**ENCOMPASS-2**

**Multimedia Workstation**

The Winsted E4853 Encompass-2 Tailored Multimedia Workstation is a full-featured workstation that offers the ultimate in sleek functionality for multimedia, video, security, or office settings. This modular unit consists of a central 48” wide desk with an overhead task light banked by two 60” wide returns with concave fronts. These returns have stylish fixed risers for holding monitors and speakers. This unit is identical to the basic Encompass-2 Archetype model, but the work surfaces, riser and sides are clad in attractive Truform panels, available in a wide range of colors.

The components are made of sturdy steel and are topped with tough laminate worktops. The central desk has smooth, tapered edge for working comfort. The units have modesty panels that house a cable management system for hiding power and data cables.

Winsted offers a wide range of accessories to customize this workstation. These include keyboard trays, drawers and pull-out shelves, file cabinets, power outlets, CPU support shelves, cup holders, cup holders LCD mounting arms, and additional task lights.

**FEATURES**

- **Comfortable and Durable:**
  This simple desk has a sturdy steel structure and smooth laminate work surface for years of editing in comfort. The wraparound design means that underside of the table allows ample legroom, and there’s plenty of space for adding accessories. The two fixed risers offer an ergonomic and space-saving solution for positioning multiple monitors. The tapered work edge, concave return edges and task light enhance user comfort.

- **Wire Management System:**
  The steel modesty panels house a cable management system through the console to help keep ugly cables out of sight.

- **Attractive and Stylish:**
  This unit is identical to the basic Encompass-2 Archetype model, but the work surfaces, riser and sides are clad in attractive Truform panels in a wide range of colors.

- **Customizable and Extensible:**
  Winsted offers a wide range of accessories to customize this workstation. These include keyboard trays, drawers and pull-out shelves, file cabinets, power outlets, CPU support shelves, cup holders, cup holders LCD mounting arms, and additional task lights.
Multimedia Workstation

The Winsted E4852 Encompass-2 Archetype Multimedia Workstation is a modular unit that consists of a central 48” wide desk with an overhead task light banked by two 60” wide returns with concave fronts. These returns have stylish fixed risers for holding monitors and speakers.

The components are made of sturdy steel and are topped with tough laminate worktops. The central desk has smooth, tapered edge for working comfort. The units have modesty panels that house a cable management system for hiding power and data cables.

Winsted offers a wide range of accessories to customize this workstation. These include keyboard trays, drawers and pull-out shelves, file cabinets, power outlets, CPU support shelves, cup holders, cup holders LCD mounting arms, and additional task lights.
**Prestige Series**

**Slim-Line LCD Console**

The Winsted Prestige Series C5118 126” Slim-Line LCD Console provides attractive and efficient working space for control and surveillance rooms, power and utilities applications, and broadcasting stations.

This console is constructed of sturdy welded steel and features a beveled-edge TruForm PVC work surface. The unit accommodates multiple LCDs (the number depends on the size of the screens) and the curved wraparound design gives users complete control.

Each unit has three locking cabinet for holding CPUs or other electronics and features a wire chase cable management system. The console can be customized with accessories such as CPU and monitor pans, outlet strips, phone and literature trays, and power outlets. Winsted offers the option of free assembly before shipping.

**Features**

- **Make the Most of Limited Space**
  The slim-line unit offers a lot of functionality in a small space, holding multiple LCDs, and features locking cabinets beneath the work area and a cable management system behind.

- **Sleek, Ergonomic Design**
  The smooth beveled TruForm work surface and wraparound design make this unit comfortable to use.

- **Customize It**
  Winsted offers multiple options for customizing each unit for your particular needs. Add power strips, organizational trays, CPU and monitor pans, as well as many other accessories.

The Winsted Prestige Series C5132 Two-Tier Slimline LCD Console has a rear shelf which can accommodate one or two LCDs (depending on the size of the screens), and it also has an upper bar that allows for mounting of one or two additional LCDs, using a Vesa pivot mount.

The unit has a locking cabinet for holding CPUs or other electronics and features a wire chase cable management system. The console can be customized with accessories such as CPU and monitor pans, outlet strips, phone and literature trays, and power outlets.

**Slim-Line LCD Console**

*The Winsted Prestige Series C5151 110” Slim-Line LCD Console With Plasma Mount provides attractive and efficient working space for control and surveillance rooms, power and utilities applications, and broadcasting stations.*

This console is constructed of sturdy welded steel and features a beveled-edge curved wraparound TruForm PVC work surface. The unit accommodates multiple LCDs (the number depends on the size of the screens), and the this unit comes with Plasma Stand, Model C5070, for mounting a 42" plasma screen behind the console.

Each unit has three locking cabinets for holding CPUs or other electronics and features a wire chase cable management system. The console can be customized with accessories such as CPU and monitor pans, outlet strips, phone and literature trays, and power outlets. Winsted offers the option of free assembly before shipping.
EDITING CONSOLE

Wraparound Console with Vertical Racks

This Winsted E4781 94" Wraparound Editing Console with 24.5" Vertical Racks is a black granite unit with gray accent trim that provides a comfortable and functional integrated workstation. It features a 48" wide and 20" deep central riser to keep monitors and speakers up off the work space.

At either end of this console is a 24.5" equipment cabinet, which provides a compact and efficient work area. Its modesty panel contains a wire management system that allows you to conceal power and data lines. The sturdy metal base and sleek laminate finish provide durability and style to your editing room.

Winsted offers a wide range of additional accessories to meet your computing needs. These include keyboard trays, equipment mount racks, task lights, speaker shelves, power outlets, wiring ducts, CPU tower supports, and accent trim.

- **Comfortable and Durable**
  This desk has a sturdy steel structure and smooth laminate work surface for years of editing in comfort. The wraparound design means that underside of the table allows ample legroom, and the central riser gets monitors and speakers up off the work surface, freeing up precious work space.

- **Customizable and Extensible**
  Winsted offers a wide range of accessories to meet your computing needs. These include keyboard trays, equipment mount racks, task lights, PC tower support shelves, monitor risers, casters, drawers, pull-out shelves, power outlets, wiring ducts, and colored accent trim.

- **Integrated Equipment Cabinets**
  This unit has integrated space-saving under-counter cabinets for a CPU, external drives, or other editing equipment at either end of the console.

Digital Edit Desk

The Winsted E4407 is a digital edit desk with riser. This large desk (more than 9' or 2.8m wide) has two rack cabinets to accommodate your essentials. Enjoy this unique-style desk with its high-tech fit, finish and feel. E4407 has a black and dove gray enamel finish and oak trim. The table workspace and riser both have a black granite laminate surface. The desk legs and framework are made of steel. For your convenience, you can adjust the height of the riser.

E4407 has a raceway cable management system for discrete and logical routing of video and monitor cables.

FURNITURE
WINSTED

4-Bay Edit Console

Winsted's 4-Bay System/85 Edit Console with TruForm Beveled Work Surface, Model J8123, comfortably houses two computer screens, a rackmount NTSC monitor, a VTR, and a CPU with external drives, as well as many other configurations.

The workstation includes two gently sloped, extra wide 12U cabinets built on 14U base units. (Extra wide bays are made to house 21” monitors, or other large non-rackmount components.)

A third, standard-width cabinet can hold rackmount electronics, while the last bay is a base unit useful for keeping a CPU, printer, and other computer peripherals. Because it’s modular, you can also add more bays and accessories if your needs grow.

The 18” (45.72cm) deep work surface is available in TruForm colors, and has a beveled edge. Top, side, and blank panels are finished with Winsted’s Pearl Gray powder coat.

FEATURES

◆ Custom TruForm Colors:
  In addition to Dove Grey, Truform work surfaces are available in Black, Slate Gray, White Nebula, Brushed Aluminum, Cherry Maple, Light Oak, and Swiss Pear Oak

◆ Cord Access Panel:
  Flexibly route wires from your mouse, keyboard, and similar devices away from the work surface, keeping your desk neat. Unique foam pieces let cords through, but snug neatly against an upper panel for a gapless appearance

◆ Space for Cables and Ventilation:
  Consoles have open pedestals that let air flow and cables pass through. Vented side panels also contribute to thermal control

◆ Durable Kick Plate:
  Winsted Pedestals include 18-gauge stainless steel kick plates to protect them from typical wear and tear

◆ Optional Wheels:
  You can turn your console into a moveable workstation by purchasing optional Plate Casters (85782)

◆ Modular Design:
  Modular components are well integrated, so your console can continue to grow and transform. Need to add another bay? Just purchase another pedestal and rack modules. You can also build corners, angled shelves, and racks of varying heights by combining different System/85 pieces

RGB Component Cables
Comprehensive’s HR Series RGB cables are top quality, broadcast grade cables and are available in three (RGB), four (RGB5), or five (RGBHV) color-coded conductor versions. All are constructed of high resolution RGB mini coax and are 100% shielded for the highest quality signal transmission with no discernable loss. These premium cables are terminated with molded premium true 75 ohm nickel over brass BNC connectors with gold pins for maximum signal transfer and durability. Comprehensive’s famous X-traflex black matte jacket and lifetime warranty make them the best RGB cables money can buy.

**XHD SERIES**

**XHD Double Shielded X3V Cables**

XHD cables are the cable of choice for digital signage, home theater and all high definition and HDTV applications. X3V composite, S-Video, component video, VGA, DVI, and HDMI cables provide true XHD performance and utilize double shielding of 95% copper braid and 100% foil which provides the ultimate protection against RF and electromagnetic interference. A 100% Oxygen Free Copper stranded center conductor allows for maximum signal transfer and no discernable loss. Comprehensive’s NGD technology (nitrogen gas dielectric) provides maximum signal transfer even over long distances. 24k gold contacts with split center pin provide premium connectivity while Comprehensive’s legendary X-Traflex jacket reduces cable stress for unsurpassed durability.

The X3V series provides the sharpest, clearest pictures with bright, true lifelike colors and the most accurate image representation available.

**X300V Silver Series**

The X300V Silver Series is the top of the line in XHD analog video cables and provides ultra high resolution video definition and performance for composite video, S-Video, component video and RF cable TV signals—even HDTV. X300V cables utilize a polished silver coated 100% Oxygen Free Copper center conductor for maximum signal strength, low attenuation and no discernable loss. Comprehensive’s NGD technology (nitrogen gas dielectric) provides maximum signal transfer. X300V cables utilize double shielding of 95% copper braid (not 80 or 85% like competitors) and 100% foil provides the ultimate protection against RF and electromagnetic interference. 24k gold slip contacts provide premium connectivity while Comprehensive’s legendary X-Traflex jacket reduces cable stress for unsurpassed durability. The X300V series provides the sharpest, clearest pictures with bright, true lifelike colors and the most accurate image representation available.

X1300 Series True HDTM HDMI 1.3 CAT 2 Cables

The Comprehensive HDMI X1300 series provides unparalleled HDTV picture and sound quality. Utilizing the latest HDMI 1.3 Category 2 technology, HDMI X1300 takes HDTV to the next level. HDMI X1300 greatly expands HDMI’s capabilities from the current and previous versions of HDMI with increased bandwidth from 165MHz (4.9Gbps) to up to 340Mhz (10.2 Gbps) and over 400% higher resolution than 720p.

Comprehensive HDMI X1300 also supports higher refresh rates of up to 120Hz for smoother motion. HDMI X1300 supports up to 12-bit (RGB or YCbCr) color depths commonly referred to as Deep Color. HDMI X1300 also supports a broader color space using next generation “xxYCC” color space technology that can display virtually the entire gamut of colors viewable by the human eye. Next-generation “xxYCC” color space supports 1.8 times as many colors as existing HDTV signals as well as viewable by the human eye. Next-generation “xxYCC” color space provides maximum rejection of all EM and RF interference and 24k gold connectors ensure superior connectivity.

X1300 HDMI cables utilize an oxygen free copper center conductor to ensure extremely low attenuation and maximum signal transfer for the ultimate in high definition HDMI cable performance. Triple shielding provides maximum rejection of all EM and RF interference and 24k gold connectors ensure superior connectivity.

X3V True HDMI 1.3 CAT 1 Cables

X3V True HD™ HDMI cables utilize Comprehensive’s exclusive technology to provide true HDTV 1.3 (category 1) performance. Unlike standard HDMI cables that can only go up to 15-ft. True HD™ X3V HDMI cables transmit resolutions of up to 1080p to 65-ft. or more without the need for an extender or a repeater. X3V HDMI cables support speeds up to 4.95 Gbps and refresh rates up to 60hz. X3V HDMI cables utilize a large gauge oxygen free copper center conductor to ensure extremely low attenuation and excellent signal transfer for high definition HDMI cable performance. Triple shielding provides maximum rejection of all EM and RF interference and 24k gold connectors ensure superior connectivity.

X3A Audio Series

X3A audio cables utilize 100% oxygen-free copper solid conductor construction with dual balanced twisted conductors and a shield which enhances audio response. Tightly twisting the dual conductors and both a 95% braid and 100% foil shield allows for superior rejection of interference when compared to other so-called high performance audio cables.

X3A cables utilize two 100% Oxygen Free Copper stranded center conductors for maximum signal transfer and no discernable loss. Premium 24k gold contacts with split center pin provide secure connectivity while Comprehensive’s legendary X-traflex jacket reduces cable stress and provides unsurpassed durability. The result is deeper bass, crisper highs, and enhanced spatial imaging.

XD1 Series — XHD Digital S/PDIF Audio Cables

XD1 series digital audio cables are specifically engineered to provide superior audio clarity and definition from today’s high end audio components. The XD1 series low capacitance design and premium dielectric provides maximum signal transfer while minimizing loss. XD1 cables utilize double shielding of 95% copper braid which provides the ultimate protection against RF and electromagnetic interference. XD1 cables utilize an all copper stranded center conductor for minimal loss and maximum signal strength. 24k gold contacts provide premium connectivity while the X-Traflex jacket reduces cable stress for unsurpassed durability.

The Elements Café series continues with
even more royalty free goodies to give your
audio imaging a pick me up - a full pot of
alternative rock theme music tracks, other
music beds, percussion, logos, electronic stingers and accents and
sound effects, plus a whoosh collection - 406 production elements in all!

- A Selection of Alternative Rock Themes
- Musical Beds, Accents, Logos & Stingers
- Electro-Acoustic Stingers, Logos, Accents & Hits

The Elements Café 3
Production Elements
The third CD in this series of spectacular
and highly practical royalty free production elements comes all packed and ready to go
with 357 tracks in all! Included are a wide
selection of special effects, more whooshes, sweeps, zaps and lasers,
electronics and communications effects, and a great collection of high
impact sound effects, ready for radio imaging use just about anywhere!

- Special Effects & Hits
- Electronic Stingers & Accents
- Whooshes, sweeps, Zaps & Lasers
- Sound Effects

The Elements Café 4
Production Elements
More than 500 sizzling royalty free
production elements and sound effects!
Elements café 4 offers a fresh brewed
selection of audio imaging accents, logos &
stingers, communications, drones, hits, lasers, rewinds, scratches, servo
motors, special fx, tones & telemetry, and whoosh effects, including:

- Dance and Groove Beds
- Bursts & Flutters
- Crowds
- Drum Hits
- Electricity & Electronic Pulses
- Explosions
- Laser Shots, Bursts and Blasts
- Record Scratches and Groove Noise
- Ripping, Metallic, Snapping,
- Spiral and Flaming Whooshes
- Audio Tape Rewinds
- Space Drones
- Station IDs
- Stereo Arc
- Telemetry & Beeps
- Transmission Bursts
- Warning & Overload Signals & Sirens

The Elements Café 5
Production Elements
Elements Café 5 packs a punch with a concen-
trated selection of 250 well produced imaging
elements designed to add serious caffeine to
your productions. These royalty free, multi-
dimensional production elements will surprise you and challenge your
creative side. This cutting-edge CD showcases:

- Beds: 18 beds for news, sports, traffic and weather
- Comedy Stagers: 9 versatile comedy accents
- IDs & Logos: 15 pre-assembled stagers & sweepers

as well as a remarkable collection of rich production elements:

- Telephone Beds & FX
- Hits
- Audio Punctuators
- Guitar Hits & Stingers

The Elements Café 6
Production Elements
Elements Café 6 - another delicious feast of royalty free production elements and music clips, served up just the
way you like them.
For starters, Elements Café 6 opens with more than eighty musical beds, stingers, loops and percussion grooves -
a fresh brewed selection of Dance, Rock and Electronic themes. The menu also features over one hundred radio
imaging house blend specialties:

Dissolves, Electronic Swipes, Sweepers, Whooshes, Lasers, Hits, Zaps, Zips and Special FX

Elements Café 6 from Sound Ideas - 200 more tracks of hot and tasty production elements and vivid musical ingredients - just the right buzz for your
productions!

The Big Whoosh Production Elements

The Big Whoosh is a royalty free extravaganza of whooshes, production elements, audio signatures and always in-demand sound effects for radio imaging, broadcast, multimedia, game developers and Web designers.

Whooshes: long, medium, short, flanged, wispy, echoing & rumbling
Music Sounders: pulses, news tags, logos & closers
Space: star showers, spooky & dangerous FX, encounters, manoeuvres, takeoffs & landings
As Well: accents, explosions, heartbeats, hits, jail doors, sparkles, telephones, zings, zaps, funny stuff & much more

The Big Whoosh 2 Production Elements

Catch the rush. The Big Whoosh 2 from Sound Ideas - a special delivery production elements parcel of long, medium and short whooshes, enhancers, phased and alien whooshes, drones, whoosh rewinds and impacts, fly bys, takeoffs & landings, special FX and music logos.

The Big Whoosh 2 - one CD, more than 300 royalty free special effects, and a whole lot of magic. Brought to you only by Sound Ideas.
 Superior metal tape technology and Super-Fine Metallix metal magnetic particles team up to ensure that you get superb Betacam SP video and audio quality for recording, editing and playback. Dropouts are kept to an absolute minimum - even after prolonged use under adverse environmental conditions.

HDCAM (HD331)
Fujis HD331 cassette offers the high output and low noise that HD broadcasting demands. High C/N and a low error rate are assured by ultrafine metal magnetic particles and a magnetic layer polished to mirror-like smoothness. Strong binder material keeps heads clean, preventing dropouts and keeps tape transport stable.

An extremely thin and uniform layer of special anti-oxidant material is applied to the surface of each metal magnetic particle. This prevents magnetic performance from deteriorating during long-term storage. Fuji also keeps tape shrinkage to an absolute minimum during archival storage. As a result consistently superior playback performance is ensured even after long-term storage.

HDCAM (Small) 6 Minutes (Mfr # 24035006 • B&H # FUHD331SP6S)..............28.50

MPEG IMX (MX321)
Fujis MX321 combines outstanding sound and image quality with high reliability and durability. Magnetic particles and advanced calendering technology assure high C/N ratio. The base film assures smooth, stable tape transport and is exceptionally durable and resistant to deformation. The binder material reduces head clogging and increases reliability under the demands of ENG/EFP fieldwork and video editing.

Sold only in multiples of 10:
MPEG IMX (Small) 6 Minutes (Mfr # 2403906 • B&H # FUMX3216S)..................14.95

Betacam SX (SX321)
Ultra-high-output magnetic particles ensure a high C/N ratio. High-performance binder system provides superior adhesion for stable tape transport and outstanding reliability and durability under the extreme demands of professional use. High-precision, high-rigidity cassette shells protect the tape during long-term storage and when shooting outdoors. Also protects stored tapes from dirt and dust that can cause dropouts and errors to increase.

Sold only in multiples of 10:
Betacam SX (Small) 6 Minutes (Mfr # 2403706 • B&H # FUSX3216S)..................9.50

DVCAM (DV131)

High-efficiency recording is assured by an ultra-thin layer of 100% cobalt magnetic particles applied directly to the base film using advanced Fuji vacuum deposition technologies. The result—"Thin Cobalt Layer Tape"—boasts outstanding magnetic characteristics. Noise is also exceptionally low, ensuring high output and C/N signal strength across the entire frequency range. High-energy metal magnetic particles allow high-density digital recording. Tightly sealed high-precision, high-rigidity cassette shells prevent damage, promote stable tape transport, and shut out dust and dirt. They also feature large clear windows that show the amount of remaining tape, and colored lids and transparent hard cases that make it easy to differentiate DP121 and DP1001 cassettes from one other.

**Sold only in multiples of 10:**

**DVCAM (DV131)**

Like DVCAM, high-efficiency recording is ensured by an ultra-thin layer of 100% cobalt magnetic particles applied directly to the base film. However, for DV141HD, even finer magnetic particles are packed even more densely to ensure high output and excellent C/N characteristics across the frequency spectrum. The exceptional smoothness of the magnetic layer surface and cleaning system team up to reduce minute dropouts and spacing loss.

- Mini HDV/ DV 63 Minutes (Mfr # 24040363 • B&H # FUDP131M63) 7.49

**HDV (DV141HD)**

Designed to get the best out of today’s 10-bit digital component recording systems. Head contact is excellent, with minimal noise and low error rates. High-adhesion binder material assures outstanding reliability and minimal head clogging - even during extended still and high-speed shuttle operation. Cassette shells are precision-crafted to protect tape under adverse conditions. Cassettes are also equipped with two sliding plugs which can be used to individually protect the control and video signals against erasure.

**Sold only in multiples of 10:**

(212) 444-6601 • 1-800-947-9901 • Quick Dial 821
Maxell’s BETACAM SP tape features a cross-linking high performance binder system. This system combined with the Ceramic Armor Metal particles technology, with its extremely thin ceramic layers, enhances the physical characteristics and corrosion resistance of the tape. Thanks to this, the tape offers excellent reliability and durability even under the harshest of electronic editing conditions.

Maxell’s meticulous contamination free production system plus its exceptional quality control reduce dropouts to the absolute minimum. In addition, a conductive backcoating and an anti-static cassette shell are used to repel dust and debris while helping suppress the dropout ratio. Hard case provides improved shock resistance.

**Sold only in multiples of 10:**
- Betacam SP (Small) 5 Minutes (Mfr # 289413 & B&H # MAB5MSP) ............... 9.99

**MPEG IMX**
MPEG-IMX achieves 4:2:2 component digital recording offering superior quality at 50Mbps that is backward compatible with Betacam SP and Digital Betacam. High output and lower noise is achieved through the use of fine metal particles and stable C/N allows for lower error rates. Fine metal particles and specially formulated binder systems allow for long-term durability. Also protects against heat and oxidation, providing stable reliability for long-term storage.

**Sold only in multiples of 10:**
- MPEG IMX (Small) 6 Minutes (Mfr # 304090 & B&H # MAB6MX) ............... 15.95

**Digital Betacam**
Maxell’s Digital Betacam cassettes combine exclusive metal tape technology with an advanced cassette mechanism to create an extra low error rate. Multi-orientation technology and advanced dispersion systems allow the high output Ceramic Armor Metal Particles to reach their full potential. In addition, the Particles’ tough Ceramic Armor coating protects against energy-dissipating heat, oxidation and corrosion. The backcoating is a conductive coating that prevents energy-dissipating heat. In addition, a conductive backcoating and anti-static cassette shell optimize smooth tape travel. In addition, Maxell’s SW (Smooth Winding) reel with radial grooves molded on the lower flange emit most of the air generated during high-speed winding to minimize uneven tape winding.

**Betacam SX**
Betacam SX achieves 4:2:2 component digital recording and is backward compatible with Betacam SP, also providing high interface ability with non-linear editing systems and video servers. Fine Ceramic Armor Metal magnetic particles and high performance binder systems achieve superior reliability and durability. Highly accurate cassette shell optimize smooth tape travel. In addition, Maxell’s SW (Smooth Winding) reel with radial grooves molded on the lower flange emit most of the air generated during high-speed winding to minimize uneven tape winding.

www.bhphotovideo.com
Maxell DVCPRO tape use Ceramic Armor Metal Particles achieve higher magnetic energy. The tape also utilizes a calendering technology that optimizes tape surface smoothness. This process delivers an improved short wavelength output and decreased noise creating a broadcast quality tape. Uniformly dispersed fillers in the tape formulation minimize head abrasion by reducing friction between the head and tape during high speed head rotations, cleaning debris from the head. Special binder ensures long-term durability even in extreme ENG/EFP environments, and in demanding editing and playback modes. The large shell window design allows for a clear vision of remaining tape and winding conditions. To ensure a low error rate, the cassette shell and cover feature a static-resistant resin that prevents the attraction of dust and foreign particles that may cause dropouts.

**Sold only in multiples of 50:**

**D5**

The 0.1 µm length, ultra fine Ceramic Armor Metal Particles provides superior magnetic qualities and calendering technology smoothes the surface of the magnetic coating, increasing short wave length output and improving the signal to noise ratio. A thin, highly rigid PEN (polyEthyleneNaphthalate) basefilm material provides a tape thickness of 11µm that delivers an ideal head-to-tape contact and superior durability. Uniform filler dispersion technology enables the tape to continually clean the head surface without causing excessive wear. This technology maintains a perfect head surface condition over long periods of time.

**Sold only in multiples of 10:**

Maxell HDCAM videotape employs very finer 0.1µm NEW Ceramic Armor Metal magnetic particles with Maxell’s unique multi-orientation technology to achieve remarkable high output and low noise. Low error rate is also reached by achieving superior C/N characteristics. High performance three dimensional cross-linking binder systems allows superior reliability and durability of the tape in extreme environment acquisition (ENG/EFP) and editing operations where long-term still modes are frequently used. The tape also provides superior anti-heat resistance and anti-oxidation characteristics. The addition of another unique process of minimizing tape shrinkage achieves superior stability characteristics suitable for long term storage such as video archiving.

**HDCAM**

**Sold only in multiples of 50:**
- HDCAM (Small) 6 Minutes (Mfr # 292890 • B&H # MAB6HD) ........................................... 23.95

**Professional Disc**

Fully compatible with the XDCAM System, Maxell’s Professional Disc is a rewritable optical disc featuring remarkably highcapacity storage on a 12cm diameter disc packed in a cartridge. High-density track patterns and the blue-violet laser’s short wavelength of 405nm both contribute to creating the Professional Disc’s large storage capacity.

To realize an ultra-low-pitch data track, Maxell employs the latest stamping instrument using a high-precision laser-cutting-control technology based on conventional DVD production technologies. Rate. In order to avoid data errors caused by minute disc warp, the disc adopts a special structure. The surface of the Professional Disc’s recording layer is formed by a 0.1-mm-thick light transmission protective layer coating with a hard coat protecting the disc’s surface against scratches, dust and fingerprints, which can damage the disc. The disc also employs a high precision cartridge to protect against dust and handling errors caused by heavy use.
Sony's Betacam SP performance is a combination of Emmy award-winning metal videotape technology and comprehensive quality control. It offers high C/N, low head-wear, reduced dropouts and outstanding durability, making it ideal for ENG, post-production and other broadcast applications, including TV transmission.

Strengthened binder gives metal tape greater durability under the stress of repeated use — important for cart machines and repeated editing. Dropouts are prevented by the stronger binder, sophisticated new quality control and the anti-static lid.

Betacam SP is the accepted digital replacement format for Betacam SP tape, offering 8-bit 4:2:2 digital quality with substantially lower cost than the analog Betacam SP tape. Sony’s ultra-fine metal particles ensure a higher carrier-to-noise ratio. Strengthened binder system reduces particle shedding for improved reliability and more consistent quality. Sony’s metal particles utilize an alumina-silica coating that almost completely prevents oxidation of the metal core by sealing out air and humidity. Sony’s distinctive yellow cases and cassette shells avoid confusion between Betacam tape formats.

Betacam SX is the accepted digital replacement format for Betacam SX tape, offering 8-bit 4:2:2 digital quality with substantially lower cost than the analog Betacam SX tape. Sony’s ultra-fine metal particles ensure a higher carrier-to-noise ratio. Strengthened binder system reduces particle shedding for improved reliability and more consistent quality. Sony’s metal particles utilize an alumina-silica coating that almost completely prevents oxidation of the metal core by sealing out air and humidity. Sony’s distinctive yellow cases and cassette shells avoid confusion between Betacam tape formats.

Digital Betacam: BCT-D Series videocassettes bring out the full potential of Digital Betacam for 1/2” digital ENG/EFP, post production and transmission. Feature specially developed ultra-fine particles for higher recording densities and lower error rates. Stronger tensilized base film for track compatibility, reliable editing and long term storage. Polymeric Lubricant for low headwear and optimal tape/head contact. Double Rib interlocking case employs high impact ABS plastics for maximum durability and anti static lid minimizing dirt and dust attraction.

MPEG IMX: With ultra-fine metal particles and an advanced calendaring system, MPEG IMX tape provides exceptional quality with a C/N ratio of 40dB. A separate magnetic particle treatment improves adhesion between the binder and particles by 30%, reducing dropouts and increasing durability.

Sold only in multiples of 10:

- MPEG IMX (Small) 12-Minutes (Mfr # BCT12MX • B&H # SOBCT12M) ............... 16.50
- MPEG IMX (Small) 22-Minutes (Mfr # BCT22MX • B&H # SOBCT22M) ............... 17.50

- MPEG IMX (Large) 124-Minutes (Mfr # BCT124MXL • B&H # SOBCT124MXL) ........ 62.95
- MPEG IMX (Large) 184-Minutes (Mfr # BCT184MXL • B&H # SOBCT184MXL) ....... 92.50
Sony’s DVCAM tape minimizes head wear and protects the life of your equipment. By developing DVCAM hardware and media in partnership, Sony has increased the guaranteed operational life of the VTR head drum to an exceptional level. Reinforced by a rugged professional hard case, DVCAM performance is guaranteed however extreme the conditions.

DVCAM media includes an advanced DLC layer for exceptional durability, making it unbeatable for long-term storage. The guaranteed minimum archival life of DVCAM is 30 years, subject to proper care, maintenance, good handling and storage conditions.

DVCAM features an Advanced Metal Evaporated tape technology and a super thick Diamond Like Carbon protective coating for a dramatically improved error rate margin over consumer DV media. With a DLC layer 1.3 times thicker than that used in consumer DV, DVCAM significantly improves the durability of still-frame video, resulting in a dramatically improved pause mode picture quality.

With a much lower friction coefficient and tighter tolerance than consumer DV media, DVCAM improves stability and provides excellent tracking and control. Pictures are sharper and more defined for maximum impact. Thanks to its advanced technologies, DVCAM reduces tape shrinkage by half, even after long-term storage. With a DLC layer 1.3 times thicker than that used in consumer DV, DVCAM significantly improves the durability of still-frame video, resulting in a dramatically improved pause mode picture quality.

DVCAM Digital Master

The perfect media for HDV, Digital Master tape combines spectacular 1080i high definition picture quality with all the benefits of tape-based recording and archiving. It’s the most convenient and cost effective high definition tape media for day-to-day filmmaking. Digital Master Tape is the only professional video tape featuring double active magnetic layers. That makes it superior to standard DV or DVCAM media with fewer errors and less dropouts. An ideal and reliable choice for low cost HD productions across a wide variety of environments.

Designed for any Mini-DV, DVCAM, or HDV camcorder, DigitalMaster tape is far from ordinary. It’s the only professional video-tape with not one, but two active magnetic layers, for 95% fewer errors than consumer DV tape. Because video error correction is so good, errors are sneaky. Even as the errors accumulate, you’ll think you’re fine. Your first sign of trouble can be a dropout that can break up the image on a one-of-a-kind tape. Your risk is even greater if the tape will undergo such adverse conditions as dusty or smoky environments, temperature and humidity changes, repeated playback or extended time in pause mode. So why risk it at all? When it comes to your vision, demand DigitalMaster tape.

Because Sony’s professional-grade album case securely locks tight, it resists accidentally opening when dropped or jumbled arounds in an equipment bag, compared to the non-locking consumer DV case.
VIDEO TAPE

HDCAM

Designed and tested with HDCAM VTRs for optimum performance, HDCAM tape features advanced metal tape technology and ultra fine metal particles. Incorporating an evolution of the highly successful binder used in Digital Betacam media, HDCAM tape achieves outstanding durability. A lubricant protects the tape surface and ensures optimum contact with the recording head.

HDCAM metal tape particles are coated in a unique aluminia silica protective layer to ensure superb anti-oxidising characteristics. Furthermore, a proprietary system reduces tape shrinkage over time and provides precise tracking and playback, even after many years of storage.

HDCAM tapes use broadcast quality videocassette shells that display recording time in 60i and 24PsF modes and feature a distinctive orange anti-static lid for easy identification.

Sold only in multiples of 10:

HDCAM SR

Featuring Sony’s most advanced metal tape technology, HDCAM SR offers incomparable picture quality and is ideal for demanding applications like special effects, archiving and film mastering. It’s the only choice for filmmakers who won’t compromise on quality and is part of a family of Sony HD media products designed for every need and budget.

HDCAM SR digital cassettes are designed to maximize recordings in HDCAM SR professional digital VCRs. These cassettes capture recording wavelength to 0.29 μm and represent the highest performance metal particle tape. They are equipped with a TeleFile system to further enhance asset management working practices. This low cost cassette label contains a memory IC featuring contact-free induction coil transmission to store information. HD VTRs can read and write from these labels.

BCT-6SR (Small) 6 Minutes (Mfr # BCT6SR/2 • B&H # SOBCT6SR) ............. 56.50
BCT-33SR (Small) 33 Minutes (Mfr # BCT33SR/3 • B&H # SOBCT33SR) ...... 93.50
BCT-40SR (Small) 40 Minutes (Mfr # BCT40SR/3 • B&H # SOBCT40SR) ...... 85.50

Professional Disc

Professional Disc combines true High Definition picture quality with outstanding recording capacity and all the advantages of non-linear production for ultra efficient filmmaking and news reporting. With its new dual-layer version, it is expanding media professionals’ opportunities. This upgraded version also increases XDCAM system’s potential as an efficient production technology. Available in 23.3 GB and dual layer 50 GB, they are ideal for long continuous recordings like sport events, speeches, conferences, etc. This equates to an HD recording time up to 120 minutes with the single-layer version and up to 250 minutes with the dual-layer version.

Sony’s advanced hard coat technology gives the disc high scratch-resistance and an extremely low electrostatic charge, making it difficult for static electricity to be generated and preventing dust inside the camera from damaging the disc.

Ruggedly engineered to perform a minimum of 1,000 record/re-record cycles, the disc can be used as many times as you like without picture or audio degradation. Disc is protected by a durable cartridge that offers exceptional resistance to dust, mechanical vibration, surface scratches and X-rays – more than tough enough to cope with the knocks and shocks of real-life shooting conditions.

PFD-23 23.3 GB Disc (Mfr # PFD23A • B&H # SOPFD23) .........................24.95
PFD-50 50GB Dual Layer Disc (Mfr # PFD50DLA • B&H # SOPFD50) .......69.95

SxS PRO

Designed for the latest XDCAM EX camcorder, Sony SxS PRO media is set to change the way professional HD video is captured and edited. These compact flash-based memory cards provide near instantaneous read and write performance with transfer speeds of up to 800Mbps. For professional videographers and broadcasters requiring faster turnaround times and more efficient high definition digital video workflows, SxS PRO is the ideal solution.

SxS PRO is the first ever PCI Express solid-state storage media and can transfer data at up to twice the speed of legacy PC Card interfaces. Cards include a high quality locking case designed to safely store and protect it while travelling.

8GB SxS PRO Memory Card (Mfr # SBP-8 • B&H # SOSBP8) ....................399.95
16GB SxS PRO Memory Card (Mfr # SBP-8 • B&H # SOSBP8) ...............849.95
The Complete Reference
Maya 8
by Tom Meade & Shinsaku Arima
A reference guide for the advanced 3D animation suite, Maya 8. Teaches you how to create animated content using Maya. The software can create content for film, TV, video game, print media, and the web. An excellent resource for anyone who earns a living using the software. 640 pgs.

Item # MCM8CR.................................................................59.95

Photoshop CS3
All-In-One Desk Reference for Dummies
by Barbara Obermeier
Whether you’re new to Photoshop, want to take your skills up a notch, or want to quickly master the new features and enhancements in Photoshop CS3, you’ve come to the right place. "Putting It Together" exercises give you hands-on experience. 700 pgs.

Item # WIDCS3IODRD.........................................................39.95

HDTV for Dummies
Second Edition
by Danny Briere & Pat Hurley
If you love movies, TV, and video games, you’ve probably thought about investing in a high-definition television set, otherwise known as HDTV. But first you should know what you’re investing your hard-earned money in, which TV set is good for you, and other things that will optimize your viewing pleasure. 330 pgs.

Item # WIHDTVDE.................................................................19.95

Maya Character Modeling & Animation
by Tereza Flaxman
A training guide for the Maya 3D animation suite. Teaches you how to use the software to create and animate character models. A CD-ROM with project files is included, allowing you to work with the examples and lessons presented in the book. 500 pgs.

Item # THMCMAA.................................................................49.95

Photoshop CS3 Channels & Masks Bible
by Stephen Romaniello
If you use Photoshop without working with channels and masks, you’re missing out on some of the most powerful and creative features of Photoshop CS3. Create dazzling composites, speed your workflow, get awesome color, with step-by-step instructions, techniques, and examples. 544 pgs.

Item # WIDPCS3CAMB.........................................................49.95

Photoshop Layers Bible
by Matt Doyle & Simon Meek
Photoshop layers allow you to create complex compositions by stacking one or more images on top of a background, providing designers with greater design flexibility. Gain total creative control. Packed with hands-on examples that demonstrate concepts and functions as well as scores of undocumented techniques and secrets. 792 pgs.

Item # WIPCS3BL.................................................................39.95
ADVANCED VIDEO

The DVX Book  
by Barry Green  
This is the ultimate training package for the Panasonic AG-DVX100, DVX100A and DVX100B camcorders. Comprehensive examination of the camera, all its settings and modes, and tutorials on some of the most common situations DVX users find themselves facing. Technical issues described in ways that make them approachable to even the most non-technical users. 150 pgs.  
Item # BODVXB ................................................................. 69.95

The HVX Book  
by Barry Green  
Covers all facets of the camera - from soup to nuts, this tutorial will fill in all the gaps, leaving no stone unturned. Written in plain language that makes it easily comprehensible by users of all levels. Technical issues are described in ways that make them approachable and practical to even the most non-technical users. Over 250 pgs.  
Item # BOHVXB................................................................. 89.95

How to Shoot, Edit & Distribute HDV  
by Andrew Lock  
A comprehensive and insightful overview of current HDV cameras. In addition, the author, Andrew Lock, talks about getting the most from your camera. Suggested shooting modes and “tweaking” the camera to squeeze the most out of what this medium can offer. 143 pgs.  
Item # BOHDVB ................................................................. 24.95

The Camera Assistant's Manual  
Fourth Edition  
by David E. Elkins, S.O.C.  
A “must have” on the set for camera assistants. Loaded with reference material such as camera illustrations, forms, charts, checklists, and equations. Teaches the complete workflow in easy-to-understand terms and does not assume prior knowledge. Invaluable career advice rounds out the book. 512 pgs.  
Item # FOCAM ................................................................. 46.95

The Camera Assistant  
A complete Professional Handbook  
by Douglas C. Hart  
A veteran camera assistant describes in this all of the important facets and duties of the first and second camera assistants’ jobs in this comprehensible technical guide. Additionally, personal anecdotes from the author’s years behind and beside the camera provide insight into this demanding field. 421 pgs.  
Item # FOCAZ ................................................................. 62.95

Bluescreen Compositing  
A Practical Guide for Video & Moviemaking  
by John Jackman  
A comprehensive how-to-course in creating effective and realistic composited scenes in video formats. Clear, understandable explanations of the different types of keying techniques and how they work. Real-world examples and tutorials. 248 pgs.  
Item # FOBSC ................................................................. 44.95

The Complete Film Production Handbook  
Third Edition  
by Eve Light Honthaner  
A step-by-step guide covering the essentials of the business, from check-lists and sample pre-production and post production schedules to contracts and company policies relating to insurance, talent management, and more. 140 line illustrations. 520 pgs.  
Item # FOCFPHB ................................................................. 59.95

Compositing Visual Effects  
Essentials for the Aspiring Artist  
by Steve Wright  
Lavishly illustrated with hundreds of film shots, figures, illustrations and diagrams to help you gain a valuable vocabulary and understanding of the full range of visual effects which play a key role in digital compositing. Author is a 20-year visual effects compositing veteran with 70 broadcast TV commercials and over 60 feature films credits. 264 pgs.  
Item # FOCVE ................................................................. 43.95
