dielectric insulation holds the critical geometry of the conductor to minimize capacitance and reduce interference
- Specially braided copper shield provides 96% coverage for the best possible reduction of exterior noise
- Lifelines construction

All Guardian Cables include a Lifetime Warranty - any excuse...even abuse

Sir Tweed and Sir Tweed Woody
(Same as Black Jack except)

- Vintage tweed look in a durable, yet highly flexible overbraid. The rich-looking nylon overbraid matches exactly the color and heritage of the 1960’s vintage amplifier coverings
- Sir Tweed terminates with gold handles, Sir Tweed Woody (TW01) has oak wooden handles and is plain with no grooves. Sir Tweed Woody (TW02) has oak wooden handles and grooves.

PROCO SOUND

PATCH CABLES

Standard, Dual, Y and MIDI Patch Cables
Proco produces patch cables for nearly every application imaginable, in dual, “Y” and single-line configurations as well as specialty cables for MIDI and computer applications.

MIDI+
- Solid-shell DIN connectors only
- Excellines 424F (four 35 gauge connectors, 100% foil shield) digital transfer wire
- 5-pin DIN to 5-pin DIN plug (all five pins connected)
- Available in lengths from 3 to 50 feet.
- 10 Year Warranty

Single Unbalanced Patch (P) Cables
Proco patch cables were designed to connect unbalanced signals in today’s sound and recording systems. They are constructed using Proco 120SM ArmorFlex single conductor spiral shield wire with ShowSavers 1/4” plugs and/or Proco HD (heavy duty) RCA connectors. Available in QR (1/4” to RCA) and RR (RCA to RCA) configurations.

- Reliable interconnects for line-level patching.
- 1/4” BigFoot Phone Plug
- Heavy Duty RCA Phono Plug
- 20 AWG Proco 120SM wire in black
- 100% coverage extruded barrier PVC shield plus 70% coverage copper spiral shield
- 10 Year Warranty

Dual Unbalanced Keyboard (DK) Patch Cables
Dual keyboard cables are designed to connect today’s stereo keyboard outputs to mixers for stage and recording use. They are constructed of two single conductor cables “twinned” together for ease of use and are offered with ShowSavers 1/4” phone plugs or Proco HD RCA male ends to accommodate a variety of input and outputs. Available in QQ (1/4” to 1/4”), RR (RCA to RCA) and QR (1/4” to RCA) configurations.

- High quality, “low crosstalk”, stereo interconnects
- 1/4” BigFoot Phone Plug
- Heavy Duty RCA Phono Plug
- Color-coded Left/Right
- 2 x 20 AWG Proco 2120SM parallel construction wire in black
- 100% coverage extruded barrier PVC shield plus 70% coverage copper spiral shield
- 10 Year Warranty

Military Spec PJ (Phone Jack)-Series Patch Cables

The phone company invented the phone plug in 1885, a long time ago. They are built differently than the 1/4˝ connectors you are used to seeing in audio, but perform exactly the same function in military type jackfields. These 1/4˝ tip/ring/sleeve (TRS) mil spec cables use Neutrik’s especially designed connectors and Proco’s 424BK wire to make these sturdy, long-life assemblies. These connectors are typically used in theatres and Broadway shows and are not commonly used in the portable world.

- Premium quality cable assemblies for military-type jackfields.
- Neutrik NP3TB 1/4˝ Military Spec TRS Phone Plugs
- 4 x 24 AWG Proco 424B “AMERIQUAD” Wire in Black, Brown, Red, Orange, Yellow, Green, Blue, Violet, Grey, and White
- 96% Coverage Copper Braid Shield
- 10 Year Warranty

TT (Tiny Telephone or “Bantam” Plugs) Cables

Most professional recording studios TT TRS patchbays because they offer 96 patch points in a single-space 19˝ rack panel. Proco’s TT cables are ShowSavers Bantam plugs and Proco miniature wire to perform this important patching function. Use for high density needs where rack space is at a premium. Available in TT to TT versions, and also TT to XLR male and female connectors or 1/4˝ TRS phone plugs.

- Premium quality cable assemblies for Bantam/Tini-telephone jackfields.
- Neutrik NP3TT 4.4mm TRS Bantam/“Tini-Telephone” Plugs
- 2 x 24 AWG Proco 224SM miniature mic cable with spiral shield (in Black)
- 80% Coverage Copper Braid Shield
- Standard lengths include 2 and 3’ lengths
- 10 Year Warranty

“Y” Cords

Proco makes standard “Y” cords, the most basic of which are constructed with one 1/4˝ phone plug (male or female) to two 1/4˝ phone plugs (male or female). The same concept can be built using male and female XLR connectors and RCA phono plugs. Uses 2120SM or 224SM Proco patch wire with spiral shield (100% coverage extruded barrier PVC shield plus 70% coverage copper spiral shield) and ShowSavers plugs, Neutrik XLRs and Proco HD (Heavy Duty) RCA connectors. 10-year warranty.

DN-X400

Professional Digital/Analog DJ Mixer

Based on the layout and technology of Denon's DN-X800 digital mixer, the DN-X400 takes full control of advanced mixing and performance features. With two digital outputs, the DN-X400 makes it possible to record directly to the Denon DN-C550R dual CD recorder/player, as well as mark tracks on-the-fly with the Track-Mark function. Also included are Input Gain controls, along with H1, M1D, and LOW tone controls (-26dB +10dB) on all four main channels, including the mic channel, for further manipulation and tweaking of input signal.

- 10 inputs for connecting to multiple devices: 8 line inputs, including 2 phono connections, and 2 balanced mic inputs (1/4˝ TRS) with Post on/off switches.
- A balanced Send/Return effects loop provides even more flexibility when connected to outboard effects and other devices.
- Six outputs include 2 digital outs (coax and optical S/PDIF), balanced Master and Zone, and unbalanced Master and Tape outputs.
- A subwoofer output is provided along with a control for crossover frequencies to be sent to the sub for greater sonic precision.
- High-quality VCA style 45mm slide faders for precise control
- Cross fader assignment selector and contour level controls allow for smooth and stable transitions between program material, while Cue and Program pan controls give the user even greater sonic separation capabilities.
- 3-band line EQ (-26dB +10dB) and 3-band mic EQ (+12db)
- Cross and channel fader-start trigger is possible and compatible with Denon CD players
- For easy visibility and instant recognition, a split cue/H/P monitor and display with a Zone meter adjustment are included.
- Subwoofer output can also be used to remotely trigger any lighting system that accepts an audio input.

Designed with today’s cutting edge DJ requirements in mind, the DN-X400 and DN-X800 offers high-quality playback along with a multitude of input and output options in a single four rack-space unit.

DN-X800

Professional Digital/Analog DJ Mixer with X-Effect

The DN-X800 steps up (no Track Mark) from the DN-X400 with full control of advanced mixing capabilities and performance features found on Denon's DN-1800F, DN-2100F and DN-2600F CD players. X-Effects such as Denon's Hot Start, Fader Start, Brake and Sampler functions can be controlled through the DN-X800.

- The DN-X800 features 14 inputs including 4 digital S/PDIF, as well as 8 line and 3 phono connections. 2 mic inputs (balanced and unbalanced with Post on/off switch) and a balanced Send/Return effects loop provides even flexibility when connected to outboard effects and other devices.
- Eight outputs include 2 digital S/PDIF, balanced Master and Zone, and unbalanced Master, Booth and Tape outputs.
- What is X-Effect?
  X-Effect means enables you to manipulate the special features of Denon’s Double CD Players from the DN-X800. Now you can trigger the Sampler feature of the DN-X800, and the Hot Start & Brake effects of both the DN-2600F and DN-2100F, which means you don’t need to use both hands to operate the CD player and Cross Fader at the same time.

- Sampler Trigger (DN-2600F)
- Brake/Platter-S Effect Trigger for Hot Start (DN-2100F/2600F)
- Hot-Starts Trigger (DN-2100F/2600F)
- Simple (5v pulse) Fader-Start Trigger (DN-1800F/2100F/2600F)
Tabletop CD Player

The DN-S5000 offers a number “firsts” for the digital DJ. A “motor driven active platter” provides the ultimate feel for true vinyl emulation, while the unique “Alpha Track” feature lets you access different tracks from the same CD simultaneously. You can even “mix” the tracks. And in the “Hot Disc” mode, you can eject a disc and it will still play for another 35 seconds, while you cue up your new disc.

The DN-S5000 will let you control many aspects of your performance as if you had two decks playing, when in fact, you’re only running the one. Combine two DN-S5000s and now you have a true digital powerhouse! Using the DN-X800 (connected through the built-in X-Effect Ports) you can connect two DN-S5000 and gain additional fader control, exchange Memo data and control various play modes of the two decks. Of course, there is an array of digital and analog inputs/outputs, as well as numerous dedicated controls.

**FEATURES**

- Motor-driven active platter for true vinyl emulation
- Alpha Track (2 in 1) allows independent and simultaneous playback of another track from the same disc, mix tracks with one drive instead of 2
- Hot Disc lets you eject a disc during play and have it continue for another 35 seconds, and you can loop within Hot Disc memory
- 3-way Scratch lets you apply scratch effects by selecting Main, Alpha or Sampler Track as the source
- Mirror Mix lets you select the same track in Main and Alpha Track and play it after a specified time delay
- Clear Scratch Disk allows you create your own custom slip mat designs
- Two DN-S5000s can be connected to a DN-X800 Mixer via the X-Effect ports and be operated by the faders. Two DN-S5000s can also view each other’s Memo data when connected via X-Effect I/O ports
- Relay Play, Program Relay Play, Random Relay Play are possible when two DN-S5000s are connected together
- Independent digital outputs (coax, S/PDIF) for Main and Alpha Track. Constant digital output at 44.1kHz is possible even when Playback Speed is changed
- With digital connection all effects can be output
- Dedicated Alpha Track Fader Start port
- Manual input of BPM values (*AUTO BPM and Manual TAP are also possible)
- Switchable display of Main and Alpha Track times
- 100 mm long slider for playback speed control
- Four Hot Start sounds can be played
- Four seamless loops can be made
- A-B Splice removes unwanted sections of a track seamlessly (2 points per track)
- The A & B points for the seamless loop, sampler loop, and splice points can easily be adjusted using the Scratch Disc
- Six Stutter Cue Play Points
- Two samplers (approx 15 seconds in 20Hz - 20kHz, 16-bit, 44.1kHz quality)
- Recessed connecting terminals on the back panel to avoid damage
- Up to 5,000 loops and cues can be stored internally and/or copied to another DN-S5000. Memo from a DN-D9000 or DN-2600F can also be copied to a DN-S5000
- Instant Start (0.2 sec)
- CD-R/RW disc playback
- Program/Random Play - program up to 25 tracks on a CD for playback and the programs for up to six discs can be stored in memory
- Random Play of CDs loaded in both drives is also possible
- Pitch Control: ±4%, 10%, 16%, 24%, 100%
- Shock Proof Memory - Main 16 seconds, Alpha Track 16 seconds

**Customizable Preset Functions (*Default)**

- Auto Cue: ON*/OFF
- Pitch Range: ±4/ ±10*/ ±16/ ±24%
- ALPH A-Track Output: Main out*/ (Alpha) Monitor out
- Platter: Turn round*/ Turn stop
- Platter Mode Memo
- Auto Load: OFF*/ 10/ 30 / 60 seconds
- EOM: OFF / 10*/15/20/30/60/90 seconds
- Digital Output Level: Normal*/ -6 dB Down
- Fader: PlayCue*/ Play/Pause
- Power On Play: ON / OFF*
- A3/4 MODE: Sampler*/4H/S/Alpha Track H/S
- Single Continuous: Single*/ Continuous
- Elapsed/Remain: Elapsed*/ Remain
- Program All Clear: YES/NO*
- Memo All Clear: YES/NO*
- Memo All Copy: YES/NO*
- Preset Clear: YES/NO*
DENON

DN-2600F

Dual CD Player

A top-of-the-line DN-2600F incorporates two Hot Starts per drive—perfect for instantaneously changing a track or Cue point at the touch of a button. The same Hot Start buttons can also be used to control the machine’s Stutter mode, which plays momentary audio as the buttons are pressed down and then recues to the original point when they are released. An ‘Effector’ mode enables DJs to bring a whole new level of expression to their performances by offering fully customizable frequency filter, reverb and flanger effects. The latter two of these effects may be synced to the music’s beats per minute count via the Tap/BPM button, producing reverb decays and flange sweeps that coordinate perfectly with the tempo of the playback material.

FEATURES

- Up to 16 seconds of CD sound can be sampled and played back at any time, even when the source CD has been removed. This sample can be played or looped in forward or reverse direction. Pitch, output level and key adjustment functions can all be used to manipulate the sample.
- The DN-2600F offers a collection of turntable effects to the digital domain:
  - ‘Real-time ‘Digi-Scratch’ effect allows DJs to simulate analog vinyl scratching on the fly.
  - “Platter Start” and “Platter Stop” emulates the effect of starting and stopping playback on a turntable.
  - Rotating the jog dial in “Platter Hold” mode duplicates the sound of speeding up or slowing down a record by changing the player’s pitch control.
  - Brake effect, Key Control and Key Adjust are controllable via the jog dials.
  - Pitch Bend may also be activated via the jog dials (±32%), as well as on dedicated buttons (±18%) and sliders.
- Most buttons including Cue, Play/Pause, Loop A1, A2 and B, and Open/Close are backlit for maximum visibility and ease of use in low light environments. In addition, the large fluorescent tube displays and numerous LEDs give the DJ a clear indication of the player’s status at a glance.
- Takes A-B Seamless Looping one step further by offering two completely independent loops per drive. ‘Next Track Reserve’ function provides seamless track jumping.
- Extensive Custom memory allows users to store Hot Starts, A-B Loop points and Pitch percents on up to 300 tracks for later recall.
- Rotary Track Selector/Data Master knobs enable users to perform a wide variety of functions quickly and intuitively.
- Large jog dial/shuttle wheels offer smooth searching, scanning and effects controlling.
- Drives 1 and 2 are equipped with independent Fader Start input
- Pitch range of ±10% or ±16% adjustable in 0.1% steps
- Ten seconds of ‘shock-proof’ memory per drive guards against interruptions due to external mechanical shocks such as bumps, ideal for nightclub-installed applications.
- Playback modes include Program, Continuous, Single and Random Play
- Auto cue to music eliminates silent portion at the beginning of CD tracks

DN-D4000 Double CD/MP3 Player

The affordable DN-D4000 offers extensive MP3 support including VBR and CBR, folder/file search, ID3-Tag display (Artist, Album & Title) among a host of innovative features:

- CD Text display
- Track and disc memo functions ( 300 tracks per drive, 10 discs per drive).
- ±4%, ±10% or ±16% pitch control
- 2 seamless loops per drive and 2 hot starts and stutter cue points per drive.
- ±18% pitch bend
- S/PDIF digital output
- 50mm jog/shuttle wheel
- Fader start, Instant start
- 10 sec. CD /100 sec. MP3 shock proof memory
- Relay, Program, Repeat Play, Power on Play
- 2-way Pitch Bend -by Jog Wheel and buttons
DENON
DN-9000

Dual CD Player
The latest in Denon’s innovative line of DJ products, the DN-9000 offers many proprietary and “world’s firsts” for professional CD players. These include ALPHA Track Play/Mode, A-B Slice function, the ability to create four Hot Start points per drive (Start Point A1, A2, A3 and A4), and the addition of up to 6 Stutter Cue play points. Besides the full sampling capabilities, the DN-D9000 has a built-in Effector function, providing 6 effects (up to four at a time), including Delay, Flanger, Filter (2 types), and Transform (2 types), all fully interruptable instantaneously using the Effector’s Bypass button.

FEATURES

- ALPHA Track Play/Mode allows independent and simultaneous playback of two tracks from the same disc, allowing manual mixing of two tracks (Sub and Main), using only one deck.
- This ALPHA track playback allows for mixing of the Sub and Main tracks, as well as an integrated ALPHA track Pre-Monitoring function for monitoring the Sub track during Main track playback in real-time.
- A-B Splice function removes unwanted sections of a track seamlessly on the fly.
- Not only can you scratch in real-time, you have the ability to scratch your Samples too with choice of directional sound movement. (Forward/Reverse)
- You can create four Hot Start points per drive (Start Point A1, A2, A3 and A4)
- 6 Stutter Cue play points
- 2 samplers per drive of the unit (approximately 15 seconds, CD quality).
- Create up to four seamless Loops within a track or disc, which can further be adjusted via the jog wheel during Loop playback.
- Constant Digital Out (44.1 kHz with subcode) even when playback speed is changed. And since the DN-D9000 can be connected to the DN-X800 DJ mixer over a digital interface, you won’t lose any sound quality when you record your own CDs.
- Auto/Manual BPM Counter (count music BPM manually by simply tapping a button)
- CD-R/RW Disc Playback
- Activate any of the Sampler, Effector, or Scratch special effects at any time during playback. Jump among the three of them, or activate all three at once.
- Built-in Effector function provide 6 effects (up to four at a time), including Delay, Flanger, Filter (2 types), and Transform (2 types), all fully interruptable instantaneously using the Effector’s Bypass button.
- Includes 5 Platter modes:
  - Drag-S: Gradually raises playback speed to normal speed after you start playback.
  - Brake: Gradually lowers playback speed to a stop when the Pause button is pressed.
  - Echo: If Echo is ON when Pause is pressed, the playback sound is repeated over and over as it fades out to a stop.
  - Reverse: Playback shifts into reverse when the Parameter knob is pressed during playback.
- Program Play (up to 25 tracks on a CD) and programs for up to 6 discs can be stored in memory. Random Play of CDs loaded in both drives is also possible.
- Single and continuous mode Relay Play: shifts playback to the CD in the other drive after the track or after playback of the the entire disc in the current drive ends.
- Pitch Control
  - Main/Alpha Track: Max. ±100% (select from ±4, 10, 16, 24, 100%; ±4%: 0.05% step, ±10, 16, or 24: 0.1% step, ±100%; 1% step)
  - Sampler 1/2: ±24%, 0.1% step
- Pitch Bend
  - ±12% Pitch Bend (when variable pitch range is ±4 or 10%), ±26% (when variable pitch range is ±16 or 24%), ±100% (when variable pitch range is ±100%)

Ergonomically designed, large 70mm illuminated jog wheel helps give a more precise scratch and solid feel to the unit, also for use with the Platter Hold function, allowing for extreme pitch bends of ±100%.

Memo function, for storing up to 5,000 points: Cue point, Playback Pitch, Pitch Range, Pitch ON/OFF, Key Adj ON/OFF, and Seamless Loop A and B data can be stored independently for Normal and track playback. This data can also be copied to another DN-D9000. MEMO from a DN-2600F can also be copied to a DN-D9000.
GEMINI

TURN TABLES

The XL-Series professional manual turntables feature a start/stop function and run at 33 and 45 RPM. Headshell and a slipmat are included.

XL-120 and XL-200
Belt Drive Manual Turntables
- ±6% (XL-120) or ±10% pitch control
- CN-25 cartridge included
- 33/45 RPM
- Anti-skate feature, strobe illuminator
- S-shaped tone arm
- Feather light touch start/stop function
- Removable headshell & slipmat, dust cover

XL-300 and XL-500 II
Direct Drive Manual Turntables
- ±10% pitch control (with pitch bend on the XL-500 II)
- Anti-skate feature, strobe illuminator
- 33/45 RPM, S-shaped tone arm
- Feather light touch start/stop function
- Removable headshell & slipmat, dust cover
- XL-300 includes CN-25 cartridge, XL-500 II is available with cartridge (XL-500IIc)

SA600 II
G-Force Straight Tone Arm Direct Drive Turntable
- ±10% pitch control with pitch bend
- Feather-touch start/stop control
- Pop-out Target light
- Strobe illuminator
- Anti-skate adjustment
- XLR lamp adapter
- Dual volt capability
- Angled Headshell & Slipmat included
- Available w/cartridge (SA-600IIc)

PT Series
High-torque direct drive quartz lock professional turntables feature locking reverse button, pitch bend, arm-lift height adjustment, up to 7 grams of tone arm pressure, strobe illuminator, and included headshell.

PT-2100
Direct Drive Manual Turntable
- ±10% pitch control
- Soft-touch start/stop button

PT-2400
Direct Drive Manual Turntable
Same as the PT-2100 plus-
- LCD shows speed, pitch & platter direction
- 33, 45 and 78 RPM
- Pop-up target light
- Anti-skate adjustment

PDT-6000
Digital High Torque Turntable
- Digital direct drive manual turntable
- Super high torque motor
- Master tempo function
- Key controller
- Torque and brake sensitivity adjustment
- Pitch range of ±4%, 8%, 16% or 35%
- BPM/pitch LCD display
- Reverse platter lock
- Digital and line level outputs
**GEMINI**

**CD PLAYERS**

**PROFESSIONAL TOP LOAD CD PLAYERS**

**CDJ-15**
DJ CD Player
- Instant start
- ±16% variable pitch control
- Frame accurate search
- Cue to music
- Single auto cue/continuous play button
- Mechanical anti-skip protection

**CD-1800X**
CD Player with Scratch Effects
Same as the CDJ-400X plus:
- Real-time scratch effects
- 4 instant start cue buttons
- Pitch range of ± 4%, 12% and 16%
- Robo Start (relay play) 2 players needed
- Slot type CD Drive
- Direct access track selection & Auto BPM

**CDX-602**
Dual Transport CD Player
Same as the CDX-601 plus:
- Dual CD player
- Seamless looping
- Anti-shock memory

**CDX-601**
Single Transport CD Player
- Looping
- Auto-calibration
- Digital output
- Automatic disc calibration system (advances CD R’s and adjusts the player for format problems)
- Instant start
- Frame accurate
- Jog wheel
- Digital output
- Robo start (relay play)
- Fly cue and pitch bend
- Pitch range of ± 4%, 8% and 16%
- Multi-speed jog search wheel

**CDX-802**
Dual Transport CD Player
Same as the CDX-602 plus:
- Seamless looping
- Anti-shock memory

**CDX-2000X**
3U Scratch CD Player
Same as the CDX-802 plus:
- Real-time scratch effects
- Instant start
- Frame accurate
- Digital signal processing with zoom (flange), filtering, echo, reverse and braking
- 6 Instant start cue buttons per transport
- 2 Seamless loops per transport
- 8 second digital sampler per transport
- Anti-shock memory
- Master tempo (change the tempo without affecting the pitch)
- BPM counter
- 4%, 12%, 24% or 100% pitch range
- Large jog wheel for pitch bend, effects and digital scratching

**19” RACKMOUNT CD PLAYERS**

**CDX-601**
Professional CD Player
- Looping
- Auto-calibration
- Digital output
- Automatic disc calibration system (advances CD R’s and adjusts the player for format problems)
- Instant start
- Frame accurate
- Jog wheel
- Digital output
- Robo start (relay play)
- Fly cue and pitch bend
- Pitch range of ± 4%, 8% and 16%
- Multi-speed jog search wheel

**CDX-1800X**
Dual Transport CD Player
Same as the CDX-601 plus:
- Dual CD player
- Seamless looping
- Anti-shock memory

**CDX-802**
Dual Transport CD Player
Same as the CDX-602 plus:
- Seamless looping
- Anti-shock memory

**CDX-2000X**
3U Scratch CD Player
Same as the CDX-802 plus:
- Real-time scratch effects
- Instant start
- Frame accurate
- Digital signal processing with zoom (flange), filtering, echo, reverse and braking
- 6 Instant start cue buttons per transport
- 2 Seamless loops per transport
- 8 second digital sampler per transport
- Anti-shock memory
- Master tempo (change the tempo without affecting the pitch)
- BPM counter
- 4%, 12%, 24% or 100% pitch range
- Large jog wheel for pitch bend, effects and digital scratching

**SCRATCH PROFESSIONAL FRONT LOAD CD PLAYER**

**CD-400X**
CD Player with Digital Effects
Same as the CDJ-20 plus:
- ±16% variable pitch control w/pitch bend
- 10-40 second anti-shock memory
- Direct access to track and cue point
- Jog Wheel

**CDX-602**
Dual Transport CD Player
Same as the CDX-601 plus:
- Dual CD player
- Seamless looping
- Anti-shock memory

**CDX-601**
Single Transport CD Player
- Looping
- Auto-calibration
- Digital output
- Automatic disc calibration system (advances CD R’s and adjusts the player for format problems)
- Instant start
- Frame accurate
- Jog wheel
- Digital output
- Robo start (relay play)
- Fly cue and pitch bend
- Pitch range of ± 4%, 8% and 16%
- Multi-speed jog search wheel

**CDX-802**
Dual Transport CD Player
Same as the CDX-602 plus:
- Seamless looping
- Anti-shock memory

**CDX-2000X**
3U Scratch CD Player
Same as the CDX-802 plus:
- Real-time scratch effects
- Instant start
- Frame accurate
- Digital signal processing with zoom (flange), filtering, echo, reverse and braking
- 6 Instant start cue buttons per transport
- 2 Seamless loops per transport
- 8 second digital sampler per transport
- Anti-shock memory
- Master tempo (change the tempo without affecting the pitch)
- BPM counter
- 4%, 12%, 24% or 100% pitch range
- Large jog wheel for pitch bend, effects and digital scratching

**19” RACKMOUNT DUAL CD PLAYERS**

**CDX-601**
Professional CD Player

Tables
These adjustable tables are an excellent portable solution for setting up your mobile DJ equipment.

AT-5422 Adjustable Table
Fold out adjustable legs adjust from 26½” up to 39½”. The tabletop surface dimensions are 54 x 22” and it weighs 32 lbs. 119.95

AT-6022 Adjustable Table
The same adjustment dimensions as the AT-5422, but with tabletop dimensions of 60 x 22” and a weight of 36 lbs. 125.95

Mobile DJ Cases

DCV-84
Holds 84 CD jewel cases or 252 view packs. 3 rows wide. Surface hardware dimensions: 6¼ x 24¼ x 13½” (HWD). Weighs 8 lbs. 69.95

DCV-112
Holds 112 CD jewel cases or 336 view packs. 4 rows wide. Surface hardware dimensions: 6¼ x 25¼ x 13½” (HWD). Weighs 10 lbs. 69.95

DCV-168
Holds 168 CD jewel cases or 504 view packs. 6 rows wide. Surface hardware dimensions: 6¼ x 36¼ x 13¾” (HWD). Weighs 15 lbs. 99.95

DCV-310c
Holds 310 CD jewel cases or 930 view packs. 7 rows wide. Recessed hardware with casters on one end for easy transport. Dimensions: 7¼ x 48 x 18¾” (HWD). Weighs 35 lbs. 189.95

ER-Equipment Racks
These racks feature a 16½” body depth not including front and rear lids.

Numark CD Mix 1 or 2 Cases

NUM-CD 1/S Carpet Style Case
Holds one Numark CD Mix 1 or 2 player. Rear spacing accommodates power supply and cables. Surface hardware. Dimensions: 7¾ x 20½ x 17¾” (HWD). Weighs 18 lbs. 119.95

NUM-CD 1/R Carpet Style Case
Holds one Numark CD Mix 1 or 2 player. Rear spacing accommodates power supply and cables. Recessed hardware. Dimensions: 7¾ x 20½ x 17¾” (HWD). Weighs 18 lbs. 139.95

F-NUM-CD 1 Flite Style Case
Holds one Numark CD Mix 1 or 2 player. Rear compartment to accommodate the power supply and cables. Cable port in rear for easy passage of wires. Dimensions: 9 x 20¼ x 17¾” (HWD). Weighs 19 lbs. 149.95

Guitar Maintenance Table
Lower neck support for electric guitars, upper neck support for acoustic guitars. Compartments for holding tools and small miscellaneous parts. Dimensions: 2¼ x 32¼ x 18¾”. Weighs 3 lbs. 64.95
**TL-Series CD Workstations**

The TL-Series is a portable CD workstation case which accommodates the mobile DJ with a well-loaded CD setup. This series comes with a trap door on the back for full access to wires and hook-ups. Surface mounted hardware is standard.

**TL-252**
Bottom: 2-space rack. Center slant: 5-space rack. Top: 2-space rack. Dimensions: 16 1/2 x 20 3/8 x 16 3/4" (HWD). Weighs 19 lbs. ........................................... 164.95

**TL-253**
Bottom: 3-space rack. Center slant: 5-space rack. Top: 2-space rack. Dimensions: 17 1/2 x 20 3/8 x 16 3/4" (HWD). Weighs 21 lbs. ........................................... 163.95

**TL-363**
Bottom: 3-space rack. Center slant: 6-space rack. Top: 3-space rack. Dimensions: 20 3/8 x 20 3/8 x 19" (HWD). Weighs 24 lbs. ........................................... 189.95

**TL-484**
Accommodates a full-loaded CD workstation. Optional CD carrying lid makes for a portable and compact setup. Bottom: 4-space rack. Center slant: 8-space rack. Top: 4-space rack. Dimensions: 26 1/2 x 20 3/8 x 23" (HWD). Weighs 31 lbs. ........................................... 208.95

**TL-484CD** Same as above with CD carrying lid ........................................... 239.95

**OU-1284CT**
**OU Series Rack**
This case features a front lid which has fold out legs to convert it into a table that mounts on either the right or left side of the case - adding more work area. 12 space bottom, 8 space slant, 4 space top. Dimensions: 43 x 203/4 x 23 1/4. Weighs 84 lbs. Accepts an additional optional table............. 413.95

**Club Racks**
Grundorf Club Racks feature pressure-fit front and back covers. The CR-Series are simple and economic racks which are available in various rack mount spacings. These are equipped with all black hardware including plastic stackable corners and a port in each cover to aid in removing and/or running cables.

TURN TABLES & CARTRIDGES

FUSION SERIES TURN TABLES

**TTX1**
- Direct drive ultra-high torque open motor (+3.7 kgf-cm peak)
- Straight and S-shaped tone arms included
- “Solid-Core” steel top, rubber base
- Interchangeable pitch fader and button cartridges for club and battle style
- Detachable power and audio connections
- Removable Target light with super-bright white LED
- Blue illuminated display with 10, 20 and 50% pitch range, 33, 45, 78 RPM, reverse, adjustable brake and startup times
- Digital out, line output, key lock

**TT200**
- Direct drive super high torque motor
- Straight and S-shaped tone arms
- Battle and cub style design
- Steel top, rubberized base, aluminum platter
- User-replaceable pitch fader, removable aluminum light
- Detachable power and audio connections
- 33, 45, 78 RPM, reverse

**TT1650**
- Direct drive high torque motor
- Battle and cub style design
- Removable target light
- Aluminum platter
- Detachable power and audio connections
- 33, 45 RPM

**TT1600**
- Efficient belt drive motor
- Battle and club style design
- Detachable power and audio connections
- 33, 45 RPM

CARTRIDGES

**CC-1** General Use Cartridge
- Plug-in silver design
- 18 grams, 6v output
**CC-1** Replacement styli for CC-1

**CS-1** Club Cartridge
- Plug-in design with rubber grip handle
- 18 grams, 6v output
**CS-1** Replacement styli for CS-1

**CX-1** Scratch DJ Cartridge
- Plug-in rugged design; Silver with blue tip
- 18 grams, 6v output
**CX-1** Replacement styli for CX-1

Groove Tool Headshell Mountable Cartridge
- .6 mil spherical diamond tip cartridge with 2.5g to 3.5g tracking force
**Groove Tool** 2 extra stylus

Wax Rider Headshell Mountable Cartridge
- .6 mil spherical diamond tip cartridge with 2.5g to 4.5g tracking force
**Wax Rider** 2 extra stylus

EQUIPMENT LEASING AVAILABLE
**DM950**

*2 Channel 8˝ Mixer*
- 2 phono, 2 line and 1 Mic input
- Master and record outputs
- Channels contain 2-band rotary EQ, gain

**DM1001X**

*2 Channel 10˝ Mixer*
Same as the DM 950 PLUS-
- 4 phono, 2 line and 1 Mic input
- Master and record outputs
- 3-band EQ and PFL meters
- Transform buttons
- Replaceable crossfader with slope and "hamster" control

**DM1002X**

*2 Channel 10˝ Mixer*
Same as the DM 1001X PLUS-
- -35 dB KILLS switches for bass, mid and treble

**DM3000X**

*3 Channel 10˝ Mixer*
- 3 phono, 3 line and 1 Mic input
- Master with pan, record, PFL send for sampling, fader start
- Channels contain gain, 3-band rotary EQ
- Assignable crossfader with hamster and slope adjust

**DM3001X**

*3 Channel 10˝ Mixer*
Same as the DM 3000X PLUS-
- Master, Booth, Record and PFL cue send for sampling outputs
- Bass, Middle, and Treble KILL switches
- Unique punch IN/OUT transform buttons, panning

**DM3002X**

*3 Channel 10˝ Mixer*
Same as the DM 3001X PLUS-
- PFL meter, post process loops

**MATRIX 2**

*2 Channel 10˝ Mixer*
- 2 phono, 2 line and 1 Mic input
- Master, Record and Zone outputs
- Fader start crossfader with extra wide knob
- Channels have Gain, 3-band EQ, and PFL meters
- 1/4˝ and 1/8˝ headphone jacks

**MATRIX 3**

*2 Channel 10˝ Mixer*
Same as the MATRIX 2 PLUS-
- 2 phono, 6 line and 1 Mic input
- Master Balanced, Record and Zone outputs
- Process loop with blend control
- VCA crossfader with assign, slope, hamster, fader start, transform buttons, kill switches
- Channels contain long-life input faders, 3-band EQ, gain panning, 8 position toggles and PFL meters

**PDM01**

*24-bit Digital 2 Channel Mixer*
- 24-bit digital 2 channel mixer with 2 phono, 3 line and 1 Mic input
- Master balanced, booth, optical and coax digital outputs
- Digital, replaceable and interchangeable VCA faders with slope and reverse controls
- Digital crossfader with 8 functions
- Channels contain dual mode tone controls and filter controls
- Mini crossfader cueing with headphone tone control
- Master balanced, booth, optical and coax digital outputs
**NUMARK**

CD & MP3 PLAYERS

---

**TABLETOP CD PLAYERS**

Axis CD players have a recessed rear panel, all rubber buttons and are CDR compatible. They offer relay play, 6-way fader/remote start/pause or start/recue.

**AXIS 2**
- Large interactive pitch wheel, long pitch slider
- 10 sec. anti-shock, true buffered instant start
- ±8/16% pitch, sleep mode, digital output
- BPM counter, separate relay play

**AXIS 8**
- Real time scratching on 130mm jog wheel
- Direct access of 12 DSP effects
- ± 6, 12, 25 and 100% pitch control on 100mm fader
- KEY lock at any tempo up to ±100%
- Beatkeeper with auto-synchronization
- 2 complete seamless loops with 3 hot stutter starts
- Reverse and key change
- Adjustable startup and braking speeds
- MIDI in/out for effects, clock, interlocks, start/stop
- User programmable custom presets
- 48 seconds of buffer memory for anti-shock
- Transport bay illumination light
- Software is updateable via CDR

---

**RACK MOUNT CD PLAYERS**

**CDN 15**
- Single rack CDR compatible CD player
- Interactive pitch bend/search wheel with finger grip
- +/-8 or 16% pitch ranges
- Sleep mode to save laser life
- Direct track access with sequence programming
- Power switch protector, All rubber buttons
- Transport bay illumination light
- Digital output

**CDN 25**
Same as the CDN 15 PLUS-
- Dual rack mountable

**CDN 88**
Same as the CDN 33 PLUS-
- Real time scratching
- Reverse, up to ±%100 pitch
- KEY lock (master tempo with key control) up to 100%
- Built in Beatkeeper with auto-mixing and synchronization
- 2 seamless loops with 3 hot stutter starts
- Many DSP interactive wheel effects
- ± 6, 12, 25 and 100% pitch control
- User programmable custom feature set
- 48 seconds of buffer memory

**CDN 33**
Same as the CDN 25 PLUS-
- 20 second anti-shock
- True buffered instant start
- Light up play/cue buttons
- Additional rotary track access
- Relay play, 6-way fader/remote start/pause or start/recue

**CDN 90**
Same as the CDN 88 PLUS-
- Adjustable startup and braking
- Saves 3,000 cue points in memory
- MIDI in/out
- User upgradeable
- Sleep mode

**MPCD3 MP3**

MP3 CD Player

- Single rack mount player plays M P3 files from CDR and audio CDs
- 999 track index
- Direct track access with sequence programming
- Interactive pitch bend/search wheel with finger grip
- +/-8 or 16% pitch ranges
- Digital output

Professional DJ Mixer

The DJM-300 is a DJ mixer that will unleash your full creative potential. Its Auto BPM Counter, separate EQ and Fader Start Play function allow you to perform better and more easily than ever. And a host of other great functions add to the flexibility. Together with a CDJ-700 Series CD player, The DJM-300 is the ideal house or mobile music system that the professionals have been craving.

FEATURES

- Auto BPM Counter accurately measures the beats per minute of almost any kind of dance music automatically. This function includes a digital indication that allows you to confirm the tempo of the current selection at a glance and takes the guesswork out of comparing the beats of different selections. Additionally, the counter works equally well when monitoring the CD player and other digital sources or analog sources such as a turntable.

- Connecting the DJM-300 to the CDJ Series allows you to take advantage of Fader Start Play. By increasing the Fader, on the mixer, the player will automatically override the Pause control and start the music immediately. Fader Start Play also works during Cross Fading to bring out the best of sampler-style music.

- The special equalizer controlling the microphone input means you can set the EQ to HIGH to give your voice greater clarity and presence, or to LOW to enable a variety of microphone sound presentations. Moreover, the EQ can also be used to compensate for feedback or burst sounds.

- Using the rear-mounted switches, the rear PHONO inputs can be used as line-inputs to allow the connection of a number of sound-source combinations. In short, the DJM-300 allows even DJs who don't use an analog turntable to make flexible use of four separate sound source inputs.

- During normal operation, the DJM-300's level indicator displays the Master output level. When the Master/Channel Level button is pressed, the input level of each channel can be displayed in turn for quick confirmation of the current channel level input status.

HEADPHONE MONITORING SWITCHING

The headphone monitor switching function makes sound source monitoring more convenient and flexible than ever by allowing you to switch easily between all-channel stereo, all-channel mixed stereo and all-channel left/right distributed monitoring.

The DJM-300 combines high sound quality with industrial-use durability. Pioneer has employed industrial-use components for the Faders, Volume controls and other rotary controls, and the Cross Fader is designed to be easily replaced from the top panel. Regardless of the sound source, the DJM-300 reproduces all original input sounds faithfully and without unwanted distortion.

- The special equalizer controlling the microphone input means you can set the EQ to HIGH to give your voice greater clarity and presence, or to LOW to enable a variety of microphone sound presentations. Moreover, the EQ can also be used to compensate for feedback or burst sounds.

- Using the rear-mounted switches, the rear PHONO inputs can be used as line-inputs to allow the connection of a number of sound-source combinations. In short, the DJM-300 allows even DJs who don't use an analog turntable to make flexible use of four separate sound source inputs.

- During normal operation, the DJM-300's level indicator displays the Master output level. When the Master/Channel Level button is pressed, the input level of each channel can be displayed in turn for quick confirmation of the current channel level input status.
Professional DJ Mixer

The DJM-600 offers many innovative DJ-friendly features which will make it the standard in clubs. It is for artists, for those serious about music, for those serious about their mixes! Complete with an impressive arsenal of powerful effects, sampling functions, automatic beat synchronization, a choice of cross fader curve patterns... and superb sound quality — the DJM-600 is set to create the ultimate high!

To ensure the widest possible music-making flexibility, The DJM-600 is equipped with an industry-first auto beat sampler, which easily and accurately samples phrases in a BPM-linked operation along with an improved auto beat effector. In combination with Pioneer’s CDJ series, this advanced mixer gives DJs everything they need to make party music really come alive.

Auto Beat Sampler

This DJ function allows you to sample your favorite sources and play them back easily at the touch of a button. The BPM is measured digitally and recorded automatically exclusively for designated beats (1/2/4/8/16 beats, maximum interval: 8 seconds). If set to the Stand-By mode when no sound is present, the function automatically starts and stops recording in response to the presence or absence of the input signal and achieves the correct sampling with perfect timing. What's more, the user can edit the end position, making possible a wide diversity of playback effects by making use of three playback mode options and the cross fader start.

- **Single Play** - plays back the recorded sound once only when the button is being pressed
- **Loop Play** - plays back the recorded sound repeatedly when the button is pressed
- **Stretch Loop Play** - extends or shortens the recorded sound in accordance with the mixed track’s BPM and plays back the sound repeatedly

Auto Beat Effector

Linked to the BPM, the DJM-600 can add effects to each CH, MIC and MASTER independently. The user can produce music that makes full use of high-level DJ techniques by performing quick setting with the Beat Unit Switch button, adjusting the precise time parameters, or controlling the balance between the effect sounds and the original sounds by varying the mix ratio. Moreover, even when using the fader, it is possible to leave just the effect sounds with or without linking to BPM.

- **Delay** - produces repeat beat effect
- **Echo** - produces repeated sounds, which fade to create an echo effect
- **Auto Pan** - automatically throws sounds between left and right speakers
- **Auto Trans** - periodically cuts the sound
- **Auto Filter** - creates effects through manipulating sound frequencies
- **Flanger** - produces an electronic wave effect
- **Reverb** - produces a range of reverberation effects
- **Pitch Shifter** - manipulates music pitch within ±1 octave
- **Send/Return** (External effects input/output) - connects available peripherals (effectors, samplers, etc)

Auto BPM Counter

Equipped with a counter that automatically measures and digitally displays a track’s BPM (measurement range: 70-139/91-180/71-180/M anual), the DJM-600 provides a visual confirmation of a tracks tempo to allow the user to merge one song into another smoothly. Also, BPM s of tracks that are difficult to measure can be manually input by tapping on the TAP button.

Fader Start Play

- When connected to the CDJ Series of CD players, the DJM-600 can begin playback of a track using the cross fader or the channel fader
- Mix tracks without creating spaces by setting the stand-by track’s cue point and performing a single-action cut-in
- Since it returns to to the cue point via the back fader alone, sampler-style playback is also possible
- Start/back play of sources recorded using the built-in sampler is also possible using the cross-fader
**Channel Faders**
- Easily replaceable faders (5 Faders)
- Extremely durable and reliable touch faders

**Cross Fader**
- 3 selectable crossfade curve patterns
- Fader Curve echo effect enables smoother mixing

**Headphone Output with Separate Level Control**
- Assign any channel to the headphone out
- Mono Split Mode lets you create separate monitor and cue mixes by assigning each input to the left or right side of the headphone
- The balance between the monitor and cue channels is adjustable

**Equalizers**
- Equipped with a separate Hi/Mid/Low 3-band graphic equalizer for each channel
- Allows the stress of the instrument sounds to be adjusted within the range -26dB to +12dB

**More Features**
- Talk Over button mutes all levels apart from the microphone
- Rec Out terminal
- Four line connections
- Two Mic inputs
- Peak Level meter allows the user to instantly determine the source input condition for each channel to make possible certain operation without loss time
- Independent monitor selection switch will monitor any channel input or effect independently or simultaneously
- Booth Monitor level adjusts the volume for a separate DJ booth monitoring system
- Balanced output provides a direct connection to amplifier
- Top panel phones output
- Separate Trim controls for each channel

**DJM-500 Professional DJ Mixer**
This is the mixer top DJ’s have been waiting for. Explore a new world of sound by linking effects to the beat with the Auto BPM function. The DJM -500 and CDJ Series make the perfect system for creating the ultimate in club or house party music. The DJM-500 features a BPM level display, a Peak Level meter that is equipped with 15-bit LED indicators for all channels and a Fader Start function. The 3-band equalizer corresponds to the HI, MID, and LOW channels and the attenuation level serves as a kill function which can decrease the level to -20 dB. The DJM-500 delivers a variety of effects such as delay, echo, auto pan, flanger, reverb, and pitch shifter that can be imposed on all channels, the microphone, and master.

</table>
The DJM-3000 is Pioneer’s first Pro DJ rack mount mixer in a 19” format. This re-sizing and rack-mounting facility, coupled with numerous feature improvements, gives users even more scope for creativity in their sets. The ability to mix tracks spontaneously and seamlessly is central to a DJ’s success and accordingly, this unit answers the need for the highest possible levels of flexibility.

Together with effects such as Delay, Echo, Auto Pan, Flanger, Pitch Shifter Reverb, Auto-Transform and Auto-Frequency Filter, the DJM-3000 incorporates an industry-first: Effect Mix Mode. It utilizes 3 effects (Echo, Zip and Roll) to transition from one song to the next in a BPM linked operation. The Roll Mix Effect effectively creates a drum build before segueing into the next song.

**Flexible Functions**
- A BPM counter automatically measures and digitally displays a track’s tempo from 70-180 BPM, allowing for instant synchronization of BPM and effect.
- For tracks that are difficult to measure, the Tap button allows DJs to manually input the BPM and confirm via the Beat Indicator that the beat is linked to the Auto BPM.
- Linked to BPM, the DJM-3000 can add effects to each input (Channel, Mic and Master) independently. The DJ can perform quick settings with the Beat Unit Switch button and adjust the precise time parameters, or control the balance between the effect sounds and the original sounds by varying the mix ratio. Even when using the fader, it’s possible to leave just the effect sounds without linking to BPM.
- Equipped with a separate 3-band equalizer (Hi/Mid/Low) for each channel. This arrangement allows the stress of the instrument sounds to be adjusted within the range -26dB to +12dB.

**Key Features**
- Digital Output: Most mixers only have analog output, so this feature increases the options by allowing DJs to connect to a digital PA system, MD or DAT player, or any other device with digital input.
- Effect Mix Mode: Easily and accurately effects phrases in a BPM-linked operation.
- Beat Effects
  - Effects dial for complete control over effect intensity
  - Effects range enables sound effects on 1/4, 1/2, 1/1, 2/1, 4/1, 8/1 beats

**Effects Section**
- Delay - Produces repeat beat effect
- Echo - Repeated sounds that fade for echo effect
- Auto-Pan - Automatically switches sounds between left and right speakers
- Auto-Transformer - Cuts sounds at requested beat
- Auto Filter - Creates effects by manipulating sound frequencies
- Flanger - Produces an electronic wave effect. Reverb: a range of reverberation effects
- Reverb - A range of reverberation effects
- Pitch Shifter - Manipulates music pitch within +/- 1 octave
- Send/Return - Connects available peripherals (external effects input/output)

**Beat Effects**
- Beat measurement from 70-180 BPM
- Automatic synchronization between BPM and effect
- Beat Indicator shows when the required beat is linked to Auto BPM

**Additional Features**
- Adjustable Talk Over level control - mutes all levels apart from microphone
- Mic Switch (Mic Off/Mic On/Talk Over)
- 7 Line Inputs
- 4 Turntable Inputs
- Switchable Phono/Line Inputs
- 4 Fader Start Inputs
- 3 Mic Inputs (1 x Neutric, 2 x 1/4”)
- Headphone Monitor Split/Headphone auditioning
- Recording outputs
- Reinforced headphone jacks
- Frequency Response of 20Hz-20kHz (CD)
- Signal to Noise Ratio 87db (CD)
- Total Harmonic Distortion Rate 0.02% or less (CD)

**Features**
- Adjustable Talk Over level control - mutes all levels apart from microphone
- Mic Switch (Mic Off/Mic On/Talk Over)
- 7 Line Inputs
- 4 Turntable Inputs
- Switchable Phono/Line Inputs
- 4 Fader Start Inputs
- 3 Mic Inputs (1 x Neutric, 2 x 1/4”)
- Headphone Monitor Split/Headphone auditioning
- Recording outputs
- Reinforced headphone jacks
- Frequency Response of 20Hz-20kHz (CD)
- Signal to Noise Ratio 87db (CD)
- Total Harmonic Distortion Rate 0.02% or less (CD)

**DJ M-3000**

**Flexible Functions**
- A BPM counter automatically measures and digitally displays a track’s tempo from 70-180 BPM, allowing for instant synchronization of BPM and effect.
- For tracks that are difficult to measure, the Tap button allows DJs to manually input the BPM and confirm via the Beat Indicator that the beat is linked to the Auto BPM.
- Linked to BPM, the DJM-3000 can add effects to each input (Channel, Mic and Master) independently. The DJ can perform quick settings with the Beat Unit Switch button and adjust the precise time parameters, or control the balance between the effect sounds and the original sounds by varying the mix ratio. Even when using the fader, it’s possible to leave just the effect sounds without linking to BPM.
- Equipped with a separate 3-band equalizer (Hi/Mid/Low) for each channel. This arrangement allows the stress of the instrument sounds to be adjusted within the range -26dB to +12dB.

**Key Features**
- Digital Output: Most mixers only have analog output, so this feature increases the options by allowing DJs to connect to a digital PA system, MD or DAT player, or any other device with digital input.
- Effect Mix Mode: Easily and accurately effects phrases in a BPM-linked operation.

- Reinforced headphone jacks
- Frequency Response of 20Hz-20kHz (CD)
- Signal to Noise Ratio 87db (CD)
- Total Harmonic Distortion Rate 0.02% or less (CD)
Digital Vinyl Turntable

When Pioneer released the CDJ-1000, it quickly became an industry standard in clubs, bars and studios around the world. Its overall performance, feel, sound and memory features gave professional DJ’s the ability to push their skills to the limit and harness the freedom and flexibility of digital technology—vinyl feeling and sound without vinyl. The CDJ-1000MK2 adds delay-free scratching, “wide” pitch control and a full-featured digital output to the world’s largest touch sensitive jog dial, allowing you to treat a CD the same way you’d treat vinyl.

FEATURES

**Performance Control**
- Hot Cue (sampler) memorizes up to 3 cue point’s per CD and can also be used like a mini sampler for vocals, stabs, or breaks
- Instant reverse with no loss of tempo or pitch - can also be used with the Hot Cue and the Loop Sampler
- Real time seamless loop provides a simple way to set a loop while a track is playing
- Loop In/Out Adjust adjusts the In and Out points of a loop stored in memory. Relooping instantly takes you back to the beginning of the loop stored in memory.

**Memory**
- Store Waves data as well as cue and loop points in internal memory, or on a supplied 16MB removable memory card (MMC). Scroll through saved cue and loop points.

**CD Control**
- Cue your CD's with a large 7” diameter touch-sensitive jog dial designed to emulate a vinyl turntable
- Pitch Bend can either speed up or slow down the tempo of the music. Jog Mode functions with or without touch sensitivity.
- Scratch Play - in Vinyl mode, pressing down on the jog dial stops the music and allows you to scratch or cue your track by rotating the jog dial in either direction.
- Vinyl Speed Adjust Touch/Brake allows adjustment in the speed at which the CD slows down until it stops.
- Vinyl Speed Adjust Release/Start adjusts the speed at which the CD returns to normal playback speed.

**Tempo**
- Master Tempo locks the pitch of the track even when you change the speed
- Tempo Control with 100mm precision linear slider that is coupled with an 0.02% incremental display panel (at ±6%)
- DJ’s can use the ±100% pitch control to create new sound effects from opposite ends of the sound spectrum and also to BPM match completely different tracks. This is in addition to the ±6 ±10 and ±16% ranges.
- Reads CD, CD-R and CD-RW discs

**Cue Functions**
- Auto Cue finds the beginning of a track even if it differs from the track’s frame
- Manual Cue points can be set anywhere on the CD using either the jog dial or manual search buttons. The cue point is automatically stored in the internal memory or removable memory card (MMC).
- Real Time Cue allows a cue point to be set on the fly and stored into internal memory
- A Cue Marker is set automatically within the center display to visually represent the cue point relative to the jog dial’s location.

**Additional Features**
- Start a track instantly by using the cross fader while connected to any DJM Series mixer. By sliding the fader back, it will return to the previously selected cue point
- Connecting two CDJ-1000’s (via 3.5mm mini-plug cable) allows one to be put on standby while the other plays. Relay Play automatically starts the second player enabling them to play 'back to back' to give you endless music play.
- Legato link reproduces sound frequencies above 20kHz, which are normally lost during CD-format playback
- Sound jumps or skipping is prevented by using a 16-second shock-proof memory for normal CD play (minimum of 10 seconds if scratching and reading wave data at the same time in Vinyl mode).
- Oil-dampened floating suspension prevents sound skipping, even when subjected to impact during use or from vibrations from high volume music and low frequency bass.
- Full-featured S/PDIF digital output ensures that all digital features are transmitted, even scratching and master tempo.

CDJ-800 Digital Vinyl Turntable

A cheaper version of the CDJ-1000MK2, the compact, silver-colored CDJ-800 features Pioneer’s world-renown jog-wheel, “wide” ±100% pitch control, S/PDIF digital output and storage for 500 cue point on board.

- Touch sensitive jog wheel enables a track to return instantly to a cue point
- Touch release dial allows CDs to be slowed, stopped and relaunched at different speeds
- Auto Beat Loop features four timing buttons to instantly create perfect 1, 2, 4, 8 beat loops. Also allows instant 1/1, 1/2, 1/4, 1/8 beat cuts of the initial loop.
Performance CD Player
A CD turntable with endless sound creation and remix possibilities, the CDJ-100S allows creative freedom to develop your own individual style. Turn the Jog Dial like an analog turntable, and club sound resounds. You can operate it with a close-to-vinyl turntable feel. Enjoy a wide variety of DJ performances combining analog touch operability with versatile digital effects.

FEATURES

- Built-in Digital Jog Break provides analog DJ effects at the turn of the Jog Dial. Each of three buttons provide a different remix assist function (Jet, Zip, Wah)
- Slot-In disc-loading slot mechanism makes it fast and easy to play, change and remove discs from the player
- Large-diameter Jog Dial allows you to manipulate your music like an analog turntable by rotating the dial to find the precise entry point for tracks
- High-precision Tempo Control allows exact control of track speed. The digital display with a 0.1% unit readout provides simplified control with higher accuracy
- 2 Tempo Control ranges - either ±10% (in 0.1% steps), or +10 to -16% (in 0.2% steps)
- Quick Start feature produces instantaneous (0.01 second or less) music start that virtually eliminates time lag
- Master Tempo changes the music tempo without changing the pitch
- An analog bar graph gives elapsed and remaining playing time, and provides a visual readout of the track playback progress - comparable to the moving needle position on an analog record
- Full cueing functions such as Cue POint, Back Cue, Auto Cue and Cue Point Sampler which allows playing up to ten minutes of sound from a preselected cue point
- Relay Play - if you connect 2 CDJ-100S decks, when playback of a track comes to an end on one deck, standby mode on the second deck is released instantly beginning playback on that deck
- Oil-damped floating suspension protects against vibrations and impacts
- Fader Start/Fader Back Cue Play - when the CDJ-100S is used with the DJM-600, DJM-500 or DJM-300 mixer, you can start the music with a fader or cross fader, or use them to return to the cue point

CDJ-700S Professional CD Player
With the help of top DJs, the CDJ-700S has been specifically designed for today's professional club performers. It answers all their needs and concerns, so that they can focus 100% on what really matters: their performance and interaction with the crowd. Now there's absolutely no excuse for failing to exploit all the advantages and creative possibilities of the CD format. The CDJ-700S offers revolutionary and innovative features which make it the standard in clubs.

- Jog Dial for a close-to-vinyl feel
- Playing Address provides an at-a-glance indication of elapsed playing time
- Tempo Control
  - Master Tempo locks in the music's pitch even when the tempo changes
- Quick Start function
- Seamless loop, Real-time loop and Loop-Out adjust functions

CDJ-500II Ltd Professional CD Player
The layout, controls and feel are the same as the conventional turntable design, but the digital CD functions put it light years ahead. Incorporating the best of both the digital and analog worlds puts the CDJ-500II Ltd in a class of its own.

- Digital features include Master Tempo, Loop functions and cue functions
- Quick Start, Playing Address
- Sensitive Jog Dial
- Fader Start/fader Back Cue Play
- Relay Play
Twin CD Player
The CMX-3000 extends Pioneer’s legacy of award-winning Pro DJ products, by bringing the twin CD player platform not only within the scope of the mobile DJ, but also to small clubs, music bars and the serious bedroom DJ. Stylishly designed with rubberized buttons and a black carbon finish, the CMX-3000 boasts an unbelievable feature set with Wave Display, Onboard Memory and Hot Cues. Additionally, features such as Pitch Bend buttons and Scratch Mode make the CMX-3000 the next generation twin CD player.

- The CMX-3000 reads the track volume level and reproduces the data as a Wave display, which is patented by Pioneer. A visual mapping of each track is represented in the display panel allowing the DJ to quickly find breaks in the tracks and use it as mix point or end point in the same way that you can on an analog record - by checking the position of the needle in the groove.

- Emergency Loop feature sets a four-beat seamless loop at the touch of a button. Indispensable if a track is about to end and the DJ has failed to cue up the next track.

- Cue & Loops can be saved to any of the three banks available for each CD and can be recalled at the touch of a button.

- BPM SYNC button synchronizes the BPM between CD 1 and CD 2, making beat matching easy and ideal when overdubbing on a track.

- Pitch bend function changes the music tempo depending on the direction of Jog dial rotation and speed of movement. Pitch bend can be achieved by using either the Pitch Bend buttons or the Jog Dial.

- Slot loading eases CD changing and will also reduce the risk of accidental damage to the player.

- CD track title information can be read on the display.

- Pioneer’s legendary Master Tempo feature offers ±6%, ±10%, ±16% and WIDE (±100%) ranges.

- Current track BPM Display.

- High quality 60mm tempo sliders offer high specification and better quality (adjustment in ± 6% is 0.05%)

- Real-time Seamless Loop simplifies setting and releasing loops. This lets you set a loop while you are playing a track. A loop can also be set at the end of the track so that the track does not stop. In addition, an ADJUST mode has been added to enable one-touch adjustment to the Loop-out point and facilitate loop operation.

- Autocue changes the sound level to suit the style of music.

- 15 second shock proof memory.

- Plays commercial CDs, CD-R and CD-RW formats.

- Legato Link technology allows the DJ to reproduce sound frequencies above 20 kHz, which are lost during normal CD-format playback.

- Quick Start (less than 0.01 sec).

- Super fast track search / super fast song search.

- Auto BPM counter/Tap BPM counter.

- Time Mode (Remain/Elapse).

- Manual Cue / Auto Cue / Real-time Cue / Back Cue / Cue Point Sampler.

- Fader Start.

- Relay Play.

- Digital Outputs.

- A 1000 CD internal memory permits the DJ to store three cue and loop points per CD, as well as Wave data for up to 20 tracks per CD. Stored data can also be copied to other CMX-3000 CD players.

- High-quality Scratch mode allows scratching, scratch cuing and backspinning.

- The two-piece jog dial allows greater visibility of the display. The dot matrix display delivers clear, bright status information. The buttons are made from hard wearing rubber and are illuminated for ease of use.
Performance DJ Effector

Designed from a DJ-perspective and with the feel of an instrument, the EFX-500 effects box is guaranteed to make your mixes more dynamic. Offering a user-friendly top panel operation, and a comprehensive range of beat effects, a powerful three-band isolator and even Midi compatibility, it will allow you to scare your crowd with a succession of weird and wonderful sounds. Further evolved Beat Effects deliver real-time effect performance with a Jog Dial, allowing 25 different effects (5 x 5 combination). Expand and explore the world of digital sound by connecting the EFX-500 to your mixer, player, and electronic instruments!

Features

- Separate 3-band graphic EQ (Hi, Mid, Low) cuts sounds up to -10dB and almost completely silences the sound of instruments in each band
- Isolator lever switch with momentary ON & LOCK ON method. (Removing your finger when in Momentary position returns the switch to OFF. When in LOCK ON position, it continues to be ON.)
- You can set the BPM instantly by tapping the button with your finger.
- Effect Frequency allows you to select Hi, Mid and Low frequency to produce effects. You can combine the bands as you like - for example, producing effects only in the Mid (picture), or, conversely, selecting the Low and Hi for effects with the original sounds in the Mid.
- Digital Jog Break can produce new digital sounds on the spot. A turn of the Jog Dial controls 5 effects: Jet, Zip, Wah, Ring and Fuzz. Set the strength and depth of effects as well as the balance of the original sounds and their effects. A Jog Break Meter optically indicates the motion of the Jog Dial and the change of sounds, allowing you to visually confirm the motion.
- The Jet function adds a short delay. Turning the jog dial creates wave sounds, with the flanger effect made by using 2 analogue turntables.
- Zip: Change the pitch of reproduced sounds without changing the tempo. Lowering of the pitch produces sounds resembling those made by slowing an analogue turntable.
- The Wah function changes cut-off frequency. You can make the sound of a certain instrument strong or weak, making it feel like the sound is moving.
- Ring: Modulation of sounds produces a tone like the ring of a bell, providing effects like cosmic sound or a robot voice.
- The Hold Function
  - With the function on, the present state can be maintained if you stop turning the Jog Dial. With the function off, it returns gradually to the state of the original sounds.
- Jog Dial Memory Function
  - This is a new function to memorize and reproduce the motion of the Jog Dial. When you turn the Jog Dial and simultaneously press the Memory button, the motion of the Jog Dial is memorized for as long as 8 seconds. While pressing the PLAY button, you can replay the memorized action in all the 5 effects as many times as you want.
- Other Functions
  - The EFX-500 is equipped with Midi I/O terminals for controlling the Clock signal of Midi instruments. The BPM of input analogue sound signal is measured automatically, converted to Midi-Clock signal, and output so that the beats of connected Midi instruments can be synchronized.
  - The Effect Monitor System monitors each of Beat Effect, Digital Jog Break, and master sounds. The volume & meter controls input/effect output levels. The auto-lighting, button indicates Rear Panel the setting of each effect. The compact size makes this machine portable.

Beat Effects

- The Auto Beat Effect button produces tempo-synced effects (1/4, 1/2, 3/4, 1/1, 2/1, 4/1) – Delay, Echo, Auto Pan, Auto Flanger and Auto Transformer
- Depth and Mix knobs change the depth of effects and the balance of the original sounds and effect sounds, respectively
- Set the beat by various methods such as Auto, Tap, msec, BPM and Midi Beat
- Effect lever switch with Momentary ON & LOCK ON
- BPM counter measures the beats per minute and turns it into a digital indication.

Digital Media Player with MP3 and SD Technology

The DMP-555 is compatible with CD audio and MP3 formats and will playback from both CD and SD cards. Since these are capable of storing a huge number of MP3 tracks and loops, the DMP-555 allows DJs to enhance their sets and mixes with the latest music from around the world. When the slim, compact and portable SD Card is used for mixes, the DMP-555 effectively becomes a sampler. This ground-breaking innovation is possible because M P3 loops can be BPM sync'd to the CD output and then fired on cue. In addition, the Master Tempo control can be used to slow down or speed up SD audio, without the pitch being affected.

CD ripping, loop editing and music file management are simple operations with the bundled DJ Booth software. And because the application simulates a set up using two Pioneer CD players and a mixer, it's easy to master the playback, mixing and editing functions in no time at all. It's even possible to control the software from the DMP-555 itself, making DJ Booth the most innovative and user-friendly application available to today's digital DJs.

FEATURES

- Supports the SD Audio format of the powerful, removable SD card
- Onboard MP3 capability
- Playback from both CD and SD card sources. Mix MP3 loops and samples from the SD Card with CD-DA audio
- Separate and dedicated CD and SD card control panels for each source during Dual Synchronous Play
- 3-Band Isolator allows you to cut out any one of the three frequencies (low: 280Hz and below, mid: 280Hz-6Khz, high: 6Khz and above) from either the CD or SD card
- Adjustment of SD card BPM for dual play
- Adjust the pitch of a loop or sample on the SD card during Dual Synchronous Play
- Mixes SD card audio output with your CD audio playout during Synchronous Play
- Match and lock SD card BPM to CD playout BPM, at the touch of a button during Synchronous Play
- Navigate easily through SD Card contents. One Track Loop Set, Continuous loop of audio track on SD Card or CD.
- Scratch effect
- Master tempo
- Tempo select +/- 6%, +/- 10%, +/- 16%
- Loop/Reloop; Loop Out adjust
- CD text + large screen display
- CD and SD card audio level & BPM meters
- CD eject lock
- Eject and Power button guards
- Front loading
- Digital output
- Anti-shock memory
- Legato Link conversion
- Relay play
- Audio output; Card monitor output
- Fader start
- USB 1.1 interface
- Auto cue and manual cue
- Time mode
- CD / SD source select
- 100mm diameter jog wheel
- CD Ripping - encodes to MP3 format from CD audio and saves to PC hard disk. Input all track information and encode with a constant or variable bit rate.
- Music Management - group by genre, BPM, edit track information and import music files
- DJ Play - simulation of 2 x CDJ players and a mixer
- Edit and create new loop samples, saved to PC hard disk
- Copy audio files to SD card via USB
- Internet - access to music website and online support at the click of a button
- Control both virtual CDJ players, in DJ Play and Create modes, from the DMP-555
- English, French, German, Italian, Spanish, Dutch, Traditional Chinese and Japanese
- Compatible with Windows 98SE / Me / 2000 / XP Home and Professional operating systems
3-Channel 10” Format DJ Mixer

The Empath mixer combines the vision of Grandmaster Flash and Rane technology. Compact size, exceptional performance and advanced features set the Empath mixer apart. The Empath is the most able 3-channel, 10” format mixer available. As the name implies: understanding, awareness and sensitivity to the needs of DJs. Empath features Accelerated-Slope, full-cut, 3-band tone controls. Dry/Wet pan on Mic, Channels 1, 2 and 3. Four Penny and Giles faders, automatic Flash-Cue, cue and master metering and a host of outputs. Meets the requirements of all DJ genres: trance · progressive · techno · electro · jungle · breaks · funk · hip hop · scratch · house · disco · drum ’n’ bass · acid · live music · goa · dance hall · freestyle · reggae · dub · garage · ambient · gabber · rap

Features Important to DJs

◆ When traveling, finding power supply adapters is difficult. A universal, 100 to 240v AC, 50/60 Hz internal power supply allows using the mixer anywhere in the world without adapters.

◆ Auto-Gain prevents performance-wrecking swings in program level when changing sources. The music is never too soft or clipped.

◆ The FlexFX external effects loop with individual Dry/Wet pan controls for Mic, Input Channels 1, 2 and 3, provides mixing style versatility.

◆ Smooth, accurate and reliable mixing is made possible by employing the most respected name in audio faders — Penny & Giles faders are simply the best money can buy.

◆ Two kinds of fader caps are provided for different mixing preferences: soft rubber caps for smooth mixing, and hard plastic caps for fast mixing.

◆ Cue selection for a three-channel mixer can be slow and complicated. Flash-Cue allows the DJ to rapidly select Crossfader A-Cue-sum or Crossfader B-Cue-sum with the flick of a switch.

◆ Two-band headphone tone controls allow the DJ to match their mixer to their headphones.

◆ Nothing is more frustrating than arriving at a club and finding their jacks don’t match. Systems may have XLR, TRS or RCA connectors. The Empath provides all three.

◆ More headphones are compatible with the Empath. It provides both 1/8” and 1/4” headphone jacks, simultaneously usable.

◆ Two assignable CD triggers work with any CD player with fader start ability.

◆ The Accelerated-Slope, full-cut, 3-band tone controls are the most flexible and highest quality available.

◆ Crossfader assign switches for each Input Channel allow any program to be mixed on the A-side, B-side or Post crossfader.

◆ Level meters view Stereo Cue, Stereo Master Mix, Split Cue or Main Output signals.

GMF Signature Edition

For the mobile DJ who requires the best, Rane offers the autographed Grandmaster Flash edition of the Empath mixer. Functionally and electrically identical to the original blue and silver unit, but with the following features:

◆ Brushed gold and black Lexan faceplate

◆ Deluxe carrying case with room for cords, headphones and phono cartridges
Performance Mixer

The TTM 54i offers more features, higher performance and more reliability than any performance mixer, from any manufacturer, at any price. The TTM 54i moves the art form to a new level. A precision Active Crossfader with continuously adjustable Contour and “Hamster” reversal controls, provides the lowest feed-through, lowest noise, and most responsive control in the industry, all with unprecedented reliability. The front panel “Hamster” reversal and switchable Contour controls give Active Program Faders ultimate flexibility. A high performance Accelerated-Slope, band-split 24 dB per octave tone controls provide more than 40 dB of Bass and Treble cut without affecting the vocal midrange. Lexan face plate insures sharp appearance for years to come.

- Assignable Effects Loop allows a stereo effect to be inserted in Pre-Fader Program 1, 2, or Master at the press of a switch.
- Independent 18 dB/octave rumble filters for each phono input.
- Balanced mic input with Bass and Treble tone controls and independent Effects Loop.
- Two phono and two line inputs with high quality, long-life clickless transform selector switches.
- Balanced 1/4” TRS and unbalanced RCA master outputs.
- Dual mono 10-segment level meters with peak hold, indicate level for Programs 1/2.
- Headphone monitor for Master program allows performance rehearsal with Master level turned down.
- Stereo Headphone Cue pans between Program 1 and 2.

TTM 56i

Performance Mixer with Non-Contact Crossfader and Channel Faders

Rane’s proprietary magnetic fader is the fastest, most accurate, and longest lasting on the planet. The design uses non-contact magnetic position sensor technology previously reserved for the most demanding aerospace and industrial applications. No travel noise - No bleed - Ever! Unlike optical non-contact faders, the magnetic fader is impervious to smoke, moisture, temperature and aging. The electrical performance is totally unaffected by use. The mechanical life of the magnetic fader exceeds 10 million operations. These magnetic faders know exactly what your hand is doing! A proprietary curve-translation module converts your hand motion into precise audio level control. You get more flexible curve selection and fader assignment options than ever before. This technology is used for both Channel Faders and the Crossfader.

- 3-Band Accelerated-Slope Full-Cut EQ
- Crossfader control includes Reverse and Mode switches and continuously adjustable Contours for A- and B-side. In Mode 1, the Contour control adjusts from smooth blend to extremely fast cut. Select Mode 2 for center-cut effect (PGM 1 and PGM 2 off in the center) with full range Contour control.
- Channel Fader controls include Reverse and Mode switches and continuously adjustable Contours. In Mode 1, the Contour control adjusts from smooth blend to extremely fast cut. Mode 2 is for Left/Right pan effect with Contour control. Channel Reverse switch allows left and right hand Channel Faders to control PGM 1 or 2.
- Two 10-segment meters with peakhold
- FlexFx effects loop allows assigning post-fader Program 1, 2 or both to the effects loop. A Wet/Dry pan control gives total control of how much processed signal is in the mix. With the effects loop post-fader, reverb & other delay effects respond to both Channel Fader and Crossfader operation.
MP 2

Mobile Club Mixer
Compact and lightweight, the MP 2 is designed specifically for the on-the-go discriminating DJ. But don’t let its petite appearance fool you. The MP 2 is packed with all the necessary features for a great performance and perfect mix.

- Each Program bus selects any of the four stereo inputs. Any input can appear on either side of the Crossfader!
- Two selectable phono/line inputs and two stereo line inputs for each of the two Program buses. Each Program bus has its own Bass and Treble EQ.
- Long lasting, noise-free 60mm active crossfader
- Outputs include a Tape Out with Pre/Post Mic sum, a balanced auxiliary output with level control for booth monitoring or feeding an additional zone and a balanced house feed.
- Balanced main mic input with full-range fader control.
- Additional features include Cue Engage on each bus, headphone slide fader that pans Cue to Master and a powerful low-noise headphone amp with level control.

MM 8z
Club Mixer
The MM 8z features eight stereo inputs. Each of the four assignable buses contains its own 3-band EQ, allowing separate equalization of different sources. The four faders are grouped in two pairs, allowing a custom mix of two input sources on each side of the crossfader. Two Pre/Post crossfader assign switches add flexibility. The first allows summing A Mix Channel 1, Pre or Post crossfader. The second allows summing B Mix Channel 4, Pre or Post crossfader. The Crossfader Contour control allows adjusting the “shape” of the Crossfader response from a gentle curve for smooth, long running fades, to the steep pitch required for top performance cut and scratch effects.

- Each of the four Phono (RIAA) inputs switch to line level via rear panel switches
- Main and Aux Mic inputs route through Bass and Treble controls
- The main program signal includes a stereo Master Loop for equalization or processing
- Main Mic input has an Effects Loop
- Tape output can be switched to exclude the Master Loop signal and record the unprocessed program signal
- Powerful headphone cueing system allows one or more channels to be cued at one time
- Metering can be switched to monitor stereo main output or mono cue on one side and mono program on the other
- Recessed top mounted jacks provide room for cabling in tight DJ coffins or racks without sacrificing its compact 4” depth

Active Crossfader Technology
(MM 8z, MP 22z and MP 24z)
Active Crossfader technology combines state of the art voltage controlled amplifier design with a professional quality crossfader control. This combination sets new standards for performance, reliability and serviceability. Virtually all crossfader noise is eliminated. Channel to channel crosstalk is greatly reduced and the off isolation of the faded channel is greatly increased.

Active Crossfader technology dramatically increases the service life of the crossfader. In the unlikely event of crossfader failure, there is no loss of signal. If a crossfader becomes rough or noisy, it may be “hot-swapped” during a performance with no interruption of the audio signal. Simply use the input faders to set the audio levels while the crossfader is out of service. The crossfader may be replaced with either a 60 mm version or a 45 mm version, your choice.

For Any Inquiries Regarding Your Order, Call Our Customer Service:
(800) 221-5743 • (212) 239-7765 • FAX: (800) 947-2215 • (212) 239-7549
Club Mixer

The MP 22z features six stereo Inputs with individual Trims. Each of the two assignable mixing buses contains its own defeatable four band EQ, allowing separate equalization for different sources. All of the fader controls feature protective dust dams. The Crossfader Contour control allows adjusting the “shape” of the Crossfader response from a gentle curve for smooth, long running fades, to the steep pitch required for top performance cut and scratch effects.

- Six stereo inputs with trims
- Front panel replaceable Active Crossfader
- 'Dipless' 60mm Crossfader; optional 45mm Crossfader
- Mic inputs have Bass and Treble controls as well as an Effects Loop. The MP 22z also features a second Remote Mic/Line Input and a stereo Aux Line Input.
- Each of the two phono (RIAA) inputs can be switched to line level use via rear panel switches
- Master outputs include a stereo Master Loop for equalization or processing, as well as two separate Zone Outputs. The Tape output and Zone 1 can be switched to include the Main Mic signal with the program signal.
- Versatile Program/Cue Metering and Headphone Cueing. The metering can be switched to monitor stereo program or mono cue on one side and mono program on the other.
- Recessed top mounted jacks provide room for cabling in tight DJ coffins or racks without sacrificing its compact 4” depth.

MP 24z

Club Mixer

The Rane MP 24z is the standard for night club mixers. Featuring four stereo input mixing channels, each supplied with a selection of several phono and line inputs, the MP 24z easily suits the needs of the most complex audio/video installations. A total of six stereo line inputs are available plus three stereo phono inputs.

- Front panel replaceable Active Crossfader
- 'Dipless' 60mm Crossfader; optional 45mm Crossfader
- Handles two mics simultaneously. Both mics may be contoured by the 3-band Mic EQ as well as processed through a Mic Loop jack. On the rear, an XLR low-Z Main Mic Input with switchable Phantom Power, and a 1/4” Hi-Z Aux Mic Input are both mixable.
- Each of the phono inputs can be converted to line inputs by moving internal jumpers.
- The Output section provides a Master Level fader, four band Program EQ (independent of the Mic EQ), two auxiliary output controls (Zone and Booth), a stereo 12-segment Peak Program Meter and full Headphone Control monitoring and cueing system.
- Besides all of the normal inputs/output, the rear of the MP 24z features a transformer isolated Light Control output with level control, balanced XLR Main Outputs, Program Equalizer EQ Range switch (±4 or ±8 dB) and a System Mono switch.
- Sliders are studio-quality as found on high quality audio mixing consoles.
- Another internal jumper allows defeating the Booth Ducker circuit when the mic is activated — this feature has been requested by those wishing to use the Booth Output as a second record output or second zone.
- Another jumper allows the Mic section to be mixed to the Tape Outs — the default setting is “music only”.

ORDER & INFO. (212) 444-5088 • FAX: (212) 239-7770 (800) 947-7008

**MP 44**

**DJ Mixer**

The MP 44 is a four-bus slide fader style mixer with a host of features to please the club DJ, club owner and the sound system installer. For the DJ 3-band Accelerated Slope full-cut tone controls on each bus, FlexFX flexible effects loop, A-side, B-side or Post crossfader assign on each input bus, VCA’s on the crossfader and channel faders and 2 automatic crossfader CD triggers. For the club owner a remote DC master level volume control. For the installer: a high performance master limiter on booth and master outs, automatic emergency page input and the remote DC master level control. The MP 44 is housed in a 5U chassis.

- Two Auxiliary Inputs are provided. Aux Input A is unbalanced, while Aux Input B is balanced. Each Input features off to +6 dB Level controls.
- Two Aux outputs (balanced and unbalanced) with up to +6 dB level controls.
- Each output may be assigned Pre- and Post-Master Effects loop or Post Master Effects loop plus Mic. These features provide the flexibility to use the Aux outputs for recording or additional zones.
- High performance VCA level controls are used for House and Booth level, providing very low travel noise and long life. A Master left/right balance control and recessed Master Mono switch with LED indicator are provided.
- High-performance Master Limiter with true rms detectors limits House and Booth maximum levels. The rear panel threshold control range is ±20 dBU. Threshold indicators are on the front and rear panels.
- Applied signal on the Emergency Page Input automatically mutes all program material at House and Booth Outputs. The Emergency Page level is set independently using a recessed rear panel control.
- Two CD Trigger Outputs are provided via 3.5mm (1/8”) mini TRS jacks. Outputs are normally high with 50 ms active low trigger pulses. Start is on tip and stop is on sleeve. Ring has no connection. The CD Trigger Enable switch is located on the front panel.

**MP 2016 Rotary Mixer**

The MP 2016 is a rotary-controlled mixer featuring six input channels, Booth and House outputs, Pre-Effects Tape outputs, Post-Effects Tape outputs with level control, switchable Effects Loop, and Headphone cueing. Input Channels 1 through 4 feature high quality RIAA phono preamplifiers which may be switched to line input via rear panel switches. Input Channels 5 and 6 each provide a balanced mic preamp with Input Gain trim, Mic/Line switch, two-band EQ, Mic Engage switch and an internal Booth Ducking enable jumper. In addition to the six dedicated preamplifiers, all six Input Channels may select any of the five stereo Auxiliary Inputs.

- Each Input Channel provides a six-position source selector, Input Gain control for matching levels, Signal/Overload indicators and a studio-grade Master Mix control.
- The Booth Output may select Master or Cue as its source.
- Master Mix circuit provides Signal/Overload indicators, Mono switch and high-pass/rumble filters. In addition, the MP 2016 features patent pending high performance threeband, full-cut, Accelerated-Slope tone controls.
- An ultra-low noise, high power headphone amplifier also allows monitoring the Master Mix or Cue Mix.
- Exceptionally ergonomic, intuitive layout packaged in a compact 19”, 3U rack mount chassis, a scant five inches deep.

### Hi-Fi/Home Audio Cartridges

Shure Hi-Fi cartridges are distinguished for their high groove tracking ability and warm, natural sound reproduction. Each cartridge comes with a user guide, mounting hardware, stylus guard, and warranty. All models employ the low-mass, high output moving magnet structure invented by Shure.

### DJ Record Needlz

An extensive range of DJ Needlz for scratching, mixing and spinning in any performance situation. Each versatile needle features the unique sound characteristics developed by Shure for low record wear, high skip resistance, and reliable record cueing.

#### All DJ Cartridges Feature:

- **Low mass, high output moving magnet construction invented by Shure.**
- **User guide, mounting hardware, stylus guard, and warranty.**
- **Wide-diameter, high strength stylus assemblies for dependable back cueing.**
- **Spherical diamond tips that ride gently over a large footprint in the record groove.**
- **Cutaway grips for high visibility of the irradiant orange stylus tip.**
- **Standard 1/2” mounts or integrated mounts compatible with all leading DJ turntables.**

Completely reinventing the wheel is not an easy job, but someone’s got to do it. So starting with the industry standards, Stanton has rebuilt the turntable, kept all of the desired features that today’s DJs need and even included some from the future. So whether you’re looking for a straight-arm or S-arm turntable, analog or digital output or the ability to change speeds without changing the key, Stanton has got a turntable for every DJ. Once you put your hands on these decks, you’ll never look at turntables the same way again.

**STR8-30**
Stanton’s entry-level direct-drive turntable. It comes with a Stanton 500 B cartridge pre-mounted on a headshell.

**STR8-50**
Belt-drive turntable with 500 AL II cartridge pre-mounted on a headshell.

**STR8-60**
Direct-drive turntable. Includes 500 AL II cartridge pre-mounted on a headshell.

**STR8-80**
Direct-drive digital output turntable. Includes 520SK cartridge pre-mounted on a headshell.

**STR8-100**
Straight-arm version

**ST-100**
S-arm version

STANTON

MASTER SERIES CARTRIDGES

Stanton has served the styli industry since 1946 and has been at the leading edge of technology and development both in the broadcast studio and recording industry as well as the club and professional DJ. They are the leader in high-quality phono cartridges and are available for many professional applications including club mixing, broadcast and scratching as well as production/remix use.

**Groovemaster II RM**
With an elliptical super high polished diamond. Ideal for club mixing, broadcast and production/remix use.

**Groovemaster II Pro**
Hand-built “best-of-the-best” DJ cartridge. The spherical tip has a Super High Polish diamond tip to reduce vinyl burn and give longer tip life. No other DJ cartridge in the world can make these claims. The gold finish and gold connector sets you apart from the crowd in appearance and performance. Packaged with an extra stylus.

**Trackmaster II SK**
With a spherical super high polished diamond, the Trackmaster II SK satisfies the needs of a scratch / hip-hop DJ. It includes a free stylus.

**Trackmaster II RS**
Roger Sanchez Signature Model
Designed based on Roger Sanchez’ specifications. Ideal for club mixing and production/remix use. This model carries an elliptical super high polished diamond and includes a free stylus.

**Discmaster II**
Designed exclusively for the competition scene. Fat, funky and fabulous, the Discmaster II dazzles with its superior groove holding capabilities, as well as its high output and terrific bass performance. It operates at relatively light tracking forces (2 to 5 grams, optimal at 4 grams), instead of the very heavy forces required by others, so it won’t wear out your records.

STANDARD MOUNT CARTRIDGES

500 AL II
A professional industry standard cartridge. It provides a balance of economy, reliability, ruggedness and optimum performance. From studio use to the mobile scene, it is built for the most discriminating professional.

500 AL II Twin
Package of two 500 AL II cartridges.

505 SK II
A budget-priced scratching cartridge with a super sturdy stylus that has been coupled with pumped-up output for the deepest ottum and in-your-face sound.

505 SK II Twin
Package of two 505 SK cartridges.

505 SK II H4 Twin
Twin pack of 505 SK cartridges mounted on H4 headshells. Includes 2 extra styli.

520 SK DJ Craze Signature Model
DJ Craze, DMC World Champion 3 years running, has selected this cartridge as the all time best competition cartridge. The sturdy suspension couples the thick wall cantilever to allow for high tracking forces and the grounded cartridge body minimizes hum and delivers great quality sound.

520 SK Twin
Package of two 520 SK cartridges. Includes 2 extra styli.

520 SK H4 Twin
Twin pack of 520 SK cartridges mounted on headshells. Includes 2 extra styli.

680 EL II
Part of Stanton's popular 4 coil standard mount stereo cartridge line. It continues the renown Stanton ruggedness balanced with total musical responsiveness.

680HP
Designed especially for club use, the 680HP delivers pumped up output and suspension and a wide-band frequency response that gives you high energy record playback and the extra punch you need to quake the dance floor.

890 SA
A high end performance cartridge for the Scratch Artist. With the collaboration of DJ Focus and DJ B-Side, Stanton has improved and reissued one of the best cartridges from thier past.

890 SA MP4
Matched pair versions of the 890 SA in a small aluminum case with a clear plexi-glass top. Includes 2 matched cartridges mounted on headshells and 2 replacement styli.

Future DJ Technology with a Blast from the Past!

Final Scratch is the best and only real bridge for the professional and home DJ to enter and control the digital world. By using any standard turntable/mixer setup, a DJ can now manipulate digital music the way it has always done it - by hand and by vinyl.

Imagine having an endless supply of records to spin all night long... you can even needle drop MP3 files until your hands go numb! Think of Final Scratch as your never ending record crate - without having to break your back to carry them all. Simply load any digital audio file onto your computer - then pick and choose from your own playlist. Save and load any production, remix or edit that you have created and play it at that very moment or take it to a gig the same night without having to cut an acetate or make test pressings.

**FS10K Package**
- Includes Final Scratch software, two encoded vinyl records, and the ScratchAmp to connect the computer to your existing turntable/mixer setup

**FS10K System**
- Supports 2 turntables, includes the Final Scratch software, the ScratchAmp, and 2 FS vinyl records

**Software**

The Final Scratch software allows the user to save the audio files in various playlists, called Record Boxes, as well as to search and assign the audio files to either turntable. The software provides a visual representation of the music, needle position for each audio file, and remaining time of each audio file.

**Records**

The vinyl records included in Final Scratch contain digital information, and are used to mix digital audio files like mp3, .wav, .aiff and audio CD. All mixing is done directly from the turntables, including seeking, pitch shifting, cueing, spinning up and down and even scratching. The records can be used in combination with traditional analog records when mixing your set.

**Hardware**

The ScratchAmp acts as a powerful sound card to connect all the components together to form the system. It provides 2 sets of phono inputs and outputs and 2 sets of line outputs. The ScratchAmp processes the signal from the Final Scratch records and sends it to the computer via USB.

**System Requirements:**
- 500 MHz or faster Intel compatible CPU
- 128 MB RAM
- IDE hard disk
- 2.5 GB of available hard disk space
- USB port
- CD Rom player boot enabled
- a traditional DJ setup of 2 turntables and 2-channel mixer with phono/line select
S-250  
Table-Top CD Player
Stanton’s first table-top CD player comes with fader start and digital outputs. The control panel and LED screen are at the front of the unit, just where DJs need them. It features:
- Instant Start
- Digital outputs
- Fader start
- Pitch bend
- Selectable pitch control (+/- 8%, 12%, 16%)

S-550 Professional Dual CD Player
Offering an improved jog-wheel, the S-550 can read CD-R’s with 8x oversampling and 16% pitch bend. It is karaoke compatible and features:
- S/PDIF digital outputs
- Auto Cue function / Instant Start
- Auto Cue Pitch Fader (+10)
- Selectable pitch range: +/- 8%, +/- 12%, +/- 16%
- Manual Pitch Bend (up to +16)
- Relay Playback (Flip Flop)
- Fader Start outputs
- LCD screen displays minutes, seconds, frames, pitch, and looping
- 4 speed scan
- 20 track program play single or continuous

S-650 Professional Dual CD Player
Loaded with tons of features that are designed for today’s professional DJs:
- Buffer Memory
- Anti-shock
- Seamless Loop
- Digital Outputs
- Relay Playback (Flip Flop)
- Fader Start (cables included)
- Instant Start
- Up to +/- 16% Pitch Bend
- Multipurpose Jog Wheel
- Auto Cue eliminates dead space
- Pitch Display
- 8x Over sampling
- 30 Programmable Play Tracks on each side
- 6 Different Speed Scans
- 8cm CD Singles Compatible
- Instant Cue point recall
- 60 seconds transport protection (open tray closes after 60 sec.)
- Reads CD-R
- Repeat one, Repeat all, Single, Continue, Sleep Modes

Penny & Giles Faders
P&G faders have been used in broadcast and recording consoles such as SSL, Neve, Mackie (Logic Control) and many others for many years. They are considered by many of the world’s top professional audio and recording engineers to be the highest quality faders in the world. Until recently, they were considered to be too expensive for DJ mixers. Stanton approached P&G to make custom faders for its mixers, such as the SA-12, SA-8, and SMX-501. Other companies have now followed (Rane, Allen & Heath, and Vestax), but they are not the same custom P&G faders that Stanton uses.

Focus Fader V2 Digital Optical Crossfader
Improving on the original and world’s first optical fader design that brought the industry and art to a new plateau, the Focus Fader V2 is truly curve adjustable to accommodate to any style of DJ artist. If your style requires a smooth fade for long mixes or a razor sharp cut-off for precise scratching, V2 is the answer. No more bleeding, no more static, no more wasted time, just hours of practice enjoyment and flawless performance. The Focus Fader V2 is highly advanced and opens many doors for innovations in DJ equipment technology. Fitted with an array of optical sensors and microprocessor controlled to eliminate the need for contacts or graphite material, the V2 will outlast any standard graphite or conductive plastic fader on the market.

Focus Fader V1 Digital Optical Crossfader
The Focus Fader V1 is the world’s first true optical crossfader for scratch artists. Without the standard graphite contacts found on most faders, the V1 offers no resistance at all which allows for quicker movements while scratching. The optics provide a true ON/OFF cut instead of the sharp fade found on all other battle mixers (which simulate a cut). Since there are no contacts, it also means that there will never be any degradation of the audio signal due to the crossfader. Focus Fader V1 is available for SK-1, SK-2, SK-4, SK-5 and SK-6

SMX-501
Hybrid 3-Channel “Techno/Scratch” Mixer
This “one of a kind” mixer combines the best of both worlds and bridges the gap between Battle & Club DJs.
- 3 channel scratch mixer
- Assign effects loop to each individual channel, plus the mic
- Custom High Quality Penny and Giles Crossfader with VCA curve adjustment and crossfader assign
- Assignable Crossfader (A, B, Bypass)
- VCA Crossfader curve control & reverse
- Curve control and reverse on Linefaders
- Each channel features a gain control, slider Pan, and a versatile 3 band EQ with complete KILL
- Balanced XLR master output (unbalanced RCA also provided)
- Booth output
- Rotatable 3 Position phono/line switch with flash feature
- Separate channel input and master output LED meters
- Headphone mute
- Fully assignable Send/Return connections for external effects
- Pre Fader Listen (PFL) of channels and effects loop with Cue Pan control
- 3 line, 3 phono, and 2 mic inputs
- Mic channel features gain controls and a 3 band EQ
- Channel fader reverse switch • User replaceable faders
SK FOUR
- 2 line and 2 phono inputs
- 2 band EQ per channel
- Smooth crossfader with VCA system
- Crossfader reverse and curve adjustment with bi-color LED
- Unique PROTEKT panel hides all screws underneath the top panel
- Master/Cue monitor select
- 2 headphone inputs (1/4” and 1/8” minijack)
- TRS balanced Master output
- 8 position input select

SK-6F
- PROTEKT panel hides screws underneath the top panel for hassle-free fader operation
- Includes both the Focus Fader V1 and the CF-SK6 super smooth crossfader with photo-coupler and curve adjustment
- Master/Cue switch
- Dual Headphone jacks (1/4” and 1/8”)
- Program reverse function reverses the input signals of channels 1 and 2
- Reverse function for crossfader and each channel fader with 2 color LED
- Effects send/return for external effects. Effects are post-crossfader, ON/OFF switch for each channel plus MIC and Cue
- 3-way, 8 position line/phono toggle switches with FLASH feature
- Mic input with volume control and 2 band EQ (+10/-10 dB)
- Headphone input with volume control and cue pan fader, plus headphone mute
- Master output (TRS balanced 1/4” and unbalanced RCA)

SK-2F
- 10” 2-channel battle mixer with 2 line and 2 phono inputs
- Includes Focus Fader V1 and the CF-SK2 long body crossfader
- Reverse function and curve adjustment for crossfader and each channel fader with 2 color LED
- 3-way, 8 position line/phono toggle switches with FLASH feature
- PROTEKT panel hides screws underneath top panel for hassle-free fader operation
- Channel faders are close together for easy one-handed dual fader use
- Gain, 3 band EQ (+9/-26dB) and Pan control on each channel
- Headphone output with volume control, cue pan fader, Master/Cue select and headphone mute function
- Master output (TRS balanced 1/4” and unbalanced RCA)

SK-2F Ltd.
- An upgrade to the standard SK-2F. It has been fitted with the new Focus Fader V2 Digital Optical Crossfader with adjustable curve control, the OS2 optical scratch switches, and a second headphone output (3.5mm mini jack).
- The OS2 is the first phono/line switch that uses a fader as the user interface. This allows the same hand/wrist movement to be used when using the crossfader and the OS2, which translates into efficiency in scratching performance. It's flat handle and soft-slide action makes it easy to perform any existing techniques including the Crab Scratch.
SA-8 DJ Focus Signature Mixer

“From the mind of Focus” comes the SA-8, the ultimate performance mixer. Never before has so much scrutiny been put into the layout of a scratch mixer. Each feature was carefully arranged and placed according to a DJ’s natural hand movement (notice where the gain is). The SA-8 offers features for every type of DJ, either strictly scratch, live performance, production, or mix. This “studio-style” scratch mixer (designed by Focus) gives you the technology of a professional console mixer compacted and ergonomically arranged in a format that is preferred by top DJs.

- Individual REC / FX and Direct outputs (each turntable signal can be sent separately through 4 direct outputs located on back of mixer)
- Custom designed P&G (Penny & Giles) crossfader (additional CFF2crossfader included) and custom designed P&G line-faders
- One-of-a-kind knobs and faders design to fit the DJ fingers
- Post Fader Cue so a DJ can listen to his scratches in the headphone while using the crossfader as normal
- 3-way adjustable curve control on linefaders
- Autocue eliminates the need for touching the cue pan (switching from Ch.1 to Ch. 2)
- Adjustable Rumble Filter allows the DJ to eliminate (or add) low end frequencies
- Booth Output
- An ergonomic layout so there is no bumping or cluttering of knobs during use
- OSII Optical Switch (for “noise-free” transforms)
- Mono/Stereo Switch per channel
- Program Reverse
- 2-Dual headphone outputs (2¼” and 2¼” minijack) with headphone mute

SA-12 DJ Craze Signature Mixer

“It’s only the 3x champion, DJ Craze signature mixer!” This battle mixer (designed for the champ) has all the flexibility and quality of a dub mixer but has all the requirements of today’s Turntablist. The SA-12 incorporates a user-friendly removable effect module that any DJ can install [one of three sound modules available]. These modules can then be assigned to either channel (1/2), the microphone, and even the main mix.

- Custom P&G (Penny & Giles) faders with curve adjustment
- OS2 Optical phono/line switches with LOCK feature (to avoid mistakes)
- Removable effects module (MOD-1) includes pitch shifter, flanger, and delay all with parameter and mix controls
- Effects assignable to channels 1 and 2, master output, and mic/line 3
- Footpedal output for effects module
- 3 position cue select Pre CF Cue / Post CF Cue / Master
- 2 line, 2 phono, and 1 mic/line (switchable) inputs
- 3-band EQ, Gain, and slider-style pan control per channel
- Crossfader and Program faders reverse switches & curve adjustments

- Program reverse
- “Soft/Quiet-Start” feature to avoid pops / noise when mixer is powered on
- 2 headphone inputs (1/4” and 1/8” minijack) with headphone mute
- TRS balanced Master output with output trim control
- Mono-stereo switch
- Dimensions: 14.9 x 10.5 x 4.3”, 8 lbs.
### RM-3S 3-Channel DJ Mixer

Based on the popular RM-3, the RM-3S keeps most of the original layout and design but with improved features and better control. A redesigned fader allows a smoother more gradual curve, and the added Cue Pan fader lets you monitor your mix through the headphones.

- 6 line, 3 phono, and 2 mic inputs
- 60mm channel faders
- Assignable AUX send/return
- Gain, 3 band EQ (+9/-26dB), and Pan control on each channel
- High quality professional crossfader with reverse function
- Mic channel features volume controls and 3 band EQ (+12/-12 dB)
- Cue section features Pre Fader Listen function with volume control and Cue-Pan fader
- 3 band frequency isolators for channels 1 and 3 featuring three-way toggle switches with FLASH function
- Rec output
- User replaceable faders

### RM-50 4-channel Stereo Preamp Mixer

Designed for small clubs and mobile DJ applications where space and budget are limited. But don’t let its compact three 19” rack-space size fool you, the RM-50 is packed with features.

- 9 line and 4 phono inputs, 4 mic inputs (combo and 1/4” connectors)
- 3 band master EQ with complete kill (+9/-60 dB)
- Fader start
- 2 position toggle switch on channels 2 and 3 for easy transforming
- Mic channel features 2 band EQ, independent level controls, and VCA controlled autotalk function
- Fully assignable crossfader (A, B, bypass)
- Balanced XLR master output, Booth output
- Master section with level and balance controls and mono/stereo switch
- Cue section features cue pan and level control
- Input and output LED meters
- 12V light BNC input

### RM-80 4-channel Stereo Preamp Mixer

- 9 line and 4 phono inputs
- Mic channel features 2 band EQ, independent level controls, ON/OFF switch, and VCA controlled autotalk function
- 3 mic inputs (combo and 1/4” connectors)
- Gain and 3 band EQ (+9/-26 dB) per channel
- Fader start
- Sub-mic on channel 4 enables use of 3 band EQ and panning
- Fully assignable crossfader (A, B, bypass)
- Beat indicators
- Balanced XLR master output, Booth output
- Master section with level and balance controls and mono/stereo switch
- Cue section features stereo/split function, cue pan and level control
- Input and output LED meters
- 12V light BNC input

### RM-100 4-channel Stereo Preamp Mixer

A step-up from the RM-80, the RM-100 adds an effects loop which lets you easily add effects or sampling to your mix. It has an Effects send and return assignable to master out, each channel (including all mics), and headphones for monitoring. Cue section features stereo/split function, cue pan and level control. Cue pan fader is assignable to booth output for in-booth monitoring. Sub mic on channel 4 enables use of 3-band EQ and panning.
DJ Dream Mixer
The VRM-10 is like no other DJ mixer in the world. From its valve preamp and built-in filter to its high quality faders, this mixer is any DJ's dream come true.

- The VRM-10 features 8 line and 4 phono inputs on 4 input channels. Each input channel can be assigned to either side of the crossfader, or the crossfader can be bypassed altogether. A crossfader curve adjustment is provided to allow the user to gradually change from a sharp curve for scratching, to a long fade for mixing. 2 mic inputs are provided on a single channel. Each mic has its own gain control and share a 3 band EQ.
- Wide selection of outputs to choose from. Master 1 (balanced XLR) and Master 2 (unbalanced RCA). Each Master output features its own level control. Master 1 also features a balance control. There are 2 headphone outputs as well as a booth output. Each channel features a Pre Fader Listen button to assign each channel to the headphone output independently. If none of the PFL buttons are pressed, the master output will automatically be assigned. A S/PDIF digital output is also provided.
- Each of the VRM-10's channels feature a gain control and an extremely versatile 3 band parametric EQ with midrange frequency adjustment.
- There are 16 on board DSP effects including 2 hall reverbs, 3 room reverbs, 2 plate reverbs, and a spring simulator; 4 stereo delays; 4 chorus / flanger effects. There are 5 parameter controls including level, feedback, speed, factor, and depth. The speed controls the frequency of the LFO (0.1-20Hz), depending on the depth setting. The on board effects can be assigned to each channel or the master output.

Titanium Pak
Titanium Pak is the top of the line DJ Package for the professional DJ looking to upgrade his or her system.

Includes:
- [2] STR8-100 turntables
- [1] SK-6F two channel mixer
- [2] 520SK cartridges
- [1] DJ PRO 60 stereo headphones
- [2] Slipmats
* PLUS a free copy of TM W2002 [Turntable Mechanic Workshop 2002]

Skratch Pak II
Includes:
- A pair of STR8-60 straight arm direct drive turntables pre-mounted with 520SK cartridges
- A SMX-201 professional turntablism mixer featuring 2 band EQ and Gain control per channel
- a pair of DJ PRO 60 stereo headphones
- 2 Slipmats  2 Dust Covers  All connecting cables
*plus a free copy of the TM W2002 [Turntable Mechanic Workshop 2002]

Platinum Pak II
Recommended by DJ Craze

Includes:
- [2] STR8-80 turntables
- [1] SK-6F two channel mixer
- [2] 520SK cartridges
- [1] DJ PRO 60 stereo headphones
- [2] Slipmats
- [2] Dust Covers
*PLUS a free copy of TM W2002 [Turntable Mechanic Workshop 2002]

Spin Cycle Pak

Includes:
- [2] STR8-30 turntables
- [1] SM X-201 two channel mixer
- [2] 500b cartridges. Already mounted on Stanton Headshells, the 500b provides the perfect balance of reliability, ruggedness and optimum performance.
- [1] DJ PRO 10 stereo headphones - with uniques earcup and headband
- [2] Slipmats
DJ Pro 2000 S

- High-quality stereo headphone designed for the professional DJ
- Rotating ear-cup allows for flexible positioning and single sided or shoulder rest wearing styles
- Detachable 10’ coiled cord for safe storage and easy replacement
- 90° (elbow) 1/4” connector
- Integrated mono or stereo monitoring
- Wide frequency response 20 Hz - 30 KHz for outstanding sound reproduction
- Closed ear-cup design for sound isolation
- 50mm drivers for clear low end reproduction and superior power handling
- Convenient folding design for ease of storage and transportation
- 3.5mm mini-jack adaptor and carrying pouch included

DJ Pro 1000 MKII S

- Enjoy the combined benefits of light weight comfort and accurate wide-frequency sound reproduction
- 50mm high efficiency, heavy duty drivers deliver full deep bass
- Straight or coiled removable cord versions aid in field replacement
- 20-20KHz frequency response
- Detachable 10’ cord with 1/4” adapter
- Includes a free carrying pouch

DJ Pro 500 MC

- Single side, closed back design with a heavy duty driver with bass boost
- For the professional DJ who needs hands-free operation with a mic
- Adjustable metal headband is protected with a soft vinyl covered foam pad
- Color-coded dual connection 12’ cable has two 1/4” plugs - mono for the mic and stereo for the headphone
- Low impedance 200Ω dynamic mic
- Includes a free carrying pouch

DJ Pro 500

- Lightweight single-sided headphone
- High efficiency 40mm heavy-duty drivers
- Detachable 10’ cord with 1/4” adapter
- Frequency response 20-20KHz
- Sensitivity 100dB @ 1mW
- Includes a free carrying pouch

DJ Pro 300

- Compact, lightweight stereo headphone with a comfortable self-adjusting headband and exceptional low end response
- Transducers 40mm drivers
- 3Hz-28KHz frequency range
- Sensitivity 102 dB
- Impedance 50Ω
- 8.5’ cable length
- 80mW maximum power input
- 1/4” stereo plug with 3.5mm mini jack adapter
- Weight (without cord) .4 lb.
- Includes a free carrying pouch

DJ Pro 60

- High quality stereo headphones at an entry level price
- 40mm super thin driver with Neodymium magnet
- 20 Hz - 20 KHz frequency response
- Sensitivity: 106dB SPL at 1KHz
- 9’ cord with 1/4” adaptor
The CD-302 isn’t for every DJ...just the ones that want to stand out from the crowd. The reason is simple, feature for feature, the CD-302 is the most powerful, creativity-inspiring dual CD DJ tool available today. Whether you’re into juggling, scratching or beat mixing, the CD-302 is ready to handle your best moves. It’s like having two separate decks, each with its own controller.

You get features like beat matching that automatically shows the tempos of the discs in both decks, 10-second sampling on each unit, and the ability to seamlessly loop material as long as your audience can take it. The brake feature lets you make the smoothest segues between songs, and the instant start feature lets you cue your material before anyone can leave the dance floor. Go crazy with ± 32% tempo adjustments that won’t change the pitch, or ± 32% pitch adjustments that don’t change the tempo. In other words, the CD-302 lets you make the music all your own.

- Two high-quality precision CD decks in a single rack-mountable unit. The CD players are independent—one CD can be cued up while the second is playing.

- Incorporates a built-in sampler that can loop a section of audio in either Play or Cue mode. Samples can also be reversed.

- Pitch and tempo can be changed independently and adjusted over a ±32% range.

- A unique feature of the CD-302 is the ability to analyze both the tempo and downbeats of two different CDs and then adjust the pitch of the cued CD to match the tempo and downbeat of the playing CD without affecting the pitch. This allows the DJ to perform flawless crossfades from one CD to another during performances.

- A built-in RAM buffer allows for a 10-second shock buffer and instant start.

- Great sounding analog-style scratching with the large JOG wheel on the remote.

- 100 mm tempo slider

- Preset and cue memory locations may be stored and recalled using a 10-key pad.

- The CD-302 is housed in a 2U, 19” rack-mount enclosure. The remote is housed in a 3U, 19” rackmount enclosure which can also be mounted flat in a DJ coffin case.

- CD Control Module includes enough RAM for unlimited looping and 10 seconds of sampling. The CD Control Module also includes Auto Cue, Sleep Function, Tap Tempo Button, Pitch Slider and intuitive Pitch Bend using the JOG Wheel.

- Sample up to 10 seconds of audio and play it back forward or reversed. The sampled sound can be played back when the source CD is still in Play or Loop mode.

- Dedicated per-deck remote control units (detachable and rack-mountable)

- Key control function allows changing key without affecting the original tempo (in percentage or semitone steps)

- Automatic BPM (beats per minute) count function and BPM counter. TAP function for manual BPM settings

- Original Key function allows tempo change while maintaining the original key

- Bend function allows adjusting of beats manually between the two decks

- Brake function allows braking in exactly the same way as on a record turntable

- Scratch function allows scratch play

- Voice Reduce function lowers the level of the vocal part

- Up to 1,000 track memories (memorized in 5 banks of 200 tracks each, Bank A to E)

- Output level control in the digital domain (±6 dB, in 1.0 dB steps).

- Elapsed and song remain time display

- Auto cue function (-72, -66, -60, -54, -35 dB)

- Auto ready function to cue up following tracks

- EOM function (10/15/20/30/60, or 90 sec)

- Timer play for deck 1 followed by deck 2.

- Relay play allows consecutive playback using both decks (as one deck stops, the other can be set to start automatically).

- RCA unbalanced outputs for each deck
Professional Mobile/Club DJ Mixers

Designed for professional mobile DJs, the X-15 and X-17 mixers are innovative DJ tools that combine powerful features, excellent sound quality, great reliability and high value. While both the X-15 and X-17 are four-channel rackmount DJ mixers created specifically for mobile DJs, the X-17 provides additional advanced features making it excellent for club DJing as well.

The X-15 offers eight stereo inputs (2 phono, 6 line), while the more flexible X-17 provides four switchable phono/line inputs as well as four dedicated line inputs. Both mixers have two mic inputs, balanced XLR and unbalanced RCA master outputs and 3-band EQ on each channel. You'll also get a set of pro features like fader start on all four channels, dedicated booth and record outputs and a replaceable crossfader. Plus, the X-15 and X-17 are intended to easily fit into a compact mobile DJ system, with standard 19” 4U rackmount enclosures.

In addition to the features shared with the X-15, the X-17 adds a three-bank, pitch-controllable sampler that stores and recalls sample files with an innovative onboard front-panel Compact Flash card slot. Additionally, the X-17 offers other professional features like front-panel aux input and output jacks with individual level controls, crossfader reverse controls, an effects send/return interface and more. Also, the X-17’s flexible design allows for its four channels to source from four switchable phono/line inputs as well as four dedicated line inputs, making it an excellent choice for both mobile DJing as well as club DJ work.

Scratch DJ Mixers

The Tascam XS-3, XS-4 and XS-8 offer affordable mixing solutions for performance-oriented scratch DJs. The XS-3 is an affordable two-channel mixer designed for a wide variety of DJ environments. It offers three-band EQ, a host of inputs and outputs including line and phono inputs on each channel, balanced and unbalanced master outputs, a recording output, an effects input, a mic input, crossfader start capabilities, adjustable crossfader curve selection and a crossfader reverse control.

The XS-4 is designed as a 2-channel battle mixer with an uncluttered, logical control surface. It offers a 2-band EQ and more sophisticated audio interfacing than the XS-3, including master outputs on balanced XLR jacks. The XS-4 offers all the features and ergonomic design desired for serious scratch DJing with the sound quality and reliability for which Tascam is well known.

The XS-8 is the top of Tascam's scratch DJ mixer line. It is a 2-channel scratch mixer that features a fully adjustable crossfader and channel fader curves, crossfader and channel fader reverse controls, a 3-band EQ, interfacing for external effects sends and returns, discrete level controls for stereo outputs, dedicated EQ controls for the mic input and more.

### XS-3 Features
- Two-channel multi purpose DJ mixer
- Four stereo inputs (two phono, two line)
- Balanced 1/4˝ TRS and unbalanced RCA master outputs
- 3-band EQ per channel
- Crossfader start and crossfader reverse with adjustable crossfader curve
- External effects send/return, Mic input, Record output
- Replaceable crossfader

### XS-4 Features
- Two-channel “Super Analog Series” scratch DJ mixer
- Channels source four stereo inputs (two phono, two line)
- Separate external stereo line input
- Balanced XLR and unbalanced RCA master outputs with separate level controls
- 2-band EQ per channel
- Crossfader reverse with adjustable crossfader curve
- Mic input, Record output
- Replaceable channel faders and crossfader

### XS-8 Features:
- Advanced two-channel “Super Analog Series” scratch DJ mixer
- Four stereo inputs (two phono, two line)
- Balanced XLR and unbalanced RCA master outputs with separate level controls
- 3-band EQ - channel balance controls
- Crossfader reverse with adjustable crossfader and channel fader curves
- Program reverse - Channel cut switches
- External FX send/return - footswitch inputs
- Session input, Mic input, Separate external stereo input, Record output
- Replaceable channel faders and crossfader
Professional Performance DJ Mixer

The X-9 is a tool for serious DJs that combines a highly flexible 4-channel mixer with a dual effects processor and a dual sampler. The result is a creative powerhouse that helps to add originality and inspiration for every mix. Designed specifically for high-end creative DJs, the X-9’s control surface is laid out to combine ultra-high performance and intuitive ease of use. Its multitude of analog and digital inputs allows for incredible flexibility for interfacing with a wide variety of DJ gear such as vinyl turntables, dual CD decks, external effects devices and other audio tools.

To achieve the ultimate in creative control of your mixes, the X-9 includes a wide variety of high-quality built-in effects. You can add reverb, delay, echo, flanging, auto panning, pitch control, a transformer effect and a low pass filter to any audio signal that passes through the X-9, with 30 spaces to store your settings for later use. The X-9 also features parametric EQ an essential control feature for exciting custom mixes. All EQ settings are also storable and recallable. Also, using the X-9’s sampling function, you can select a sampling source from Input 1 through 4, from the master output, the microphone input, or both sides of the crossfader. Along with its customizable fader start function, which can be assigned to several controllers on the mixer, the X-9 offers all the features you ever wanted in a DJ mixer and a few you never knew you needed until now. Whether you’re combining it with TASCAM’s CD-302 Dual CD Decks or any other audio playback tool, the X-9 represents a giant leap forward in setting the standard for DJ mixing in the 21st century.

FEATURES

- Mixing and audio manipulation tool for professional DJs
- 4-channel stereo inputs on line and phono inputs
- Dual sampler
- 2 coaxial digital inputs (channels 1 and 2), 2 external line inputs (channels 3 and 4)
- 2 built-in digital effects processors with reverb, delay, echo, flanger, auto pan, pitch control, transformer and low pass filter; 30 storable effects settings
- Fully-parametric 3-band EQ on each input channel with 100 storable patterns
- 3-stage adjustable input fader curve, Input fader reverse, Cross fader reverse, Cross fader curve control
- Microphone input with 2-band EQ
- Low/Mid/High Cut control for both cross fader sides
- Coaxial digital Master output with pre/post master selection in the menu
- Booth output, analog balanced Master output with attenuator, analog unbalanced Master output with attenuator and pre/post master fader switch
- Headphone outputs on front and top panels, with 3-stage headphone EQ
- 4 fader start/stop connectors
- Optional MIDI In/Out/Thru connectors
- External stereo effect send/return connectors
- 2 assignable foot switches connectors
- Coaxial digital Master output with pre/post master selection in the menu

PDX-2000
Super High Torque DJ Turntable with Anti Skipping Tonearm

A totally new turntable designed strictly for professional DJs. The silver body design uses super high-density molded ABS plastic which diminishes vibrations. Its high-torque quick-response DC motor, heavy-duty Anti Skipping Tonearm System (A.S.T.S.) and great versatility through various braking, start and reverse features make this a perfect turntable for any DJ. Even the hardest scratching won’t fault the powerful PDX-2000. With two pitch controls it is possible to adjust the pitch by up to ±60%. Achieve the most extreme effects and sounds — and ensure the best possible performance every time with the PDX-2000.

- ASTS Floating-Suspension Tonearm system coupled with Tracking Hold reduces needle skip and jump
- Speed Adjustment allows manipulation of the start and stop speed independently. Instant start/stop or slow wind-up/wind down gives DJs the ability to be creative
- High-torque direct-drive DC motor enables a start speed of 0.5 seconds to reach normal RPM
- Power switch for “Motor off-on” effects
- Ultra Pitch fader controls the pitch range by ±50% and then, combined with Fine Pitch fader, control of ±60% is possible
- Non skipping plus feedback prevention
- Special 100mm fine pitch control fader
- Super direct drive 33/45 rpm
- Adjustable start and break time
- Reverse button makes the platter spin backward at one easy touch

PDX-d3s
Digitally Controlled Turntable

The PDX-d3s offers advanced mixing performance. The reverse switch, selectable pitch range, motor off switch and joystick for pitch bend control give DJ’s unlimited new techniques.

- Synchronize feature allows you to control more than 2 turntables with a single operation (optional cable required)
- The stick controller gives instant speed adjustment of ±50% and pitch bend of ± 1, 2, 3 or 6% (selectable). There’s no need to touch the turntable for cue point or pitch bend anymore
- Reverse mode feature works for all features such as pitch bend, speed control, etc.
- Selectable range of pitch control allows wider or finer pitch control with 3,6, and 12% of range

BDT-2500
DJ Turntable with Line Out

A high-quality phono amplifier allows the BDT-2500 to connect directly to a line input jack of a mixer/pre-amplifier without the grounding cable usually required with turntables.

- Includes an internal phono amp bypass switch for use when connection to phono input is preferred or required
- Two pitch controls: Main Pitch and Fine Pitch, allow you to set the speed from 16 rpm to 98 rpm with no gaps
- Static-balanced “S” shape tone arm system maximizes its traceability and durability
- Unique heavy-duty metal chassis minimizes the feedback and vibration

(Please note: The BDT 2500 is not designed for scratch play)
**R-1 Premium**

**19” Rack Mountable Mixer**

The R-1 is the superior sonic solution for professional house DJs, installations and studios. The R-1, with its rotary style dials, is created using only the highest quality components. Just wait till you hear its superb sound quality - it’s one of the most incredible sounding mixers ever produced! Designed with advice from the world’s top club DJs, the R-1 features a built-in 4-band isolator and a 3-band booth EQ, helping you boost your creativity.

- 5 channel mixer features 5 phono and 5 line inputs
- The ALPS custom-made volume pot generates perfect torque and great durability
- 4-way Equalizer/ Isolator - allows DJs to totally separate sounds with the use of the Vestax “Infinity Cut”
- Dedicated 3-band EQ provided for Sub master output enables perfect monitoring in the DJ booth
- Hand-made line transformer - superb quality, generating a warm, thick sound
- Insert type effect loop - for easy connection of external EQs and other effects on individual programs
- Signal/Peak LED on each channel
- Special selected rotary input fader
- Inputs:
  - 5-Phono (RCA)
  - 5-Line (RCA),
  - 5-Effect Return (1/4”)
- Outputs:
  - 1-PA Master Out (XLR balanced),
  - 1-Line Out (1/4” unbalanced),
  - 1-Sub Master Out (1/4” unbalanced),
  - 1-Record Out (RCA),
  - 5-Effects Send (1/4”),
  - 1-Monitor Headphone Out (1/4”)

**R-1 Specifications**

- Frequency Response: 20Hz - 20kHz ±1dB
- S/N Ratio: >75dB
- THD: <0.005%
- Dimensions: 19 x 7 x 5.2” (WxDxH)

**MCR-1**

Crossfader Unit for the R-1 Premium

The MCR-1 is a Crossfader Unit for the Vestax R-1 Premium which enables you to assign 5 PGM channels into the crossfader. The MCR-1 uses only the highest audio quality components, so you can add this unit without reducing the R-1’s sound quality. The MCR-1 includes an original superior grade PCV crossfader developed exclusively by the Vestax engineering team to provide super long life.

- Cross Fader Assign (A/B) Switch is used to assign the signal from each of the PGM channels to either side of the crossfader
- The detachable cross fader mixes the signals assigned by Cross Fader Assign Switch
- The Monitor Select Switch is used to select the cue signal to be monitored by headphone from PGM channels 1-5 or MASTER
- H.P. LEVEL (Monitor Level) controls the volume level of the headphones
- Headphone Jack is used to connect the headphones with impedance from 8-150 ohm
- 1/4” unbalanced line output
- IN / SEND (1/4” unbalanced); OUT / RTN (1/4” unbalanced)
VESTAX

PROFESSIONAL SERIES MIXERS

PMC-46MKII
19” Rack Mount
5-Channel Rotary Style Mixer

The PM C -46M KII was designed with advice from professional DJs in New York. The “curve” of the rotary dial is the most important feature for professional House DJs, and the Vestax PM C -46M KII offers the best House “curve” in the world.

- 4/6 channel mixing instrument with 4 phono and 8 line inputs.
- Advanced mixing facilities through Aux send - return and Submaster
- VCA controlled Crossfader
- Special cue-signal monitoring through new option meter.
- Special selected rotary input fader
- Extremely variable mixing facilities
- Replaceable VCA crossfader with slope
- LED beat indicator
- 1 AUX send and 1 Effects loop
- 2-band EQ per channel
- Input/output level meter
- Balanced XLR and 1/4” outputs
- Champagne gold color

PMC-400
Similar to the PM C -46M KII, but with slide faders instead of rotary faders......................... Call

PMC-250
Ultra Slim 19” Rack Mount House/Mobile DJ Mixer

Ideal for 19” rackmount requirements, the PM C - 250 is only 3RU high. It features a rotatable connector panel for either table top or installation purposes, and has balanced XLR outputs with a -10dB attenuation switch. The mixer is primarily a two channel but has the facility for a third auxiliary input, switchable between phono and line input levels. The main two channels feature rotary three band fixed EQ controls with -85 and +4dB cut and boost. Short 5mm faders above these controls offer the “kill” effect without the occasional clicks that can occur with switches. The mixer uses very high quality components and has features to please DJs and sound engineers alike. Input faders and the crossfader are user replaceable.

- 3-band frequency isolators are provided on both main music channels, allowing you to boost, cut or fade frequency ranges with maximum control for truly active mixing
- A -10/0db output level switch is provided for professional installation use
- Fader-type cut switch enables smooth and dynamic frequency cut-off without the annoying “clicks” found on regular “kill switches”
- Optional rotary faders can be fitted in place of the standard 45mm faders on the input channels for that “New York” style rotary effect in the mix
- Balanced XLR and 1/4” jacks are provided for easy connection
- The location of the rear connector panel can be selected from either the rear or on the base of the mixer. This allows the PM C -250 to be used on a tabletop or securely fixed to a vertical rack without wasting rack space on cable connectors
- An Aux (phono/line switchable) input is provided for third turntable, CD, MD, etc.

Rear view of the PM C -250

EQUIPMENT LEASING AVAILABLE
PMC-55
Professional 4-Channel Mixer

The PMC 55 is the mixer of choice of many top DJ’s and clubs due to its flexibility and high quality components. Pro users of this model include Ritchie Hawtin, Carl Cox and Alex Patterson of The Orb. The PMC 55 is a 12 input, 4 channel mixer with a stereo FX loop, dual balanced XLR outputs, booth output with assignable source, VCA crossfader with curve control and user-replaceable input faders with a rotary “dial fader” option. Each channel features individual gain, metering, pan, 3-band EQ with bypass switch, FX send and insert point. The maximum gain and EQ boost of each channel can also be limited by internal switches, preventing any possible distortion to the master output stage of the mixer. The master output section has a -10dB and -20dB attenuation switch to prevent any further increase in output gain before the amplifier, making the PMC 55 the obvious choice for large nightclubs and sound engineers alike.

◆ Powerful 4/7 channel mixer with 4 phono and 8 line inputs
◆ Various effect processing facilities on each channel
◆ Special programmable protect functions for save PA operations
◆ Faders use a replaceable 60mm input fader and a 60mm crossfader
◆ Line inputs and effects connection on front panel for “visiting” players and mobile effects
◆ An LED indicator has been provided for each channel’s CUE switch
◆ The booth output can be selected from CUE, Master 1 or Master 2 for flexible monitoring
◆ The AUX (FX) loop can be selected from either pre or post fader for different effect possibilities
◆ The 3-band EQ has a boost/cut range of -24/+6dB. This enables greater cut of each bandwidth, and less possibilities of distortion through EQ boost
◆ Champagne gold color

PMC-37 Pro
High-Quality Multi-Genre Mixer

This incredible mixer offers the matrix input assign system, which allows instant selection of multiple sound sources for any input channel. With isolators on each channel, built-in sweep effects, PCV input faders and PCV crossfader, the PMC-37 Pro is in high demand worldwide. Incredibly, one turntable can be assigned to every program channel.

◆ High-quality VCA circuitry provided optimum S/N, warm fat sound and broadcast-quality audio
◆ 3/5 channels (3 stereo, 2 mono) with 4 phono and 4 line inputs
◆ 2 Mic inputs with 2-band EQ and AUX send/return
◆ 2 effect loops with pre/post switches on each channel
◆ Matrix input assign system allows instant selection of multiple sound sources for any input channel
◆ Unique program assign switches for each stereo channel
◆ Dynamic dual peak/sweep filter on each program extend creative possibilities
◆ 3-band isolator fader with function on each stereo channel
◆ Matrix input assign system allows instant selection of multiple sound sources for any input channel
◆ Unique program assign switches for each stereo channel
◆ Dynamic dual peak/sweep filter on each program extend creative possibilities
◆ 3-band isolator fader with function on each stereo channel
◆ 4-position Cue Monitor selector dial allows you to switch between Cue PGM, Master, AUX 1 and AUX 2
◆ Special cue-signal monitoring through option meter
◆ User replaceable input fader and crossfader
VESTAX

SAMURAI SERIES MIXERS

Featuring the world's first super-smooth, no-maintenance digital crossfader, the Samurai series of mixers offer exclusive circuitry that gives you quick and easy control over the shape of the crossfader curve. The selectable base curves gives the DJ access to 8 crossfader curves on each Samurai selection. And best of all, due to the magnetic field sensor of the crossfader, Samurai series mixers are liquid-resistant and 100% maintenance free.

PMC-07ProD

The Battle Mixer we all love - the PMC-07Pro - joins the Samurai range as the PMC-07ProD with the slashing sound of Vestax digital crossfader technology. The PMC-07ProD features a Session Mix function that allows team DJs to connect multiple mixers simultaneously. The Master output is TRS balanced for automatic connection to balanced PA systems. 3-Band Slider EQ faders on each channel with +6dB/-24dB

- Master output is TRS balanced for automatic connection to balanced PA systems
- 3-band slider EQ faders on each channel with +6dB/-24dB
- Crossfader Curve selection and shaping
- Crossfader is resistant to liquid spills
- Deep burgundy and silver finish

PMC-05ProD

As the standard for hip-hop scratch mixing, the PMC-05Pro has been loved by so many hip-hop artists around the world. There have been many pretenders, but the PMC-05Pro is still king. Now, due to the addition of the new Vestax digital crossfader with built-in curve control, the PMC-05ProD Samurai blasts off into a new Solar System, where only the true pioneers of today's sound will go.

- 2/4 channel mixer with 2 phono and 2 line inputs
- Digital crossfader with user designable curves
- The standard for hip-hop/scratch mixing
- Exclusive double panel system with 576 different settings of fader and switch modes
- Switchable input fader curve
- User replaceable input fader
- Monitor crossfader for PFL mixing
- Studio type PCB layout

PMC-06ProD

The incredibly popular PMC-06Pro has been updated with the addition of a digital crossfader to create the PMC-06ProD. This scratch mixer fits between two turntables with minimum distance in between. All faders and switches are laid out for perfect one-hand operation.

- Top line hip-hop mixer with “Hamster” switch
- Digital crossfader with up to 32 crossfader curves
- 2 channel mixer with 2 phono and 2 line inputs
- Exclusive double panel system with 576 different settings of fader and switch modes
- Switchable input fader curve
- Super slim mixer fits between turntables
- User replaceable Input fader and cross fader
- Monitor crossfader for PFL mixing
- Studio type PCB layout
- Deluxe front panel design

www.bhphotovideo.com
PCV/ PROFESSIONAL SERIES

PMc-07Pro

Extended EQ, session mix, mic input with 2-band EQ, input fader curve and many other extended features make the PMC-07Pro the choice for aggressive creative music makers.

- 2/4 channel mixer with 2 phono and 2 line inputs
- Crossfader reverse switch and curve control knob are provided not only on the crossfader, but also on the input faders
- Double panel design with hidden features
- 3-band equalizer, program and crossfader reverse switches for top performance
- Curve adjustments and reverse functions for input and crossfaders
- 8-position input selector switch
- User-replaceable input and cross fader
- Monitor crossfader for PFL mixing
- Studio-type PCB layout

PMc-07Pro I.S.P.

Developed by the world-famous Invisibl Skratch Piklz, the PMC-07Pro I.S.P. inherits all the advanced features from the PMC-07Pro flagship performance mixer with the addition of quadraphonic (4-channel) output. This allows DJs to expand their performance to a 4-dimensional level with the cue stick control. The beats and scratches can fly around the room, from front to back and left to right.

- 2/4 channel mixer with 2 phono and 2 line inputs
- Crossfader reverse switch and curve control knob are provided not only on the crossfader, but also on the input faders
- Double panel design with hidden features
- 3-band equalizer, program and crossfader reverse switches for top performance
- Curve adjustments and reverse functions for input and crossfaders
- 8-position input selector switch
- User-replaceable input and cross fader
- Monitor crossfader for PFL mixing
- Studio-type PCB layout

PMc-05ProII

The successor of the world-standard professional battle mixer, the PMC-05Pro II is used by many of the world’s professional battle and hip-hop DJs. Its photo coupler cross fader system with curve control, double panel system and cross fader reverse switch make it the one and only professional battle mixer you will need for top performance.

- 2/4 channel mixer with 2 phono, 2 line and 2 Mic inputs which are equipped with a 2 band equalizer. (Hi and Lo +/- 12dB)
- A cross fader reverse switch is provided to enable quick crab scratch technique
- Eight position input selector switch
- Photo Coupler operation of the crossfader allows crossfader Curve adjustment
- Double Panel design with hidden features
- Switchable input fader curve
- User-replaceable input and cross fader
- Monitor crossfader for PFL mixing

PMc-06ProA

The PMC-06ProA professional DJ scratch mixer has a “shaped-up” style to fit between two turntables with minimum distance in between. All faders and switches are laid out for easy one-handed operation. A double panel system and photo coupler cross fader system are also featured for professional use. Photo coupler controlled cross fader with curve adjustment.

- Super slim mixer fits between turntables
- 2 channel mixer with 2 phono and 2 line inputs
- Double panel design with 576 different settings of fader and switch modes
- Switchable input fader curve
- User-replaceable input fader and cross fader
- Monitor crossfader for PFL mixing
- Studio type PCP layout
- “Hamster” switch (reverses the direction of cross fader)
PCV SERIES MIXERS

PCV-002U Entry-Level Mixer
Compact body size and extended features make this unit suitable for scratch, mobile and hobby use.
- Multi-use facilities: Mobile, bedroom and hobby
- 3 band full Isolator with the renowned Vestax sound on channel 1+2
- Portable and rugged metal chassis with ironblue frontpanel
- Vestax double panel design with user upgradeable PCV-crossfader
- 3 channel mixer; 2 phono + 2 line inputs and microphone input on rear panel
- 3-band full Isolator for hi-mid-low frequencies on channel 1+2
- Special crossfader for monitoring channel 1+2

PCV-150 19” Rack Mountable Mixer
An all-genre mixer for DJs who require multi-mixing features. Featuring a PCV crossfader, it is the correct choice for professional quality and long-term durability at a sensible price. Striking metal blue panel design.
- Powerful 4/7 channel mixer with 3 phono and 5 line inputs
- 3-band “Super Cut” equalizer on each program channel
- Various professional connection possibilities through switchable XLR plus 3 more outputs
- Transformer and assign buttons for ultimate scratching
- Special split master cue system for every application
- PCV-crossfader; metal blue panel design

PCV-175 Professional Techno/Trans Mixer
This flexible, popular mixer is highly suitable for techno, trance and hardcore mixing. The European styling of this mixer, coupled with its flat panel faceplate was designed with speed mixing in mind. It features a 45mm PCV crossfader and 60mm vertical faders.
- 3/6 channel mixer with 3 phono, 5 line and 4 mic. inputs
- 3-band equalizer with cut switches
- Pre fade monitoring on each channel
- 10-segment stereo LED level meter
- Effect switches for each channel
- Replaceable PCV faders and crossfader
- Metal blue front panel

PCV-275 Professional Mixing Controller
This techno/trance mixer offers many features, such as PCV fader technology, 3-band isolator switches, selectable AUX send and option cue meter.
- 3-band isolator switch eliminates each frequency range completely
- Pre/post selectable AUX send switch
- Option meter allows the DJ to visually and audibly check the levels and accuracy of a “mix”
- 3 phono and 6 line inputs
- User replaceable 60mm input faders and 45mm crossfader make “on-site” repairs very easy
- Accepts optional rotary input volume controls
- Line 4 input connector socket is situated on the top panel for the easy addition of a MD/DAT/tape/CD input during performance
DCR-1200
3-Band Frequency Isolator

The original frequency isolator for house, techno and many other styles of mixing. Sound ranges are divided into three groups: High, Mid and Low. The DCR-1200 allows separate volume control of each range.

- Stereo 3-band 5 frequency sound control isolator
- Sound ranges are divided into High, Mid and Low groups
- DJs have total control over the volume of each range individually
- Using the on/off switches, DJs can invert the right and left sound and erase the center-sound instantly
- Input/Output: 1-Line (phone), 1-Master (phone), 1-Divided Hi/Mid/Low Output (phone)
- Frequency antiphase controls for additional performance
- Fast action through large aluminum knobs
- Creative sound part for any DJ set-up
- Antiphase controls to cut off selected sounds or voices
- Low and high frequency outputs

DCR-1200 Pro
4-Band Frequency Isolator

Get total creative freedom with Hi/Mid-Hi/Mid-Low/Low frequencies. Two frequencies can be chosen on Mid-Hi and Mid-Low. The 4-band control allows DJs to divide the frequency and control the music more precisely.

- Stereo 4-band 6-frequency sound control isolator
- The cut-off frequency can be selected from 2 different frequencies enabling DJs to create various kinds of frequency control
- XLR balanced (+4dB) and 1/4” unbalanced (-0dB) connections are provided for various occasions and connections
- Large aluminum control knobs enable easy and accurate setting
- AC power supply (no adaptor) creates wider dynamic range and lower noise
- Quick on-off action can be made with bypass switch 19” 1RU rack mount configuration
- Creative sound part for any DJ set-up
- Frequencies switchable for extended usage
- Superb also in master output line

CFR-US Replacement Crossfader
45mm crossfader for PM C-205L, 09, 005, 05MK3, 05T, 20, 26, 17, 15SL, 15, 05FX, 17A, 27MK2, 15MK2, 06T, 005AMK2, M W-3000R, 3000, StreetMaster-5005

CFR-S Replacement 20mm Short Crossfader
Fits all mixers with CF-R

CF-PCV Replacement Long Life Crossfader
For PM C-05, 06, 07, 07 ISP, and all other PCV Series mixers

CF-40 Crossfader
For PM C-400, 46

CF-46xIII Crossfader
For PM C-46MKII

CF-50 Crossfader
For PM C-50

VCC-3W Wood Cartridge Case
Holds 3 stylus with headshells

CFR-US Replacement Crossfader
45mm crossfader for PM C-205L, 09, 005, 05MK3, 05T, 20, 26, 17, 15SL, 15, 05FX, 17A, 27MK2, 15MK2, 06T, 005AMK2, M W-3000R, 3000, StreetMaster-5005
VESTAX

HALF RACK EFFECTOR SERIES

**DPH-X1** The DPH-X1 is a stereo phaser with a 12-step phase shifting circuit that directly targets specific “DJ” frequency ranges. Using a combination of phase mode and phase shift controls, 18 superb phase sounds are quickly accessible.

- 12-step phase shifting circuit allows DJ to create an extremely wide range effect. From a natural wave to deep modulation, the possibilities for sound manipulation are extreme
- Bypass/Effect Crossfader allow you to instantly switch or move between dry sound or effect sound in one smooth “crossfade” action

**DWG-X1** Utilizing proprietary Vextax Filter technology, the DWG-X1 offers sensational Wah effects that can be applied to a wide range of frequencies: from crisp top end to fat bottom end. The “color” of the filter sound can be uniquely manipulated by an extremely high quality 5-band graphic filter fader with Low/Mid-Low/Mid/Mid-High/High controls.

- Super Phasing effects through 12 stage circuit
- Creative sound part for any DJ set-up
- Phono and line inputs
- Extreme space and deep modulation effects will emphasize the audience

**DFG-X2** This super compact frequency isolator separates frequencies perfectly in three parts: Hi, Mid and Low. Features a high spec phono amplifier, allowing you to easily connect a turntable directly to the DFG-X2.

- Line and phono inputs
- Fully 3-band frequency controlling filter bank
- 3-band stereo isolator for flexible usage
- Creative sound part for any DJ set-up

**DDG-X2** Finally, a performance Digital Delay featuring a large BPM counter display. Send perfectly timed delayed signals, flying around the dance floor, quickly and easily by just tapping in the tempo. The Tap Function allows instant synchronization of the delay effect with the music source down to extremely fine increments.

- Half-rack 2U size
- Fully 3-band frequency controlling filter bank
- 3-band stereo isolator for flexible usage
- Creative sound part for any DJ set-up
- Grounding Post for direct turntable connection
- Simple, but complete, control over the dry and effected signals

**DGE-X2** Remix artists will fall in love with the DGE-X2. Unique among graphic equalizers, the DGE-X2 allows you to modify the sound source in real-time, targeting particular frequency ranges.

- This unique 6-band eliminator combines advanced EQ and isolator functions to give you amazing cut control over your 60Hz, 160Hz, 500Hz, 1.6kHz, 5kHz and 16kHz frequencies.
- The no boost cut only vertical faders can be adjusted real-time and the whole effects setting can be bypassed returning to the original sound of the input source quickly and easily

DGE-X2

ONE HOUR FREE PARKING
AT 349 W. 34th STREET (with purchase of ‘100 or more)
**DJT-1400 Professional DJ Table**
The DJT-1400 aluminum DJ table is both lighter and more compact than other DJ tables. It ships flat, yet takes mere minute to assemble.

- The aluminum foot in the truss structure provides great support and reduces the weight of the whole body
- Easy to carry around and transport
- 1.3" thick, 4.6" wide hardboard guarantees high stability for any DJ play
- Superb high lacquer finish

**CDX-16 Dual CD Mixing Console**
The CDX-16 is a fun, intelligent and elegantly designed alternative to traditional CD players. Playing one or two CDs is easy, creating your own mix is simple. The combination of a shockproof mechanism and 10 second buffer memory make the CDX-16 able to be used in any application, be it club, mobile or professional studios. The built in crossfader, eliminates the need for an external mixer.

- Each CD can be monitored through the headphones allowing the user to practice the mix first. Last “stop” point can be recalled as a “cue” point instantly for quick mix situations.
- +/- 8% pitch control faders are provided for each disc for quick accurate beat matching
- Dual Function joystick is provided for easy cueing and pitch bending
- Single/All repeat switch enables repeat play of either one song or the whole CD
