Meaning of Symbols in the Guide

• Symbols for Safety
The documentation and this product use graphical symbols to show how to use this product safely.
The indications and their meaning are as follows. Make sure you understand and respect these caution symbols to avoid injury to persons or property.

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>!</td>
<td><strong>Warning</strong> This symbol indicates information that, if ignored, could possibly result in personal injury or even death due to incorrect handling.</td>
</tr>
<tr>
<td>!</td>
<td><strong>Caution</strong> This symbol indicates information that, if ignored, could possibly result in personal injury or physical damage due to incorrect handling.</td>
</tr>
</tbody>
</table>

• Symbols for General Information

<table>
<thead>
<tr>

Safety Instructions

Read this User's Guide and follow all safety instructions for your document camera. Keep this guide at hand for future reference.

Environmental Precautions

⚠️ Warning
Do not use or store the document camera or remote control in a hot location, such as near a heater, in direct sunlight, or in a closed vehicle. Thermal damage, fire, or malfunction may occur.
Do not use or store the document camera outdoors for an extended length of time, or where it may be exposed to rain, water, or excessive humidity. Fire or electric shock may result.
Do not use or store the document camera where it may be exposed to smoke, steam, corrosive gases, or excessive dust. Fire or electric shock may result.

⚠️ Caution
Do not set up the document camera near high-voltage electrical wires or sources of magnetic fields. This may interfere with correct operation.

Operate in the proper environmental conditions. 👈 "General Specifications" p.57
Do not place or store the document camera where it is accessible to small children. It may drop or tip over, causing personal injury.
Do not place the document camera where it may be exposed to vibration or shock.
**Electrical Precautions**

⚠️ **Warning**

Never open any covers on the document camera except as specifically explained in this *User's Guide*. Never attempt to disassemble or modify the document camera. Refer all repairs to qualified service technicians.

Unplug the document camera from the outlet and contact your local dealer or Epson for help under the following conditions:

- If smoke, strange odors, or strange noises come from the device
- If liquid or foreign objects get inside the device
- If the device has been dropped or the housing has been damaged

Continuing to use under these conditions may result in fire or electric shock.

Do not attempt to use any adapter other than the AC adapter and power cord included with the device. Using an improper adapter may cause damage, overheating, fire, or electric shock.

Be sure to use the AC adapter with the proper voltage indicated in this guide. Use of a different power source may result in fire or electric shock.

If the AC adapter, power cord, or document camera is damaged, turn the power off, unplug the AC adapter from the electrical outlet, and contact your local dealer or Epson for help.

Do not touch the device, the AC adapter, or the plug with wet hands. Otherwise, you may receive an electric shock.

Do not use a power cord that is damaged. This may result in fire or electric shock. Take the following precautions when handling the power cord:

- Do not modify the power cord.
- Do not place heavy objects on the power cord.
- Do not bend, twist or pull the power cord excessively.
- Keep the power cord away from hot electrical appliances.

Take the following precautions when handling the plug. Failure to comply with these precautions could result in fire or electric shock.

- Do not overload wall outlets, extension cables, or power strips.
- Do not insert the plug into a dusty outlet.
- Insert the plug firmly into the outlet.
- Do not pull the power cord when disconnecting the plug; always be sure to hold the plug when disconnecting it.

Do not touch the plug during an electrical storm. Otherwise, you may receive an electric shock.
Caution

Turn off the document camera and unplug it after use.
Make sure the power is turned off, the plug is disconnected from the outlet, and all cables are disconnected before moving the document camera.
If a malfunction occurs due to static electricity, thunder, and so on, the product begins recovery operations. During recovery operations, do not touch any switches on the product.

Installation Precautions

Warning

Do not use adhesives to prevent the screws from loosening and do not use oils or lubricants. This may cause the document camera housing to crack and could cause serious injury.

Caution

Do not place the document camera in an unstable location, such as on a shaky table or slanted surface. The document camera may drop or tip over, causing personal injury. If you use a table, cart, or stand, make sure it is stable and will not fall over.
When using the mounting points under the document camera to secure it to a table, cart, or stand, fasten the two bolts securely but do not overtighten them. Do not use adhesives.
Do not place the document camera in a poorly ventilated place where heat can accumulate.
Do not place the document camera on a carpet, blanket, and so on, or cover it during use.
Do not install the document camera in a hot location, such as near a heater.
Route cables so that they are not a tripping hazard. Otherwise, they could trip someone and cause a fall or injury.
Cleaning Precautions

⚠️ **Warning**

Use a dry cloth (or, for stubborn stains, a moist cloth that has been wrung dry) for cleaning. Do not use liquid, aerosol cleaners, or solvents such as alcohol, thinner or benzine.

Do not place any containers of liquid on top of or near the document camera.

Do not spill liquid or spray fine mist into the document camera. Liquids entering the document camera may cause malfunction, fire, or electric shock. If you spilled liquid, turn the power off, unplug the AC adapter from the electrical outlet, and contact your local distributor. Using the damaged device may cause fire or electric shock.

Never allow objects of any kind to enter any openings in the document camera. Do not leave objects, especially flammable objects, near the document camera. Doing so may result in fire or electric shock.

⚠️ **Caution**

Unplug the AC adapter from the outlet before cleaning to prevent electric shock.

Usage Precautions

⚠️ **Caution**

Do not look into the lens when the LED illumination lamp is on. The bright light can damage your eyes.

Do not use excessive force when adjusting the document camera. The document camera may be broken, resulting in personal injury.

Do not place heavy objects on document camera. Otherwise, it may be damaged.

Do not try to press the arm flat or fold it backwards. Otherwise, it may be damaged.
Battery Precautions

⚠️ **Warning**

Incorrect battery usage may cause batteries to rupture and leak battery fluid, which could result in fire, injury, or corrosion of the remote control.

If battery fluid gets in your eyes, do not rub your eyes. Wash them well with clean water and contact a doctor immediately.

If battery fluid enters your mouth, rinse immediately with plenty of water and contact a doctor immediately.

If battery fluid comes in contact with your skin or clothes, wash with water to prevent possible skin damage.

Keep batteries out of the reach of children; they are choking hazards and are very dangerous if swallowed.

Prepare two replacement manganese or alkaline AA batteries. Do not install batteries of different types, or mix new and old batteries.

Insert batteries so that the polarities (+ and -) are correct. Not doing so may cause leakage, overheating, or explosion.

Be sure to replace both batteries with new ones of the same type. Not doing so may cause leakage, overheating, or explosion.

Remove the batteries if you will not be using the remote control for a long period of time. When a battery runs down, take it out of the remote control immediately. If a used-up battery is left inside for a long time, gas emitted from the battery may cause leakage, overheating, explosion, or damage to the remote control.

Do not expose batteries to heat, flame, or water.

Dispose of used batteries according to local regulations.

## Specifications
- General Specifications ........................................... 57
Introduction

You can use this document camera to capture and project pages from books or other documents, and even three-dimensional objects. You can also use the software supplied to operate the document camera from a computer.
- Remote control with 2 AA batteries
- Power cord and adapter
- Computer cable
- USB cable
- EPSON Document Camera Software CD-ROM
- Document CD-ROM
- Quick Start Guide
- Microscope adapter
**Document Camera Parts**

### Top/Side/Rear

- **Name**: Camera head
  - **Function**: "Camera Head" p.12
- **Name**: Remote receiver
  - **Function**: Receives signals from the remote control.
- **Name**: Control panel
  - **Function**: "Control Panel" p.13
- **Name**: SD card slot
  - **Function**: Lets you save and display images on an SD card. "Displaying Saved Images as a Slideshow" p.30
- **Name**: Security slot
  - **Function**: The security slot is compatible with the Microsaver security system manufactured by Kensington.
- **Name**: Interface
  - **Function**: "Interface" p.14

### Camera Head

- **Name**: Security cable installation point
  - **Function**: Lets you attach a commercially available security cable to lock the document camera in place.

**Microphone**
- Captures sound when you record a video.

**[☀️] Lamp switch**
- Changes the LED lamp status in three steps: bright, dim, and off.

**LED lamp**
- Provides additional light when there is not enough light on your document.

**Camera lens**
- Captures the image.
### Document Camera Parts

<table>
<thead>
<tr>
<th>Name</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>① Camera arm</td>
<td>Extends or retracts to adjust the height of the camera head.</td>
</tr>
</tbody>
</table>

**Attention**

Do not rub the lens with harsh materials or subject it to shock, as it can be easily damaged. Use a soft cloth to gently wipe the lens.

---

### Control Panel

**Name**

1. **( )** power button - Turns the document camera on or off.
2. **[Source] button** - Switches the output image to the device connected to the Display Out port.
   - [ ]: Projects images (live or on an SD card) from the document camera.
   - [ ]: Projects images from a computer connected to the Computer In port.
3. **[Menu] button** - Opens and closes the menu.
4. **[ ] [ ] [ ] [ ] buttons** - When the menu screen is displayed, pressing these buttons selects menu items and setting values.
5. **[ ] [ ] buttons** - Adjusts the brightness of the image if pressed while projecting images from the document camera.
6. **[ ] [ ] buttons** - Adjusts the focus of the image if pressed while projecting images from the document camera.
7. **[Enter] button** - When the menu is displayed, pressing this button confirms the current item. Displays the SD Card menu and images on the SD card if pressed while projecting live images. "Displaying a Slideshow (SD Card Viewer Function)" p.33
8. **[Esc] button** - Stops the current function. When the menu is displayed, pressing this button moves to the previous menu level.
9. **[Zoom] button** - Enlarges or reduces the image without changing the projection size.
10. **[Capture] button** - Captures still images. "Saving Images" p.31
11. **[Focus] button** - Focuses the image automatically. The document camera cannot focus on objects that are approximately 10 cm (4 inches) or less from the surface of the camera lens.
12. **[Freeze] button** - Freezes live images. Press the button again to resume projection.
13. **[Record] button** - Starts and stops video recording.

  - [Document Camera]: Projects images (live or on an SD card) from the document camera. |
| Remote control light-emitting area | Outputs remote control control signals. |
Connecting

Follow the instructions in this section to set up the document camera.
You can connect the document camera directly to image devices, such as a projector or external monitor, using a computer cable or HDMI cable.

You can also connect the document camera to a projector through a computer.

"Connecting to a Projector Using a Computer" p.20

**Connecting Using a Computer Cable (Supplied)**

Connect the Display Out port on the document camera to a projector using the computer cable. Images (live or on an SD card) from the document camera are output from the projector. Audio is not output.

When image devices that support the HDMI CEC standard are connected to the document camera, operations for the document camera and the image device can be linked together. Set **HDMI Link** on the document camera. **Function - HDMI Link** p.41

For necessary settings on the image device, see the documentation provided with the device.

**When Using a Computer**

When the Computer In port on the document camera is connected to a computer using a computer cable, you can project PowerPoint slides or images from any other application from a projector.
This connection method is only available when the document camera is connected to a computer using a computer cable. If the computer you are using does not have a VGA output port, connect the computer directly to the projector.

Images on the computer connected to the document camera are only output from the Display Out port.

You can switch the projected image between [ ] or [ ] using the [Source] button on the document camera or the remote control.

[ ]: Projects images from a computer.
[ ]: Projects images (live or on an SD card) from the document camera.
When the document camera is connected to a computer using a USB cable, you can operate the document camera from the computer. Using the software supplied, you can save images and video, adjust picture quality, zoom, and so on.

☞ "Using the Computer Software" p.44

Connect the USB-B port on the document camera to a computer using a USB cable.

Next, connect the computer to the projector. The cable used to create the connection differs depending on the computer and projector you are using. See the documentation provided with the computer and projector you are using.

- You cannot project images by directly connecting the document camera to a projector with a USB cable.
- Connect the document camera to a USB 2.0 port of a computer. If you connect it to a USB 3.0 port, it may not function properly.
- Do not connect multiple document cameras to one computer at the same time.
Projecting
Positioning the Document Camera

1. Raise the camera arm with one hand while holding the base of the camera with your other hand.

2. Rotate the camera arm as shown.

3. Position the camera head above the projection area.

Attention
Do not try to press the arm flat or fold it backwards. Otherwise, the document camera may be damaged. The camera arm can only rotate within the range shown below.
Connect the document camera to the projector with a cable before turning on the document camera. “Connecting” p.17

1. Connect the power cord as shown and plug the cord into a wall outlet.

2. Press the [()] power button on the document camera or remote control.

   ![Diagram of power button and cable connection]

   The power indicator flashes blue. When startup is complete, the power indicator and the camera indicator are lit blue. Startup takes approximately 15 seconds.

3. Turn on your projector.

4. Select the appropriate source on the projector depending on the port to which you connected.

   Live images from the document camera are projected from the projector.
1. Place your document on the table under the camera head. Align the center of your document with the ▽ mark on the side of the document camera.

   - When projecting A4-size or letter size paper, align the edge of the paper with the guides on the side of the document camera.
   - The maximum paper size that can be projected is A3 landscape.

2. Slide the [☀] lamp switch to illuminate the document.

   - If necessary, you can adjust the brightness of the image using the [☼] or [🌙] on the document camera or remote control.

3. Press the [Focus] button on the document camera or the [Auto Focus] button on the remote control.

   The focus is adjusted automatically.

   - To sharpen hard-to-focus objects, use the [◄]/[►] buttons on the document camera, or the [Focus] buttons [▲]/[▼] on the remote control.

4. To zoom in on part of the image, press the [Zoom] - [++] button on the document camera or remote control. Press the [Zoom] - [☉] button to zoom out.

   - To zoom out, press the [Zoom] - [++] button a second time.
• You can zoom up to 12x optically and 10x digitally. (When the optical zoom rate reaches the maximum value, it switches to the digital zoom.)

When using the optical zoom:

![Optical Zoom](image)

When using the digital zoom:

![Digital Zoom](image)

• To enable the digital zoom, press the [Menu] button and set **Image > Digital Zoom** to **On**.
• When using the digital zoom, you can scroll (Pan/Tilt) the enlarged image by pressing the [↑], [↓], [←], and [→] buttons.
• Image quality declines when using the digital zoom function.

---

**Switching the Projected Image**

When a computer is connected to the document camera, you can switch the image projected from the projector using the [Source] button on the document camera or the remote control.
Outputting Images and Sound

When connecting multiple devices to one document camera, the image and audio are output as follows.

When [ ] is selected using the Source button
- Display Out port: Images from the computer
- HDMI port: Live images from the document camera
- USB-B port: Live images from the document camera and audio from the internal microphone

Images on the computer connected to the document camera are only output from the Display Out port.

When [ ] is selected using the Source button
When projecting live images from the document camera
- Display Out port: Live images from the document camera
- HDMI port: Live images from the document camera
- USB-B port: Live images from the document camera and audio from the internal microphone

When recording live images or taking photos using the document camera, images and audio cannot be output from the USB-B port.

When projecting images from an SD card
- Display Out port: Images from the SD card
- HDMI port: Images and audio from the SD card

When a computer is connected to the USB-B port, the SD card viewer is unavailable.

Freezing an Image

Press and release the [Freeze] button on the document camera or the remote control to freeze the image.

After freezing the image, you can remove your document while leaving its image displayed on the screen. Place your next document under the camera lens and press the [Freeze] button again; your presentation continues without interruption.

Projecting Small Objects

To project a small object, lower the camera arm. You can place the camera head within approximately 10 cm (4 inches) of the object.

To zoom in on part of the image, press the [Zoom] - [ ] button on the document camera or remote control. Press the [Zoom] - [ ] button to zoom out.

Displaying Whiteboard Images

You can use the document camera to display a lecture or presentation at the front of a room, or to capture images of a whiteboard or chalkboard.

Press the [Rotate Image] button [ ] on the remote control to turn an image upside-down. You can also rotate the image by pressing the [Menu] button and then selecting Image > Image Rotation > 180 degrees.

1 Rotate the camera head and set it in the direction of the object.
Projecting Through a Microscope

To display objects as seen through a microscope, use the included microscope adapter.

1. Attach the microscope adapter to the microscope's eye piece.

2. Press the [Focus] button on the document camera or the [Auto Focus] button on the remote control.

The image is automatically focused.

You can make an audio/video recording of your projection. The recorded images are saved to the SD card.

"Recording Movies" p.32

- Before installing the document camera, make the following settings:
  - Focus the microscope and adjust the zoom
  - Press the [Menu] button, and then select Image > Microscope > On.

- Images may not be displayed correctly depending on the optical properties of your microscope.
2 With the microscope's eye piece in the center of the microscope adapter, tighten the three screws on the microscope adapter to secure it in place.

3 Adjust the height and angle of the camera head, and then attach it to the microscope adapter.
Turn off the document camera after use.

1. Press the [ aç ] power button on the document camera or remote control.

The following message is displayed on the projected image.

Do you want to turn off the document camera?
Yes: Press [ aç ] button
No: Press any other button

2. Press the [ aç ] power button again.
The projected image disappears, and the power indicator turns off.

3. Disconnect the power cord and any other connected cables, and then fold down the camera arm.
Displaying Saved Images as a Slideshow

You can save live images from the document camera to an SD card and then display the saved images and movies as a slideshow.

This section explains how to perform operations using the document camera or the remote control. You can save images using software on your computer.

"Using the Computer Software" p.44

- FAT16 SD cards (up to 2 G) and FAT32 SDHC cards (up to 32 GB) are supported.
- EX-FAT SDXC cards are not supported.
- SD cards with a security function cannot be used.

Attention
In the following situations, data on the SD card may be lost or corrupted.
- If the card is subjected to static electricity or electronic noise
- If the card is not handled correctly
- If a malfunction occurs or during repairs
- If damage occurs due to a natural disaster

Note that Epson accepts no responsibility for lost or corrupted data, even if the loss occurs during the warranty period.
You can save images from the document camera to an SD card as still images.

- Images are saved in JPEG format (1920 x 1080).
- You can change the background color for the image in Background Color. When White is set and the image is saved, if you print the image on white paper, the area around the image may not stand out. Function - Background Color p.41

1. Insert an SD card into the SD card slot on the document camera.

2. Project the image you want to save.

3. Press the [Capture] button to capture the image.

   The number of photos available is displayed at the top right of the screen next to , and captured images are saved to the following folder on the SD card:

4. Repeat steps 2 and 3 for any additional images you want to save.

   If there is no space on the SD card, the message "No free space on the SD Card." is displayed, and the image is not saved.
You can save images and audio from the document camera to an SD card as movies.

- Movies are saved in AVI format (images: Motion JPEG 720p/30 fps, audio: Linear PCM).
- You can record individual files at the following sizes:
  - Capacity: up to 2 GB
  - Recording time: up to approximately 29 minutes
  - If the maximum capacity or recording time are exceeded while recording, the movie up to that point is saved and the recording ends.
- You can check the amount of available free space on the SD card in SD Card Info. SD Card - SD Card Info. p.43
- Set Sleep Mode to Off to prevent the power turning off while recording. Function - Sleep Mode p.41

1. Insert an SD card into the SD card slot on the document camera.

2. Project the image you want to save.

3. Press the [Record] button [ ] to start recording.

The recording indicator is lit blue while recording.

- While recording, the elapsed time is displayed at the top right of the screen. This is not displayed on the saved image.
- If there is no space on the SD card, the message "No free space on the SD Card." is displayed, and the movie is not saved.
- Do not remove the SD card while recording.
- The following operations are available while recording:
  - Freeze, Zoom (Pan/Tilt), Auto Focus, Brightness adjustment, Focus adjustment
  - Note that operation sounds are also recorded.
- While recording, a blue screen is displayed on the computer connected to the document camera using a USB cable.

4. To stop recording, press the [ ] button again.

While saving recordings, the recording indicator flashes blue, and when saving is complete the indicator turns off. Movies are saved to the following folder on the SD card:

```
DCMI
    XXXEPSON
        MOV00001.avi
        PICT0002.jpg
        PICT0003.jpg
```
Displaying a Slideshow (SD Card Viewer Function)

You can display images saved on an SD card as a slideshow. This function is unavailable in the following situations:

- When the document camera is connected to a computer using a USB cable
- When recording a movie
- When a 480p signal is being output from the HDMI port

Files that can be played as a slideshow:

<table>
<thead>
<tr>
<th>Type</th>
<th>File Type</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Still images</td>
<td>JPEG (DCF-compliant)</td>
<td>Files with a resolution over 7680 x 5760 pixels cannot be played.</td>
</tr>
<tr>
<td>Movies</td>
<td>AVI (images: Motion JPEG, audio: Linear PCM)</td>
<td>Files that are larger than 2 GB cannot be played.</td>
</tr>
</tbody>
</table>

You can also display files that were not captured by the document camera as a slideshow. To display files, they must be saved to the specified folder. See the following for more details.

"SD Card Problems" p.49

1. Press the [Single] button on the remote control.

The final file and thumbnail on the SD card are displayed.

2. Press the [◄] [►] buttons to select the thumbnail for the file you want to display.

Press the [▲] [▼] buttons to change the thumbnails page.
Displaying a Slideshow (SD Card Viewer Function)

3 Press the [Enter] button to hide the thumbnails.
   [ıp] button: Displays the previous file.
   [îp] button: Displays the next file.
   [Esc] button: Displays the thumbnails again.

4 Hide the thumbnails, and then press the [Enter] button to play the movie.

5 Press the [Enter] button to pause/play the movie.

Press the [Menu] button to access the following functions.

<table>
<thead>
<tr>

*1 This is not available while a movie is being displayed.
*2 This is not displayed while thumbnails are displayed.

Attention
If the images on the SD card are rotated when displayed by the document camera, the original image can be saved as the rotated image. Backup data on the SD card to other media as often as necessary.

6 End the slideshow by pressing the [Camera] button on the remote control.

You can also close the slideshow by pressing the [Esc] button when thumbnails are displayed.

Dividing the Screen and Displaying Two Images (Split Screen)
You can display live images and images on an SD card side-by-side on the screen. You can also display two images on an SD card at the same time.
Displaying live images and images on an SD card

1 Press the [Split] button on the remote control.

A live image and an image on the SD card are displayed side-by-side on the screen.

You can start the split screen projection using the [Enter] button on the document camera or the remote control. Press the [Enter] button while projecting a live image, and then select Split Screen from the SD Card menu.

2 Press the [◄] [►] buttons to select the thumbnail for the image you want to display.

Press the [▲] [▼] buttons to change the thumbnails page.

3 Press the [Enter] button to hide the thumbnails.

[◄] button: Displays the previous file.
[►] button: Displays the next file.
[Esc] button: Displays the thumbnails again.

4 Press the [Menu] button to access the following functions.

Some functions are not available depending on the image being projected.

<table>
<thead>
<tr>
<th>Function</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rotate to Right</td>
<td>Rotates the image 90 degrees to the right.</td>

<td>Displays thumbnails.</td>
</tr>
</tbody>
</table>

* This is not displayed while thumbnails are displayed.

You can use the following adjustment functions for live images.

- Brightness adjustment, Focus adjustment (automatic and manual), Freeze, Zoom (Pan/Tilt)

5 End the slideshow by pressing the [Camera] button on the remote control.
Displaying a Slideshow (SD Card Viewer Function)

You can also close the slideshow by pressing the [Esc] button when thumbnails are displayed.

Displaying two images on an SD card

1. Press the [Split] button on the remote control.

A live image and an image on the SD card are displayed side-by-side on the screen.

You can start the split screen projection using the [Enter] button on the document camera or the remote control. Press the [Enter] button while projecting a live image, and then select Split Screen from the SD Card menu.

2. Press the [Menu] button on the document camera or the remote control, and then select SD/SD Mode.

Two files on the SD card are displayed side-by-side on the screen. You can change the file surrounded by the orange frame.

3. Press the [◄] [►] buttons to select the thumbnail for the file you want to display.

Press the [▲] [▼] buttons to change the thumbnails page.

4. To move the orange frame between the right and left of the screen to re-select the file, press the [Menu] button while thumbnails are displayed, and then select Change Focus.
Press the [Enter] button to hide the thumbnails.

[⌜] button: Displays the previous file.

[⌝] button: Displays the next file.

[Esc] button: Displays the thumbnails again.

End the slideshow by pressing the [Camera] button on the remote control.

You can also close the slideshow by pressing the [Esc] button when thumbnails are displayed.

Image Adjustments and Effects

The document camera provides a full range of image adjustments and effects, including freeze image, black-and-white, and the ability to change the display for color images.
Press the [Menu] button on the document camera or remote control to view the on-screen menu. See the following for details on each item in the on-screen menu.

"On-Screen Menu Table" p.40

The following menu is displayed:

Use the [▲] [▼] [◄] [►] buttons to navigate the menu and adjust the settings. Press [Enter] to select a setting. When you are done adjusting the settings, press the [Menu] or [Esc] button to close the menu and save your settings.

The menu cannot be displayed when connecting to a computer using a USB cable.

Using the Computer Software

The included software lets you operate the document camera from a computer. The software also lets you capture live images and record them as movies.
When using the Easy Interactive Tools camera screen, you can display images from the document camera on a computer connected via a USB cable. You can adjust the image size, brightness, and so on, and save it as an image file or a movie file.

For more details on Easy Interactive Tools, see the *Easy Interactive Tools Operation Guide*.

When projecting an image using a projector that supports the interactive pen or touch operations, you can operate the Easy Interactive Tools on the projected image.

* Requires QuickTime 7.7 or later.

---

* Service Pack 2 or later
Installing

- The software should be installed by a user with administrator access.
- Close all running applications before starting the installation.

**Windows**

1. Turn on your computer.
2. Insert the EPSON Document Camera Software CD-ROM in your computer.
   - The installer screen is automatically displayed.
3. Select **Drawing on the Camera screen** on the installer screen to start installation.

**OS X**

1. Turn on your computer.
2. Insert the EPSON Document Camera Software CD-ROM in your computer.
   - The installer screen is automatically displayed.
3. Double-click the **Install Navi** icon in the EPSON window.
4. Select **Drawing on the Camera screen** on the installer screen to start installation.

Uninstalling

**Windows Vista/Windows 7**

1. Click **Start**, and then **Control Panel**.
2. Click **Uninstall a program**.
3. Select **Easy Interactive Tools Ver.X.XX**, and then click **Uninstall**.

**Windows 8/Windows 8.1**

1. Select **Search** on the Charms, and then search for **Easy Interactive Tools Ver.X.XX**.
2. Right-click (press and hold) **Easy Interactive Tools Ver.X.XX**, and then select **Uninstall** from the app bar.
3. Select **Easy Interactive Tools Ver.X.XX**, and then select **Uninstall**.

**OS X**

1. Double-click **Application - Easy Interactive Tools Ver.X.XX**.
2. Run **Easy Interactive Tools Uninstaller** from the **Tools** folder.
3. Follow the on-screen instructions to uninstall.
You need to install TWAIN Driver for Epson Document Camera (Ver. 2.00 or later) to use software that supports TWAIN. (Supports Windows only)

**Installing**

1. Turn on your computer.
2. Insert the EPSON Document Camera Software CD-ROM in your computer.
3. Double-click **Computer - TWAIN Driver for Epson Document Camera - setup.exe**.
   - The installer screen is automatically displayed.
4. Follow the instructions on the screen to install all the software.

**Uninstalling**

**Windows Vista/Windows 7**

1. Click **Start - Control Panel**.
2. Click **Uninstall a program**.
3. Select **TWAIN Driver for Epson Document Camera Ver.X.XX**, and then click **Uninstall**.

**Windows 8/Windows 8.1**

1. Select **Search** from the Charm bar, and then search for **TWAIN Driver for Epson Document Camera Ver.X.XX**.
2. Right-click (and hold) on **TWAIN Driver for Epson Document Camera Ver.X.XX**, and then select **Uninstall** from the application bar.
3. Select **TWAIN Driver for Epson Document Camera Ver.X.XX**, and then select **Uninstall**.
Solving Problems
Operation Problems

No image appears on the screen

- After you press the [Ø] power button, wait a few moments for the image to appear. It takes approximately 15 seconds for the document camera to output an image.
- Make sure all necessary cables are securely connected and the power is on for the projector and the document camera.
  - "Connecting the Document Camera Directly to a Projector" p.18
  - "Connecting to a Projector Using a Computer" p.20
- If you have connected a laptop, see the following.
  - "Problems Connecting a Laptop" p.50
- To project live images from the document camera, press the [Source] - [ ] button on the document camera or the remote control.
- Select the correct source on your projector. The source refers to the port on the projector to which you have connected the cable.
- Press the projector's power button to wake it from standby or sleep mode. Make sure the image has not been "muted" or turned off. Also see if your document camera is in sleep mode.
- If the power indicator on the document camera flashes, reconnect the power cord. If no images are output even after pressing the [Ø] power button again, stop using the document camera, contact your local dealer or the nearest service center provided in this guide. "Epson Projector Contact List" p.51

Image Quality Problems

The image is fuzzy or out of focus

- If the surroundings are dark and the contrast in the projected image is low, the document camera's auto focus function may not work correctly. Press the [▼] [▲] buttons on the document camera or the [Focus] buttons [▼] [▲] on the remote control, and then adjust the contrast manually.
- Make sure the camera head is at least 10 cm (4 inches) away from the object you are viewing.
- If you are using a projector to display the image, check its focus.

The image brightness or colors are incorrect

- To illuminate your document, slide the [ό] lamp switch on the side of the camera head.
- Press the [ό] or [ό] button to increase or decrease image brightness.
- Set the White Balance setting to Auto to adjust the color automatically. If the colors are still not correct, select the best setting for the type of lighting in your environment (Cloudy, Daylight, Fluorescent, or Incandescent).
  - "Image Menu" p.40
- If the document camera was used with a microscope, make sure you set the Microscope setting to Off when you return to displaying documents.
  - "Image Menu" p.40

Other image problems

- If the image is stretched or has black bars, change the Output Resolution or the HDMI Output from the Function menu.
  - "Function Menu" p.41
- To return all image settings to their initial values, select the Reset menu.
  - "Image Menu" p.40

SD Card Problems

Some images do not appear

Check the file format when copying images to the SD card from a computer.
• Images must be DCF-compliant, JPEG files to be displayed, such as from a digital camera. Do not edit the images, as this may change their format and prevent them from being displayed.
• Images must be named using the format ABCD1234.JPG, where ABCD is any combination of upper- or lowercase letters and 1234 is any combination of numbers. (For example: Pict0001, Pict0002)
• Images must be placed in a folder named DCIM\123ABCDE, where 123 is any combination of numbers and ABCDE is any combination of upper- or lowercase letters. If this folder structure does not exist, first create a folder named DCIM, then create a folder within it with the desired name. (For example: 100EPSON)

Image files do not have the correct time stamp
The document camera does not have a built-in clock. Therefore, when you view captured image files from your computer, the actual time they were created is not displayed.

Problems Connecting a Laptop
If images are not displayed from a PC laptop, you need to set up the laptop to display on an external monitor. If images are not displayed from a Mac laptop, you need to set up the laptop for mirrored display. (See your laptop manual for details.)

• Windows
Hold down the laptop’s Fn key and press the key labeled with left or CRT/LCD. (See your laptop manual for details.) Wait a few seconds for an image to appear. To display on both the laptop’s monitor and the projector, try pressing the same keys again. If the same image is not displayed by the laptop and projector, check the Windows Display utility to make sure the external monitor port is enabled and extended desktop mode is disabled. (See your computer or Windows manual for instructions.)
• OS X
From the Apple menu, open the System Preferences utility and select Displays. Click the Arrangement tab and select the Mirror Displays checkbox.
See the following contact list if any problems occur when using the document camera outside Japan.

DECLARATION of CONFORMITY
According to 47CFR, Part 2 and 15
Class B Personal Computers and Peripherals; and/or
CPU Boards and Power Supplies used with Class B Personal Computers

We: Epson America, Inc.
Located at: 3840 Kilroy Airport Way
MS: 3-13
Long Beach, CA 90806
Tel: 562-981-3840

Declare under sole responsibility that the product identified herein, complies with 47CFR Part 2 and 15 of the FCC rules as a Class B digital device. Each product marketed, is identical to the representative unit tested and found to be compliant with the standards. Records maintained continue to reflect the equipment being produced can be expected to be within the variation accepted, due to quantity production and testing on a statistical basis as required by 47CFR 2.909. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Trade Name: EPSON
Type of Product: Document Camera
Model: ELPDC13/ELPDC21

FCC Compliance Statement
For United States Users

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures.

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARNING

The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.
