

# STELLA 1000

## OWNER'S MANUAL

Light & Motion  
711 Neeson Road,  
Marina, CA 93933 USA  
[lightandmotion.com](http://lightandmotion.com)  
[sales@lightandmotion.com](mailto:sales@lightandmotion.com)

### CAUTION! ATTENTION!

- Stella is a professional light that can produce high amounts of heat - Adequate ventilation is required for proper use
- Never look directly at the LEDs when turned on
- Stella is safe for air travel when the power is off and the switch is locked

### WARRANTY

Your Light & Motion product is covered against defects in workmanship and materials under normal use and service for 2 years from the date of purchase. Rental program carries a 1 year warranty.

### WARRANTY LIMITS & EXCEPTIONS

- Batteries are warrantied for 180 days
- Cosmetic discoloration from wear and use is not covered
- Light & Motion is not liable for any loss damages or expenses including incidental or consequential damages directly or indirectly arising from the sale or use of this product

### CARE & MAINTENANCE

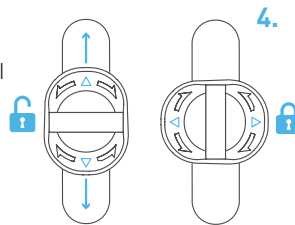

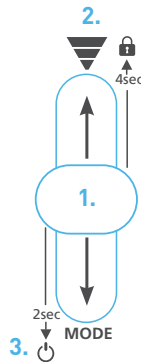

- Maintain o-rings with a light coating of silicone grease to preserve seal
- Clean charge terminals with eraser or q-tips and vinegar / water solution

### STORAGE & TRAVEL

- Store your light partially to fully charged for long life
- Never store the lights with the batteries fully discharged as this may cause permanent damage to the batteries
- Do not leave lights in direct sun or stored in hot location as this can cause damage
- Lock-out the power for travel

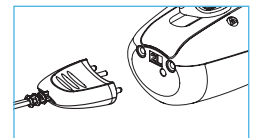

### OPERATION

1. Toggle
2. Increase / Decrease power
  - a. Tap forward to step up – tap back to step down
  - b. Hold forward to smoothly increase output
  - c. Hold back to smoothly decrease output
3. Off
  - Step 1. tap back to low - release
  - Step 2. hold back 2 seconds - light turns off
4. Switch lock
5. **Electronic lock:** With light off, hold switch forward for 4 seconds – display will flash red 3 times. Unit is now disabled.
6. **Cancel lock-out:** hold switch forward 4 seconds. Display will flash green. Light is returned to normal operation. (plugging in charger will cancel lock-out)

### Operating the Stella from External Power

Light will operate best on external power if internal battery is charged. If the light is run off wall power with an empty battery, the extra heat generated while charging may cause the light to operate at less than full power. For maximum lumen output, make sure the battery is charged more than 50%.

### Battery Charge State

		50% - 100%
		25% - 50%
		10% - 25%
		< 10%

### Charging

The light displays "1-2-3 blink" while charging.

- Solid green** = full charge
- Green** 50% - 95% charge
- Amber** 25% - 50% charge
- Red** - empty battery

### ADDING MODIFIERS

## STELLA 1000 ACCESSORIES

### MOUNTS

YS Mount /  
Thumb Screw  
800-0180-A-A

1/4-20 Adapter  
800-0286-A
